Worksession

Present: Vice-Mayor R. Carl Mumpower, Presiding; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Charles R. Worley

On behalf of City Council, Vice-Mayor Mumpower expressed Council's deepest sympathy to Mayor Charles R. Worley for his recent loss of his father.

ORDINANCE NO. 3164 - ORDINANCE AMENDING THE 2004-05 ANNUAL OPERATING BUDGET TO AUTHORIZE PERMIT AND FEE WAIVERS TO REPAIR STRUCTURES IN DESIGNATED AREAS FLOODED BY THE EFFECTS OF HURRICANE FRANCES BEGINNING SEPTEMBER 6-8, 2004

City Manager Westbrook explained the ordinance as follows: The City of Asheville adopted the FY 2004-05 Annual Operating Budget on June 22, 2004, providing for certain permit fees for building and related activities. Following the eye of Hurricane Ivan touching down in the State of Mississippi, substantial winds and rainfall felled upon the City of Asheville, beginning September 15, 2004, through September 17, 2004, causing major flooding and wind damage of commercial and residential properties. Many of the commercial and residential structures were completely submerged in water or damaged by trees. Before repairs or re-occupancy of such structures, the City of Asheville must first issue appropriate building and related permits. In an effort to minimize the substantial financial and emotional loss already suffered by certain City of Asheville residents and businesses, staff of the City of Asheville is of the opinion that it is in the best interest of the City to waive building and related permit fees for owners of such properties. NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT (1) Building permit fees for structures suffering flooding and wind damage due to the effects of Hurricane Ivan from September 15-17, 2004, within the jurisdiction of the City of Asheville, be and are hereby waived beginning on September 17, 2004; (2). The Building Safety Director is further authorized to expedite the processing of permits for repairs to flood damaged structures by waiving the requirement for a City of Asheville Privilege License for N.C. Licensed Contractors; and (3) This budget ordinance amendment will expire on January 1, 2005.

Councilman Dunn moved to waive the rules and take formal action on this ordinance at this time. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3164. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 328

CONSENT AGENDA:

Amendment to Asheville-Buncombe Minority Business Plan

Summary: The consideration of a resolution amending the Minority Business Plan in order to enhance and clarify provisions of the Plan.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan has been amended four times: (1) November 1998 to expand participation in the

Mentor-Protégé Program; (2) December 1999 to add the 72-hour delay requirements for "good faith efforts; (3) December 2001 to expand certification to two years; and (4) October 2002 to reduce the Minority Business Commission from 13 to 11 members and provide for clarification of the grievance process in the Plan.

At their meeting on August 12, 2004, the Minority Business Commission recommended that the Plan be further amended to enhance and clarify provisions of the Plan. The most significant changes are the update of N.C. General Statutes in the changes made in the Plan regarding procurement, construction and professional services and the update of definitions.

On September 7, 2004, the Buncombe County Commissioners reviewed and approved the Plan.

Advantages:

- Changes in definitions will make the program easier and less complicated to understand.
- Update of N.C. General Statutes will provide that the current provisions are being used, updating our procedures for construction, procurement and professional services originally provided in the May 1998 adopted MB Plan.
- Removal of any reference to specific forms for minority business compliance so that it is not necessary to update with changes.
- Clerical changes for ease of reading in removing repeated information, clearer wording of procedures.
- Removal of any reference to certification being a prerequisite to contracting with the City of Asheville.

City staff recommends City Council adopt the resolution amending the Minority Business Plan.

After a brief discussion, it was the consensus of City Council to have the Mayor write a letter to Buncombe County Commission Chair Nathan Ramsey to support the filling of a third position in the Minority Affairs Office as soon as possible. Councilwoman Jones also suggested personal contact with the Commissioners would be helpful.

NC DOT Utility Agreement

Summary: The consideration of a resolution authorizing the Mayor to execute a utility agreement with the N. C. Dept. of Transportation (NCDOT) to relocate a water line in the State right-of-way on Bridge 740 over Mill Creek (NCDOT Project B-3616) and approval of an associated budget amendment, in the amount of $83,000, to provide funding for this project.

The Water Resources Department operates a water main across Bridge 740 over Mill Creek under the policies of the Asheville, Buncombe & Henderson Regional Water Authority (RWA), which is owned by the City of Asheville. Under State law, NCDOT is requiring the owner, the City of Asheville, to relocate this water main during roadway construction. The NCDOT has estimated the construction cost of this relocation at $74,656. An additional 10% needs to be added to include contingency and inspections, so the total amount that needs to be budgeted is $83,000.

The Utility Agreement will authorize NCDOT to include the water main relocation in the highway construction project, with NCDOT administering the construction and invoicing the City of Asheville upon completion of the project. Funding is currently available from excess funds in the Critical Needs II matching funds. A budget amendment amending Capital Project Ordinance 82-25 (35 Fund) to reflect funding for this project is required.

Pros: Reprogramming funds for this NCDOT project will provide funding for a state mandated project that requires relocation of a water line that conflicts with an NCDOT right of way.

Cons: None noted.

City staff recommends that City Council approve the resolution authorizing the Mayor to execute a Utility Agreement with NCDOT for relocation of a water line and a budget amendment to provide funding for this project

Clerk to Advertise for Upset Bids for a Vacant Lot on Max Street

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located on Max Street.

The subject property is an RS-8 Residential Single-Family High Density District zoned parcel comprising approximately 0.04 acre located on Max Street (PIN No. 9648.07-59-8495) across from Stephens-Lee Center. The lot is too small to build on. The tax value for the parcel is $1,500.

Brandon Knolls LLC has submitted a bid to purchase the property in the amount of $1,500, and intends to combine it with adjacent property that is improved with a single-family house

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- The sale and combination of this lot with the adjoining lot will eliminate a substandard parcel.

Approval of the resolution will establish a minimum price of $1,500 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing advertisement for upset bids.

Exchange of Land at 14 Michigan Avenue for Land on Lyman Street

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of real property located on 14 Michigan Avenue for real property located on Lyman Street.

The City and Brandon Knolls LLC (Knolls) have negotiated an exchange of real property at 14 Michigan Avenue for Knolls property on Lyman Street.

The property at 14 Michigan Avenue (PIN No. 9638.15-54-8270) is a 0.19 acre parcel zoned RM-8 Residential Multi-Family Medium Density District. The lot is on the east side of Michigan Avenue about 150 feet from its intersection with Haywood Road. It is elevated about 5 feet above street grade and mostly level except for a driveway. It has several large trees and some grass that has been worn bare due to frequent use by customers of the convenience store on the adjacent lot. All utilities are available to the lot. There is a sidewalk across the front of the property at the street. The property has a tax value of $16,800.

The property owned by Knolls (PIN No. 9648.17-01-5372) is a 0.88 acre parcel located on the French Broad River at the intersection of Lyman Street and Amboy Road. It is directly across the river from the French Broad River Park and highly visible from the park. It slopes steeply down from the road at Amboy and levels off at the river. It is long and narrow, wider at Amboy and tapers off as it runs North with the western boundary of Lyman Street. Traveling North, the grade of Lyman Street descends closer to the river thus improving the access to the property. The parcel has a tax value of $83,600. Knolls purchased the lot at a tax foreclosure sale for the upset bid amount of $7,250. After purchasing the lot, Knolls offered to exchange the lot for City-owned property An exchange of property was negotiated which includes an additional cash payment to the City in the amount of $5,000.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It is consistent with the greenway master plan.
- It will protect the view from the park across the river.
- Acquisition of the entire parcel will allow greater flexibility than an easement.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff recommends adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of real property located 14 Michigan Avenue for real property located on Lyman Street.

2005 Legislative Weekend

Summary: The City has received a request from the Chamber of Commerce for a $10,000 appropriation to help support the 2005 Legislative Weekend.

The Asheville Area Chamber of Commerce, on a biannual basis, invites the North Carolina General Assembly to travel to Asheville and meet with members of the Chamber and local governments. The purpose of the event is to build relationships and familiarize members of the General Assembly with the needs of the Asheville area. In 2003, there were 200 legislators and spouses who committed to attend the event here. Since that was the first and the weather was not at its best, we expect more than 200 this year.

The private sector is supporting the 2005 Legislative Weekend, in addition to an appropriation of $30,000 from Buncombe County. Members of the Chamber of Commerce are working with the local delegation to the General Assembly to plan an appropriate agenda and program. The Chamber is requesting $10,000 from the City to support the program. As you know, the City has some important issues coming before both the local delegation and other members of the General Assembly in the next several years. This will be an excellent opportunity to start previewing those needs and concerns with them.

City staff recommends Council adopt a budget amendment, in the amount of $10,000, from Contingency to the Chamber of Commerce in support of the 2005 Legislative Weekend.

Vice-Mayor Mumpower asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

FEMA BRIEFING

Mr. Butch DeCote, Public Affairs Officer for the Federal Emergency Management Agency, updated City Council on the assistance they are providing to the citizens of Asheville and other areas in North Carolina affected by Hurricanes Frances and Ivan.

PROGRESS ENERGY UPDATE

Ms. Nancy Thompson, representing Progress Energy, briefed City Council on the progress Progress Energy has made, and is making, to restore power as a result of outages from the recent disasters of Hurricanes Frances and Ivan. She commended City staff for their communications and working with them throughout the disasters.

REPORT FROM DELOITTE CONSULTING ON ORGANIZATIONAL ASSESSMENT OF ASHEVILLE ALCOHOLIC BEVERAGE CONTROL BOARD

Mr. Joe Davidson, Senior Manager for Deloitte Consulting, presented City Council with an executive summary of their report on the organizational capabilities business processes and internal controls of the Asheville Alcoholic Beverage Control Board. He said that they were engaged (1) to assist the ABC organization in evaluating their organizational processes, their structure and their effectiveness, (2) to make recommendations that would overall improve their organizational efficiency and make them more transparent to the stakeholders in that organization; and (3) to make recommendations on how to be a more effectively functioning organization.

Mr. Davidson then reviewed the following highlights of recommendations along with the status of each of the recommendations:

- The current organizational structure could be redesigned to reduce the supervisor's span of control, thereby enhancing decision-making and information sharing capabilities.
- The new managerial position, "Store Operations Manager," should be shared by two high-performing store managers (in addition to their current store responsibilities) who possess operational, managerial and communication skills.
- The expanded responsibilities proposed increase store managers' accountability for their respective store operations.
- Centralizing purchasing and instituting guidelines and protocols for a key business process can be executed through a full-time employee dedicated to fulfilling these objectives.
- Increasing job clarity and improving accountability requires defining the role of each position in the organization and the expectations for successful job performance. Recommendations for the Supervisor position were detailed.
- Additional job specifications were developed for the following positions: Chief Accountant, Accountant, Administrative Assistant; and Warehouse Manager/Assistant Manager
- Separation of duties – opportunities exist to clarify job responsibilities and cross-train employees to create more productive and transparent work processes and improve workforce accountability.
- Purchasing for non-product goods should require completion of a requisition form, with pre-approval received centrally prior to actual transaction.
- Stores managers should be more accountable for inventory management.
- Policies and procedures – The organization needs up-to-date written policies and procedures, increasing the extent to which formal procedures guide decision-making in the organization.

- Policies and procedures – The organization can improve it's employee handbook through consideration and implementation of recommendations.
- Risk management – Internal controls should be developed for several internal transactions to assure transparency of operations.
- ABC law enforcement is provided by the ABC Board in many jurisdictions. In other jurisdictions, the function is "outsourced" to the local police. The Board should continue to evaluate the alternatives and choose the best solution.
- Organizational culture and communications can be improved by adoption of recommendations regarding the increase of both formal and informal communication channels throughout the ABC organization.

When Councilman Dunn asked about recommendations about the ABC Board and it's role, Mr. Davidson explained that their focus was operational review of the ABC organization and the Board itself was not in the scope of their engagement.

Mr. Davidson then responded to various questions and comments from Council, some being, but are not limited to: why were findings made in the report if policies and procedures had been followed; what was the recommendation regarding store managers communicating directly with ABC Board members; explain why one store sold $915,830 worth of alcohol last year but only had a net profit of $12,431; what is the overall morale of the employees; will store managers be given more latitude in store operations; how many full-time employees are there in the ABC organization; and with 42 employees, the Board may need one person solely for Human Relations responsibilities.

Councilman Dunn expressed concern that the current members on the ABC Board haven't fulfilled their responsibilities. He felt it was not City Council's responsibility to be looking over the shoulder of any board to insure good governance. City Council should not have had to request a management study be performed. The Board should have done this themselves a long time.

Upon inquiry of Councilman Dunn, Mr. Davidson said that they have discussed the full results with the ABC Board and they are in agreement with all the recommendations and are eager to begin implementation of them as soon as possible.

Mr. Curtis Canty, General Manager/Supervisor of the Asheville Board of Alcoholic Control, responded as best he could since he has only been General Manager/Supervisor for 45 days, to various questions/comments from City Council, some being, but are not limited to: what he has already implemented since he has been hired; what are some of the big changes with small improvements that can be made; what is the attitude and morale of the ABC employees; what type of communication has occurred with the employees; what type of internal controls have you look at for change; is it the General Manager's responsibility or the Board's responsibility to supervise the employees; will Board members be allowed to talk to employees; how will each of the recommendations be addressed and during what timeframe; and what do you think the role of the ABC operations is as it relates to the City of Asheville.

Councilwoman Bellamy stated that the ABC Board hired Mr. Canty to do a task and hoped that the employees will allow him a chance to do his job.

Ms. Debora Holmes-Young, Chair of the ABC Board, responded to various questions/comments from members of Council, some being, but are not limited to: why is there such a small percentage of the net profits from alcohol sales allocated to the City; has the Board been diligent in using taxpayer's money; why did the Board Chair feel the need to spend a night at the Grove Park Inn during a conference; what inclination does the Board have regarding in-house ABC law enforcement or outsourcing it to the Asheville Police Department; what was the

reasoning for spending 19% on ABC law enforcement; is there more money unaccounted for other than the $244,411 from employee embezzlement in 2002; the responsibility of allocating taxpayer dollars for alcohol and drug education should rest with an elected body and not an appointed body; and will the Board consider allocating an additional $250,000 to the City to promote the drug program adopted by the City of Asheville this fiscal year.

Ms. Holmes-Young said that they will be sending City Council their law enforcement reports to give Council an ideal of how their hours are spent. In addition, she urged City Council to review the detailed minutes of their meetings.

Councilwoman Jones said that the ABC Board's challenge will be how to increase profit margins as well as simultaneously implement the recommendations.

When Vice-Mayor Mumpower asked for any ideas on how the relationship between the ABC Board and City Council can be strengthened, Ms. Holmes-Young suggested that if City Council has a question or a concern with any decision made by the Board, that the Council come to a Board meeting to have the concerned addressed.

After City Attorney Oast verified that the legislature has increased the ABC Board membership from 3 to 5 members, it was the consensus of City Council to start the application process.

On behalf of City Council, Vice-Mayor Mumpower thanked Mr. Davidson, Mr. Canty and Ms. Debora Holmes-Young for responding to Council's questions and concerns.

N.C. LEAGUE OF MUNICIPALITIES KICK-OFF FOR SEARCH FOR NEW CITY MANAGER

Mr. Ellis Hankins, Executive Director of the N.C. League of Municipalities ("League"), and Mr. Gene Dillman, Director of Member Services of the League, reviewed with City Council an outline for selecting a new City Manager. They reviewed the roles of the League and the roles of City Council. They then briefly talked about the (1) importance of the process; (2) agreeing on what City Council wants in a Manager; (3) and agreeing on a timeframe/procedure for selection, including (a) timeframe if Council manages the process themselves; (b) salary range and other considerations; (c) some sources for publication of the vacancy; (d) the screening process; (e) the interview process; (f) the interview session with City Council; and (g) the selection of the top candidate. City Council has three options: (1) manage the entire process themselves; (2) manage the entire process with the understanding that you may need some outside facilitation or guidance; or (3) retain a professional executive search firm to help you with the process.

Mr. Ellis and Mr. Dillman responded to various questions/comments from Council, some being, but are not limited to: does the League offer facilitators and services to help a City agree on what they are looking for in a manager; is up-front public involvement good for the process; can the League give the City a list of professional executive search firms; is it common for employees to leave after a new city manager is hired; and if it is disclosed at the beginning of the process that public involvement is a possibility before final selection, will that affect a candidates decision to apply or not.

On behalf of City Council, Mayor Worley thanked Mr. Ellis and Mr. Dillman for their presentation.

BUNCOMBE COUNTY DRUG TREATMENT COURT

The Honorable Ronald K. Payne, Superior Court Judge, explained when the drug court began and why. He said the Buncombe County Drug Treatment Court (DTC) originated in

December of 2000 under his leadership. The other original Team members were Al Williams, D.A.'s office; Kristin Warnke, T.A.S.C.; Lori Anderson and Robin Keith, Probation; and Patricia Kaufman, Public Defender's office. Barbara Blanks was the DTC Administrator until her retirement in June 2004, at which time Kyle Moody took over as Administrator. The DTC seeks to reduce drug/prison recidivism, while specifically providing guidance, treatment, and discipline to those facing addiction recovery. To that end, the DTC Team, comprised of probation, law enforcement, treatment providers and court officials, offers individuals the tools necessary to help maintain sobriety years after program completion.

The model used in forming the Drug Court is the acceptance into a deferred judgment program or post-plea diversion program shortly after arrest, under which the defendant pleads guilty to a criminal charge (for example, unlawful possession of drugs) with the understanding that (a) the active sentence will be deferred; (b) if the defendant successfully completes the program, the plea of guilty will be vacated and the charges dropped; and (c) if the defendant fails to complete the program, sentence will be imposed on the original charge.

He explained the key components of the program, which are: (1) Drug Courts integrate alcohol and other drug treatment services with justice system case processing; (2) Using a non adversarial approach, prosecution and defense counsel promote public safety while protecting participants' due process of rights; (3) Eligible participants are identified early and promptly placed in the Drug Court program; (4) Drug courts provide access to a continuum of alcohol, drug, and other related rehabilitation services.; (5) Abstinence is monitored by frequent alcohol and other drug testing; (6) A coordinated strategy governs drug court responses to participant's compliance; (7) Ongoing judicial interaction with each drug court participant is essential; (8) Monitoring and evaluation measure the achievement of program goals and gauge effectiveness; and (9) Continuing interdisciplinary education promotes effective drug court planning, implementation, and operations. Forging partnerships among drug courts, public agencies and community-based organizations generates local support and enhances drug court effectiveness.

Active client numbers have grown over the years. The DTC currently serves 44 individuals. Of those, 4 are habitual felons.

As funding is the easy answer, the understanding behind the funding is more important. The DTC is currently funded by the County with a 75% reimbursement by the Governor's Crime Commission (for the time being). However, addiction and the good effort to get a handle on it lies beyond the County. DTC services, and is serviced, by all local governances and law enforcement. Therefore, it is easy to determine we are all working together to not only to fight, but also positively address the issue of addiction.

If the current persons did not agree to participate in this program, or if this program did not exist, various costs to the County and community would likely be: $1,046,760.00 in jail or prison costs (44 participants with an average jail time of 10 months at an average daily cost to house an inmate of $78). This cost does not include the likely subsequent drug and related charges following release from incarceration. $150,000.00 annual cost to the community for 1/3 of the participants who would likely become homeless (annual cost of a chronic homeless offender is $10,000, as referenced by the committee to develop a 10 year plan to end chronic homelessness in Asheville and Buncombe County). Additional and permanent dependency on community service providers including public housing and DSS (Drug dependency interferes with a person's ability to maintain employment and provide assistance to families).

The annual budget for the DTC is approximately $145,000, most of which goes to the treatment provider. Over the past few years, the majority of this cost ($108,000) has been provided through an initial grant from the Governors' Crime Commission.

The Governors' Crime Commission grant runs out at the end of September, 2004, however, as of today, they have just found out that the grant has been extended it because all the money hasn't been spent. We have also made the participants pay some monies. We have about $9,200 remaining from the Eblen Foundation. All monies totaled will probably enable us to operate until February or March of 2005 with the participants we have. He also thinks there is an outside chance that we can get some other monies from private sources. They have quit accepting other clients. He is guardedly optimistic that the DTC will be funded by the State next year. He explained that the General Assembly has now made DTC an intermediate sanction to be used by the courts, although there are only 5 in existence throughout the State. He has talked to some of our representatives who will try to seek that funding. Because of City Council's efforts to battle drugs in our community he felt that Council may see fit to fund a portion towards the DTC in the treatment aspect.

Judge Payne responded to various questions and comments from Council, some being, but are not limited to: are the clients ordered to pay restitution; what happens if a person is convicted of another felony while in DTC; are records expunged if the person graduates; how much have the treatment costs gone up since the overhaul of the mental health system; and what type of crimes are committed by the clients in the program.

Vice-Mayor Mumpower said that it was Council's interest to respond to an immediate crisis and since the grant has been extended, the crisis may have been abated for a period of time. He said this is about drug interdiction, however, there is a concern about the City getting too heavily involved in treatment matters, which he personally feels is more of a state and county function. With the knowledge that the DTC has some temporary relief, he would prefer to temporarily tabling the matter until to the first of 2005, when the financial pictures becomes clearly in terms of permanent funding. He did feel this is a powerful program that has a positive impact on Asheville and the surrounding area.

Upon inquiry of Councilman Newman, Judge Payne said that Buncombe County has invested $25,000 to the program for each of the last three years, for the match of the Crime Prevention grant. The ABC Board has given them $12,000 a year, which is also used towards the match. Since Buncombe pays part of Mr. Moody's salary and they provide the office space and making of copies, he did not ask them for more funds. He did note though that Mecklenburg County receives funding from both the City and County.

Councilman Newman could see the tremendous value of the program and would like to see it continue. His only concern is that the criminal justice process is primarily a county responsibility, although the benefits for the citizens are self-evident. He would like to be supportive, however, he did think Buncombe County should be playing some significant leadership role.

Upon inquiry of Councilwoman Jones, Judge Payne could only guess that approximately 40% or more are City residents in the program. He explained that they only verify that they are a Buncombe County resident.

Councilwoman Jones would like to be supportive as well of this program and felt that a one-time matching of what the County has done in terms of dollars for two months is a way to be supportive.

Councilwoman Bellamy has seen the Charlotte program and they, along with Judge Payne, are committed to ensuring that people stay out of trouble long-term. She felt this program should qualify as an outside agency and the City of Asheville should invest it this successful model annually. She noted that in the past the City did provide outside agency funding for the Drug Commission, which is no longer in existence.

Judge Payne stated that one of the reasons he has not asked the City for funding in the past is because he believes the courts should be funded by the state. That said, they don't want to run out of money and then ask for funds. He said that he would not ask the City to assist in funding through June 30 because he did not think it is the role of City government – or the role of County government. He believes it is the role for the State government.

Vice-Mayor Mumpower suggested a resolution of support to our legislative delegation.

Councilman Davis would be supportive to help the program one-time and felt the end of the year would be an appropriate time to decide what the City can contribute.

When Councilman Brownie asked what will happen if the State doesn't fund the program, Judge Payne said he would approach Buncombe County and ask them to approach people in the community that might take an interest in this sort of effort.

Upon inquiry of Councilman Newman, using an approximate figure, Judge Payne said that if they received $20,000 they could run the program through June 30 and be able to serve the maximum number of participants (44).

It was the consensus of City Council to have Judge Payne check for other funding sources and then come back to Council with a specific request in November or early December. If, however, in the interim, if new information is obtained about funding sources or matching monies, City Council would be willing to bring up this issue prior to that time.

REPORT ON PANHANDLING, PUBLIC DRUNKENNESS AND GRAFFITI/COUNCIL PRIORITIZATION OF STAFF PROJECTS

It was the consensus of City Council to consider this matter when the worksession is continued to September 28, 2004.

DEVELOPMENT REVIEW PROCESS TEAM

It was the consensus of City Council to continue this matter until the October 19, 2004, worksession when all Council members will be present to hear the presentations.

REQUEST FOR PROPOSALS FOR WATERSHED MANAGEMENT PLAN

It was the consensus of City Council to consider this matter when the worksession is continued to September 28, 2004.

QUARTERLY REPORT ON THE COUNCIL'S STRATEGIC PLAN

It was the consensus of City Council to consider this matter when the worksession is continued to September 28, 2004.

UDO AMENDMENT REVIEW

Agreements as to Removal, Relocation and Reconstruction of Non-Conforming Off-Premise Signs

It was the consensus of City Council to hear the presentation at the public hearing scheduled on September 28, 2004.

BOARD/COMMISSION VACANCIES

It was the consensus of City Council to instruct the City Clerk to re-advertise for the Alternate vacancy on the Board of Adjustment.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Geraldine Melendez to the Asheville-Buncombe Fair Housing Commission.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Eva Estelle Williams to the Firemen's Relief Fund Board of Trustees.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Pattiy Tomo, as one of the two property owners within the River District, to the River District Design Review Committee.

It was the consensus of City Council to instruct the City Clerk place the vacancy on the Buncombe County Tourism Development Authority on the next formal City Council agenda for action.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Councilman Joe Dunn to the Regional Water Authority.

FLOOD UPDATE

City Manager Westbrook updated City Council on matters related to the recent floodings as a result of Hurricanes Frances and Ivan and responded to various questions/comments from Council.

CONTINUATION OF WORKSESSION

At 6:37 p.m., Councilman Dunn moved to continue the City Council worksession until 3:30 p.m. on Tuesday, September 28, 2004, in the Council Chamber, Second Floor of the City Hall Building. This motion was seconded by Councilwoman Jones and carried unanimously.

CONTINUATION OF TUESDAY, SEPTEMBER 21, 2004, WORKSESSION

September 28, 2004 – 3:30 p.m.
Council Chamber – City Hall

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower (arrived at 3:54 p.m.); Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

REQUEST FOR PROPOSALS FOR WATERSHED MANAGEMENT PLAN

Interim Water Resources Director David Hanks said that City Council approved the implementation of a watershed management plan for the North Fork and Bee Tree watersheds. This plan was the first phase in a comprehensive management plan covering the next five (5) years and beyond. The request for proposals (RFP) is the second phase of the watershed plan to ensure long range proper management of the watersheds.

Submitting watershed management firm must be qualified to address the best watershed management concepts and the scope of the proposal must include but is not limited to the following:

- Provide annual detailed recommendations to City of Asheville Water Resources staff for managing the watershed in the next fiscal year (July 1 – June 30)
- Insure that the annual recommendations maintain water quality as the primary objective
- Approval of the annual plan by City Council during the annual budget process for each fiscal year plan in order to proceed
- Provide detailed information on cost and any projected revenues of the annual proposed plan
- Identify areas within the watershed which require annual maintenance and specifically identify ways to address the annual maintenance needs using best forestry management techniques
- Provide recommendations for riparian buffer designs in order to reduce sedimentation and provide protection for streambanks
- Provide recommendations to reduce the risk of catastrophic events, such as fire, insects or disease to preserve the watershed in order to maintain high water quality
- Identify trees, underbrush, plants, shrubs, etc. which require one time maintenance or removal
- Identify trees, underbrush, plants, shrubs, etc. which require ongoing maintenance or removal during the life of the contract
- Identify roads, bridges, stream crossings, and road shoulders that require immediate maintenance
- Identify roads, bridges, stream crossings, and road shoulders that require long-term maintenance
- Identify invasive plant and tree species and provide action plans for removal or termination to insure continued health of the watershed
- Provide annual watershed plans that are compatible with the North Carolina Conservation Trust easement
- Provide annual watershed plans that protect and preserve the scenic view sites of the watershed from the Blue Ridge Parkway
- Assist in determining which emergency access roads should be maintained, closed or developed within the watershed
- Determine sites within the watershed for re-establishment of the American Chestnut tree
- Identify endangered/threatened species in the watershed area and provide recommendations for management
- Provide annual plans that will enhance native plants, wildlife, and other species found within the watershed
- It is the desire of the City to appoint a Watershed Advisory Committee made up of Water Resources and other City staff, representatives from the North Carolina Conservation Trust, Blue Ridge Parkway, and City of Asheville Tree Commission. This committee will be used to provide technical assistance and recommendations to the watershed management plan
- Any water-related work the firm is qualified to do (or sub-contract), as directed and mutually agreeable to both parties

Staff will bring an annual plan to City Council outlining specific details of what will be done within the watershed, except emergency maintenance, for the next fiscal year for Council approval.

Mr. Hanks noted that due to recent storm events some items in the RFP will not need to be performed, e.g. several trees have already blown down and every bridge that has been accessible for them are gone.

City staff recommends City council's approval of the proposed RFP for the next phase of managing the North Fork and Bee Tree watersheds.

Councilwoman Bellamy initiated discussion about the need to receive as much public input as possible before it is brought to City Council. It was the desire of Council to have the Watershed Advisory Committee receive public input prior to the matter being considered by Council. Councilwoman Jones suggested another item in the RFP should include a public input process for the firm to do as well. This way, the public input would be in the formulation of the plan and then public input when the plan if finalized.

Mayor Worley felt it would be appropriate for staff to formalize the Watershed Advisory Committee and the ground rules under which they operate and bring that back to Council for approval.

Upon inquiry of Councilman Newman, Mr. Hanks said that they are looking for an individual or firm who has the resources to look at the entire 22,000 acres of the watershed.

In response to Councilman Newman, Mr. Hanks said that we are soliciting RFP's so we can gauge on how much it will cost based on the scope of what we want done. He has requested in the RFP an hourly rate and a flat rate for the entire project. We may have to go with an hourly rate, depending on the cost factor. He has called around and has gotten estimates on projects done with similar size watersheds and they range from $50,000 to $500,000, depending on the level and scope.

Councilman Newman felt we clearly need to have the a plan to identify which roads are vital, have the vital roads cleared, bridges maintained, and a plan for ongoing maintenance of those roads. He supports the chestnut restoration and preserving hemlocks, however, we only need a plan to maintain an adequate road network, with bridge repairs, and removal of the exotic species.

Mr. Hanks said that we are looking at a 5-10 year project. After we get the rates, then Council can determine what they want done, if anything, on a priority basis.

Councilman Newman said that in his opinion the main benefit of using forestry as a management tool in the watershed is to produce revenue to either accomplish other management goals or to create significant revenue for the Water Department. He feels that the watershed takes care of itself and even the consultant Council hired stated that forestry management on the watershed doesn't reduce the risk of fire. He felt Council needed to be more clear on if we want to use forestry as a tool and to what degree. If we aren't going to do much forestry on the property then he didn't see a need to hire a big firm to create an expensive plan.

A brief discussion surrounded the reason for the RFP and the need to have capable people to follow-through on any of the services City Council want to move forward on.

City Manager Westbrook said that Council will tailor what the firm does each year, if anything.

Councilman Newman asked that this matter not be on the consent agenda for the formal meeting.

QUARTERLY REPORT ON THE COUNCIL'S STRATEGIC PLAN

Assistant City Manager Jeff Richardson said that this multi-year plan document outlines seven (7) key focus areas that City Council has identified as critical to the overall long-term positive growth and vibrancy of the Asheville community. Within those seven key focus areas, 45 goals and 94 operational tasks are identified. Timeframes were identified for each of the tasks. This report outlines staff progress in the first 90 days after adoption of this plan for those tasks with timeframes conducive to this fiscal year.

Pros - City Council will continue to receive quarterly updates to insure city staff are progressing as directed by City Council.

Mr. Richardson asked for direction on the following two tasks:

(1) The focus area of economic development, Goal # 3. It was the consensus of Council for staff to invite Dr. James Johnson, Director of the Investment Strategies Center from UNC-Chapel Hill's Kenan-Flagler Business School to speak at the annual strategic planning summit between the City of Asheville, Buncombe County, AdvantageWest, Economic Development Commission, Tourism Development Authority, Asheville Regional Airport Authority and other economic development organizations.

(2) The focus area of community building, Goal #1, Objective A: Conduct evaluation of City Council's current legislative process to determine if it best facilitates effective Council decision-making. After a brief discussion, it was the consensus of Council to review Task #1 (appoint City Council task force to analyze process) in the second quarter of 2005 with possible appointment in the third or fourth quarter of 2005. In addition, Objectives B and C will be coordinated with direction given for Objective A.

Upon inquiry of Vice-Mayor Mumpower, Mr. Richardson explained the work in progress utilizing the web/internet and other media forms to increase knowledge of vision, city services and Council decision-making. He suggested more frequent feedback on this task.

REPORT ON PANHANDLING, PUBLIC DRUNKENNESS AND GRAFFITI/COUNCIL PRIORITIZATION OF STAFF PROJECTS

Planning & Development Director Scott Shuford said that Downtown Social Issues Task Force (DSITF) has made recommendations to City Council concerning panhandling, public drunkenness, and graffiti. City Council asked staff to examine these recommendations and report back in terms of implementation.

Pursuant to this direction, staff evaluated the Task Force recommendations and placed them into three "Status" categories. **Status 1** represents items that can readily be accomplished by City staff without additional resources or workload prioritization. **Status 2** items require additional resources and/or workload prioritization. **Status 3** items require action by agencies outside direct Council control, such as statutory authority for an additional tax. He reviewed the following DSITF recommendations and their status rankings.

IMPLEMENTATION ITEM	STATUS	COMMENTS
PANHANDLING		
1. Lock box program • Locate 4 lockboxes • Brochure development/distribution • Support PR campaign • Urban Neighborhood Watch Program	 2 2 2 1	 Legal review needed Support brochure development Support PR campaign Neighborhood Watch program already in place
2. Maintain current ordinance; improve	1-2	Improving implementation may take add'l resources
PUBLIC DRUNKENNESS		
1. Improve detox facilities	2-3	May require legislative authority; need to determine roles of other players
2. Housing First Program	1-2	Part of 5-Year Strategic Plan work; may require funding
3. Emergency detox/treatment/recovery center	2-3	Funding responsibility determination; possible statute change needed
4. Inebriate Safety Zones	2	Legal review; Police implementation
5. City park alcohol possession ordinance	2	Legal review
6. Resolution addressed to District Attorney	1	Council resolution
GRAFFITI		
1. 48-hour graffiti removal pilot program	2	City fund part of program
2. 48-hour graffiti removal ordinance	2	Legal review; City funding
3. Webpage marketing of anti-graffiti program	1	Minor staff time (requires program to be established)
4. Support for *Asheville Mural Project*	1	Council resolution of support
5. Additional kiosks	2	City funding and placement
6. Resolution addressed to District Attorney	1	Council resolution
7. Greater police presence	2	Allocate resources
8. Consideration of "legal graffiti wall" concept	1	Staff may be involved in location and marketing issues

There are several items that can be pursued immediately by staff, including: writing a resolution asking the District Attorney to treat panhandling, public drunkenness and graffiti offenses as serious crimes; writing a resolution in support of the Asheville Mural Project (and exempting the murals from sign code regulation): and maintenance of existing ordinance enforcement and the existing Neighborhood Watch program.

Several of the Task Force recommendations raise issues of constitutionality and/or the City's legal authority and practical ability to implement them. The possibility of such issues was generally recognized by the Task Force in its presentation. There are significant First Amendment issues associated with placing collection boxes on public property or right of way, significant State law pre-emption issues associated with some of the alcohol-related recommendations, and both constitutional and State law consistency issues associated with the designation of inebriate safety zones. These are examples, but not a complete list.

Special legislation--if it is even possible (and there are constitutional limitations on local acts)--may be required for some of the recommendations, and further practical and legal analysis is needed with respect to how some of the recommendations will be administered or enforced.

The City Attorney's Office will be glad to perform the necessary research and analysis, and to make recommendations to Council as to what may be done under current law, what may require special legislation, and what the City may lack the power to do for constitutional or legal reasons. This research will require consultation with other municipalities (in NC and around the country), the Attorney General's Office, and/or the Institute of Government, as well as some of the national organizations that provide assistance in such matters. This is extensive work and may require the department to reprioritize our workload or seek other resources such as added staffing or outside consultants. We will ask the Task Force to direct us to examples of the recommended programs or ordinances elsewhere in the State or country to facilitate our work.

Additionally, several of the recommended implementation items require potentially significant enhancements of existing resources. The Police Department will need to examine the degree to which some of the recommendations, if implemented, will require additional or reallocated staffing (especially the call for greater police presence), although, most of the recommendations would have minimal impact. The Planning and Development Department will need to become involved in marketing and promoting the programs. The Public Works Department will need funds for kiosk construction, graffiti removal kits, and enhanced light pole graffiti/poster removal and other cleanup efforts.

Finally, for the public drunkenness issue, please note that City involvement in the treatment aspect of this matter will represent a major shift in policy. In North Carolina, counties are the local governments statutorily charged with providing social services; cities typically don't run these programs or provide significant financial support to them (most do as we typically do with our outside agency allocations, for example). In the Healing Place example from Raleigh, Wake County is a major funder, while the City of Raleigh funds only 3.2% of the total. (See funding breakdown below.) The City has begun dialogue with Western Highlands area mental health and local health officials about their efforts to expand existing detox facilities within the next year. Once established, this expansion could significantly assist the City in addressing downtown public drunkenness issues. Buncombe County will shortly begin construction of a major detention center and should be approached about assisting with the public drunkenness problem by providing additional overnight detention/treatment space. We recommend considerable dialog with the ABC Board, the County and existing providers of this service before we move forward with any implementation measures.

HEALING PLACE FUNDING – PERCENT OF $1.4 MILLION ANNUAL BUDGET	
ABC Board - $650,000 or **46.4%**	Wake County - $242,000 or **17.3%**
City of Raleigh - $45,000 or **3.2%**	Private Donations - $463,000 or **33.1%**

Also are work program priorities already established by Council for the City departments most affected by the implementation of **Status 2** and **Status 3** items. These departments are: Legal and Planning and Development (possibly, in the future, Police). In order to add these implementation items to our current work programs, we will need to reprioritize our work and will need Council to assist us in determining which work program tasks have a higher level of Council priority. Additionally, Council may choose to provide us with additional resources to allow all priorities to be met.

City staff recommends City Council receive staff presentation and provide direction as to the implementation priorities for the DSITF recommendations.

Upon inquiry of Councilwoman Bellamy about maintenance of our existing kiosks, Mr Shuford said that he will provide Council with information on how they are working from a Public Works perspective.

Discussion occurred regarding the comments and the reasoning behind some status categories.

Regarding funding, Councilwoman Jones said that there be other groups in the community that have an investment in seeing some of these items implemented in terms of tourism.

After discussing the current workload of the Planning & Development Department and the City Attorney's Office, it was the consensus of Council to ask Mr. Shuford to convert the list of items into a checklist with a little more information associated with it, e.g., which legal items will require an extensive amount of research, minor research, extensive funding or less expensive funding. He will send that checklist to Council and ask for each Council member to prioritize them and return the list to him. He will then compile it and give the entire Council a composite of the results at an upcoming worksession.

ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 4:45 p.m.

Magdalen Bouleson
CITY CLERK

Charles B. Worley
MAYOR

Tuesday – September 28, 2004 - 5:00 p.m.

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

U.S. Air Force Staff Sergeant Tabitha Davis led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Dunn gave the invocation.

GIRL SCOUT TROOP

Mayor Worley recognized Girl Scout Troop 531 who thanked the City of Asheville for their work through the recent Hurricanes Frances and Ivan.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Vice-Mayor Mumpower asked that Consent Agenda Item "H" be voted on separately.

Councilman Newman asked that Consent Agenda Item "I" be removed from the Consent Agenda and discussed as New Business.

Councilwoman Bellamy asked that Consent Agenda Item "K" be voted on separately due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 14, 2004

B. RESOLUTION NO. 04-195 - RESOLUTION AMENDING THE ASHEVILLE-BUNCOMBE MINORITY BUSINESS PLAN

Summary: The consideration of a resolution amending the Minority Business Plan in order to enhance and clarify provisions of the Plan.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan has been amended four times: (1) November 1998 to expand participation in the Mentor-Protégé Program; (2) December 1999 to add the 72-hour delay requirements for "good faith efforts; (3) December 2001 to expand certification to two years; and (4) October 2002 to reduce the Minority Business Commission from 13 to 11 members and provide for clarification of the grievance process in the Plan.

At their meeting on August 12, 2004, the Minority Business Commission recommended that the Plan be further amended to enhance and clarify provisions of the Plan. The most

significant changes are the update of N.C. General Statutes in the changes made in the Plan regarding procurement, construction and professional services and the update of definitions.

On September 7, 2004, the Buncombe County Commissioners reviewed and approved the Plan.

Advantages:

- Changes in definitions will make the program easier and less complicated to understand.
- Update of N.C. General Statutes will provide that the current provisions are being used, updating our procedures for construction, procurement and professional services originally provided in the May 1998 adopted MB Plan.
- Removal of any reference to specific forms for minority business compliance so that it is not necessary to update with changes.
- Clerical changes for ease of reading in removing repeated information, clearer wording of procedures.
- Removal of any reference to certification being a prerequisite to contracting with the City of Asheville.

City staff recommends City Council adopt the resolution amending the Minority Business Plan.

Upon inquiry of Vice-Mayor Mumpower, Finance Director Bill Schaefer briefed Council on how the City of Asheville is complying with the Minority Business Plan, noting that City staff is committed to the Plan.

RESOLUTION BOOK NO. 28 – PAGE 359

C. RESOLUTION NO. 04-196 - RESOLUTION AMENDING THE 2004 CITY COUNCIL MEETING SCHEDULE TO DELETE THE OCTOBER 5, 2004, WORKSESSION

Councilman Mumpower understands the positive impact on City staff with City Council holding only one worksession a month, however, he personally thinks that one is not adequate and that we are doing ourselves a disservice only holding one worksession a month. He feels that it forces Council to have condensed deliberations or limits the inclusion of items that Council otherwise would be able to address if we had two worksessions a month.

Mayor Worley said that in a comparison of two worksessions a month in 2003 vs. one worksession in 2004, we spent about 23.9 hours through August of 2003 and about 25.8 hours through August of 2004. His personal prospective is that it makes more sense to do the work in one meeting that is a little longer than two shorter meetings a month. He understands that we might be artificially condensing discussion, however, he thinks that in a lot of Council's deliberations that we artificially expand our discussions as well.

Councilman Dunn said that to sit 4-5 hours in one worksession makes it sometimes difficult to concentrate. He felt that City staff should be brief and only give Council the facts.

Councilman Newman tended to support only one worksession a month but was open to bringing the matter back up in the future.

Councilwoman Jones spoke in support of only one worksession a month.

RESOLUTION BOOK NO. 28 – PAGE 360

D. RESOLUTION NO. 04-197 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A UTILITY AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR IMPROVEMENT OF THE STATE RIGHT-OF-WAY ON BRIDGE 740 MILL CREEK

Summary: The consideration of a resolution authorizing the Mayor to execute a utility agreement with the N. C. Dept. of Transportation (NCDOT) to relocate a water line in the State right-of-way on Bridge 740 over Mill Creek (NCDOT Project B-3616) and approval of an associated budget amendment, in the amount of $83,000, to provide funding for this project.

The Water Resources Department operates a water main across Bridge 740 over Mill Creek under the policies of the Asheville, Buncombe & Henderson Regional Water Authority (RWA), which is owned by the City of Asheville. Under State law, NCDOT is requiring the owner, the City of Asheville, to relocate this water main during roadway construction. The NCDOT has estimated the construction cost of this relocation at $74,656. An additional 10% needs to be added to include contingency and inspections, so the total amount that needs to be budgeted is $83,000.

The Utility Agreement will authorize NCDOT to include the water main relocation in the highway construction project, with NCDOT administering the construction and invoicing the City of Asheville upon completion of the project. Funding is currently available from excess funds in the Critical Needs II matching funds. A budget amendment amending Capital Project Ordinance 82-25 (35 Fund) to reflect funding for this project is required.

Pros: Reprogramming funds for this NCDOT project will provide funding for a state mandated project that requires relocation of a water line that conflicts with an NCDOT right of way.

Cons: None noted.

City staff recommends that City Council approve the resolution authorizing the Mayor to execute a Utility Agreement with NCDOT for relocation of a water line and a budget amendment to provide funding for this project

RESOLUTION BOOK NO. 28 – PAGE 361

E. ORDINANCE NO. 3165 - BUDGET AMENDMENT TO PROVIDE FUNDING FOR THE N.C. DEPT. OF TRANSPORTATION FOR IMPROVEMENT OF THE STATE RIGHT-OF-WAY ON BRIDGE 740 MILL CREEK

Summary: See Consent Agenda Item "D" above.

Upon inquiry of Mr. Fred English, City Manager Westbrook explained that the City of Asheville has to pay their portion of the non-betterment costs of the State project.

ORDINANCE BOOK NO. 21 – PAGE 329

F. RESOLUTION NO. 04-198 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE A VACANT LOT ON MAX STREET

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located on Max Street.

The subject property is an RS-8 Residential Single-Family High Density District zoned parcel comprising approximately 0.04 acre located on Max Street (PIN No. 9648.07-59-8495) across from Stephens-Lee Center. The lot is too small to build on. The tax value for the parcel is $1,500.

Brandon Knolls LLC has submitted a bid to purchase the property in the amount of $1,500, and intends to combine it with adjacent property that is improved with a single-family house

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- The sale and combination of this lot with the adjoining lot will eliminate a substandard parcel.

Approval of the resolution will establish a minimum price of $1,500 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing advertisement for upset bids.

Upon inquiry of Councilwoman Bellamy, Field Services Coordinator Ed Vess explained exactly where the property was located.

RESOLUTION BOOK NO. 28 – PAGE 362

G. RESOLUTION NO. 04-199 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE OF EXCHANGE OF REAL PROPERTY LOCATED AT 14 MICHIGAN AVENUE FOR REAL PROPERTY LOCATED ON LYMAN STREET

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of real property located on 14 Michigan Avenue for real property located on Lyman Street.

The City and Brandon Knolls LLC (Knolls) have negotiated an exchange of real property at 14 Michigan Avenue for Knolls property on Lyman Street.

The property at 14 Michigan Avenue (PIN No. 9638.15-54-8270) is a 0.19 acre parcel zoned RM-8 Residential Multi-Family Medium Density District. The lot is on the east side of Michigan Avenue about 150 feet from its intersection with Haywood Road. It is elevated about 5 feet above street grade and mostly level except for a driveway. It has several large trees and some grass that has been worn bare due to frequent use by customers of the convenience store on the adjacent lot. All utilities are available to the lot. There is a sidewalk across the front of the property at the street. The property has a tax value of $16,800.

The property owned by Knolls (PIN No. 9648.17-01-5372) is a 0.88 acre parcel located on the French Broad River at the intersection of Lyman Street and Amboy Road. It is directly across the river from the French Broad River Park and highly visible from the park. It slopes steeply down from the road at Amboy and levels off at the river. It is long and narrow, wider at Amboy and tapers off as it runs North with the western boundary of Lyman Street. Traveling North, the grade of Lyman Street descends closer to the river thus improving the access to the

property. The parcel has a tax value of $83,600. Knolls purchased the lot at a tax foreclosure sale for the upset bid amount of $7,250. After purchasing the lot, Knolls offered to exchange the lot for City-owned property. An exchange of property was negotiated which includes an additional cash payment to the City in the amount of $5,000.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It is consistent with the greenway master plan.
- It will protect the view from the park across the river.
- Acquisition of the entire parcel will allow greater flexibility than an easement.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff recommends adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of real property located 14 Michigan Avenue for real property located on Lyman Street.

RESOLUTION BOOK NO. 28 – PAGE 363

H. BUDGET AMENDMENT TO HELP SUPPORT THE 2005 LEGISLATIVE WEEKEND

This item was pulled off the Consent Agenda for an individual vote.

I. RESOLUTION APPROVING REQUEST FOR PROPOSALS FOR THE WATERSHED MANAGEMENT PLAN FOR NORTH FORK AND BEE TREE WATERSHEDS

This item was pulled off the Consent Agenda to be discussed under New Business.

J. RESOLUTION NO. 04-200 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY KNOWN AS TRACT I ON CHOCTAW STREET TO TILMAN AND SABRINA JACKSON

Summary: The consideration of a resolution authorizing the Mayor to convey property on Choctaw Street.

A bid has been received from Tilman and Sabrina Jackson, in the amount of $17,400, for the purchase of Choctaw Street, Tract 1, PIN No. 9648.10-25-5447, in the East Riverside Redevelopment Project. This bid amount is not less than the appraisal value of $17,400.

Choctaw Street Tract 1 is a residential zoned lot on the north side of Choctaw Street and opposite the intersection with Congress Street comprising 0.224 acre. The parcel is level with the street and sloping up toward the rear line. It is covered with natural vegetation consisting of grass, small trees and brush.

The Jackson's own the adjoining property where they reside. There are no improvements planned for the subject property at this time.

On September 14, 2004, the City Council directed the City Clerk to advertise for upset bids on Choctaw Street, Tract 1. The advertisement ran in the Asheville Citizen-Times on

September 17, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Tilman and Sabrina Jackson in the amount of $17,400 was not upset and the sale to Tilman and Sabrina Jackson should be approved.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the tax appraisal.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.

Community Development staff recommends adoption of the resolution authorizing the Mayor to convey property on Choctaw Street to Tilman and Sabrina Jackson, in the amount of $17,400.

RESOLUTION BOOK NO. 28 – PAGE 364

K. MOTION SETTING A PUBLIC HEARING ON OCTOBER 12, 2004, TO AMEND THE 2004 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

This matter was removed from the Consent Agenda for an individual vote.

L. RESOLUTION NO. 04-201 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Asheville-Buncombe Fair Housing Commission.

Kim Moore has resigned as a member of the Asheville-Buncombe Fair Housing Commission, thus leaving an unexpired term until December 31, 2004.

At the City Council's worksession on September 21, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint Geraldine Melendez to the A-B Fair Housing Commission, to serve the unexpired term of Ms. Moore, term to expire December 31, 2004, and then to serve a full three year term, term to expire December 31, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 365

M. RESOLUTION NO. 04-202 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND BOARD OF TRUSTEES

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Firemen's Relief Fund Board of Trustees.

Mr. Lloyd Williams has recently died, thus leaving an unexpired term until January 1, 2005.

At the City Council's worksession on September 21, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint Eva Estelle Williams as a member of the Firemen's Relief Fund Board of Trustees, to serve the unexpired term of Ms. Williams, term to expire January 1, 2005, and then to serve a full two-year term until January 1, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 366

N. RESOLUTION NO. 04-203 - RESOLUTION APPOINTING MEMBERS TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Vice-Mayor Mumpower said that this is the consideration of appointing members to the River District Design Review Committee.

The terms of Marvin Slosman (owner of property within the River District) and Laura Webb (member of the RiverLink Board of Directors) expired on September 1, 2004.

At the City Council's worksession on September 21, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint Pattiy Tomo, as the owner of property within the River District, to serve on the River District Design Review Committee for a three year term, term to expire September 1, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 367

O. RESOLUTION NO. 04-204 - RESOLUTION APPOINTING A MEMBER TO THE REGIONAL WATER AUTHORITY OF ASHEVILLE, BUNCOMBE AND HENDERSON

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Regional Water Authority of Asheville, Buncombe and Henderson.

The term of Councilman Joe Dunn, as a member on the Regional Water Authority of Asheville, Buncombe and Henderson, expires on September 30, 2004.

At the City Council's worksession on September 21, 2004, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Councilman Dunn as a member of the Regional Water Authority of Asheville, Buncombe and Henderson, to serve an three year term, term to expire September 30, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 368

P. RESOLUTION NO. 04-205 - RESOLUTION DESIGNATING CITY OF ASHEVILLE'S AGENTS TO THE N.C. DIVISION OF EMERGENCY MANAGEMENT

Summary: The N.C. Division of Emergency Management requires a resolution designating the City's agent. This resolution will designate William F. Schaefer, Jr., Finance Director, as the primary agent and Cynthia A. Fortune, Finance Operations Manager, as the secondary agent.

RESOLUTION BOOK NO. 28 – PAGE 369

Q. ORDINANCE NO. 3166 - BUDGET AMENDMENT TO PROVIDE FUNDING FOR EMERGENCY STORM RELATED EXPENSES

Summary: The consideration of a budget amendment, in the amount of $1.25 million, to provide funding for emergency storm related expenses.

Tropical depression Frances severely damaged all of the water transmission lines from the North Fork Water Treatment Facility including the 36-inch, 24-inch, and twin 16-inch lines supplying Asheville

and an 8-inch line supplying Black Mountain. There was also an 8-inch line that runs along US 70 in Swannanoa that was damaged by floodwaters. Crews and contractors worked around the clock from September 8th to September 16th to make repairs in order to fully restore water to Asheville and Black Mountain. Hurricane Ivan damaged the twin 16-inch lines that supply water to portions of Swannanoa and caused power outages at all of our critical pump stations resulting in widespread water outages.

The Fiscal Year 2004/2005 Water Fund Budget does not contain a provision for expenses related to emergencies such as droughts or floods, so it will be necessary to adopt a revised budget to fund these severe storm events. Expenses include repairs to water transmission lines, purchase of water from Weaverville, and protective emergency measures. These expenses are estimated to be at least $1.25 million.

Pros: FEMA is expected to reimburse the City for a portion of flood related expenses.

City staff recommends City Council approve the budget amendment to provide funding for emergency storm related expenses.

Upon inquiry of Councilwoman Bellamy, City Manager Westbrook and Interim Water Resources Director David Hanks responded to various financial questions regarding when the City can expect reimbursement and what would happen to the Water Fund if something else unexpected happens and the reimbursement has not yet been received.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA TO BE VOTED ON SEPARATELY.

ORDINANCE NO. 3167 - BUDGET AMENDMENT TO HELP SUPPORT THE 2005 LEGISLATIVE WEEKEND

Summary: The City has received a request from the Chamber of Commerce for a $10,000 appropriation to help support the 2005 Legislative Weekend.

The Asheville Area Chamber of Commerce, on a biannual basis, invites the North Carolina General Assembly to travel to Asheville and meet with members of the Chamber and local governments. The purpose of the event is to build relationships and familiarize members of the General Assembly with the needs of the Asheville area. In 2003, there were 200 legislators and spouses who committed to attend the event here. Since that was the first and the weather was not at its best, we expect more than 200 this year.

The private sector is supporting the 2005 Legislative Weekend, in addition to an appropriation of $30,000 from Buncombe County. Members of the Chamber of Commerce are working with the local delegation to the General Assembly to plan an appropriate agenda and program. The Chamber is requesting $10,000 from the City to support the program. As you know, the City has some important issues coming before both the local delegation and other members of the General Assembly in the next several years. This will be an excellent opportunity to start previewing those needs and concerns with them.

City staff recommends Council adopt a budget amendment, in the amount of $10,000, from Contingency to the Chamber of Commerce in support of the 2005 Legislative Weekend.

Vice-Mayor Mumpower felt this is a good effort, however, he feels that it is inappropriate to use City taxpayer dollars to help fund a Chamber of Commerce initiative.

Vice-Mayor Worley and Councilwoman Jones both spoke in support of the request in that Council's Strategic Operating Plan includes many other bodies, including state decision-makers, to achieve Council's goals so we need to continue to work closely with them.

Councilman Newman said that this is a good investment of dollars, however, double taxation of City residents is a problem and we do need to review each proposal carefully.

Councilwoman Jones moved for the adoption of Resolution No. 04-196. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 333

MOTION SETTING A PUBLIC HEARING ON OCTOBER 12, 2004, TO AMEND THE 2004 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in the matter due to a conflict of interest. This motion was seconded by Councilman Newman and carried unanimously.

Summary: The consideration of a motion setting a public hearing on October 12, 2004, to receive public input on a proposed amendment to the 2004 Consolidated Action Plan

The Annual Consolidated Action Plan sets out the City's planned use of federal CDBG and HOME funds for the next fiscal year. The 2004 Action Plan was approved by Council on April 13, 2004, and amended on August 24, 2004, to incorporate American Dream Downpayment Initiative funding from HUD.

Mountain Housing Opportunities has now requested an additional allocation of $25,000 in the form of a HOME Pre-Development Loan. The funds will be used to determine the feasibility of developing a 2-acre parcel on Depot Street, including the former Glenrock Hotel. HOME program income funds are available to budget for this purpose.

Additional information on the potential uses for the site will be provided before the public hearing.

City staff recommends City Council set a public hearing on October 12, 2004, to received public input on the proposed amendment to the 2004 Consolidated Action Plan.

Vice-Mayor Mumpower moved to set a public hearing on October 12, 2004, to amend the 2004 Consolidated Community Development Block Grant and HOME Action Plan. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR REMOVAL/RELOCATION AGREEMENTS FOR NON-CONFORMING OFF-PREMISE SIGNS

ORDINANCE NO. 3168 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR REMOVAL/RELOCATION AGREEMENTS FOR NON-CONFORMING OFF-PREMISE SIGNS

Mayor Worley opened the public hearing at 5:45 p.m.

City Attorney Oast said that this is the consideration of an amendment to the Unified Development Ordinance authorizing the removal/relocation/ replacement agreements for off-premise signs. This public hearing was advertised on September 17 and 24, 2004.

A. History of sign ordinance and enforcement efforts

1. Since 1977, the City has adopted several ordinances regulating the size and placement of billboards. Some of the ordinances contained amortization provisions, requiring the removal of nonconforming billboards within a certain amount of time.

2. Most recently in 1997, the City adopted an ordinance that essentially prohibited the placement of new billboards within the City's zoning jurisdiction, and made existing billboards nonconforming. That ordinance had a companion ordinance providing for amortization of nonconforming off-premise signs, but it was invalidated in 2001 in a case that went to the N. C. Supreme Court.

3. Beginning in 1997, the City undertook enforcement proceedings with respect to some billboards that have been made nonconforming by a 1990 ordinance, and should have been brought into compliance—and in some cases removed--in 1995. These efforts have been contested and are awaiting review by the Board of Adjustment. We have been to court at least twice on issues related to this enforcement effort, and the matter is still unresolved.

4. A new law adopted in 2004 and effective last month requires that cities that adopt amortization ordinances pay compensation based on a formula to the owners of billboards that are removed as a result of amortization. The new law does not affect pre-existing ordinances that provide for amortization.

B. Cap and Replace Ordinance. The all-or-nothing approach of traditional billboard regulation, with amortized removal as the end result, has in some cases hampered the ability of cities and sign owners to come to some other mutual accommodation with respect to signs, frequently resulting in protracted litigation. What has developed over the years in other jurisdictions is a concept known as "cap-and-replace," which essentially freezes the number of billboards within a local government's zoning jurisdiction at a specified number, but allows them to be moved or replaced within certain limitations. The same new N.C. law that now requires compensation for amortized removal also authorizes the use of "removal and relocation" agreements. Although this authorization appears to be set out primarily as an alternative to future amortization efforts, and prescribes requirements for agreements in those circumstances, it also provides for the use of removal-relocation agreements in other circumstances, such as on-going enforcement efforts.

C. Proposed Ordinance. The availability of this tool will permit the City to resolve several on-going or potential enforcement issues without the necessity of initiating proceedings before the Board of Adjustment or in court. The proposed ordinance will require notification to sign owners, and will require registration of signs in order for those signs to be eligible for inclusion in an agreement. The proposed ordinance will permit eligible billboards to be relocated on site in order to deal with site-specific development issues, or to be relocated within designated overlay zones subject to certain restrictions as to height, size and setback. Ineligible signs will remain subject to the provisions of the code that restrict the ability to relocate or replace them.

The proposed ordinance does not allow for any increase in the number of billboards within the City's zoning jurisdiction, nor does it allow for any increase in the size of affected billboards. The ordinance also does not restrict the City's ability to enforce its ordinances with respect to any billboard. Rather, it permits the City and the sign owner to negotiate for the relocation of eligible billboards.

This proposed new ordinance does not restrict the City's ability to adopt ordinances in the future that provide for the amortization of billboards. If the City chooses to do that, however, the new law will require compensation in accordance with the formulas set out in the law.

D. Recommended Changes from Planning and Zoning approved draft. Based on further review by staff, the proposed ordinance as reviewed and approved by the Planning and Zoning Commission has been clarified as to certain provisions as follows (original draft language is shown following each affected provision in the proposed ordinance):

1. The term "Qualified Billboard" has been changed to "Qualified Sign."

2. Paragraph (g)(1) has been changed to provide that Qualified Signs include signs with respect to which enforcement proceedings had been commenced; previously the proposed ordinance expressed these concepts as separate. This is a clarification.

3. Paragraph (g)(2)b. was revised to provide that signs must have been legal when erected in order to become a Qualified Sign.

4. The height limitation in paragraph (g)(2)c.2.ii. has been changed to provide that signs may not exceed 40 feet; the previous draft provided that they could not exceed their height prior to relocation, except with a variance. This change was made because 40 feet is the height limitation applicable to billboards in the 1990 ordinance. Measurement in all cases is from the base of the sign.

5. Paragraph (g)(2)c.2.iv. previously provided that Qualified Signs could only be located within the required separation distance from non-Qualified Signs with the approval of the Planning Director. This requirement was removed because any off-premise sign that is not a Qualified Sign is nonconforming and subject to removal.

Pros:

- Provides an alternative for resolving current enforcement actions regarding billboards, including removal of some billboards.
- Protects a visually sensitive corridor and the Blue Ridge Parkway viewshed.
- Establishes a cap on the number of billboards in the City.

- Makes an additional tool available for resolving some disputes, but does not require its use.
- Does not permit any increase in the number of billboards in the City.

Cons:

- At least with respect to enforcement efforts under the existing sign ordinances, an agreement could mean that some billboards now potentially subject to removal may not be removed.
- Allows billboards to be relocated to new locations.

Staff recommends adoption of the ordinance authorizing the removal/relocation/ replacement agreements for off-premise signs.

At 5:58 p.m., Mayor Worley closed the public hearing.

There was considerable discussion as City Attorney Oast responded to various questions from Council, some being, but are not limited to: where are the designated corridors; what is the compensation formula to owners of billboards that are removed as a result of amortization; how long has the City been dealing with the billboard issue; has there been any input and if so, what has it been, from the billboard owners regarding this proposed amendment; and what happens if the City extends it's extraterritorial jurisdiction or annexes.

Councilman Newman was concerned that the property tax is nowhere near the income generated or the value placed on the billboard by the billboard companies.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3168. This motion was seconded by Vice-Mayor Mumpower.

Councilwoman Jones spoke in support of the ordinance, however, requested that in the future more groups be solicited to review the ordinance.

At the request of Councilman Newman, it was the consensus of City Council to ask the City Manager to contact Buncombe County regarding the value process for billboards in the City and to make sure the value is consistent with the property tax being paid.

The motion made by Councilman Davis and seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 335

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

Planning & Development Director Scott Shuford said that this is the consideration of resolutions stating the intent of the City to annex the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area and the Airport Road area.

He said that the State of North Carolina enables cities to grow by annexation of areas that meet certain statutory requirements. This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic

30

development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population.

The City of Asheville has initiated annexations for the past four years. These recent annexations, like the ones being presented are designed to include: areas that are clearly urban, areas surrounded by the City but not within the City of Asheville and can only be accessed through the City; areas that will create a more logical City boundary; and areas with at least some existing water and sewer service.

It is now time for the City to initiate the next phase of annexations. Staff has identified the following four areas: Ridgefield Business Park area, Ascot Point Village area, Long Shoals Road area and Airport Road area.

The following steps and dates meet the process required by State law:

Council Adoption of Resolutions of Intent	September 28, 2004
Council Adoption of Plans of Services	October 12, 2004
Staff-Sponsored Public Informational Meeting	November 15, 2004
City Council Public Hearings	December 14, 2004
Council Adoption of Annexation Ordinances	January 11, 2005
Effective Date of Annexations:	
March 31, 2005 – Ridgefield Business Park area	
December 21, 2005 – Ascot Point Village, Long Shoals Road & Airport Road	

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex the Ridgefield Business Park area, Ascot Point Village area, Long Shoals Road area and Airport Road area.

Mr. Shuford stated that the resolutions of intent state that (1) it is the intent of the City Council of the City of Asheville to consider annexation of the territory described in the resolution pursuant to Part 3 of Article 4A of Chapter 160A of the North Carolina General Statutes; (2) a public informational meeting on the question of annexing the above-described territory will be held in the Public Works Building located at 161 S. Charlotte Street, Asheville, N.C., at 5:30 p.m. on the 15th day of November, 2004, at which time a representative of the City of Asheville shall make an explanation of plans for extending services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given the opportunity to ask questions and receive answers regarding the proposed annexation; (3) a public hearing on the question of annexing the above-described territory will be held in the Council Chamber located on the 2nd Floor of the City Hall Building, 70 Court Plaza, Asheville, N.C., at 5:00 p.m. on the 14th day of December, 2004, at which time a representative of the City of Asheville will make an explanation of plans for extending Services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given an opportunity to be heard; (4) a report of plans for extending services to the above-described territory shall be made available for public inspection at the office of the City Clerk at least thirty (30) days prior to the date of the public informational meeting; (5) the statement of financial impact contained in the report shall be delivered to the Buncombe County Board of Commissioners at least thirty (30) days prior to the date of the public informational meeting; (6) a legible map of the area to be annexed and a list of identified persons holding freehold interests in property in the area to be annexed shall be posted in the office of the City Clerk, Asheville City Building, 70 Court Plaza, Asheville, North Carolina, at least thirty (30) days prior to the date of the

public informational meeting; (7) the effective date of annexation shall be at least one year, but no more than 400 days, from the date of passage of the annexation ordinance; and (8) notice of the public informational meeting and public hearing shall be given as required by law.

Our annexation strategy has been to (1) select areas that are clearly developed; (2) include areas where water and sewer have been extended; (3) improve city limits by eliminating pockets and clarifying boundaries; and (4) disperse areas geographically.

Councilwoman Bellamy felt the process should be delayed until January or February because the public information meeting and the City Council public hearings are near holidays. She felt people might be preoccupied with the season's festivities to adequately deal with potential annexation.

Mr. Shuford said that the statutes require a specific process and if Council wishes to delay action, then he would need additional time to review the statutes to make sure that all timeframes are met.

A brief discussion was held about the scheduling of the meetings around the holidays, noting that the weather is a bigger factor than the holidays themselves.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 04-206 - RESOLUTION OF INTENT TO ANNEX THE RIDGEFIELD BUSINESS PARK AREA, SETTING A PUBLIC INFORMATION MEETING ON NOVEMBER 15, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON DECEMBER 14, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Jones moved for the adoption of Resolution No. 04-206. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 370

RESOLUTION NO. 04-207 - RESOLUTION OF INTENT TO ANNEX THE ASCOT POINT VILLAGE AREA, SETTING A PUBLIC INFORMATION MEETING ON NOVEMBER 15, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON DECEMBER 14, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Jones moved for the adoption of Resolution No. 04-207. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 374

RESOLUTION NO. 04-208 - RESOLUTION OF INTENT TO ANNEX THE LONG SHOALS ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON NOVEMBER 15, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC

HEARING ON DECEMBER 14, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Jones moved for the adoption of Resolution No. 04-208. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 378

RESOLUTION NO. 04-209 - RESOLUTION OF INTENT TO ANNEX THE AIRPORT ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON NOVEMBER 15, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON DECEMBER 14, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Jones moved for the adoption of Resolution No. 04-209. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 382

B. RESOLUTION NO. 04-210 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Buncombe County Tourism Development Authority (TDA).

Mr. Chris Cavanaugh has resigned, as the individual who is involved in the tourist business who has demonstrated an interest in tourist development, and who does not own or operate hotels, motels or other taxable tourist accommodations, from the Buncombe County Tourism Development Authority, thus leaving an unexpired term until August 30, 2005.

Councilwoman Bellamy, who is the City Council liaison to the TDA, said that the TDA recommends Randy Fluharty.

Councilman Dunn was concerned about the room tax issue and felt the TDA make-up should be changed.

Councilman Newman spoke highly of Mr. Fluharty's skills, however, he explained why he felt he should be excluded from being eligible for this position. His other concern is about fair taxation in Asheville. In the past several years, City Council has raised property taxes and water rates on families and businesses in Asheville. Asheville has among the highest cost of living in North Carolina and the City taxpayers are paying $800,000 to maintain our Civic Center and $100,000 a year for the Chamber of Commerce's visitor center, yet Asheville has among the lowest hotel occupancy fees in North Carolina. The service sector in the hotel industry specifically pay among the lowest wages in our community, often times not paying living wages. No one has been able to show that if Asheville increased our local hotel occupancy fee to the state average to help pay for infrastructure that benefits the tourism industry and our community as a whole, that we would reduce tourism visitation to Asheville. The TDA provides recommendations to our state delegation regarding the hotel occupancy fees and rates and if we fill this position with people who support the status quo, then it will be harder to increase the local hotel occupancy fee to the state average to help pay for key infrastructure. The tour industry

should help pay their fair share. He felt we need to bring new voices to the TDA and he would support James Rentz.

After a brief discussion about the Council voting process regarding board appointments, Vice-Mayor Mumpower moved to appoint Randy Fluharty, as the individual who is involved in the tourist business who has demonstrated an interest in tourist development, and who does not own or operate hotels, motels or other taxable tourist accommodations, to the Buncombe County Tourism Development Authority, to serve the unexpired term of Mr. Cavanaugh, term to expire August 30, 2005, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Councilman Dunn and Councilman Newman voting "no."

RESOLUTION BOOK NO. 28 – PAGE 386

C. RESOLUTION NO. 04-211 - RESOLUTION APPROVING REQUEST FOR PROPOSALS FOR THE WATERSHED MANAGEMENT PLAN FOR NORTH FORK AND BEE TREE WATERSHEDS

Mr. David Hanks, Interim Water Resources Director, said that City Council approved the implementation of a watershed management plan for the North Fork and Bee Tree watersheds. This plan was the first phase in a comprehensive management plan covering the next five (5) years and beyond. The request for proposals (RFP) is the second phase of the watershed plan to ensure long range proper management of the watersheds.

Submitting watershed management firm must be qualified to address the best watershed management concepts and the scope of the proposal must include but is not limited to the following:

- Provide annual detailed recommendations to City of Asheville Water Resources staff for managing the watershed in the next fiscal year (July 1 – June 30)
- Insure that the annual recommendations maintain water quality as the primary objective
- Approval of the annual plan by City Council during the annual budget process for each fiscal year plan in order to proceed
- Provide detailed information on cost and any projected revenues of the annual proposed plan
- Identify areas within the watershed which require annual maintenance and specifically identify ways to address the annual maintenance needs using best forestry management techniques
- Provide recommendations for riparian buffer designs in order to reduce sedimentation and provide protection for streambanks
- Provide recommendations to reduce the risk of catastrophic events, such as fire, insects or disease to preserve the watershed in order to maintain high water quality
- Identify trees, underbrush, plants, shrubs, etc. which require one time maintenance or removal
- Identify trees, underbrush, plants, shrubs, etc. which require ongoing maintenance or removal during the life of the contract
- Identify roads, bridges, stream crossings, and road shoulders that require immediate maintenance
- Identify roads, bridges, stream crossings, and road shoulders that require long-term maintenance
- Identify invasive plant and tree species and provide action plans for removal or termination to insure continued health of the watershed
- Provide annual watershed plans that are compatible with the North Carolina Conservation Trust easement

- Provide annual watershed plans that protect and preserve the scenic view sites of the watershed from the Blue Ridge Parkway
- Assist in determining which emergency access roads should be maintained, closed or developed within the watershed
- Determine sites within the watershed for re-establishment of the American Chestnut tree
- Identify endangered/threatened species in the watershed area and provide recommendations for management
- Provide annual plans that will enhance native plants, wildlife, and other species found within the watershed
- It is the desire of the City to appoint a Watershed Advisory Committee made up of Water Resources and other City staff, representatives from the North Carolina Conservation Trust, Blue Ridge Parkway, and City of Asheville Tree Commission. This committee will be used to provide technical assistance and recommendations to the watershed management plan
- Any water-related work the firm is qualified to do (or sub-contract), as directed and mutually agreeable to both parties

Staff will bring an annual plan to City Council outlining specific details of what will be done within the watershed, except emergency maintenance, for the next fiscal year for Council approval.

City staff recommends City Council's approval of the proposed RFP for the next phase of managing the North Fork and Bee Tree watersheds.

Councilman Newman said that the management activities that are needed in the watershed include the maintenance and restoration of bridges on the watershed property, and the removal of identified exotic species that present a fire threat to the property. His concern is that this RFP is much broader than that and we are going to spend a lot of money paying consultants to develop a very broad plan and really the only pressing management needs that he can see in the watershed are the activities to maintain the road network and remove the exotic species. There is an element of commercial logging activities that is contemplated in the RFP and if we are going to use commercial logging as a management technique in the watershed property, we need to be more clear about exactly why we are doing that. It doesn't seem to him that it meets any of our management goals in the watershed, other than creating a source of revenue. He is concerned that we are unnecessarily vague about the role that we want that to play in the future management of the watershed. Based on the potentially high price we are going to pay for the consulting firm to create the second phase of the management plan, he will not support it.

Mayor Worley noted that this is only a RFP and when it comes back, Council will determine the scope of what, if anything, they want done and the cost associated with that.

Councilwoman Jones would not support the RFP largely because of the costs quoted.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Councilman Davis moved for the adoption of Resolution No. 04-211. This motion was seconded by Councilman Dunn and carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilwoman Jones and Councilman Newman voting "no."

RESOLUTION BOOK NO. 28 – PAGE 387

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced vacancies on various boards.

Vice-Mayor said that Square D has closed and thanked them for their important service to our community for over 30 years.

The following claims were received by the City of Asheville during the period of September 10-23, 2004: Homer Sams (Water), Eric Hornbeek (Police), Karen Valentine (Streets), Trace Bates (Streets), Vivian Smith (Water) and Marian Jacobsen (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:04 p.m.

Magdalen Bourleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 12, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING – SOMETHING ABOUT OCTOBER, 2004, AS "DISABILITY EMPLOYMENT AWARENESS MONTH"

Mayor Worley read the proclamation proclaiming October 2004, as "Disability Employment Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Bart Floyd, Mr. Richard Arends and Ms. Carol Hubbard who briefed City Council on some activities taking place during the month.

B. PRESENTATION OF CERTIFICATE OF ACHIEVEMENT FOR EXCELLENCE IN FINANCIAL REPORTING AWARD

Mayor Worley presented City Accountant Pat Leckey with the Certificate of Achievement for Excellence in Financial Reporting Award. The Certificate of Achievement is the highest form of recognition in the area of governmental accounting and financial reporting, and its attainment represents a significant accomplishment by a government and its management. The City of Asheville is proud to have received this award for the 24th year.

He also was proud to acknowledge that the City of Asheville's Accounting Division received the Award of Financial Reporting Achievement.

Ms. Lynn Ducker, Ms. Sue Bagwell, Ms. Tia Keith, Ms. Leah Singleton, Ms. Charlene Frankin and Mr. Tim Taylor were also recognized for their work in achieving the awards.

Mayor Worley announced the upcoming retirement of William Schaefer, Finance Director. Mr. Schaefer will be retiring at the end of December 2004, after 37 years of public service including 11 years with the City of Asheville.

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda "L" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE WORKSESSION HELD ON SEPTEMBER 21, 2004, AND CONTINUED UNTIL SEPTEMBER 28, 2004; AND MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 28 2004

B. RESOLUTION NO. 04-212 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY ON MAX STREET TO BRANDON KNOLLS LLC

Summary: The consideration of a resolution authorizing the Mayor to convey property on Max Street to Brandon Knolls, LLC, in the amount of $1,500.

On September 28, 2004, the City Council directed the City Clerk to advertise for upset bids on a parcel of land on Max Street (PIN No. 9648.07-59-8495) in the East End/Valley Street Community.

The subject property is an RS-8 Residential Single-Family High Density District parcel comprising approximately 0.04 acre located on Max Street across from Stephens-Lee Center. The lot is too small to build on. The tax value for the parcel is $1,500.

Brandon Knolls LLC has submitted a bid to purchase the property in the amount of $1,500 and intends to combine it with adjacent property that is improved with a single family house

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- A non-buildable lot will be assembled with an adjoining parcel to provide a more coherent land use pattern
- The sale of this lot to Brandon Knolls will assure the continued use of the lot for driveway access to the adjoining lot

The advertisement for upset bids ran in the Asheville Citizen-Times on Friday, October 1, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Brandon Knolls, LLC, in the amount of $1,500 was not upset and the sale to Brandon Knolls, LLC should be approved.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to convey property on Max Street to Brandon Knolls, LLC, in the amount of $1,500.

RESOLUTION BOOK NO. 28 – PAGE 388

C. RESOLUTION NO. 04-213 - RESOLUTION AUTHORIZING CONVEYANCE OF REAL PROPERTY AT 14 MICHIGAN AVENUE IN EXCHANGE FOR REAL PROPERTY ON LYMAN STREET

Summary: The consideration of a resolution authorizing the City to exchange real property at 14 Michigan Avenue for Brandon Knolls LLC property on Lyman Street.

The property at 14 Michigan Avenue (PIN No. 9638.15-54-8270) is a 0.19 acre parcel zoned RM-8 Residential Multi-Family Medium Density District. The lot is on the east side of Michigan Avenue about 150 feet from its intersection with Haywood Road. The property is elevated about 5 feet above street grade and mostly level except for a driveway. It has several

large trees and some grass that has been worn bare due to frequent use by customers of the convenience store on the adjacent lot. All utilities are available to the lot. There is a sidewalk across the front of the property at the street. The property has a tax value of $16,800.

The property owned by Brandon Knolls LLC (Knolls) (PIN No. 9648.17-01-5372) is a 0.88 acre parcel located on the French Broad River at the intersection of Lyman Street and Amboy Road. The property is directly across the river from the French Broad River Park and highly visible from the park. It slopes steeply down from the road at Amboy and levels off at the river. It is long and narrow, wider at Amboy and tapers off as it runs North with the western boundary of Lyman Street. Traveling North the grade of Lyman Street descends closer to the river thus improving the access to the property. The parcel has a tax value of $83,600. Knolls purchased the lot at a tax foreclosure sale for the upset bid amount of $7,250. After purchasing the lot, Knolls offered to exchange the lot for City owned property An exchange of property was negotiated which includes an additional cash payment to the City in the amount of $5,000.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It is consistent with the greenway master plan.
- It will protect the view from the park across the river.
- Acquisition of the entire parcel will allow greater flexibility than an easement.

Pursuant to N. C. Gen. Stat. sec. 160A-271 a notice was duly published in the Asheville Citizen-Times on October 1, 2004.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. Gen. Stat. sec. 160A-271.

Planning & Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing the City to exchange real property at 14 Michigan Avenue for Brandon Knolls LLC property on Lyman Street.

RESOLUTION BOOK NO. 28 – PAGE 389

D. RESOLUTION NO. 04-214 - RESOLUTION AMENDING THE 2004 SCHEDULED CITY COUNCIL MEETINGS TO DELETE THE NOVEMBER 2, 2004, WORKSESSION

RESOLUTION BOOK NO. 28 – PAGE 390

E. RESOLUTION NO. 04-215 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF JUSTICE FOR A GRANT TO ASSIST WITH THE PURCHASE OF EQUIPMENT FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under the U. S. Department of Justice, Office of Justice Programs, Bureau of Justice Assistance Local Law Enforcement Block Grant Program; and an associated budget amendment, in the amount of $44,173, to provide for the local matching contribution.

The City of Asheville has been awarded a grant, in the amount of $39,765, under the Fiscal Year 2004 Local Law Enforcement Block Grants Program. A local match of $4,418 in required for a total of $44,173. The purpose of the grant program is to fund projects, allowed

under the grant program, designed to reduce crime and improve public safety. We have chosen the area of improving police equipment in the area of crowd control and homeland security. The following is planned equipment purchases:

30	Taser X26E units (w/holsters)	Each: $799.95	Total: $23,998.50
90	Taser replacement cartridges	Each: $18.97	Total: $1,707.30
1	Package Appliqués for helmets	Each: $155.00	Total: $155.00
20	Eyeglass prescription inserts	Each: $70.00	Total: $1,400.00
35	V-Top shin guards	Each: $85.00	Total: $2,975.00
35	Torso Protectors	Each: $350.00	Total: $12,250.00
2	Pepper Ball Projectors	Each: $400.00	Total: $800.00
2	40 MM Gas Projectile Units	Each: $250.00	Total: $500.00
4	Training chemical certification	Each: $250.00	Total: $1000.00
	Estimated Freight		Total: $1000.00
			Grand Total: $44785.80

Pros:

- The desired equipment is would allow officers to respond to all types of crowd control and homeland security issues with safety in mind.
- This will contribute to the reduction of officer and citizen injury while improving the effectiveness of crowd control detachments.

Con:

- Though there are many benefits to this program, the one drawback would be our financial expectation of up-keep to the equipment and replacement when needed.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to accept the grant award; and (2) to adopt the budget amendment, in the amount of $44,173, to provide for the local matching contribution.

RESOLUTION BOOK NO. 28 – PAGE 391

F. ORDINANCE NO. 3169 - BUDGET AMENDMENT TO PROVIDE MATCHING FUNDS FOR U.S. DEPT. OF JUSTICE GRANT TO PURCHASE POLICE EQUIPMENT FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: See Consent Agenda Item "E" above.

ORDINANCE BOOK NO. 21 – PAGE 341

G. RESOLUTION NO. 04-216 - RESOLUTION OF INTENT TO PERMANENTLY CLOSE VIVIAN AVENUE

Summary: The consideration of a resolution of intent to close Vivian Avenue and set a public hearing for November 9, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the University of North Carolina at Asheville has requested the City of Asheville permanently close to public use as a public street Vivian Avenue as shown on a plat entitled, "Property of the Christian School of Asheville," at Plat Book 32, Page 28 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this right-of-way is not a City maintained street. Closure of this right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There are three parcels that abut this section of right-of-way. They are identified by PIN Nos. 9649.09-17-3141, 9649.09-16-0734, and 9649.09-16-2885. The petitioner has authority over all the abutting parcels.

City staff recommends that City Council adopt the resolution setting a public hearing for November 9, 2004, to close Vivian Avenue.

RESOLUTION BOOK NO. 28 – PAGE 392

H. RESOLUTION NO. 04-217 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR WATER SYSTEM IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to apply for a State of North Carolina loan under the North Carolina Clean Water Revolving Loan and Federally Funded State Revolving Fund Program for water system improvements.

The State of North Carolina is making low interest loan funds available to water systems with a 2.20 percent interest rate. The Water Resources Department needs to replace the asbestos water line in the west district of the water system due to health hazard and maintenance concerns. Replacing the asbestos water line and extent the water system will increase pressure and improve fire protection to this part of the system. The asbestos water lines are health hazards that require a third party vendor to handle and dispose of when repairs are made from routine and emergency breaks. Repairs to the asbestos lines take up to three times longer due to safety and health requirements. These lines are concrete inside and water does not come in to contact with the outside asbestos. If approved by the State the City is under no obligation to accept the grant should the stated interest rate change or other funding such as grants become available. The loan approval process from the State should be completed early summer of 2005 with payments starting in Fiscal Year 2005/06. The requested amount to fund the project is $1,771,965.00. The repayment terms will be negotiated with the State to ensure the City receives the best value for this loan.

The water system improvements consist of the following: Approximately 2,200 lineal feet of 16-inch and 13,500 linear feet of 12-inch ductile iron water line and related appurtenances along US 19-23 and Sand Hill Road (NC112) in western Buncombe County will be installed. The intent of the project is to replace existing 6-inch asbestos cement piping and to serve as the initial phase of a regional interconnection project to link the City of Asheville's water system to the Town of Canton's system in Haywood County per the Water System Master Plan.

City staff recommends City Council authorize the City Manager to apply for a loan through the State of North Carolina State Revolving Fund Program.

RESOLUTION BOOK NO. 28 – PAGE 393

I. ORDINANCE NO. 3170 - BUDGET AMENDMENT TO APPROPRIATE FUNDS FROM A TRANSPORTATION IMPROVEMENT PROGRAM GRANT

Summary: The consideration of accepting $18,993 from the State of North Carolina to purchase up to 40 bicycle racks for installation at public facilities.

The Transportation Improvement Program Project E-3415 was partially executed and this expenditure will close the project. The State will reimburse the City 100% up to $18,993. The total grant was $60,000, of which $41,007 has been previously received. Eighty-three bicycle racks have been purchased and installation continues throughout the City via this grant.

Pros:

- No matching funds required.
- These funds will add bicycle racks throughout the City.

Cons: None noted.

This budget amendment addresses three goals within three focus areas established in the Strategic Operating Plan: (1) Goal #1 in the Natural & Built Environment focus area, (2) Goal #2 in the Planning focus area, and (3) Goal #3 in the Sense of Place focus area.

City staff recommends City Council accept $18,993 from the State of North Carolina to purchase up to 40 bicycle racks for installation at public facilities.

Upon inquiry of Vice-Mayor Mumpower, City Engineer Cathy Ball said that although they have no statistical data on how much the existing racks are being utilized, she believe there is about a 20% utilization, depending on their location, e.g., in front of the library, the racks are heavily used. She said that one advantage is that they don't have a designated location for these new bike racks so they can be placed at a higher utilization location.

Vice-Mayor Mumpower felt the utility and the placement should be measurable at $475 a bike rack.

Ms. Ball said that they were getting a lot of complaints about people locking their bikes to parking meters or putting them in the way, so she does feel they have provided an opportunity for people to use bikes as an alternative mode of transportation. She feels that the more racks are installed, the more use you will see. The Bicycle Pedestrian Task Force provides valuable input and there have been 12 requests for bike rack locations.

Upon inquiry of Vice-Mayor Mumpower about other uses for the grant money, Ms. Ball said that this money is geared for the purpose of bicycle enhancements, whether it is bicycle lanes, bicycle racks, etc. In this community we have identified the need for bike racks. If we find out any additional information or identify a different need, she believes the State would be open to working with us. -Ordinance Book No 21 - page 344

J. **ORDINANCE NO. 3171- BUDGET AMENDMENT TO COVER OVERTIME EXPENSES THAT WILL BE INCURRED AS A RESULT OF THE NEW FAIR LABOR STANDARDS ACT OVERTIME EXEMPTIONS**

Summary: The consideration of a budget amendment, in the amount of $77,500, to cover overtime expenses that will be incurred as a result of the new Fair Labor Standards Act (FLSA) overtime exemptions.

On August 23, 2004, the new FLSA regulations governing overtime pay exemptions for executive, administrative, professional, and computer employees became effective.

The Human Resources Department has reviewed all positions and has determined that 15 job titles will have changes in exemption status to comply with the new regulations.

These exemption status changes will require the City to pay overtime to employees filling these job titles. These positions have previously been considered exempt from overtime. It is estimated that the total cost of additional overtime expenses will be $77,500.

The negative aspect of this change will be the additional costs incurred by the City for overtime; however, these costs are unavoidable as the FLSA regulations must be complied with by law.

The positive aspect of this change is all adjustments made according to the law resulted in a beneficial increase to the employee.

City staff recommends City Council approve the budget amendment, which provides funds for overtime expenses incurred as a result of the new FLSA changes.

ORDINANCE BOOK NO. 21 – PAGE 346

K. RESOLUTION NO. 04-218 - RESOLUTION AUTHORIZING THE EXECUTION OF RIGHT-OF-WAY PERMIT FROM NATIONAL PARK SERVICE FOR BRIDGE ACROSS SWANNANOA RIVER TO AZALEA ROAD FACILITY

Summary: The consideration of a resolution authorizing execution by City Manager of Park Service Right-of-Way Permit for use of bridge over Swannanoa River to Azalea Road property.

Last month, the City received a permit from the National Park Service permitting the City to use a bridge and appurtenant access roads to access its property along Azalea Road. The property in question is the site for the City's proposed beneficial fill site on Azalea Road. The bridge and access roads may also be used for maintaining the City's adjacent parks facilities, but will not be used for general public access. Since the acquisition of the Azalea Road property by the City, the City and the Park Service have had discussions on whether the roads and bridge can be used by the City, and the permit process was a way of accommodating their competing interests.

The permit authorizes the City to make needed repairs to the bridge and adjacent roadways, and authorizes the use of the bridge and appurtenant roads for access to the beneficial fill site, and for maintenance purposes. The City plans to provide some screening of the beneficial fill site from the Parkway and to take other steps to mask and mitigate the impacts of its use. The permit is good for five years, and may be renewed for additional five-year terms up to a total of 20 years.

This permit has been the focus of negotiations between the City and the Park Service, and has been through a lengthy environmental review process. There are still some minor clarifications and adjustments needed, but these should be handled easily and quickly, and it appears that the permit as drafted will meet the City's needs.

Considerations. (1) Other than the cost of the bridge repair and periodic maintenance, the cost to the City of using this permit will be negligible. (2) The cost savings in transportation and tipping fees will be significant. (3) Care will be taken to mitigate any impacts of the fill site or adjacent residential areas, and to visually screen it from the Parkway. (4) The ability to use this existing bridge means that the City does not have to construct another bridge further downriver.

Staff recommends that Council authorize the City Manager to execute this permit for the City, and to apply for and execute renewals as appropriate.

Councilman Dunn asked how much the City has spent in tipping fees over the past two years because we didn't have a permit to use the bridge to the Azalea Road site. Public Works Director Mark Combs said that it has cost the City approximately $250,000.

RESOLUTION BOOK NO. 28 – PAGE 394

L. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE "BENEFIT OF BILTMORE" EVENT ON OCTOBER 23, 2004

This item was removed from the Consent Agenda for an individual vote.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Newman and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 04-219 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE "BENEFIT OF BILTMORE" EVENT ON OCTOBER 23, 2004

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the "Benefit of Biltmore" event on October 23, 2004.

The "Benefit of Biltmore" special event has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and unfortified wine at their October 23rd event.

This event is co-sponsored by the City of Asheville Parks and Recreation Department for the purpose of providing a benefit for business owners and employees of Biltmore Village due to the recent flooding events.

The location of this event is within the Biltmore Village area located on Kitchen Place between the intersection of Angle Street and the intersection of Boston Way.

The event will consist of several micro-breweries offering samples of their beer.

Pro: To generate funds for businesses and employees in the Biltmore Village area that were affected by the recent flooding.

Con: None noted.

The Asheville Parks and Recreation Department recommends City Council's approval of the resolution authorizing the possession and consumption of malt beverages and/or unfortified wine at the "Benefit of Biltmore" event.

Councilman Dunn moved for the adoption of Resolution No. 04-219. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 28 – PAGE 395

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE BUNCOMBE COUNTY EMERGENCY MANAGEMENT FACILITY LOCATED ON 129 S. LEXINGTON AVENUE FOR A PROPOSED 911 CALL AND COMMUNICATION CENTER, AND EMERGENCY DISPATCH FACILITY**

On October 7, 2004, a letter was received from Buncombe County Manager Wanda Greene requesting "that the hearing on the Conditional Use Permit application for the Union Transfer Building (tax lots PIN 9648.06-48-0774 and 0445), located on Hilliard Avenue, be delayed until the fourth Tuesday in February, 2005." Therefore, Vice-Mayor Mumpower moved to continue this public hearing until February 22, 2005. This motion was seconded by Councilwoman Bellamy and carried unanimously.

B. **PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE MOUNTAIN HOUSING OFFICE ADDITION LOCATED AT 64 CLINGMAN AVENUE FOR A PROPOSED EXPANSION OF THEIR OFFICE SPACE**

Councilman Newman moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

On October 12, 2004, a letter was received from Mr. Mike Vance, Homeownership Manager from Mountain Housing Opportunities, requesting that their proposal to amend the conditional use permit for the Merritt Park Condominiums, scheduled for October 12, 2004, be continued until the next available City Council meeting. Therefore, Vice-Mayor Mumpower moved to continue this public hearing until November 9, 2004. This motion was seconded by Councilwoman Jones and carried unanimously.

C. **PUBLIC HEARING TO AMEND THE 2004 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN**

RESOLUTION NO. 04-220 - RESOLUTION AMENDING THE 2004 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

ORDINANCE NO. 3172 - BUDGET AMENDMENT TO PROVIDE A HOME PRE-DEVELOPMENT LOAN TO MOUNTAIN HOUSING OPPORTUNITIES

Councilman Newman moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

Mayor Worley opened the public hearing at 5:26 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution amending the 2004 Consolidated Action Plan to provide a HOME pre-development loan to Mountain Housing Opportunities. This public hearing was advertised on October 1 and 8, 2004.

The Annual Consolidated Action Plan sets out the City's planned use of federal Community Development Block Grant (CDBG) and HOME funds for the next fiscal year. The 2004 Action Plan was approved by Council on April 13, 2004, and amended on August 24, 2004.

Mountain Housing Opportunities (MHO) has requested an additional allocation of $25,000 in the form of a HOME pre-development loan. The funds will be used to determine the feasibility of developing a 2-acre parcel on Depot Street, including the former Glenrock Hotel. MHO envisions a development of about 20 affordable housing units in the rehabilitated hotel building, plus at least 35 new mixed-income housing units and 20 new commercial/retail spaces. Loan proceeds will be used for: option fee, appraisal, environmental studies, and preliminary architectural plans. Funds are available from HOME program income from loan pay-offs.

The HOME program regulations provide specifically for funds to be loaned for pre-development site control and feasibility studies by Community Housing Development Organizations such as MHO. If the project goes ahead, the loan is repaid from project financing; if it proves infeasible the loan is forgiven.

A public hearing is required as this is a substantial amendment to the Action Plan. Two public notices have been published

Potential Advantages:

- Addition of at least 55 new housing units and 20 commercial units
- Rehabilitation of an historic building
- Contributes to revitalization of the "River Arts District", identified in the Riverway Master Plan
- Potential for artist live/work studios
- Adjacent to Reid Community Center and Park
- Attracts Low Income Housing Tax Credits and other resources
- Increase of about $10,000,000 in property tax base.

Disadvantages:

- Loss (forgiveness) of the HOME loan if project proves infeasible because of cost, environmental factors, or market conditions.

Staff recommends City Council approve the resolution for a $25,000 HOME predevelopment loan to Mountain Housing Opportunities and the associated budget amendment.

Mayor Worley closed the public hearing at 5:38 p.m.

Councilman Dunn, Chairman of the Housing & Community Development Committee, spoke in support of the amendment.

Mayor Worley said that members of Council have previously received a copy of the resolution and budget amendment and they would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-218. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 397

Councilman Dunn moved for the adoption of Ordinance No. 3172. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 348

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE FOLLOWING FOUR AREAS PROPOSED FOR ANNEXATION WHICH ARE GENERALLY KNOWN AS (1) THE RIDGEFIELD BUSINESS PARK AREA; (2) THE ASCOT POINT VILLAGE AREA; (3) THE LONG SHOALS ROAD AREA; AND (4) THE AIRPORT ROAD AREA

Planning & Development Director Scott Shuford said that the Annexation Services Plan is being submitted for Council's approval for the following areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, and the Airport Road area.

City Council approval of this document is the second step in the annexation process that began on September 28, 2004, when Council adopted the resolutions of intent to annex these four areas.

Upon review and approval by City Council, the Plan will be made available for public review. The follow steps will complete the annexation process.

Approval of Annexation Services Plan	October 12, 2004
Public information meeting	November 15, 2004
Public hearings	December 14, 2004
Adoption of annexation ordinances	January 11, 2005

Effective Date of Annexations:

March 31, 2005 – Ridgefield Business Park area

December 21, 2005 – Ascot Point Village, Long Shoals Road & Airport Road

The N.C. General Statutes require that municipalities exercising annexation authority make plans for the extension of services to the area proposed to be annexed and shall, prior to the public hearing and public information meeting, prepare a report setting forth such plans.

The Statutes require that the reports include:

1) Maps showing: (a) The present and proposed boundaries of the municipality; (b) The present major water and sewer lines, and any proposed extensions; and (c) The general land use pattern in the area to be annexed.

2) A statement that the area to be annexed meets the standards of N. C. Gen. Stat. sec. 160A-48 (basically contiguity and urbanization).

3) A statement setting forth the plans of the municipality for extending to the annexation area each major municipal service performed within the municipality. Specifically, (a) police protection, fire protection, solid waste collection and street maintenance on the date of annexation; and (b) extension of major trunk water mains and sewer outfall lines so that property owners in the area will be able to secure public water and sewer service according to the municipal policies in effect for extending such service to individuals lots or subdivisions.

4) The method under which the municipality plans to finance extension of services into the area to be annexed.

5) A statement of the impact of the annexation on any rural fire department providing service in the area to be annexed and a statement of the impact of the annexation on fire protection and fire insurance rates in the area to be annexed.

6) A statement showing how the proposed annexation will affect the City's finances and services, including City revenue change estimates.

He then reviewed with Council the specifics of how each area qualifies for annexation and used photos to show some of the uses in the proposed annexation areas.

Mr. Shuford then explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will require expansion of the Police Department. Extending service into the proposed annexation areas will require operational adjustment in two primary areas (1) configuration of patrol districts covering the proposed annexation areas so as to provide for effective manpower deployment and a balanced response time to calls for service; and (2) filling vacancies in sworn personnel positions to accommodate the anticipated increase in demand for police services. He explained how each area would be served by an expansion of a particular district. Based on the projected population increase at the time of annexation, it will be necessary to add seven (7) officers to maintain the current benchmark ratio of one officer to 407 residents. The plan of services calls for the addition of these officers, at the annual cost of $245,000, on or before August 1, 2005.

Fire protection: Three additional firefighter positions will be required to adequately serve the additional land area, dwelling units, businesses and improvements. The current first unit to be placed out of service is Ladder 4 when personnel are not available for minimum staffing. These positions will reduce the number of "out of service" times for this response company. The annual cost for the positions will be $105,000 for salary and benefits plus associated equipment and safety items of $15,500. The extension of fire protection services is not simply an extension of existing department resources. The City is required by G.S. 160A-49.1 to offer existing fire service entities contract opportunities, which allow for the continued service of annexed areas by existing rural fire departments. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the suburban fire department may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending fire protection; therefore, the City has developed a plan that incorporates alternative solutions to extending fire protection to annexed areas.

Solid waste collection: With the addition of 1,605 residences, the Sanitation Division cannot absorb the annexed areas into the six existing routes. An additional automated truck and a new position, Motor Vehicle Operator III, are required. The City is required by G.S. 160A-49.3 to offer existing private service entities contract opportunities which allow for the continued service of annexed areas by existing companies. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the existing private companies may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending solid waste collection services; therefore, the City has developed a plan that incorporates alternative solutions to extending solid waste collection services to annexed areas.

Street maintenance services: The additional land area, street mileage, dwelling units, businesses and improvements will not require expansion of Public Works Department, Street Maintenance Division. The City has evaluated the streets in the annexation areas for inclusion in the maintenance program as follows: (1) Ridgefield Business Park area: Alliance Court, Heart Drive, Ridgefield Boulevard and Ridgefield Court (39 street lights at a total annual cost of $8,327); (2) Ascot Point Village area: Ascot Point Circle (2 street lights at a total annual cost of $418); (3)

Long Shoals Road area – Skyland Inn Drive (3 street lights at a total annual cost of $650); and (4) Airport Road – Machen Road (8 street lights at a total annual cost of $1,677).

Water distribution: On the effective date of annexation, all residents, businesses and property owners within the proposed four annexation areas that are adjacent to existing water facilities will receive service on a basis substantially equal to all current portions of the City. The following two areas require no water line improvements: Ridgefield Business Park area and Ascot Point Village area. In the Long Shoals Road area, there is a lack of fire protection coverage. Therefore, there is a need to upgrade the existing small diameter water line on Plott Place and to upgrade an existing small diameter water line on Overlook Road Extension. Approximately 500 linear feet of six-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Plott Place and approximately 550 linear feet of 6-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Overlook Road Extension. All existing water service connections shall be reconnected to the proposed 6-inch water line and the existing small diameter water lines shall be abandoned. In the Airport Road area, there is a lack of fire protection. Therefore, there is a need to upgrade an existing small diameter water line on Machen Road and install additional fire hydrants to existing water lines in the area to bring fire protection coverage to the same level as other parts of the City. Approximately 1,000 linear feet of 6-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Machen Road. All existing water service connections shall be reconnected to the proposed 6-inch water line and the existing small diameter water line shall be abandoned. Two new fire hydrants will be installed on the existing 24-inch water line along Airport Road, 1 new fire hydrant will be installed on the existing 24-inch water line along Hendersonville Road and 1 new fire hydrant will be installed on the existing 6-inch water line along Glen Bridge Road. Water system improvements for the Ridgefield Business Park area are planned for completion by March 31, 2007, and water system improvements for the Ascot Point Village area, Long Shoals Road area and Airport Road area are planned for completion by December 31, 2007.

Sewer collection: The following two areas require no sanitary sewer system improvements: Ridgefield Business Park area and Ascot Point Village area. In the Long Shoals Road area, major sanitary sewer trunk lines and interceptors are currently in place for the majority of this area; however, upgrades will be required to the existing sanitary sewer infrastructure in order to bring this area to substantially the same level as other parts of the City. Approximately 800 linear feet of 8-inch sanitary sewer line and all related appurtenances shall be installed cross-country, beginning on Long Shoals Road, approximately 350 feet east of the intersection of Long Shoals Road and CP&L Drive and extending south to tie into the existing sanitary sewer system on CP&L Drive. In the Airport Road area, major sanitary sewer trunk lines and interceptors are currently in place for the majority of this area; however, upgrades will be required to the existing sanitary sewer infrastructure in order to bring this area to substantially the same level as other parts of the City. Approximately 350 linear feet of 8-inch sanitary sewer line and all related appurtenances shall be installed along Airport Road, beginning 380 feet west of the intersection of Airport Road and Hendersonville Road. Approximately 850 linear feet of 8-inch sanitary sewer line and all related appurtenances shall be installed along Benwood Drive, beginning approximately 700 feet west of the intersection of Benwood Drive and Bradley Branch Road. Sanitary sewer system improvements for the Ridgefield Business Park area are planned for completion by March 31, 2007, and sanitary sewer system improvements for the Ascot Point Village area, Long Shoals Road area and Airport Road area are planned for completion by December 31, 2007.

Administrative and other municipal services: The City of Asheville is governed by a City Council consisting of a Mayor, Vice-Mayor, and five Councilpersons with general administration responsibilities delegated to a City Manager. Supporting the City Manager are key professionals and department heads specializing in public works, police protection, fire protection, urban land

use planning and zoning, building code enforcement, legal matters, parks and recreation and various other municipal activities and functions. The City of Asheville is active minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities in an effort to make Asheville a better community for present and future residents, businesses and property owners. Employees and employee relations are managed by the City Manager. The City of Asheville is an Equal Opportunity Employer. Three well-qualified practicing attorneys provide legal counsel to the City.

Financial Impact:

Revenue: Total ad valorem property tax revenue - $887,148; Total state utility taxes - $107,936; Total sales tax - $320,556; Total Powell Bill allocation - $64,055; and Total fees, charges and permits - $111,076. Total revenue - $1,490,771.

Annual recurring expenditures: Police (seven additional officers to be hired effective August 1, 2005) - $245,000; Fire (costs for additional personnel and financial impact payments to the rural fire departments (5-year duration) - $193,643; Solid waste - $96,558 (annual costs for solid waste collection and disposal and recycling are not anticipated to be absorbed into current budgets; the solid waste annual expenses include an additional MEO III position plus annual disposal costs of $15,721. Annual costs for street maintenance are anticipated to be absorbed into the current budget with no increase in expenditures at this time); Recycling - $12,209; and Street lighting - $11,072. Total recurring expenditures - $510,645.

Annual capital expenditures: Water lines - $153,650; Sewer lines - $285,000; Solid waste (cost equals potential economic loss compensation for private solid waste haulers of $57,644 plus $182,000 for an additional automated loader truck) - $239,644; Rollout containers - $16,960; Police (police capital costs include equipment, training and vehicles for hired officers) - $186,385; and Fire (fire costs include equipment for hired personnel) - $15,500. Total annual capital expenditure - $897,139.

Mr. Shuford asked City Council to adopt the resolutions approving the report of plans for the four annexation areas.

Mr. Shuford responded to Councilwoman Jones in what the formula is for potential economic loss.

Upon inquiry of Councilman Newman, Mr. Shuford explained the process for sidewalk improvements and street maintenance.

Upon Councilman Dunn, Mr. Shuford explained what the concerns were from the earlier appeal of Ridgefield Business Park area and Long Shoals Road area and how we have now addressed those concerns.

In response to Councilman Dunn, Mr. Shuford said that he would report to Council the number of residents annexed in the last round of annexations.

Councilman Newman felt it would be beneficial to have information on manufacturing facilities in the proposed annexation areas since Council has a concern of the loss of manufacturing in our area. Mr. Shuford responded that one of the goals they tried to follow under Council's direction to minimize that. He said there are two industrial classified properties in the Ridgefield Business Park area - one is a flooring shop and one is a plant in the process of closing. He said in the Airport Road area, there are six businesses.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 04-221 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE RIDGEFIELD BUSINESS PARK AREA

Councilman Davis moved for the adoption of Resolution No. 04-221. This motion was seconded by Councilwoman Jones and carried on a 4-3 vote with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 398

RESOLUTION NO. 04-222 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE ASCOT POINT VILLAGE AREA

Councilwoman Jones moved for the adoption of Resolution No. 04-222. This motion was seconded by Councilman Davis and carried on a 4-3 vote with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 399

RESOLUTION NO. 04-223 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE LONG SHOALS ROAD AREA

Councilman Davis moved for the adoption of Resolution No. 04-223. This motion was seconded by Councilwoman Jones and carried on a 4-3 vote with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 400

RESOLUTION NO. 04-224 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE AIRPORT ROAD AREA

Councilwoman Jones moved for the adoption of Resolution No. 04-224. This motion was seconded by Councilman Davis and carried on a 4-3 vote with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 401

VI. OTHER BUSINESS:

Vice-Mayor Mumpower thanked District Attorney Ron Moore, Matthew Bacoate, and others who participated in the successful Gun Buy-Out Program, which 500 guns collected and taken off the streets.

Vice-Mayor Mumpower announced the October board and commission vacancies.

The following claims were received by the City of Asheville during the period of September 24-30, 2004: BellSouth (Streets), Cameron Seleska (Fire), Michael Aanonsen

(Streets), J.D. Wallace (Sanitation) and JLS Company (Sanitation). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English felt City Council should not annex any more until they provide services for those who are already City residents.

CLOSED SESSION

At 6:12 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilwoman Jones and carried unanimously. The following actions occurred in closed session:

Resolution No. 04-225 – Resolution establishing just compensation and authorizing the use of eminent domain to acquire an easement over certain property on New Haw Creek Road for greenway purposes. The appraisal by Mark Morris is hereby accepted, and just compensation for the easement over the property identified by PIN Nos. 9658.08-78-6513 and 9658.08-78-5543 and owned by Ricky K. Wallin and wife, Diana L. Wallin on New Haw Creek Road is hereby established at $1800.00 (Parcel A) and $1500.00 (Parcel B). Acquisition of said easement by the use of eminent domain is hereby authorized in accordance with the provision of Chapter 40A of the N. C. General Statutes. Resolution Book No. 28 – Page 402.

Resolution No. 04-226 – Resolution establishing just compensation and authorizing the use of eminent domain to acquire an easement over certain property on New Haw Creek Road for greenway purposes. The appraisal by Mark Morris is hereby accepted, and just compensation for the easement over the property identified by PIN No. 9658.08-78-8554 and owned by Jolly SIS & B, LLC, Jean Jolly Jaynes, and George Frederick Jaynes on New Haw Creek Road is hereby established at $2400.00. Acquisition of said easement by the use of eminent domain is hereby authorized in accordance with the provision of Chapter 40A of the N. C. General Statutes. Resolution Book No. 28 – Page 403.

At 9:35 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:35 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 19, 2004 – 2:00 p.m.
6th Floor Training Room – City Hall

Joint City of Asheville/Buncombe County Special Meeting

Asheville City Council Members Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Assistant City Manager Jeffrey Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Buncombe County Commissioners Present: Chairman Nathan Ramsey, Presiding; Commissioner Patsy Keever; Commissioner Bill Stanley; Commissioner David Young; County Attorney Joe Connolly; County Manager Wanda Greene; and County Clerk Kathy Hughes. Vice-Chair David Gantt was absent.

Mayor Worley and Chairman Ramsey each called their respective meetings to order at 2:00 p.m. and said the meeting will focus on joint efforts in light of the recent Hurricanes Frances and Ivan flood damages.

Mr. Jerry VeHaun, EMS Director, gave a brief overview of the storm damage and a status of assessments.

Ms. Mandy Stone, DSS Director, reviewed with Council and the Commissioners the social impacts of the storm.

Fire Chief Greg Grayson outlined observations and the status of the storm impact from fire, police, building safety and public works prospective.

Mr. Justin DeMello, representing FEMA, updated Council and the Commissioners on FEMA's disaster response.

Mr. Philip Letsinger, NFIP State Coordinator, gave a brief update on flood mapping.

Throughout the presentations, individuals responded to various questions and comments from Council and the Commissioners.

At 3:15 p.m., Mayor Worley and Chairman Ramsey adjourned their respective meetings.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – October 19, 2004 - 3:15 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

FIRE AND RESCUE NATIONAL ACCREDITATION PROCESS

Fire Chief Greg Grayson said that that this is the consideration of a resolution adopting Asheville Fire Rescue's Strategic Plan and Standard of Response Cover.

Fire and Rescue staff has been working diligently for several years towards meeting the national fire and rescue services accreditation standards. Staff has now completed the requirements to be reviewed by the Commission on Fire Accreditation International (CFAI). A site visit by peer reviewers is scheduled for November with award of accredited status slated for February, 2005. If all requirements are met, Asheville Fire and Rescue will become the eighth accredited fire and rescue agency in North Carolina and the first accredited agency in Western North Carolina. Prior to the site visit by CFAI, City Council will need to endorse the department's standard of cover and strategic operating plan.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operation Plan. It meets that goal in the section on Critical Services and Infrastructure, Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

The recognized national model which a fire and rescue agency validates their services is through the CFAI accreditation commission. The CFAI accreditation commission is comprised of fire service leaders from agencies of differing size as well as the International City Manager's Association (ICMA), city government, county government, the insurance industry, labor representatives, the International Association of Fire Chiefs (IAFC) and citizens at large.

At this time, the accreditation process is completely voluntary and has been in full effect for approximately the past five years. To date, within the State of North Carolina, there are seven accredited fire and rescue departments (Cary, Charlotte, Gastonia, Greensboro, Jacksonville, Rocky Mount, Wilson). Nationally, 96 agencies have received accredited agency status. Many more departments are currently at some point in the process. All metropolitan fire and rescue departments in North Carolina are involved in the CFAI accreditation process.

The accreditation process has several key components. Over eighty (80) members of the fire and rescue department have been actively involved in formulating these three key components. These include:

1. **Performance Indicators**
   There are 254 individual performance indicators that analyze department operations. Of these 254, 108 indicators are considered "core competencies" and must be met in order to become an accredited agency. The indicators are in the following categories:
   a. Governance and Administration
   b. Assessment and Planning
   c. Goals and Objectives

d. Financial Resource Management
e. Programs
f. Physical Resources
g. Human Resources
h. Training and Competency
i. Essential Resources
j. External Systems Relations

2. **Strategic Operating Plan**

The strategic plan for the department would parallel the City's Strategic Operating Plan and give the department a specified work plan that goals and objectives can be formulated from. It is envisioned that the department's strategic operating plan be adjusted at least annually in concen with modifications of the city's strategic operating plan.

3. **Standard of Cover**

The standard of cover illustrates the department's level of service. This is developed from a risk assessment that consists of the following:

a. Fire flow – amount of water to control the emergency
b. Probability – likelihood that a particular event will occur within a given time
c. Consequence – life safety as well as economic impact
d. Occupancy Risk – risk to life and property
e. Fire Management Zones – geographical areas of need or risk
f. Community Profile – demographics, level of services provided

In addition, the standards of response coverage consists of three key elements. These are:

a. Distribution of resources – deployment of facilities and apparatus
b. Concentration of resources – ability to deliver and effective response force
c. Staffing levels – personnel and their task assignments

Completion of the comprehensive standard of cover document for the department has required a significant amount of research and data collection and data analysis by our firefighters.

<u>Why should Asheville Fire and Rescue become an accredited agency? (PROS):</u>

- Assures City Council and our community that the fire and rescue department is performing according to national standards and that the organization is being managed in a professional manner.
- Ensures that we have proper procedures, policies and guidelines in place and that we are delivering the services needed by our community through risk analysis.
- Promotes excellence within the fire/emergency service organization.
- Encourages quality improvement through a continuous process.
- Provides assurance to the public that the department has a defined mission and related objectives that will result in improved performance by the department.
- Provides a detailed evaluation of the department and the services it provides to the community that we serve and protect.
- Identifies areas of strength and weakness within the department.
- Provides a forum for the communication of management and leadership philosophies throughout the organization and community.

- Provides a formal mechanism for developing concurrent documents, such as strategic and business plans and continuously analyzes all of the services that the department is involved with.
- Fosters pride in the organization and promotes professionalism.
- The strategic plan for the department would parallel the City's Strategic Operating Plan and give the department a specified work plan that goals and objectives can be formulated from.

Concerns (CONS):

There have been no cons identified with the accreditation process for Asheville Fire and Rescue Department at this time. The effort and energy to perform the key components of the process have been completed. There are no substantial continuing costs in maintaining accredited agency status. Re-accreditation is on a five calendar year cycle.

City staff recommends City Council allow the Fire and Rescue Department to complete their accredited agency status from CFAI by giving their support to the Asheville Fire and Rescue Department's Strategic Operating Plan by adoption of the standard of response cover document for the Asheville Fire and Rescue Department.

Fire Chief Greg Grayson responded to various questions from Council.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this matter on the next formal City Council agenda.

BUNCOMBE COUNTY SCHOOLS ACHIEVEMENT UPDATE

Buncombe County Superintendent of Schools Cliff Dodson and Mr. Roger Aiken, Buncombe County School Board Chair, gave City Council a brief report on the testing scores.

Mr. Dodson reported that the System-wide SAT average of 1068 is (1) 42 points higher than national average; (2) 62 points higher than state average; (3) Highest total mean score in NC among school districts with more than 2 high schools; and (4) Fourth highest out of the state's 117 school districts.

Other achievements noted are: (1) Record-breaking End-of-Grade and End-of-Course scores; (2) 95% of schools achieved expected or high growth status compared to the state average of 75%; (3) 21 Schools of Excellence; (4) 12 Schools of Distinction; (5) 68% of schools achieved high growth status compared to the statewide average of 35%; and (6) 53% of schools recognized as Schools of Excellence compared to the state average of 27%.

Mr. Dodson reported that (1) Enrollment increased by more than 400; (2) 10-day headcount totaled 25,274; (3) Widespread growth expected to continue; and (4) Requesting additional positions from DPI.

Mr. Dodson stated that Buncombe County Schools has 3,846 students enrolled within the Asheville city limits.

Discussion occurred on various topics raised by City Council, e.g., drug testing, consolidation, etc.

On behalf of City Council, Mayor Worley thanked Mr. Dodson and Mr. Aiken for sharing this important information.

At 4:50 p.m., Mayor Worley announced a short recess.

DEVELOPMENT REVIEW PROCESS TEAM

Recommendations

Mr. Russ Martin, Chair of the 2004 Development Review Process team, presented Council with suggestions to improve the development process.

As part of the Fiscal Year 2004-05 budget approval process, City Council members requested that a task force be created to evaluate the current processes. Approximately 50 citizens were invited to participate, with as many as 34 citizens attending various meetings. Ideas were developed by the citizens who attended the various meetings, representing the following groups: Architects/Engineers/Designers and Surveyors, Business Owners and Manager, Commercial Contractors & Developers, and Residential Contractors & Developers.

Mr. Martin reviewed with Council the following recommendations:

1. Advocate that major changes be made to the Unified Development Ordinance (UDO).
   - Limit City Council reviews
   - Only those processes that are statutorily required should go to Council (rezonings)
   - Eliminate Level 3 Conditional Use Permits from Council approval
   - Eliminate the formal Technical Review Committee (TRC) reviews since they add delays to the process; recommend informal TRC reviews at least twice a month
   - All non-conditional use projects that meet the UDO and engineering specifications should be approved at staff level.
   - Recommend maximum approval times of Level 1 – one week; Level 2 – three weeks; and Level 3 – five weeks.
   - Reformat the content and presentation of the UDO to be more user friendly (tables, drawings, charts, etc.)
   - The time required to upgrade to current code a non-conforming structure that becomes vacant should be extended to 12 months

2. Restructure some processes to provide for "communication" among parties earlier in the process.
   - Consolidate all forms into one document and designate one location for drop-off of plans for necessary approval for all permits. Utilize technology to coordinate the process
   - The turnaround times for permit and plan review approvals need to be reduced, as previously recommended, even if additional staff is required
   - Need a City staff expeditor to act on customer's behalf (someone with authority over all development processes)

3. Streamline the process by eliminating and combining steps.
   - Make new permit application (single form to be developed) available on-line
   - To speed up the approval processes, City staff should be cross-trained on tasks in order for industry to have to contact fewer persons (i.e., consolidation of inspectors). Example: Driveway inspections by building inspector.
   - Trade permits (electrical, mechanical, and plumbing) should be activated at the time the building permit is approved if subcontractors are known (goal is for the unknowns to be able to call theirs in by phone)
   - New contractors should be able to apply and pay their initial tax privilege license at the "Development Services Center"

- There should be an option of backflow devices being installed on the interior of structures instead of outside in vaults (local regulations should not exceed state law)

4. Establish a "common sense" culture among staff and commissions.
   - Adopt a comprehensive "business friendly" attitude. Both sides to understand expectations of each other. Time is money.
   - Need a balance of having an ISO # 1 rating vs. time and money factor for business/community

5. Eliminate conflicts between ordinances, standards, and codes.
   - Recommend creation of an industry review committee to be involved in changes to the "Asheville Standard Specifications and Details Manual" (updates to come to Council in November)
   - Code interpretation and review shall be consistent between plan reviewers and inspectors as well as among inspectors
   - Eliminate City approval on driveway permits when NC DOT approval is required
   - Recommend the Landscaping/UDO final inspection for commercial projects be done by Planning staff instead of Building Safety's building inspectors
   - Provide incentives (less fees and charges) for installation of fire sprinklers (the State Code provides trade-offs for sprinklers; the Water Authority's fees and policies discourage installing sprinkler systems)

6. Improve permit coordination with outside agencies.
   - Street address assignment to occur at the beginning of the permit process (to help all departments and agencies including the utility companies)
   - Develop computer links with outside agencies (MSD, Air Quality, NC DOT, etc.) as well as other internal departments, i.e., Water, Planning, etc.
   - Recommend payment of MSD fees at a time nearer to the final inspections

7. Create more effective education and informational tools (checklists, guides, etc.).
   - Develop educational programs on the development process and building in the City (Cable TV program, first timers orientation video, etc.)
   - Recommend annual review/update and publishing of Development Guide

8. Strengthen communication between City and industry.
   - Support Building Safety's "Adopt 100 Customers Program" to develop partnerships and better communication
   - City should develop an e-mail "Development eNews" for industry
   - Current turnaround time should be tracked for the different types of approvals and posted on the City website

9. Employ technology when and where practical for both City and industry.
   - The current Internet eGov system needs to be enhanced to do permits on line and provide real time information concerning the status and details of projects in review
   - Consider other enhancements that are business friendly and provide time savings to industry
   - Provide regular customer feedback and training opportunities (classroom sessions, etc.)

10. Encourage development via performance based standards and ordinances.
    - To encourage development the City, not the developer" should pay for public infrastructure (sidewalks, hydrants, etc.)

- There should be an option of backflow devices being installed on the interior of structures instead of outside in vaults (local regulations should not exceed state law)

4. Establish a "common sense" culture among staff and commissions.
   - Adopt a comprehensive "business friendly" attitude. Both sides to understand expectations of each other. Time is money.
   - Need a balance of having an ISO # 1 rating vs. time and money factor for business/community

5. Eliminate conflicts between ordinances, standards, and codes.
   - Recommend creation of an industry review committee to be involved in changes to the "Asheville Standard Specifications and Details Manual" (updates to come to Council in November)
   - Code interpretation and review shall be consistent between plan reviewers and inspectors as well as among inspectors
   - Eliminate City approval on driveway permits when NC DOT approval is required
   - Recommend the Landscaping/UDO final inspection for commercial projects be done by Planning staff instead of Building Safety's building inspectors
   - Provide incentives (less fees and charges) for installation of fire sprinklers (the State Code provides trade-offs for sprinklers; the Water Authority's fees and policies discourage installing sprinkler systems)

6. Improve permit coordination with outside agencies.
   - Street address assignment to occur at the beginning of the permit process (to help all departments and agencies including the utility companies)
   - Develop computer links with outside agencies (MSD, Air Quality, NC DOT, etc.) as well as other internal departments, i.e., Water, Planning, etc.
   - Recommend payment of MSD fees at a time nearer to the final inspections

7. Create more effective education and informational tools (checklists, guides, etc.).
   - Develop educational programs on the development process and building in the City (Cable TV program, first timers orientation video, etc.)
   - Recommend annual review/update and publishing of Development Guide

8. Strengthen communication between City and industry.
   - Support Building Safety's "Adopt 100 Customers Program" to develop partnerships and better communication
   - City should develop an e-mail "Development eNews" for industry
   - Current turnaround time should be tracked for the different types of approvals and posted on the City website

9. Employ technology when and where practical for both City and industry.
   - The current Internet eGov system needs to be enhanced to do permits on line and provide real time information concerning the status and details of projects in review
   - Consider other enhancements that are business friendly and provide time savings to industry
   - Provide regular customer feedback and training opportunities (classroom sessions, etc.)

10. Encourage development via performance based standards and ordinances.
    - To encourage development the City, not the developer" should pay for public infrastructure (sidewalks, hydrants, etc.)

Finally, the Task Force recommends an implementation follow-up at 3, 6 and 12 months.

City staff recommends that Council receive the Report from the Task Force and thank them for their service. On November 19, 2004, at the Fall Developers Forum with the City Manager, staff will present an update, and receive more feedback from the industry on revising the Development Process. An implementation plan will be presented to City Council in coordination with the 2005-2006 budget process.

Mr. Martin responded to various questions and comments from Council regarding the recommendations, some being, but are not limited to: how can we made the computer version of the UDO more user friendly; was the one-stop permitting center explored by the Task Force; and is there a problem of one inspector inspecting the property and then another one after that finding other violations.

Mr. Martin felt that some members of the Task Force should be part of an advisory committee so that when changes are proposed, they can provide their input.

Councilwoman Jones said that when Council forms a task force, what the expectations are on the citizens that invest their time is always a concern for her. For example, the recommendation about changes to the UDO, there are a lot of other groups in the community that would need to discuss that. She didn't want the Task Force to think that Council wasn't hearing the recommendations, if they don't implement them all. The timeline is very aggressive and Council is in the midst of recruiting a new City Manager and implementing their strategic plan. In fact, the Downtown Social Issues Task Force has worked two years on their recommendations, which City Council is just now in the process of prioritizing. She noted that a lot of the Task Force's recommendations are great, but most of them require funding. She asked if there was any sense if the Task Force members were open to understanding that the better delivery of service could translate into a higher fee.

Mr. Martin responded that the Task Force understood that possibility, however, some recommendations will be cost savings in the long run. Although the Task Force's implementation follow-up at 3, 6 and 12 months is a goal, they really would like some feedback so they know something is progressing and the City is taking seriously what their recommendations are. In addition, the Task Force members would like the opportunity to approach Council and advise them of their experience on the Task Force and explain some of their recommendations.

Vice-Mayor Mumpower said that through the work of the Task Force, we can make a meaningful, lasting impact in this area.

Upon inquiry of Vice-Mayor Mumpower, Mr. Martin said he was certain some of the Task Force members (including himself) would participate in an advisory body to assist staff with pragmatic implementation of some of these policies, if Council appointed such a body.

Upon inquiry of Councilman Newman, Mr. Martin said that timeliness of the review process was the most important issue to the Task Force members. He said they did recognize fees, however, they didn't dwell on the fee structure in that timeliness was the overall factor. He did not get a sense that the Task Force members would object to fees being raised if they were reasonable and justifiable.

There was discussion about how long it would take City staff to report back to Council with an implementation plan.

Assistant City Manager Jeff Richardson pointed out that this is one of Council's goals in the Strategic Plan. The goal is for an efficient and economical permitting process. One of the

objectives is to improve the plan review process by enhancing effectiveness in customer service. On a parallel track to this Task Force, Mr. Summey, his staff and other department directors have begun to look internally at what we can do to improve and streamline the process; improve customer service; and meet the direction and expectations of City Council. He felt it would be appropriate for Council to give Mr. Summey and his staff an opportunity to look at the recommendations and report back to Council, recognizing that on a quarterly basis, we are formally reporting to Council on the entire Strategic Plan. With regard to the involvement of the Task Force, we will look for Council direction, but it will continue to be a public process.

Mayor Worley said that some recommendations may be capable of fairly short-term implementation, but short-term implementation may mean from 2 weeks to 6 months. Other recommendations are clearly longer-term processes. For instance, major changes to the UDO needs a lot of input. He tends to see staff melting the recommendations in with their own process and then meeting again with the Task Force of those who are willing to continue to serve in an advisory capacity. If there are recommendations that are not doable, the Task Force needs to hear from staff why and what the problems are in trying to implement them. The Task Force may also have some better ideas on the doable things. He felt the dialogue needs to continue in some fashion, but we need to not have an expectation that this is a 2-6 month process, but a process that will take us through the 2005-06 budget process and we may have pieces that are not implemented a year from now.

Councilwoman Jones felt these recommendations should be on a parallel track similar to other committee recommendations that Council prioritizes and interfaces them with budgetary issues. While she felt the recommendations are great and would like for staff to give Council a report on them, she gets the sense that the Task Force is pre-empting Council's role and she is a little uncomfortable with that.

Vice-Mayor Mumpower felt we should follow whatever has merits, whether it is this effort or another one, and based on those merits move forward as quickly as we can. He didn't think Council should just receive the recommendations and disband the Task Force. He said there is a difference between an implementation plan and implementation of that plan. He suggested we ask our staff what is a reasonable period of time to develop an implementation plan, that we keep the Task Force involved in some level and then we be patient with the fact that it takes time to implement these things, some which may not be appropriate.

Councilman Davis liked the Task Force's recommendation regarding follow-up in 3 months. That will give staff time to review the recommendations and see what they feel is workable. Then a follow-up at 6 months and a year all make sense to him.

Mr. Martin felt the Task Force would be glad to reconvene at Council's discretion to hear updates and be a part of this process. It is important to them to know that the 347 hours they spent in developing the recommendations haven't been swept under the rug.

Councilman Newman was interested in staff's perspective on which recommendations what they think they can incorporate. He felt Council should have a discussion, before the next budget cycle, about what Council thinks about the recommendations because some are public policy matters that City Council needs to determine whether they want to proceed with or not.

Mayor Worley said that if we accept the recommendation of the Task Force for a 3, 6 and 12-month follow-up, the 3-month follow-up would be a good opportunity for City Council to have some discussion on the recommendations. He felt City staff could move toward an implementation plan at the 3-month level, but it doesn't have to be a full-blown implementation plan, if Mr. Summey's department has other pressing issues.

Vice-Mayor Mumpower felt this is one of the most important things that Council can undertake and he supported a 3-month process to develop an implementation plan.

Councilwoman Jones was concerned how staff will develop an implementation plan if they assume all of the recommendations are viable, equally prioritized options. They may be moving forward in a direction where City Council doesn't want to go.

Mayor Worley said that there is the Fall Developers Forum on November 19 at which time there will be additional input. He felt that Council should move forward with a 3-month timeframe to get an update and some implementation plan on those things that don't require significant Council policy decision-making as a part of the process and costs associated with the implementation. Also at the 3-month follow-up Council can have their discussion and input on some of the main policy issues and set the direction for some of the bigger items.

Councilwoman Jones felt that Council is being held to an external pressure that doesn't recognize everything else is being balanced. She's not advocating putting this on a shelf or dragging our feet, however, she does feel like some of the pressure is not folding into our larger reality.

Building Safety Director Terry Summey said that even with his Department's tremendous workload increase relating to the two floods, he felt he could have some type of implementation plan for Council's review in 3 months, noting that some of the recommendations will be split up amongst different City departments, e.g., Water Resources Department, Engineering Department, Planning & Zoning Department, etc.

Affordable Housing & Building Safety Fees

Building Safety Director Terry Summey said that this is the consideration of amending the Fees & Charges Manual to implement portions of the City Council's 2004 Strategic Operating Plan.

The Fiscal Year 2004/05 budget proposed amendments to the Fees and Charges Manual to promote the construction of Affordable Housing (AH) and provide 95% operational cost to the Building Safety Department. Council members requested that the proposed amendments receive further review from the public. For the past 6 months, the proposed amendments have been in the possession of the public. To date, no objections or changes have been received from the public or the Development Review Task Force. The amended fees incorporate several proposed goals in the Strategic Operating Plan to include the following:

- Housing Opportunities Goal #1: Increased development incentives for AH – Create incentives and revise the permitting process throughout the City to encourage AH.
  - Objective A. Increase incentives to invest in AH (work to decrease fees and revise development specifications).
    Task#1: Revise fees- (new ranges and reductions) increase AH incentives.
    Task#2: Increase AH Cap-extension of incentives to ensure more AH

- Economic Development Goal #2: Efficient/economical permitting process – Reform to make more conducive to do business in Asheville.
  - Objective B. Encourage independent business development-reduce permitting costs for subcontractors and small renovation projects.
    Task #1: Revise fees/charges structure (subcontractors- more work/smaller fee).

Pros

- Fees support public relations: encourages the development of affordable housing.
- Fee changes support the cost of services provided.
- Public/Industry: No changes or negative comments received in over 6 months of promotion.

Cons - None

Staff recommends City Council adopt the ordinance to amend the Fees and Charges Manual to support AH and the cost of services, effective December 1, 2004.

Discussion occurred as Mr. Summey responded to various questions from Council regarding the fees and the reasoning behind the fees.

City Attorney Oast responded to Councilwoman Newman regarding any legal constraints for waivers, rebates and reductions for permitting.

Mr. Summey noted that the Development Review Task Force said that when fees are waived or rebated, they want the taxpayers (the citizens that pay their annual city/county property tax bill) not the other contractors (paying for permit fees) to subsidize the fees waived or rebated.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this matter on the next formal City Council agenda.

REPORT ON THE NEIGHBORHOOD/DEVELOPER MEETING PROCESS

Planning & Development Director Scott Shuford said that City Council requested an update on the Neighborhood/Development (N/D) meeting procedures, which have been in effect for one year.

Three N/D meetings have been held. One was an "informal" meeting that occurred prior to the formal adoption of the process. Two other meetings were formal N/D meetings involving primarily the Kenilworth Forest neighborhood (Foxwood Apartments and May Apartments).

Our experience with these N/D meetings has been mixed. The informal meeting involving a proposed rezoning went relatively well, with the developer agreeing to a number of voluntary concessions that satisfied neighborhood concerns. The two formal meetings were less successful. In general, during these meetings, there was a real difficulty in getting this highly-organized neighborhood to overcome its adamant opposition to these projects in order to allow negotiation and compromise to occur.

Staff still feels that N/D meetings have the potential to be a valuable tool in our development review toolbox. We are reluctant to recommend either for or against continuing the process based on this limited sample. We are taking several steps to improve the process, such as providing a more clear notice letter (establishing meeting goals and expectations), changes to the format of the start of the meetings, and researching successful programs in other areas. We will also work with the Coalition of Asheville leadership to implement their ideas for improving the process.

Despite the limited success of N/D meetings to result in a less antagonistic development review process, staff recommends that we continue with them for another year. We would like to have experience with other development projects and other neighborhoods before coming to a final decision about whether or not to continue with this type of public involvement.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that he would look for ways in which to address incentives for neighborhoods to participate in this process.

Ms. Barber Melton, representing the Coalition of Asheville Neighborhoods, felt they could enhance the process.

It was the consensus of City Council to continue with Neighborhood/Developer meetings for another year and report back with their findings after that year.

FISCAL IMPACT ANALYSIS REPORT

Planning & Development Director Scott Shuford said that City Council recently debated the advisability of rezoning a property for possible nonprofit use and directed staff to prepare a report on this subject for Council consideration.

Planning staff has researched this issue. Usually when communities have concerns about this type of issue, they utilize a tool called "fiscal impact analysis" to address their concerns.

There are two basic types of fiscal impact analysis – comprehensive and development review. Comprehensive fiscal impact analysis looks at the community as a whole and is used for a variety of purposes, ranging from alternative development pattern analysis to capital improvement programming to operational budgeting to coordinating levels of service to determining intergovernmental impacts of development.

Mr. Shuford reviewed with Council details about this form of fiscal impact analysis, but did not recommend that such an effort be undertaken at this time.

The second type of fiscal impact analysis occurs as part of the development review process. In areas where they are allowed, impact fee exactions are one form of assessing new developments for their service impacts. Since that option is not available to us, we suggest that if Council is interested in adding fiscal impact analysis to our development review process, that we clearly identify the scale of development to which to apply the fiscal impact analysis "tool" (staff recommends Level III projects) and the types of services to be analyzed (staff recommends only analyzing public safety services - we already address water, sewer and transportation using existing requirements such as allocation commitments and traffic impact analyses; schools are largely the County's responsibility and they can project future needs in the City by examining zoning patterns; and we are in the process of preparing an open space ordinance for Council's consideration).

Finally, since there is interest in managing our fiscal matters through land use planning, staff recommends that Council direct City staff to (1) prioritize instituting a higher land value zoning along selected corridors, the river district and in neighborhoods where a plan for such development has been prepared (e.g., WECAN); and (2) add a public safety impact as part of our large scale development review process as an eighth condition to the conditional use process.

Several comments and concerns were raised, including, but not limited to, the schools impact regarding development review and what is the impact of non-profits.

Councilman Newman requested additional information on what the current policy is regarding exemptions for non-profits and what the process would be if Council proposes to the State a more fair policy. In addition he would like to have information on how the current tax-exempt developments are impacting our community.

Regarding the amendment to the Unified Development Ordinance (by adding an eighth condition to the conditional use process), Mr. Shuford said that he would draft a condition and then see how we might apply it in a particular circumstance. Then, he will report back to Council to make sure that they have some level of comfort with the condition and then seek feedback.

It was the consensus of City Council to direct staff to (1) prioritize instituting a higher land value zoning along selected corridors, the river district and in neighborhoods where a plan for such development has been prepared (e.g., WECAN); and (2) add a public safety impact as an eighth condition to the conditional use process.

DESIGNATION OF A LOCAL HISTORIC LANDMARK – RICE CORNELL BROWN HOUSE ON RICE BRANCH ROAD

Planning & Development Director Scott Shuford said that this is the consideration of a motion setting a public hearing on November 9, 2004, to designate the Rice Cornell Brown House on Rice Branch Road as a local historic landmark

The proposed landmark designation consists of the Rice-Cornell-Brown House with its ca. 1850 original portion and subsequent 1890, 1927 and 1953 additions; a ca. 1848 cabin moved to the site in 1975; a ca. 1848 pig pen moved to the site in 1975; a ca. 1848 smoke house moved to the site in 1975; and a tool shed built in 1953, all of which are contributing structures. Also included is a 1968 horse barn, which is a non-contributing structure.

The Rice-Cornell-Brown House is an assemblage of three main side-gabled blocks that reflect the century long development of the house from a single-pen, log cabin to a modest but well crafted log and frame house that retains integrity from each of its periods of development.

The original structure of the Rice-Cornell-Brown House was a one and one-half story plus loft, one room log cabin constructed of half dovetailed, hand hewn logs. The 1890 addition, which extends to the east, is wood frame construction with unpainted clapboard siding and a side gabled roof of asphalt shingles. The inside of this addition exhibits more detailing than the original one-room cabin with beaded ceilings and plaster walls. The 1927 one room addition, located to the southeast of the 1890 addition, is of frame construction, unpainted clapboard siding and gable roof with asphalt shingles, similar to the 1890 addition. Inside the walls and ceiling are of rough sawn boards. The 1953 addition built on the south side and extending the full length of the original cabin has stained board and batten siding with a low pitched gable roof of asphalt shingles. The interior was designed to be in keeping with the rustic style of the rest of the cabin.

The Rice-Cornell-Brown House, the site, as well as the additional structures and outbuildings, with a period of significance from 1848-1953, are historically significant for their contribution to the broad pattern of history of the Beaverdam Valley. They represent the evolution of a small log cabin that housed subsistence farmers, into an early 20th century working farmstead. Additionally, the House is significant as it is the most architecturally intact of only two examples in the County exemplifying the use of native materials and mid-nineteenth century log cabin construction techniques and the later evolution of the building as the family grew and prospered.

The additional mid-nineteenth century log house and structures moved to the site in 1975 are also important as both historic and architectural reminders of the widespread use of this house form throughout Buncombe County. These structures would have been demolished if not moved from their original site.

The Rice-Cornell-Brown House was listed on the National Register of Historic Places on December 24, 1998. The listed property includes a 26-27 acre tract of land, which is the residual

acreage of the tract that was farmed by the J.O. Rice family, builders of the original log portion of the house. The current landmark designation would only include a 6.71 acre portion of that larger tract. The 6.71 acres being the location of the original house and contributing outbuildings. The remainder is a separate 20 acre tract, which is currently in forest use and maintained under a forest management plan.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $224,200. If the property is designated as a local landmark the potential tax savings for the property owner, including city, county and school taxes, would be $1479.72.

Although designation of the property places no obligation on the property owner to provide public access to the property, the Brown's while being good stewards of the land and structures have allowed and encouraged public access to many organizations and other groups over the years, such as high school clubs, church groups, the Preservation Society and very recently the Sons of the Confederacy, just to name a few.

The ordinance designates the Rice-Cornell-Brown House as a local historic landmark. The property included in the designation consists of Rice-Cornell-Brown House and the 1.61 acre parcel on which it is located. The designation also includes the exterior of the house, some interior details and landscape features.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Pros:

- The designation will provide the property owner with a local property tax deferral that will help with the costs of keeping the structure in good repair.
- A significant property will be recognized for its contribution both architecturally and culturally to the history of the area.

Cons:

- The tax deferral will result in a loss of revenue to the city and county.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance designating the Rice-Cornell-Brown House, as a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this public hearing on the November 9, 2004, formal City Council agenda.

TRAFFIC CALMING UPDATE

City Traffic Engineer Anthony Butzek said that in February 2000, City Council adopted the City's Traffic Calming Policy, setting forth policies for the installation of traffic calming on City streets. At this time, a demonstration project had already been completed on Lakeshore Drive. The first five projects under the new policy were completed between winter 2002 and spring 2003. These projects were 1) South French Broad Avenue, 2) Wyoming Road, 3) Caribou Road

and Booker Avenue, 4) Florida Avenue and Dorchester Avenue, and 5) Gracelyn Road and Ottari Road. The work was completed by private contractors and administered through the City's Engineering Department. It has been, and continues to be the policy to distribute these projects geographically within the City.

In May 2003, the City issued a request for bids for the next project, Murdock Avenue in north, and Ridgelawn Road and Wellington Road in west. Due to the inability to obtain a contractor at a reasonable price, we have not been able to award a contract for the work. The Public Works Department has agreed to fit the work into their schedule. Concrete work (islands and chicanes) is expected to be completed by April 2005, and asphalt work (humps) is expected to be completed in Fall 2005.

The next project scheduled using money allocated by City Council is Kenilworth Road. City staff plans to complete preliminary plans by the end of year 2004 for the neighborhood to undertake the petition process. Funds allocated by Council for traffic calming is $50,000 a year and the funds allocated for '04-'05 and '05-'06 are planned to be used for the Kenilworth Road project.

Several projects are scheduled, in which construction is being funded in conjunction with private development, but designed and administered by City staff. This includes Redwood Forest in east, and Shiloh in south. We plan to request bids on Kenilworth, Redwood Forest, and Shiloh as one project, which will be dependent on receiving required petitions expeditiously. Given past history, this process could take between one and two years, depending on community response and competitiveness of bids.

The engineer's estimate for the most recent project was about $77,000 per mile of traffic calming. The most recent bid for same was about $114,500 per mile. We believe the engineer's estimate is reasonable, and that the contractor's bids were excessive due to lack of local competition, particularly in the asphalt industry.

At this time, we have not prioritized future projects beyond Kenilworth Road. We have requests for traffic calming on about 300 street segments in the City, totaling about 100 miles of streets. The streets which appear to be most impacted by existing traffic, based on measured traffic volumes and measured speeding are:

- Cedar Street and Wood Avenue, 0.74 miles
- Kimberly Avenue and Edwin Place, 1.65 miles
- Montford Avenue, 0.89 miles
- South French Broad Avenue (Phifer to Livingston), 0.47 miles
- Edgewood Road (north), 0.36 miles
- School Road East, 0.52 miles
- Chestnut Street, 1.12 miles
- Bear Creek Road, 0.73 miles
- London Road, 0.70 miles
- Burton Street, 0.56 miles
- Hanover Street, 0.50 miles
- State Street, 1.00 miles
- Forest Hill Drive (Wyoming to Biltmore), 0.23 miles
- Westwood Place, 0.70 miles
- Shelburne Road, 0.67 miles

These total to 10.84 miles. In addition, there are many more residential streets on which traffic volumes are relatively low, but speeding is particularly prevalent, including Cisco Road, Michigan Avenue, and Riverview Drive.

Pros of traffic calming

- Speeding is significantly reduced
- Need for enforcement is significantly reduced
- Quality of life is improved for residents of streets
- Can include aesthetic enhancements to support community

Cons

- Costs for installation
- Require maintenance
- Some opposition to measures (minority of residents)

Traffic calming supports an efficient transportation system by managing traffic demand in neighborhoods.

Upon inquiry of Councilwoman Bellamy, Mr. Butzek said that after the Kenilworth Road project, they will go back to the data they have on the top streets listed above and re-prioritize based on the system that was created with the policy, which is based on the speed along the street, volume on the street and some other geometric factors.

In response to Councilman Davis regarding bidding the work vs. using City forces, Mr. Butzek said that the current plan is to continue to bid the projects and to meet with contractors to find out why they are not bidding so we can get a more competitive process. We are still optimistic that is still a workable solution, because using City forces takes them away from their already prioritized work schedule.

Councilman Davis said that traffic calming has become the things that neighborhoods want the most because it is popular to talk about. However, some neighborhoods who had traffic calming installed are unhappy with speed humps. He is concerned we have a monster and is not sure how we can pay for all the traffic calming. He senses this may be a tread that we see with all kinds of developments, but Council needs to be cognizant that this is very expensive work.

Mr. Butzek said that traffic calming is being more prevalent nation-wide in cities and the residents on the street tend to be happy with the project, although the people driving through are inconvenienced slightly by it.

Upon inquiry of Councilwoman Bellamy, City Engineer Cathy Ball said that regarding maintenance of the islands, we typically try to get a contract with the community to maintain the islands. It was never the intent to use traffic calming money on maintenance. Councilwoman Bellamy responded that it's not realistic to think that we can get neighborhoods to cut the grass every two weeks, so we need to re-think the feasibility of what we are implementing in neighborhoods.

Vice-Mayor Mumpower said there is a point of balance between cost and impact. He said that one of the most cost efficient traffic calming methods is speed humps. Since we have very limited funds, he hoped we would look for ways to spread it out as much as possible and if we have a choice between elaborate concrete work or speed humps, he hoped we would use a the cost-effective effort.

Mr. Butzek said that even though speed humps are the lowest costs, however, in terms of effectiveness, it tends to be more effective to have a mix of measures.

Upon inquiry of Councilman Dunn and Councilwoman Jones, Mr. Butzek reviewed the traffic calming policy with regard to obtaining signatures on the petitions, who is eligible to sign, and is there a time limit on when a petition is completed.

Councilwoman Jones felt that the City should add another variable in their criteria when they look at prioritizing streets for traffic calming. That variable should be future development in the area. Another time-saver variable might be to review the top neighborhoods already identified for traffic calming and to see if they can make the 40% petition requirement.

RESOLUTION NO. 04-227 - RESOLUTION SETTING A PUBLIC HEARING ON NOVEMBER 9, 2004, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HIGHWATER CLAYS

Economic Development Director Mac Williams said that this is the consideration of a resolution setting a public hearing on November 9, 2004, to consider an economic development incentive grant for Highwater Clays.

City Council approved a grant to HighWater Clays in June 2003 and the required performance agreement was signed. In February 2004, HighWater Clays asked to revise that agreement as they anticipated investing a significantly higher amount than was originally programmed. It was determined that a brand new agreement would be needed, including going through the public process again, versus simply revising the original agreement.

Based on new information, the capital investment, for purposes of determining a grant amount is now $1,560,000 (vs. $750,000 originally) in building renovation and new equipment. Further, the owner states that the number of new jobs created will go up from 5 to 7 and that the average hourly wage will go up to $10.43 from $9.00.

As an incentive, Council originally agreed to $7,500 payable in two equal installments. For the new grant, it is proposed to offer $31,000 payable in equal installments over five years.

Support statements:

- Grant supports expansion of local small business. This supports Strategic Plan: Key Area – Economic Development Goal 1, Objective A.
- HighWater Clays continues to invest in riverfront area.

Staff recommends approval of the resolution setting a public hearing on November 9, 2004, to consider an economic development incentive grant to HighWater Clays.

Councilwoman Jones moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Dunn and carried unanimously.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-227. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 404

KINDNESS CAMPAIGN

Vice-Mayor Mumpower introduced Dr. Barry K. Weinhold who said that the Kindness Campaign has been utilized successfully in 11 other U.S. cities to bring positive changes to the culture of those cities.

He gave a brief background of the Kindness Campaign by saying that (1) a primary prevention program started in 1994 that focuses on creating communities of kindness; (2) designed to recognize positive behaviors in order to create a more positive community, school, family, and workplace climate; (3) basic premise is to eliminate a negative behavior (criminal acts, hatred, discrimination) and focus on it's opposite – kindness; and (4) started in over 600 schools in the U.S. and Canada and 11 other U.S. cities.

The goals of the Kindness Campaign are (1) to help create a more positive climate in schools, communities, families and the workplace; and (2) to create primary prevention programs in communities that address the underlying causes of community, school, family and workplace violence by promoting the collective recognition of acts of kindness.

Dr. Weinhold reviewed the outcomes of the Kindness Campaign. He then said that successes to date for the Kindness Campaign Asheville include (1) selected Citizen-Times as media sponsor; (2) enrolled 50 volunteers; (3) enrolled RiverLink as community sponsor; (4) received grant from Jubilee to purchase buttons; (4) distributed about 2,000 buttons since August, 2004; (5) presented Community of Kindness Awards to Progress Energy and to three area residents; (6) scheduled community kick-off meeting for October 22, 2004, at the First Baptist Church; (7) published article on Kindness Campaign in Asheville in Spirit in the Smokies magazine; (8) Earth Fare offers gift certificates to award winners; and (9) began forming a Community Advisory Board.

Dr. Weinhold asked for City Council support of this Campaign by being models of kindness and encouraging City employees to become part of the Campaign. He invited Council to the kick-off meeting on October 22, 2004.

BOARDS AND COMMISSIONS

It was the consensus of City Council to have the City Clerk arrange interviews with Jim Ellis, Kenneth Kaplan, Fred Slosman, Duane Jarnecke and Lisa-Gaye Hall for vacancies on the Alcoholic Beverage Control Board.

It was the consensus of City Council to have the City Clerk arrange interviews with Robert Middlemas, Starr Silvis and Penny Rush for a vacancy for an alternate position on the Board of Adjustment.

It was the consensus of City Council to have the City Clerk arrange an interview with Brian Tuner for a vacancy on the Civic Center Commission. In addition, it was the consensus of Council to appoint George Keller to fill the unexpired term of Peter Crosa, term to expire June 30, 2006.

It was the consensus of City Council to have the City Clerk arrange interviews with Diane Vander Linden, Rudy Rodriquez, Lisa Sarasohn and Melinda Rains for vacancies on the Film Commission. In addition, it was the consensus of City Council to appoint Vice-Mayor Mumpower and reappoint David Schulman, Lee Nesbitt, Steven Lutz, Diedra Smith and Leni Sitnick to each serve an additional three-year term respectively.

It was the consensus of City Council to have the City Clerk arrange interviews with Joseph Minicozzi and Jerome Jones for a vacancy on the Planning & Zoning Commission.

It was the consensus of City Council to have the City Clerk readvertise for the vacancy on the Recreation Board.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:15 p.m.

Magdalen Bourlesos
CITY CLERK

Charles A. Worley
MAYOR

Tuesday – November 9, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy (excused from meeting at 8:16 p.m.); Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION & PLEDGE OF ALLEGIANCE

Mayor Worley said that a couple of weeks ago Col. Ray Green died. After Col. Green retired from the U.S. Air Force he continued to give his time to the community. Col. Green led City Council many times in the Pledge of Allegiance and he will be missed. Mayor Worley then gave the invocation, followed by the Pledge of Allegiance.

I. PROCLAMATIONS:

A. THE ASHEVILLE CITY DEVELOPMENT PLAN 2025

Mayor Worley was pleased to announce that The Asheville City Development Plan 2025 received the 2004 Marvin Collins Outstanding Planning Award from the N. C. Chapter of the American Planning Association for large communities. He recognized facilitator Paul Godfrey and members of the City Plan Advisory Committee. Ms. Hazel Fobes said that the Plan does not specify strategies for the Regional Water Authority and accepted the Award noting that omission.

II. CONSENT AGENDA:

Vice-Mayor Bellamy asked that Consent Agenda items "F" and "G" be removed from the Consent Agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 12, 2004; THE JOINT CITY/COUNTY MEETING HELD ON OCTOBER 19, 2004; AND THE WORKSESSION HELD ON OCTOBER 19, 2004

B. RESOLUTION NO. 04-229 - RESOLUTION SUPPORTING THE FIRE AND RESCUE STRATEGIC PLAN

Summary: The consideration of a resolution adopting Asheville Fire Rescue's Strategic Plan and Standard of Response Cover.

Fire and Rescue staff has been working diligently for several years towards meeting the national fire and rescue services accreditation standards. Staff has now completed the requirements to be reviewed by the Commission on Fire Accreditation International (CFAI). A site visit by peer reviewers is scheduled for November with award of accredited status slated for February, 2005. If all requirements are met, Asheville Fire and Rescue will become the eighth accredited fire and rescue agency in North Carolina and the first accredited agency in Western North Carolina Prior to the site visit by CFAI, City Council will need to endorse the department's standard of cover and strategic operating plan.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operation Plan. It meets that goal in the section on Critical Services and Infrastructure, Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

The recognized national model which a fire and rescue agency validates their services is through the CFAI accreditation commission. The CFAI accreditation commission is comprised of fire service leaders from agencies of differing size as well as the International City Manager's Association (ICMA), city government, county government, the insurance industry, labor representatives, the International Association of Fire Chiefs (IAFC) and citizens at large.

At this time, the accreditation process is completely voluntary and has been in full effect for approximately the past five years. To date, within the State of North Carolina, there are seven accredited fire and rescue departments (Cary, Charlotte, Gastonia, Greensboro, Jacksonville, Rocky Mount, Wilson). Nationally, 96 agencies have received accredited agency status. Many more departments are currently at some point in the process. All metropolitan fire and rescue departments in North Carolina are involved in the CFAI accreditation process.

The accreditation process has several key components. Over eighty (80) members of the fire and rescue department have been actively involved in formulating these three key components. These include:

1. **Performance Indicators**
   There are 254 individual performance indicators that analyze department operations. Of these 254, 108 indicators are considered "core competencies" and must be met in order to become an accredited agency. The indicators are in the following categories:
   a. Governance and Administration
   b. Assessment and Planning
   c. Goals and Objectives
   d. Financial Resource Management
   e. Programs
   f. Physical Resources
   g. Human Resources
   h. Training and Competency
   i. Essential Resources
   j. External Systems Relations

2. **Strategic Operating Plan**
   The strategic plan for the department would parallel the City's Strategic Operating Plan and give the department a specified work plan that goals and objectives can be formulated from. It is envisioned that the department's strategic operating plan be adjusted at least annually in concert with modifications of the city's strategic operating plan.

3. **Standard of Cover**
   The standard of cover illustrates the department's level of service. This is developed from a risk assessment that consists of the following:
   a. Fire flow – amount of water to control the emergency
   b. Probability – likelihood that a particular event will occur within a given time
   c. Consequence – life safety as well as economic impact
   d. Occupancy Risk – risk to life and property
   e. Fire Management Zones – geographical areas of need or risk
   f. Community Profile – demographics, level of services provided

In addition, the standards of response coverage consists of three key elements. These are:

a. Distribution of resources – deployment of facilities and apparatus
b. Concentration of resources – ability to deliver and effective response force
c. Staffing levels – personnel and their task assignments

Completion of the comprehensive standard of cover document for the department has required a significant amount of research and data collection and data analysis by our firefighters.

Why should Asheville Fire and Rescue become an accredited agency? (PROS):

- Assures City Council and our community that the fire and rescue department is performing according to national standards and that the organization is being managed in a professional manner.
- Ensures that we have proper procedures, policies and guidelines in place and that we are delivering the services needed by our community through risk analysis.
- Promotes excellence within the fire/emergency service organization.
- Encourages quality improvement through a continuous process.
- Provides assurance to the public that the department has a defined mission and related objectives that will result in improved performance by the department.
- Provides a detailed evaluation of the department and the services it provides to the community that we serve and protect.
- Identifies areas of strength and weakness within the department.
- Provides a forum for the communication of management and leadership philosophies throughout the organization and community.
- Provides a formal mechanism for developing concurrent documents, such as strategic and business plans and continuously analyzes all of the services that the department is involved with.
- Fosters pride in the organization and promotes professionalism.
- The strategic plan for the department would parallel the City's Strategic Operating Plan and give the department a specified work plan that goals and objectives can be formulated from.

Concerns (CONS):

There have been no cons identified with the accreditation process for Asheville Fire and Rescue Department at this time. The effort and energy to perform the key components of the process have been completed. There are no substantial continuing costs in maintaining accredited agency status. Re-accreditation is on a five calendar year cycle.

City staff recommends City Council allow the Fire and Rescue Department to complete their accredited agency status from CFAI by giving their support to the Asheville Fire and Rescue Department's Strategic Operating Plan by adoption of the standard of response cover document for the Asheville Fire and Rescue Department.

RESOLUTION BOOK NO. 28 – PAGE 407

C. RESOLUTION NO. 04-230 - RESOLUTION ACCEPTING THE NEW STREET NAME "MAGNUM WAY"

Summary: The consideration of a resolution accepting the new proposed street name "Magnum Way."

George G. Lycan, owner of lots on Magnum Way off of Round Top Road, has petitioned the City of Asheville to accept the street name " Magnum Way." The new street will begin at Round Top Road and end at T-turn on Magnum Way.

City staff recommends adoption of the resolution accepting the new proposed street name "Magnum Way."

RESOLUTION BOOK NO. 28 – PAGE 408

D. RESOLUTION NO. 04-231 - RESOLUTION ACCEPTING THE NEW STREET NAMES "BULLDOG DRIVE" AND "LASER CIRCLE"

Summary: The consideration of a resolution accepting the new proposed street names "Bulldog Drive" and "Laser Circle" in the Campus Crest community.

Campus Crest of Asheville, LLC, owner of lots off of Montford Avenue, has petitioned the City of Asheville to accept the street names "Bulldog Drive" and "Laser Circle" within the Campus Crest community. The new street Bulldog Drive will begin at Montford Avenue and end at Zillicoa Street. The new street Laser Circle will begin at Bulldog Drive and end at Zillicoa Street.

City staff recommends adoption of the resolution accepting the new proposed street names "Bulldog Drive" and "Laser Circle" in the Campus Crest community.

RESOLUTION BOOK NO. 28 – PAGE 409

E. RESOLUTION NO. 04-232 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "APPELDOORN CIRCLE"

Summary: The consideration of a resolution accepting the new proposed street name "Appeldoorn Circle."

C&R Project Development; owner of lots off of Brooklyn Road, have petitioned the City of Asheville to accept the street name " Appeldoorn Circle."
The new drive-around street will begin and end at 200 Brooklyn Road.

City staff recommends adoption of the resolution accepting the new proposed street name "Appeldoorn Circle."

RESOLUTION BOOK NO. 28 – PAGE 410

F. RESOLUTION APPROVING AN AMENDMENT TO THE 2004 CONSOLIDATED ACTION PLAN

This item was removed from the Consent Agenda due to a conflict of interest.

G. BUDGET AMENDMENT TO ALLOCATE ADDITIONAL COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS FOR EMERGENCY HOUSING REPAIRS DUE TO STORM DAMAGE

This item was removed from the Consent Agenda due to a conflict of interest.

H. ORDINANCE NO. 3173 - BUDGET AMENDMENT TO CONTINUE CONSTRUCTION OF THE GLENN CREEK GREENWAY

Summary: The consideration of a budget amendment, in the amount of $50,000, from the National Trails Grant Program to continue the Glenn Creek Greenway across Merrimon Avenue into Weaver Park.

The Asheville Parks and Recreation Department and the Asheville Greenway Commission continue to work towards the development and implementation of the Greenway Master Plan. A critical connection to downtown has always been connecting North Asheville residents to the Glenn Creek Greenway near UNC-Asheville. The Department has been successful in receiving a $50,000 grant from the National Trails Grant Program that will allow the existing trail at Weaver Park to be expanded and a connection made to the Glenn Creek Greenway on Merrimon Avenue. This will allow residents near Weaver Park to safely connect to the Glenn Creek Greenway and then ultimately on to the Reed Creek Greenway into downtown. This grant requires a 20% match, which is being met through in-kind services by the Parks and Recreation Department for design and construction.

Pros:

- This will allow continued development of the greenway system with no taxpayer dollars required.
- This will allow safe connection from North Asheville ultimately to downtown using the greenway system.
- This meets the objectives of the Greenway Master Plan.

Cons: None

This project meets several goals established by the Strategic Operating Plan, specifically, the natural and built environment focus area. This will address the goal for increased greenway benefits throughout Asheville.

City staff recommends City Council approval of a budget amendment, in the amount of $50,000, to continue the Glenn Creek Greenway across Merrimon Avenue into Weaver Park.

ORDINANCE BOOK NO. 21 – PAGE 350

I. ORDINANCE NO. 3174 - BUDGET AMENDMENT TO ALLOCATE FUNDS FROM THE JUNIOR LEAGUE OF ASHEVILLE FOR RENOVATIONS AT THE REID RECREATION CENTER

Summary: The consideration of a budget amendment, in the amount of $97,500, to allocate a grant from the Junior League of Asheville to operate a program at Reid Recreation Center for the Cultural Renaissance of the Arts – Impact Project.

Through the generosity of the Junior League of Asheville, the Parks and Greenway Foundation and the Asheville Parks and Recreation Department are able to provide enhanced cultural arts experiences for youth and teens at the Reid Recreation Center. The Junior League will be providing financial assistance as well as volunteers to assist in a three-year project at the Reid Center. This project includes the funding for renovations at the Center, funds for programming the Cultural Renaissance Program and funds for the After School Program. In addition, the Junior League will assist our staff in developing additional funding resources for continued renovations at the Reid Center. A total of $97,500 will be received over the three-year period as follows:

$15,000 per year for three years for renovations
$15,000 per year for three years for the Cultural Renaissance Art Program
$25,500 per year for three years for the After School Program

Pros:

- This program will address issues facing at-risk youth.
- This program will allow us to leverage additional resources by using these funds as seed money.
- The Junior League will provide assistance for staff to write additional grant for renovations at Reid Center.

Cons: None

This project will address City Council's Strategic Operating Plan by enhancing the focus area of Sense of Place Heritage and the Arts.

City staff recommends City Council approve a budget amendment, in the amount of $97,500, to allocate funds secured from the Junior League of Asheville for renovations at the Reid Community Center.

ORDINANCE BOOK NO. 21 - PAGE 352

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTE

RESOLUTION NO. 04-233 - RESOLUTION APPROVING AN AMENDMENT TO THE 2004 CONSOLIDATED ACTION PLAN

Councilwoman Jones moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

Summary: The consideration of a resolution amending the 2004 Consolidated Action Plan to increase Community Development Block Grant (CDBG) funding for Mountain Housing Opportunities' Emergency Repair Program; and the associated budget amendment in the amount of $20,000.

Mountain Housing Opportunities (MHO) has requested a one-time increase in its CDBG grant for the Emergency Repair Program, from $80,000 to $100,000. Following tropical storms Frances and Ivan, MHO received a sharp increase in repair requests. Much of the work is not covered by insurance or FEMA, either because FEMA doesn't accept it as storm damage or because it exceeds the maximum FEMA grant and the homeowners can't afford an additional loan. MHO will work closely with FEMA to maximize federal assistance in each case, before using local CDBG funds.

Typical repairs are for roof leaks; broken sewer lines; repair or replacement of furnaces or water heaters; electrical hazards; and holes in floors or stairs. Grants range from about $800 to $5,000. The typical recipient is an elderly or disabled homeowner with less than 50% of area median income.

Funds are available from the City's CDBG program income account, due to the recent pay-off of several rehabilitation loans.

The Housing and Community Development Committee considered this request at its October 11 2004, meeting and recommends approval.

Potential Advantages:

- Assistance for an additional 6-10 Asheville residents impacted by the storms
- Grant program provides maximum assistance and speed of response
- Addresses only health and safety issues – not general home improvements
- Will not substitute for FEMA assistance where that is available
- Some homeowners may have to leave their homes if not assisted
- Will allow MHO to continue its normal program through the winter months when furnace failures are a serious hazard.

Disadvantage:

- To the extent that CDBG funds are obligated to this program, it reduces the City's ability to respond to other urgent needs that may arise.

No public notice or public hearing is required, as this is not a new program.

City staff recommends City Council approve a $20,000 increase in the CDBG funding for the MHO Emergency Repair Program and a budget amendment to appropriate program income for that purpose.

Councilman Dunn moved for the adoption of Resolution No. 04-233. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 411

ORDINANCE NO. 3175 - BUDGET AMENDMENT TO ALLOCATE ADDITIONAL COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS FOR EMERGENCY HOUSING REPAIRS DUE TO STORM DAMAGE

Councilman Dunn moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Summary: See Resolution No. 04-233 above.

Councilman Dunn moved for the adoption of Ordinance No. 3175. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 354

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE MOUNTAIN HOUSING OFFICE ADDITION LOCATED AT 64 CLINGMAN AVENUE FOR A PROPOSED EXPANSION OF THEIR OFFICE SPACE

Councilman Davis moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

A letter was received on November 9, 2004, from Mike Vance, Homeownership Manager from Mountain Housing Opportunities Inc., stating that "due to a delay in a required response from HUD, Mountain Housing Opportunities is requesting that our proposal to amend the Conditional Use Permit for the Merritt Park Condominiums scheduled for November 9, 2004, be continued until the next available City Council meeting." Therefore, Councilwoman Jones moved to continue the public hearing until January 11, 2005. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON SPRINGSIDE PARK DRIVE, LOCATED OFF WHITE PINE DRIVE, FOR THE CONSTRUCTION OF A 60-UNIT MULTI-FAMILY DEVELOPMENT (KENILWORTH FOREST VILLAGE APARTMENTS) IN AN RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 3176 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON SPRINGSIDE PARK DRIVE, LOCATED OFF WHITE PINE DRIVE, FOR THE CONSTRUCTION OF A 60-UNIT MULTI-FAMILY DEVELOPMENT (KENILWORTH FOREST VILLAGE APARTMENTS) IN AN RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

Ms. Patsy Brison, attorney representing the Kenilworth Forest Community Club, moved to continue this matter for the following reasons: (1) The application has not been signed by all of the property owners or agents of property owners whose properties are included within the project, as is required by subsection 7-5-2 (c) (1) of the Code of Ordinances of the City of Asheville; (2) The proposed access to the project is by way of a driveway shown on the tax maps as being named "Springside Park Road." We previously raised a question in our July 14, 2004, letter to you regarding the use of this access road and that issues has not been addressed. As a result, there is no clear access to the project; (3) it was not until 4:00 p.m. yesterday that we received a 'revised traffic study' for the project. The revised traffic study was to take into consideration the change in the access road. There were no changes made in the traffic study other than changing the site plan. Among other problems with the traffic study, there is no analysis or study done regarding the limited site distance from the crest of the hill on White Pine Drive to the proposed access road for the project; (4) As a result of recent floods due to hurricanes in September in our area, the flood plain maps are to be redrawn by FEMA. This project includes a flood plain area. At this point, it is not known how much of this property would be affected by the redrawn FEMA maps; (5) It is impossible to tell the amount of acreage which will be available for this project as there is a proposed subdivision of the property which has not yet been completed. As a result, it is impossible to determine the density allowed for the project; (6) the staff report prepared for the City Council public hearing includes City staff 'findings' on the standards required for approval for issuance of a conditional use permit. All of the standards are noted as being met, without having an evidentiary hearing before City Council. This constitutes clear pre-hearing bias, having instructed the City Council on how to find in a positive manner on all of the standards, without having heard the evidence at its quasi-judicial hearing; and (7) the conditions which were required by the Technical Review Committee and the Planning & Zoning Commission to be met prior to submission of City Council have not been met in that an updated traffic analysis and site plan based on the use of Springside Park Drive and associated improvements have not been submitted and the ability to access Springside Park Drive has not been clarified and the road has not been made public." (Neighborhood Exhibit 1)

Ms. Brison said that if Council chooses to deny the first motion, she moved "to strike the staff report in that it constitutes evidence provided to the City Council outside of the quasi-judicial hearing." This constitutes pre-hearing bias in violation of the standard set forth in Crump v. Board of Education and its progeny. (Neighborhood Exhibit 1)

Ms. Brison further stated that "it remains our view that the access to this property must be resolved before the conditional use permit can be approved. While there may be private property rights involved and at issue, it is our view that a City permit cannot be approved without proof of adequate access to the project site. In addition, it is our view that the property owners who own the underlying fee over which the proposed access road is to be constructed must be a part of the application process. We have found no evidence that the applicant, Virginia May, owns the underlying fee for the properties over which the access road is to be constructed." (Neighborhood Exhibit 1)

City Attorney Oast said that he has considered all of the reasons for continuance and doesn't think that any of them is a basis for continuing the hearing tonight. (1) The access issue has been raised and he didn't think that this is the appropriate forum to resolve the issues regarding private property rights. City Code Section 7-2-4 (c) states that this chapter (meaning the Unified Development Ordinance) "is not intended to abrogate any easement, covenant, or other private agreement." Whatever rights exist in that access are matters that if they are not resolved to the point that a road can be built there, the project can't be built. This Council cannot resolve those issues as they need to be resolved in another forum; (2) As to the issue of pre-hearing bias, he has examined case law and he didn't think that is an issue. This Council receives staff reports all the time and Council frequently makes decisions contrary to those staff reports. He does asks before each conditional use permit public hearing whether Council has any information that they think would cause them to not make a fair decision in the case. There is nothing that he is aware of that prevents Council from receiving this information from staff; (3) Regarding the redrawn FEMA maps, he was not aware of anything where FEMA had indicated that the City should stop development in or near floodplains; and (4) City staff feels that the property owners or their agents have signed the application. In summary, it was City Attorney Oast's recommendation that Council can proceed with the hearing.

Upon inquiry of Councilman Dunn, City Attorney Oast said that the applicant has made application and they asserting that they have access Others say they don't have access. Again, this Council can't resolve that issue. We do require any new development in the City, especially with a conditional use permit, have appropriate access to a public road or on a public road. Even if Council grants the conditional use permit and they find they don't have access, the project can't go forward.

Upon inquiry of Councilman Newman, City Attorney Oast said that the subdivision will occur after the project is approved. As he understands it, the applicant wants to subdivide the piece of property that has the single-family residence on it away from the rest of the project. It doesn't make sense to do that unless the project is approved. And when that is done, it will have to comply with our subdivision regulations.

When Mayor Worley asked for a motion by Council to grant or deny Ms. Brison's continuance motion, there was none. Therefore, in the absence of a motion, Mayor Worley ruled the continuance request denied.

When Mayor Worley asked for a motion by Council to grant or deny Ms. Brison's motion to strike the staff report, there was none. Therefore in the absence of a motion, Mayor Worley ruled the motion to strike the staff report was denied.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site-specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:36 p.m.

Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for property located on Springside Park Drive, located off White Pine Drive, for the construction of a 60-unit multi-family development (Kenilworth Forest Village Apartments) in an RM-8 Residential Multi-Family Medium Density District. This project is a request from Virginia May for a Level III site plan approval.

This project was originally submitted and reviewed under the Neighborhood Developer Meeting Procedures. However, prior to the scheduled Council meeting in May of this year, the developer withdrew the project due to unresolved private matters concerning deed restrictions for the use of the property and the legality of using Springside Park Drive as the proposed access for the development. There were also questions regarding the number of units proposed. The owner has since hired legal counsel to address the deed restrictions, and also the question regarding whether this development has legal conveyance to use Springside Park Drive, both considered private matters between the two parties involved.

The site plans for this project have been revised from what was submitted during the initial review and include the following revisions:

1. The relocation of the drive entrance from White Pine Drive to Springside Park Drive.
2. A change in lot sizes for the main tract of land that will house the development and also the proposed lot housing the owner's existing residence.
3. Relocation of the dumpster which has been moved further west of its original location and 58 feet in from the abutting vacant residentially zoned tract on the south side of the site.
4. A reduced buffer with privacy fence has been added along the access drive; and
5. The maximum height of retaining walls has been added to the plans.

The project site is located off of Springside Park Drive, a private street that is located off of White Pine Drive within the Kenilworth Forest Neighborhood (Attachment to City Exhibit 3 – Location Map). The parcel consists of 7.16 acres and is zoned RM-8 Residential Multi-Family Medium Density District. The owner's residence also located on this parcel will be subdivided from the main tract, leaving 6.9 acres (Attachment to City Exhibit 3 – Aerial Map). In this district, 5,000 square feet per unit is required. Based on the remaining acreage, 60 units are permitted.

Single-family development is prominent along portions of the East and south sides of the property closest to White Pine Drive. Single-family development is found along portions of the west sides of the property along with several large vacant-residential tracts of land. A motel,

apartment complex and a large vacant parcel border sections of the northeastern side of the property on the east side of Springside Park Drive (Attachment to City Exhibit 3 – Aerial Map).

The existing topography on the lot portrays a moderately steep decline in elevation along the northern side of the property. The more level areas of the site are located between the west and south sides of the property, where the majority of the development will be concentrated (Attachment to City Exhibit 3 – Aerial Map). Portions of this property are also located within the 100-year flood plain due to the location of Ross Creek, which flows along portions of the northwestern and northern property lines (Attachment to City Exhibit 3 – Aerial Map). A small section of one of the proposed buildings is located within this flood plain area, however, as long as the building is elevated to meet the FEMA requirements, this would be permissible.

The conceptual site plan proposes a 22-foot driveway off of Springside Park Drive as access to the development (Attachment to City Exhibit 3 – Zoning Site Plan). In addition to the new driveway, the City will require that Springside Park Drive be improved to meet the City's street standards and require that the road be made public.

The development will consist of two apartment buildings, housing 30 units each. Ten units in each building will be provided a one-car garage on the lowest level of the building. In addition, a parking lot consisting of 96 spaces will be constructed to serve the facility.

Open space for the development is being provided in two large areas within the site along the north and on west side of the property (Attachment to City Exhibit 3 – Zoning Site Plan). As an added amenity to the facility, the developer is proposing several walking trails and bird watching stations within these areas. Additionally, a 30-foot greenway easement along Ross Creek will be dedicated to the City that will provide for a future greenway connection.

In addition to the vegetation being preserved by the developer in these areas, an equivalent of a 20-foot, type "B" vegetative buffer is required along the entire perimeter of property, with street trees along the access drive and parking lot landscaping as required by the Unified Development Ordinance (UDO). The applicant is proposing a 6-foot privacy fence in lieu of the 20-foot vegetative buffer along the access drive between the owner's residence and abutting residential property along the east side of the site.

The proposed building elevations for the project illustrate the use of high-quality materials and added architectural and design elements that will enhance the appearance of the buildings (Attachment to City Exhibit 3 – Building Elevations). Cultured stonework, hardiplank siding, and architectural shingles are among the list of materials proposed for the façade of the buildings. A total of 36 – one-bedroom units; and 24 – two bedroom units are proposed. The buildings will be constructed in a ¾ story split design, 3 stories in the front facing White Pine Drive, and 4 stories in the rear.

Although not relevant to the process by which we are reviewing this project today, a Neighborhood Developer Meeting with the Kenilworth residents was held on Thursday, April 29, 2004. The residents in attendance at the meeting expressed a number of concerns in regards to the proposed development including: deed restrictions for the use of the property, traffic concerns, location of the proposed entrance and trash compactor, impact of development on Ross Creek, and light and noise pollution generated by the development.

Regarding two of the main issues raised by the neighborhood concerning traffic and deed restrictions, the City's Traffic Engineer Anthony Butzek has stated that the level of service and capacity of the development does not meet the threshold for requiring a Traffic Impact Analysis (TIA). The developer, however, in order to address traffic concerns by the neighborhood, chose to have a traffic study completed for the development that was submitted to the City for review

during the initial application of the project. The City's Traffic Engineer requested a revised copy of the traffic study to be provided before this hearing in order to review site distance requirements at Springside Park Drive and White Pine Drive. It was her understanding that Mr. Butzek has received the revised traffic study.

In regards to the referenced deed issues, staff consulted with the City Attorney who has advised that enforcement of private deed restrictions is a private matter and should be disregarded in our consideration of the request.

Other concerns raised by the neighborhood have been addressed with the re-submittal of plans and also with added conditions, should Council choose to approve the project.

On Wednesday, October 6, 2004, the Asheville Planning and Zoning Commission approved the project subject to the conditions by Technical Review Committee (TRC) and recommended conditions by staff.

The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety;

   The proposed use of the property is a multi-family residential project. Prior to the issuance of any permits, the Technical Review Committee will review the final detailed plans to insure technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety, are met.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

   Grading of the site will be necessary to develop the property as proposed. The site has been designed in a manner that is environmentally sensitive by concentrating the development on the more level areas of the site, limiting land disturbance near Ross Creek and significant steep areas; and by preserving existing large vegetated areas that will be reserved for open space.

   A condition has been added to the project for the developer to work with staff to ensure water quality issues in relation to Ross Creek are addressed by means of stream bank stabilization, appropriate wetland species, riparian buffers and use of other Best Management Practice tools.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

   Landscape buffering will be installed in accordance with the standards set forth in the UDO. In addition, several large wooded areas along the North and West sides of the property will remain undisturbed and be reserved toward the required open space standards. The buildings will also be constructed with long lasting materials and enhanced with architectural features that will have a positive effect on the surrounding community.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

   The development is being proposed at the density permitted for the lot. The low-density residential properties along White Pine Drive sit at a higher elevation than the proposed development. This will assist in providing visual relief of the full scale and height of the buildings.

   In addition, landscape buffering will be installed along the entire perimeter of the property that will assist in mitigating any negative impacts the development may have on abutting properties and will also increase the compatibility of the site with the surrounding area. The proposed buildings are also being designed with enhanced architectural features that will increase their compatibility with the neighborhood.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

   The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and transportation goals. The project utilizes the existing zoning on the lot to create a sustainable medium-density residential development within the city limits and where infrastructure capable of handling this type of development exists. The site is also within very close proximity of transit service, potential employment centers, restaurants and shopping centers.

   This project also supports and implements goals specified in the Greenway Master Plan by providing an easement along Ross Creek that will provide for a future greenway connection. Water quality goals as it relates to Ross Creek are also being implemented through the project's design and development.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

   Any development of the site would require technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's Technical Review Committee, which found that adequate services and facilities are available for the proposed development. Several transit service stops on Tunnel Road are within a mile of the site.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The City's Traffic Engineer has determined that the project does not meet the threshold for requiring a Traffic Impact Analysis. As part of the project, the developer must address site distance requirements for the improvements required to bring Springside Park Drive up to City Standards.

In closing, staff feels that the proposed development adequately addresses the seven conditional use standards and provides an appropriate infill development project that meets many of the City's Smart Growth goals.

As such, staff recommends approval of the project subject to the following conditions:

1. That the project meet all conditions required by the Technical Review Committee;

2. Legal and adequate access to Springside Park Drive must be clarified and the road made public.
3. Based on the TIA and the need to address sight distance at Springside Park and White Pine, the developer shall be required to complete one of the following: re-grade White Pine to soften the crest vertical curve near Springside Park and increase sight distance; or reduce the design speed on White Pine through geometry (such as a neighborhood traffic circle at the intersection).
4. All site lighting shall be equipped with 90-degree cut-off fixtures and oriented away from the surrounding residential property.
5. The developer shall work with City staff to address water quality issues in the design and monitoring of stormwater run-off infrastructure and by means of stream bank stabilization, selection of appropriate wetland species, riparian buffers and use of other Best Management Practice tools as approved by the City Engineer and Planning Director.
6. The developer shall work with the Buncombe County Health Department to evaluate safety concerns regarding the abandoned septic tank on the owner's adjoining vacant lot.
7. Developer shall relocate the compactor to an internal location within the development.

Additionally staff would like to the recommend that Council consider adding the following conditions expressed by the neighborhood at the Neighborhood Developer Meeting:

1. Prior to the issuance of the Certificate of Occupancy, the developer shall remove all damaged limbs and trees on their property that overhang abutting properties.
2. The developer shall install a privacy fence along portions of the south side of the property as requested by the abutting property owners.
3. In addition to the required buffers, the developer shall provide additional landscaping along the internal road to deflect headlights from properties along Aurora Drive.

Pros:

- The site is appropriately zoned for this type of development.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to smart growth, infill and sustainable development, and transportation goals.
- The conditional use permit will require the developer to work with staff on addressing water quality issues in order to protect the sensitive wetland environment surrounding Ross Creek.
- The proposed development has been designed in a manner that is environmentally sensitive by concentrating the development in the center of the property, leaving the steepest areas on the site undisturbed, and by preserving large areas of existing vegetation around the perimeter of the site.

Cons:

- The buildings will be larger in scale than those found in the surrounding single-family neighborhood (although consistent with building sizes typically found in multifamily-zoned property).
- Properties along the north and west sides of the development are at the same elevation and may visually experience the height and scale of the project. However, in addition to the required buffer plantings, two large existing vegetated areas within these areas will be preserved and dedicated as required open space for the development.
- An increase in traffic on White Pine Drive may be noticeable by current neighborhood residents, but would still be well below the carrying capacity of the road. Most of the traffic concerns expressed by neighbors relate to traffic already generated by the Asheville Mall.

Ms. Virginia May, applicant, said that she has been a contributing member of the community since 1974 and would now like to develop her property.

Mr. Bob Grasso, Land Planner representing Ms. Virginia May, spoke in support of the conditional use permit in that it will be a nice addition to the City. They worked hard to fit 60 apartments in a residential area that has a lot of surrounding single-family residences. He explained the ¾ story split (Attachment to City Exhibit 3 – Zoning Site Plan). They placed the units in the middle of the property so that they could retain a good buffer of existing vegetation around the perimeter of the property. They held a neighborhood/developer meeting in order to work with the neighborhood, hear their concerns and try to alleviate their concerns. They have no problem in complying with any of the recommendations listed by Ms. Hamel. When concerns were raised about traffic impact, they hired a traffic engineer to look at how the project would affect the intersection at White Pine Drive. Also in their original proposal they were showing a driveway access through a lot that the Mays had purchased for that purpose. Because of deed restrictions of that lot they could not use it to serve the back part of the property, so they revised their site plan to show the access on Springside Park Drive to White Pine Drive. They do have a legal opinion that says they have right-of-way to White Pine Drive using Springside Park Drive. They would not be before Council if they didn't think they had legal access.

Mr. Ken Putnam, Traffic Engineer who prepared the traffic study, said that the City did not require a TIA because the anticipated traffic during the peak hour was going to be only 51 new trips, instead of the threshold of 100 trips that kick in a study. However, the developer did hire him to prepare a study to see what impacts her development would have specifically at the intersection with Tunnel Road and White Pine Drive, which is currently signalized. Basically the report concluded that there would be very little impact after the apartment complex is fully built out. The level of service is around a "B" and at build-out it will still be a "B". The study did not address anything else, other than that one intersection. In order to improve the site distance where Springside Park comes into White Pine Drive, City staff has suggested two alternatives. One is to lower the existing grade on White Pine Drive and the other is to create a traffic circle which would lower the design speed.

When Councilman Dunn questioned only 51 trips for a 60-unit apartment complex, Mr. Putnam explained he used the formulas in the Trip Generation Manual, which is based on research of similar sites.

Mr. Grasso said that even though they can't restrict the type of residents that will occupy the apartments, they will market them to retired people. We feel the traffic impact will be even less because they will not be traveling during peak rush hour times. The type of amenities included will enforce that audience we are marketing to. We do not have any tot lot areas or play equipment for young children. We will have passive recreation consisting of trails and bird watching stations. They are also pleased to be able to tie into the greenway system.

Mr. Chris Eller, Civil Design Concepts, said that from an infrastructure standpoint, this is an ideal site for urban infill in that water and sewer are directly adjacent to the site. MSD has just completed an upgrade of the Ross Creek line and as part of that construction we had them coordinate a stub out for us. For stormwater management we will be doing underground detention to minimize above-ground disturbance. In conjunction with that, we will coordinate with water quality and stream improvements.

Mr. Grasso said Ross Creek is a valuable asset to the project as part of the passive recreation and we have agreed to do some natural channel design stabilization to the steam banks so that we could improve the health of the stream and contribute to the water quality of the French Broad River basin. The architect has done a nice job of designing a building that has enough architectural detail so that it makes the massive building smaller and it fits in with the surrounding area as far as the type of residential architecture. These are large building, but we've done is by moving them to the center of site by preserving the perimeter existing vegetation and stepping them down the hill, we have made every attempt to fit this in with the neighborhood

and to keep site disturbance to a minimum. He said one of the concerns by the neighbors was the odor of the dumpster, so they now have a trash compactor which will be totally enclosed. On a scheduled basis, the hauler will remove the trash compactor and replace it with another one. He explained the location of the compactor and the need to have it sited on a downhill slope (Applicant Exhibit 1). Again, to address the concern of the adjoining property owner, they moved the compactor further into the property and addressed the visual impact with a very dense screen which more than exceeds the buffer that is required.

Ms. Brison entered into the record (1) five deeds and two plats where they contend that shows there is not access via Springside Park Drive (Neighborhood Exhibit 2); and (2) a copy of a tax map showing that 10-foot easement that the applicant has discussed having access to, is a separate tax lot not owned by this applicant and also a deed showing ownership of that lot (Neighborhood Exhibit 3). Based upon the limited research that they have done, they believe the applicant does not have access to this property. The applicant has not provided any documentation or oral testimony, other than hearsay testimony, about their access to this property. She entered into the record the Traffic Impact Study referred to by Mr. Putnam dated May 25, 2004 (Neighborhood Exhibit 4). The evaluation of traffic does not make an evaluation of the intersection at Brackettown Road, or at Springside Park Drive – only the intersection of White Pine Drive and Tunnel Road. Also you will see from the traffic study that none of the traffic counts made on April 26, 2004, considered the revised access to the road. In addition, none of the traffic counts were made on a Friday evening after 2:00 p.m., none were made on a Saturday, and none were made on holidays. In addition, on Page 17 of that report, there is a reference to a "D" level and problems with the queuing of traffic accessing that area. Finally, the traffic impact study does not take into consideration that there are 96 parking spaces proposed for this 60-unit apartment complex.

Ms. Brison asked Mr. Putnam the following questions, all to which he replied no: Is there is anything in the study that addresses site distance between the proposed access at Springside Park Road and the crest of the hill on White Pine Drive; have you measured the distance between the crest of that hill and Springside Park Drive; have you done any analysis of traffic counts at the intersection of Brackettown Road and White Pine Drive; have you done an analysis of traffic counts at the intersection of Springside Park Drive and White Pine Drive; other than the change in the site plan from the initial draft given to City staff, were any changes made to the traffic impact study after the access road was changed to Springside Park Drive.

Mr. Jimmy Boyd, resident at 26 East Shore Drive in Kenilworth Forest, showed Council photos of the intersection of White Pine Drive and Springside Park Road (Neighborhood Exhibit 5). He explained that in icy or snowy conditions drivers must maintain speed to avoid sliding back down the hill and even near the crest of the hill, Springside Park Road still cannot be seen. After cresting the hill, Springside Park Drive is visible to a vehicle entering Kenilworth Forest, however, even the safest driver would have difficulty stopping in the short distance available. He showed that Springside Park Drive is a narrow road and it will be a narrow, tight turn for large emergency vehicles entering onto it off of White Pine Drive. One of the two solutions offered for site distance was to lower the crest of the hill. However, the crest of the hill is the natural buffering required by City Council when Highway Business was put there. The other solution would be to put a traffic circle to slow traffic coming in or going from the Kenilworth neighborhood. He said the from the crest of the hill on White Pine Drive to Springside Park Road is 85 feet and because the road is on a north-facing hill, in the winter White Pine Drive stays iced over. It's already hard to slow down and stop when it's dry. And, he was not aware that there is any other ingress or egress to Kenilworth Forest other than White Pine Drive.

Mr. Boyd presented to Council an e-mail copy from Anthony Butzek to Ken J. Putnam dated September 1, 2004 (Neighborhood Exhibit 6).

86

In response to Ms. Brison, Mr. Butzek, City's Traffic Engineer, read from Neighborhood Exhibit 6 as follows: "Sight distance at Springside Park and White Pine was raised as a concern. I looked at it, and it is not adequate. At 25 mph, 105' is required, and only about 105-110' exists. I see two options – regrade White Pine to soften the crest vertical curve near Springside Park and increase the site distance – reduce the design speed on White Pine through geometry ... a neighborhood traffic circle at the intersection could accomplish this."

When Ms. Brison said that there has been testimony about the distance from the crest of the hill to Springside Park Road being 85 feet instead of 105-110 feet, Mr. Butzek responded that he would stand by his opinion based on the way site distance is properly measured.

In response to Ms. Brison, Mr. Butzek said the speed limit on White Pine Drive is 25 mph.

In response to Ms. Brison, Mr. Butzek said he made no traffic counts at the intersection of White Pine Drive and Springside Park Road, nor at the intersection of Brackettown Road and White Pine Drive.

Ms. Brison then entered into the record a N. C. Court of Appeals case Ghidorzi vs. Town of Chapel Hill 80 NC App 438 (1986) which stands for the proposition that a city council can deny a conditional use permit on the basis of traffic problems (Neighborhood Exhibit 7).

Mr. Dick Mansfield, resident of 215 White Pine Drive in Kenilworth Forest, showed Council photos of homes in the Kenilworth Forest area (Neighborhood Exhibit 8). He said that most homes are small bungalow-type homes (around 950 square feet). He showed a picture where he measured 85-feet from the center of Springside Park Road to the water meter on the top of the hill. He said that he measured 20 feet from the corner of the Lewis' deck to the center of Springside Park Road. If Springside Park Road is widened, traffic will be 5 feet from the Lewis' deck. He said that there are no 2, 3 or 4 story homes in Kenilworth Forest.

Mr. Alan Driscoll, resident of 30 Ridgecrest Road in the Oakley community and Certified Residential Appraiser for 18 years said that he has appraised homes in the Kenilworth Forest area. He has appraised a single-family residence adjacent to an apartment complex within the past year. There are factors to be considered in single-family home values being located adjacent to an apartment complex. He said there is a concept in appraisal known as conformity. He read an excerpt from the "American Institute of Real Estate Appraisers" textbook (Neighborhood Exhibit 9) as follows: "Conformity, Principle of: In appraising, the theory that value is based (in part) on similarity. The more similar a subject property is to the surrounding property is to the surrounding properties, the greater the value." From the "Basic Real Estate Appraiser 2nd Addition" textbook he read, "Conformity – A reasonable degree of conformity is required for maximum value to result. A serious lack of market conformity in size, style, quality, or use type can be detrimental to value, particularly in single-family residential properties." It is his opinion that the location of an apartment complex adjacent to single-family homes in Kenilworth would substantially injure the property values. He explained another instance where he appraised property in east Asheville that was located adjacent to an apartment complex. He did make an adjustment to that property lowering the value. That was based on its proximity to that apartment complex; lack of buffer; and issues of light and noise. He explained the term location adjustment. If there are adverse factors present that affect the subject property or the subject neighborhood which are not present in other homes that are within that market area, then a location adjustment is made, if warranted. Using Attachment to City Exhibit 3 – Building Elevations, and Neighborhood Exhibit 8, and a portion of a site plan that shows the 3 stories on one side and 4 stories on the other (Neighborhood Exhibit 10), he said it was his opinion that this apartment complex is not in harmony with the scale, bulk, density and character of the Kenilworth Forest neighborhood. Based on the definitions he read earlier, it was his opinion that the 3 and 4

story apartment project would not be compatible with the single-family homes in Kenilworth Forest.

Upon inquiry of Councilwoman Bellamy, Mr. Driscoll said that the topography factors could pay a role in his assessment. The more you can have conformity within any neighborhood, property values will remain more stable and you should realize greater property appreciation if that is the case.

In response to Ms. Brison and using the site plan (Neighborhood Exhibit 10), Mr. Driscoll said that it appears to him that from the base of the building up to just below the roof looks like an additional story and a half, above the 3 or 4 stories planned for the project.

Ms. Brison stated that Council must find that all seven standards for a conditional use permit must be met. The applicant has not submitted hardly any evidence in any of these standards, and it is their burden of proof. In her view, none of the seven have been met. Regarding Standard No. 1, she has provided testimony through the City's Traffic Engineer that the site distance is inadequate at the intersection of Springside Park Road and White Pine Drive and that only with a substantial fix (lowering the crest of the hill or creating a traffic circle) that it might be addressed. In addition, she has presented testimony (Neighborhood Exhibit 7) that says that future traffic improvements may not be considered by city council, but the present traffic situation is what you should consider in determining whether or not to approve or deny a conditional use permit. Regarding Standard No. 2, we have shown disharmony with the area. Regarding Standard No. 3, we have presented competent, material and substantial evidence in support of there being injury to the property value. Regarding Standard No. 4, we provided photographs of the single-family one-story homes in the area vs. the two very large buildings proposed. In addition, Mr. Driscoll testified about the great difference in the bulk and scale. Regarding Standard No. 5, the applicant has not submitted any evidence of any conformity with any of the City's plans. Regarding Standard No. 6, there was testimony that the only way in and out of Kenilworth Forest neighborhood is via White Pine Drive. If that were blocked due to problems at the intersection of Springside Park Drive, then there would be no access for emergency vehicles. Regarding Standard No. 7, there is a problem with traffic impact and there is inadequate site distance as the City's Traffic Engineer testified based on the present situation on the ground.

In addition, Ms. Brison pointed out that there is no access to this property. Council cannot make a determination as to whether or not the density is appropriate because you simply don't know how many acres is included in this project. They have not subdivided it yet. There has been no accounting for unusable land. There is in fact an unopened 30-foot right-of-way across this property that has not been closed. The height limitation of 40-feet has been exceeded – if you add the roof, it adds another story and a half. Again, they request the matter be continued until these issues can be addressed. In the alternative, she feels they have clearly shown that by the substantial material evidence in this record that this project should be denied.

Mr. Grasso said that they have agreed to make the necessary traffic improvements to White Pine Road so that it will be safe. He noted that this property was down-zoned from RM-16 to RM-8 and they have met the standards outlined in the UDO for a RM-8 development. They have done an outstanding job of citing these buildings so that it reduces the impact to the surrounding neighborhood. We are preserving a buffer of existing trees around the perimeter so that it will reduce the visual impact to the surrounding neighbors.

Regarding Mr. Driscoll's appraisal to downgrade property near an apartment complex because of light, Mr. Grasso asked what specifically were the issues with light. Mr. Driscoll said that light is going to be emitted when you have public lighting when you do not have it existing in the neighborhood at the present time. When Mr. Grasso asked Mr. Driscoll if he was aware that

the apartment units are below the elevation of the surrounding residences, Mr. Driscoll replied yes. Mr. Grasso asked how can the light go up the hill and spill onto adjoining properties when they have cut-off light fixtures, Mr. Driscoll replied that he was not a lighting engineering.

Regarding Mr. Driscoll's appraisal to downgrade property near an apartment complex because of noise, Mr. Grasso asked what type of residents were in those apartments. Mr. Driscoll replied that they were typical apartment residents. Mr. Grasso noted that they would be marketing to retirees.

In response to Mr. Grasso regarding buffering, Mr. Driscoll said he didn't feel that a building that size could be adequately buffered with vegetation and a 6-foot privacy fence. Mr. Grasso explained that the 6-foot privacy fence would be installed to screen the driveway between this property and Ms. May's property and in order to have the adequate amount of acreage that is required by the UDO for a single-family residence. This is the only way they can get a road grade that meets the UDO. In addition to the existing vegetation, they are providing a buffer that will meet or exceed the UDO standards. They have had requests from the neighbors to increase the buffer so that headlights won't spill onto neighboring properties and they have agreed to that. They have tried to meet the desires of the neighborhood.

Mr. Grasso said that there would be elevators in the buildings. He said that security was an issue that was built into the design. There will be one entrance on the front side and there will be an entrance on the lower side. This elevation doesn't take into account that the adjoining property owners will be looking down onto the apartments so they won't be seeing the full impact of this elevation. This residential use does conform with the neighborhood. It conforms with the way the property is zoned. They have made every effort to fit into this neighborhood. Regarding the traffic issue, their study has shown they will not be adding to any of the traffic congestion that already exists there.

The following residents spoke in opposition of issuing the conditional use permit for various reasons, some being, but are not limited to: when the Asheville Mall was built the intersection of Brackettown Road and White Pine Drive wasn't adequate and how can it be adequate now; if there is another traffic device at the crest of the hill on White Pine Drive, there will be the potential for traffic to be backed up onto Tunnel Road; people who live on the back side of the building (on Aurora Drive) will be looking directly at the building; in the winter when White Pine Drive is icy, the entire road is hazardous, not only at the crest; since there is only one road into the apartment complex, residents will have a problem getting in and out when it's icy; cut-off fixtures don't work as you can see when you are in White Pine Park looking at the Asheville Mall; traffic counts should be taken between Thanksgiving and Christmas; and it sometimes takes Kenilworth Forest residents 10 minutes to get onto Tunnel Road and if you add 96 more cars, it will be more dangerous:

Ms. Jan Howard, resident of Kenilworth neighborhood
Mr. Fred English, Haw Creek area
Ms. Claire Payne, resident of 291 White Pine Drive
Ms. Addison Martin, resident of 33 East Shore Drive
Mr. Steve Ritt, resident of 24 Swannnaview Drive
Mr. Philip Hawkins, resident of 244 White Pine Drive

Upon inquiry of Vice-Mayor Mumpower, Mr Butzek said that traffic on White Pine Drive is an existing problem and certainly having the development there will increase the amount of traffic. However, the developer is willing to assume the cost to solve the problem. Both solutions proposed have positives and drawbacks. Lowering the crest of the curve would result in some grading and delays during construction. They would have to do a topographic survey to measure the exact profile of the street and compute what kind of grading would be required to achieve the

necessary site distance. A guesstimate on lowering would be somewhere in the range of five feet. The second solution would be to implement a traffic calming measure – something to slow down the traffic so that when they reach the intersection it would have to be traveling slow enough that people could safely turn out of the intersection. He was hoping to hear more from the residents on which they prefer. Since neighbors talked about icing, perhaps grading may be the better solution. City staff has no problem with either option. If Council prefers one option over the other, he would ask Council to make that a requirement. If not, then it would be up to the developer's discretion which option to proceed with.

Councilman Dunn questioned the traffic study not taking into consideration peak times on Fridays and Saturdays. Mr. Butzek said it does not concern him. He said it is very typical for traffic studies to look at the afternoon peak hour. In cases where the morning peak hours is a concern, sometimes they would study that. And for retail developments, a Saturday peak hour is fairly typical to study. But for this type of development and this type of situation, studying the afternoon peak hour is standard practice.

In response to Councilwoman Bellamy Mr Butzek said the traffic count was taken at the intersection of White Pine Drive and Tunnel Road, at the traffic signal. Typically in doing a traffic study it's standard practice to look at the signalized intersections and if there are any other points where we feel we may have an issue. Based on typical practice and discussions with the engineer in this case, we decided the intersection of White Pine Drive and Tunnel Road would be the first thing to have operational difficulties, if any.

Upon inquiry of Councilman Newman, Mr. Butzek said that Springside Park Road will have to be brought up to City standards inasmuch as possible within the right-of-way. That would include street, curb and sidewalks, assuming the right-of-way or available property permits that.

Upon inquiry of Councilman Davis, Mr. Butzek agreed that the Lewis' house was about 20 feet from the centerline on Springside Park Road.

When Councilwoman Bellamy asked how Springside Park Road could be expanded, Mr. Butzek said that there is a public right-of-way that has been platted but he doesn't know the dimensions of it. That is public right-of-way is for the possibility of being used as a public street. The street they are widening would have to occur within that space unless additional property was purchased from those property owners.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that regarding the traffic impact, they looked at the build-out of the project, which is two-years from now, and that is standard practice to use for analysis purposes. They verified that traffic would operate acceptably in that future year.

When Vice-Mayor Mumpower asked Mr. Butzek if he was concerned that there was only one point of access, Mr. Butzek replied that he preferred multiple access points; however, in this particular case there are no additional possible points of access. He said that the Fire Department staff did not raise any objection over the one point of access at the TRC meeting.

City Engineer Cathy Ball responded to Councilman Dunn's question regarding the redrawing of the FEMA maps. She said that we are supposed to work under the current maps that we have. We have not been regulated or told by FEMA that we should use different maps or that we don't' need to go by the existing maps that we have. She has no issues in this specific area or any indication that there will be a great deal of change in where the floodplain is. She doesn't view that as a concern in this case. Part of the property is in the floodway and flood fringe. In the part that has a building in it, they are required to elevate that building so that it is above the 100-year flood elevation and that is a proposal they have in place.

Vice-Mayor Mumpower asked if there are concerns regarding the impact of sediment from this project in Ross Creek. Ms. Ball said that anytime development there is a real opportunity for erosion concerns. Our ordinance requires the developer to design for controlling a 10-year storm event and the erosion that would come from the site from that. It doesn't preclude them from keeping as much erosion on site as possible, but that is a problem when there is a lake. We will work hard with the contractor to make sure that his erosion control measures are in place and operate effectively.

Vice-Mayor Mumpower asked if our current erosion control protections for that area are adequate. Ms. Ball felt that our design standards to control erosion are adequate. She said that Council may impose a stricter penalty if their erosion control measures do not work property. One of the issues that we have is if the measures fail then there is a requirement that they fix the measure and make it not happen again. Very few times are there fines or penalties associated with that. She did not know if that is within the purview of the conditional use permit to have an additional penalty or fine or some type of consequence when the measures fail.

City Attorney Oast said that Council has the ability to impose stricter standards, but he hasn't specifically looked at the issue of imposing stiffer penalties in case where standards are violated. One penalty that Council can impose is revocation of the conditional use permit.

In response to Councilwoman Bellamy, Ms. Ball said their stormwater measures and their stormwater control are different things. They are proposing to put in underground detention in order to control stormwater runoff and that is after construction. The erosion control measures typically are sediment basins, silt fences, straw bales, etc.

Mr. Shuford explained that the reason this project is before Council is because it is a Level III project – it is more than 50 residential units. If this project were 50 or less units, it would be approved by the TRC under the conditions that have been imposed by the TRC. The development intends to be above what the current zoning allows. The property is large enough and able to accommodate 60 units that is triggering the Level III review.

In response to Councilwoman Bellamy about the 40-foot height restriction, Mr. Shuford said that 40-feet is the height limit for almost all of our residential zoning districts. That height is measured from the primary entrance to be used by the Fire Department to gain access to the building to the ceiling of the upper floor. That is the same standard for single-family residential as it is for this project. He said that in Kenilworth Forest on a single-family lot you could build a building as tall as this, with a roof-line like that. He read the definition of "building height" from the UDO as follows: "Building height means the vertical distance from the ceiling of the highest occupied floor to the primary level of fire department access."

Councilman Davis said that this is a fairly tall roof once you get beyond that upper floor, which may be to access the elevator towers. He was concerned about the actual height of the building. Mr. Shuford said that Council has the option of specifying a lower roof pitch.

Upon inquiry of Councilman Dunn, Ms. Hamel used a map (City Exhibit 4) showing elevations. She said that the building is lower and almost sits at the same elevation on the Aurora Drive side. Most of the visual impact will be on the Aurora Drive side.

Upon inquiry of Councilman Davis regarding the building height, Mr. Grasso said that he didn't have the exact height, but guessed it would be four floors (40 feet), and then about another 15 feet. The roof line is designed to be either a 10/12 or 12/12 pitch, which matches a lot of the roof lines in the surrounding neighborhood. The architect tried to mimic the roof lines in neighborhood. The Aurora Drive side of the site will be looking across an area that is wetlands

and has a lot of trees. We will not be doing any disturbance on this side. They will be looking at quite a buffer to the back-side of the units.

When Vice-Mayor Mumpower asked why the developer chose to do 60 units instead of 50, Mr. Grasso said that they looked at the zoning and acreage available and they came up with calculation of 60 units. They knew they would be going through a Level III review, but the 60 units is important from the standpoint of offsetting site construction costs and to make the numbers work as an apartment project.

Councilwoman Bellamy asked if there was a way Council can be sure that people are not deliberately excluded from applying. City Attorney Oast said that they have to comply with the Fair Housing Law. He didn't think there was a lot of control Council can have over how they market the project. They indicated their desired marketing target, but that doesn't guarantee that you're going to have retirees moving in there. He wasn't sure there was anything additional that Council can do to structure the mixture of the tenants in the apartments.

Councilman Newman moved to approve the project, subject to all TRC and staff conditions being met, in that he believes it meets all of the conditions set forth in the UDO. Mayor Worley ruled the motion out of order since the public hearing on this matter has not been closed.

Even though Councilman Davis understood Council cannot control the access issue, he was concerned about the centerline of Springside Park Road being 20-feet from someone's deck. He was also unsure about lowering the crest of White Pine Drive by five feet to make that area functional. He was also not sure a traffic circle is a good solution for traffic calming. He felt a 55-foot tall structure is certainly out of conformity with the rest of that neighborhood as seen from Aurora Drive side. He could not support the project since he felt it was out of scale with the rest of the neighborhood and his concerns regarding access.

Councilman Dunn was concerned with accessibility to the property. He felt that to put a 60-unit apartment complex in the middle of the Kenilworth Forest neighborhood did not conform with the neighborhood, especially knowing that there will be one side looking up at a 4.5 story apartment building.

Vice-Mayor Mumpower asked Mr. Driscoll what loss of property value percentage is attached to property located in proximity to an apartment complex. Mr. Driscoll said that he has not done the market research in this case and that would have to be done to be able to quantify that number. Some objective range, however, would be 10%.

Councilman Newman asked if it was Mr. Driscoll's testimony that if this project were approved, the neighboring property values would go down from where they are today and in five years. Mr. Driscoll said that he feels the property values could continue to escalate, but the way he sees that is if a person has an opportunity to earn a 10% annual growth rate and someone by reason of this type development or any another non-conforming development comes into that neighborhood, you restrict that individual from the opportunity to earn 10% in that market area. To him that is a loss of value. He thinks the property will continue to appreciate, but he thinks for many of them, especially the ones in close proximity, that the rate of appreciation for these properties would be less than properties unaffected.

Councilman Newman stated that the Condition 3 reads that "the proposed or use or development of the land will not substantially injure the value of adjoining or abutting property." He asked the City Attorney if the property is continuing to grow in value, but perhaps at a different rate, is that "substantially" injure. City Attorney Oast said that is a question for Council to determine, but Mr. Driscoll did say that the property would continue to appreciate.

Upon inquiry of Councilwoman Jones, Mr Grasso said that he didn't know if the project wasn't approved today whether the applicant would end up developing the property with a lower number.

Mr. Grasso said that he has the plat information to help Council understand the access issues. He also clarified where Aurora Drive is in proximity to this project and what they would be looking at. Using the topography map (City Exhibit 4), Mr. Grasso again explained that Aurora Drive residents will be looking across wetlands and a lot of trees. The distance of the apartment buildings and Aurora Drive is several hundred feet.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that if they don't have access or the right-of-way, they can't build on the property. Council needs to base their decision on the seven standards that are contained in the UDO. If they can't meet this condition, the project cannot move forward.

Mr. Shuford said that when the applicant originally came in, they proposed a driveway access through another property to White Pine Drive but were unable to proceed with that because of deed restrictions on that property (it limited it to a single-family use). They are using the access point they have available to them.

Upon inquiry of Councilwoman Bellamy, Ms. Hamel said the applicant is required to install a 20-foot Type "B" vegetative buffer. It is required along entire perimeter of the property. They are requesting to do a privacy fence (by Ms. May's house) and plantings that will be outside of the privacy fence in lieu of the 20-foot buffer, which is something that is available to them under the UDO. They can use existing vegetation to count towards the 20-feet. We would ask them to do a tree survey once it comes back in for final approve through TRC. But as part of the conditional use permit and what they have presented, we can make that a requirement that the existing vegetation be preserved. Council may want to add a condition that all the existing vegetation be preserved in addition to the buffer plantings.

Upon inquiry of Councilman Davis, Mr. Butzek said that in order to lower the crest on White Pine Drive there would have to be some grading adjacent to the roadbed to provide for slopes, but it would be just the roadbed and slopes through that crest. He felt that is probably the better long-term solution. The negatives he sees with that is the construction issue, lane closures, etc. to lower that grade. But, in terms of a long-term solution, that is probably the best solution and is probably the more expensive solution as well. It will, however, improve an existing problem as well.

Vice-Mayor Mumpower asked how dangerous is that crest to the residents now. Mr. Butzek said he wouldn't classify it as extreme danger. The available site distance is just over 2/3 of what it needs to be. There is some concern, but he wouldn't say it is a crucial concern. We do have other places in Asheville with the same topography with the same condition.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that on Springside Park Road there are about 8 apartments and one residence. The danger factor would be increased with the addition of the new units, if mitigation were not performed.

Upon inquiry of Councilwoman Bellamy, Mr. Butzek said that they would recommend the traffic mitigation be in place prior to issuing a Certificate of Occupancy for the building.

Councilman Dunn was concerning with the light issue. Mr. Shuford said that we have imposed standards for lighting that do have the 90-degree cut-off. We think that type of lighting standard will be effective in reducing the amount of light trespass that comes from the property.

Mr. Shuford said that if Council was inclined to recommend or require one of the two traffic mitigation measures on White Pine Drive, he asked that in the event that there is some technical reason why that measure can't done that staff proceed with the other alternative.

Vice-Mayor Mumpower asked if there was a condition to require the developer to m· ntain the erosion control system put in place. City Attorney Oast said one possible condition m ght be to require the developer to engage an independent stormwater expert to perform the inspections on a more frequent basis than City staff can and then make reports to appropriate staff if matters are out of compliance.

Mayor Worley closed the public hearing at 7:42 p.m.

Councilman Newman moved for the adoption of Ordinance No. 3176, granting a conditional use permit for property located on Springside Park Drive, located off White Pine Drive, for the construction of a 60-unit multi-family development (Kenilworth Forest Village Apartments) in an RM-8 Residential Multi-Family Medium Density District, subject to the following conditions: (1) all conditions outlined in the Technical Review Committee staff report; (2) An updated traffic impact analysis and site plan based on the use of Springside Park Drive and associated improvements must be submitted prior to City Council; (3) The ability to access Springside Park Drive must be clarified and the road made public; (4) Legal and adequate access to Springside Park Drive must be clarified and the road made public; (5) Based on the Traffic Impact Analysis and the need to address sight distance at Springside Park and White Pine the developer shall be required to complete one of the following: regrade White Pine to soften the crest vertical curve near Springside Park and increase sight distance; or reduce the design speed on White Pine through geometry (such as a neighborhood traffic circle at the intersection); (6) All site lighting shall be equipped with 90-degree cut-off fixtures and oriented away from the surrounding residential property; (7) The developer shall work with City staff to address water quality issues in the design and monitoring of stormwater run-off infrastructure and by means of stream bank stabilization, selection of appropriate wetland species, riparian buffers and use of other Best Management Practice tools as approved by the City Engineer and Planning Director; (8) The developer shall work with the Buncombe County Health Department to evaluate safety concerns regarding the abandoned septic tank on the owner's adjoining vacant lot; (9) Developer shall relocate the compactor to an internal location within the development; (10) Prior to the issuance of the Certificate of Occupancy, the developer shall remove all damaged limbs and trees on their property that overhang abutting properties; (11) The developer shall install a privacy fence along portions of the south side of the property as requested by the abutting property owners; (12) In addition to the required buffers, the developer shall provide additional landscaping along the internal road to deflect headlights from properties along Aurora Drive; (13) In addition to planting the 20-foot buffer, the existing vegetation on the Master Plan should be preserved; and (14) At the developer's expense, the developer shall engage an independent stormwater expert to monitor sedimentation control on a more frequent basis than City staff can and provide regular reports to City staff which would allow for more timely interventions if problems occur. This motion was seconded by Councilwoman Jones.

Councilman Newman feels the project does meet all the seven standards in the UDO. He feels that the site distance on the Aurora Drive side has a big distance of buffer that will remain in a natural state. If you look into the neighborhood it is primarily single-family, but if you look to the immediate east of the project, it is very different. He feels this is a transitional area. He believes it fits the existing zoning and if we don't approve the project, the developer can take ten units off this project and proceed with construction without any Council input. Regarding the two traffic mitigation solutions on White Pine Drive, he will leave that open so that staff can continue to look at it and the neighborhood can have input as well. He understands the traffic mitigation will be one of those two solutions and that it must be addressed in some way for the project to move forward.

Councilman Davis said that he would like to see housing, however, he felt that this project is out of context with the rest of the neighborhood.

Vice-Mayor Mumpower said that he would like to see the project proceed and it sounds like it would be a good addition to the City. However, he didn't think the project meets Standard No. 4, in that he feels the project is not in harmony with the scale, bulk, coverage, density and character of the neighborhood in which it is located.

Councilman Newman's motion passed on a 4-3 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

City Attorney Oast said that he would bring the ordinance back to City Council for second reading on November 23, 2004. Mayor Worley announced there would be no public comment at the second reading of the ordinance.

At 7:50 p.m., Mayor Worley announced a short recess.

ORDINANCE BOOK NO. 21 - PAGE 356

At 8:16 p.m., Councilwoman Bellamy asked to be excused from the remainder of the meeting. Therefore, Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from the meeting. This motion was seconded by Councilman Newman and carried unanimously.

Vice-Mayor Mumpower commented that the organized opposition and the neighborhood deserve some positive attention for their efforts to be civil, bring facts to the table, and to bring information to Council in order to help them sort through those facts.

C. PUBLIC HEARING RELATIVE TO PERMANENTLY CLOSING VIVIAN AVENUE

RESOLUTION NO. 04-234 - RESOLUTION TO PERMANENTLY CLOSE VIVIAN AVENUE

Mayor Worley opened the public hearing at 8:20 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to close Vivian Avenue. This public hearing was advertised on October 15, 22, 29 and November 5, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the University of North Carolina at Asheville has requested the City of Asheville permanently close to public use as a public street Vivian Avenue as shown on a plat entitled, "Property of the Christian School of Asheville," at Plat Book 32, Page 28 in the Buncombe County Register of Deeds.

Public Works Department staff has researched and determined that this right-of-way is not a City maintained street. Closure of this right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There are three parcels that abut this section of right-of-way. They are identified by PIN Nos. 9649.09-17-3141, 9649.09-16-0734, and 9649.09-16-2885. The petitioner has authority over all the abutting parcels.

City staff recommends that City Council adopt the resolution to close Vivian Avenue.

Mayor Worley closed the public hearing at 8:23 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-234. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 412

D. PUBLIC HEARING RELATIVE TO DESIGNATING PROPERTY KNOWN AS THE RICE CORNELL BROWN HOUSE, LOCATED ON RICE BRANCH ROAD, AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 3177 - ORDINANCE DESIGNATING PROPERTY KNOWN AS THE RICE CORNELL BROWN HOUSE, LOCATED ON RICE BRANCH ROAD, AS A LOCAL HISTORIC LANDMARK

Mayor Worley opened the public hearing at 8:24 p.m.

Ms. Stacy Merten, Historic Resources Director, said that this is the consideration of an ordinance to designate the Rice Cornell Brown House on Rice Branch Road as a local historic landmark. This public hearing was advertised on October 29 and November 5, 2004.

Ms. Merten explained the process the applicant goes through in designating a local historic landmark.

This proposed landmark designation consists of the Rice-Cornell-Brown House with its ca. 1850 original portion and subsequent 1890, 1927 and 1953 additions; a ca. 1848 cabin moved to the site in 1975; a ca. 1848 pig pen moved to the site in 1975; a ca. 1848 smoke house moved to the site in 1975; and a tool shed built in 1953, all of which are contributing structures. Also included is a 1968 horse barn, which is a non-contributing structure.

The Rice-Cornell-Brown House is an assemblage of three main side-gabled blocks that reflect the century long development of the house from a single-pen, log cabin to a modest but well crafted log and frame house that retains integrity from each of its periods of development.

The original structure of the Rice-Cornell-Brown House was a one and one-half story plus loft, one room log cabin constructed of half dovetailed, hand hewn logs. The 1890 addition, which extends to the east is wood frame construction with unpainted clapboard siding and a side gabled roof of asphalt shingles. The inside of this addition exhibits more detailing than the original one-room cabin with beaded ceilings and plaster walls. The 1927 one room addition, located to the southeast of the 1890 addition, is of frame construction, unpainted clapboard siding and gable roof with asphalt shingles, similar to the 1890 addition. Inside the walls and ceiling are of rough sawn boards. The 1953 addition built on the south side and extending the full length of the original cabin has stained board and batten siding with a low pitched gable roof of asphalt shingles. The interior was designed to be in keeping with the rustic style of the rest of the cabin.

The Rice-Cornell-Brown House, the site, as well as the additional structures and outbuildings, with a period of significance from 1848-1953, are historically significant for their contribution to the broad pattern of history of the Beaverdam Valley. They represent the evolution of a small log cabin that housed subsistence farmers, into an early 20th century working farmstead. Additionally, the House is significant as it is the most architecturally intact of only two examples in the County exemplifying the use of native materials and mid-nineteenth century log

cabin construction techniques and the later evolution of the building as the family grew and prospered.

The additional mid-nineteenth century log house and structures moved to the site in 1975 are also important as both historic and architectural reminders of the widespread use of this house form throughout Buncombe County. These structures would have been demolished if not moved from their original site.

The Rice-Cornell-Brown House was listed on the National Register of Historic Places on December 24, 1998. The listed property includes a 26-27 acre tract of land which is the residual acreage of the tract that was farmed by the J.O. Rice family, builders of the original log portion of the house. The current landmark designation would only include a 6.71 acre portion of that larger tract. The 6.71 acres being the location of the original house and contributing outbuildings. The remainder is a separate 20 acre tract, which is currently in forest use and maintained under a forest management plan.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $224,200. If the property is designated as a local landmark the potential tax savings for the property owner, including city, county and school taxes, would be $1479.72.

Although designation of the property places no obligation on the property owner to provide public access to the property, the Brown's while being good stewards of the land and structures have allowed and encouraged public access to many organizations and other groups over the years, such as high school clubs, church groups, the Preservation Society and very recently the Sons of the Confederacy, just to name a few.

The ordinance designates the Rice-Cornell-Brown House as a local historic landmark. The property included in the designation consists of Rice-Cornell-Brown House and the 1.61 acre parcel on which it is located as described in the deed. The designation also includes the exterior of the house, some interior details and landscape features.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Pros:

- The designation will provide the property owner with a local property tax deferral that will help with the costs of keeping the structure in good repair.
- A significant property will be recognized for its contribution both architecturally and culturally to the history of the area.

Cons:

- The tax deferral will result in a loss of revenue to the city and county.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance designating the Rice-Cornell-Brown House, as a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Mayor Worley closed the public hearing at 8:30 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3177. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 365

E. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HIGHWATER CLAYS

RESOLUTION NO. 04-235 - RESOLUTION TO APPROVE AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HIGHWATER CLAYS

Mayor Worley opened the public hearing at 8:32 p.m.

City Manager Jim Westbrook said that this is the consideration of a resolution approving an economic development incentive grant for HighWater Clays. This public hearing was advertised on October 29 and November 5, 2004.

City Council approved a grant to HighWater Clays in June 2003 and the required performance agreement was signed. In February 2004, HighWater Clays asked to revise that agreement as they anticipated investing a significantly higher amount than was originally programmed. It was determined that a new agreement would be needed, including going through the public process again, versus simply revising the original agreement.

Based on new information, the capital investment, for purposes of determining a grant amount is now $1,560,000 (vs. $750,000 originally) in building renovation and new equipment. Further, the owner states that the number of new jobs created will go up from 5 to 7 and that the average hourly wage will go up to $10.43 from $9.00.

As an incentive, City Council originally agreed to $7500 payable in two equal installments. For the new grant, it is proposed to offer $31,000 payable in equal installments over five years.

Support statements:

1. Grant supports expansion of local small business. This supports Strategic Plan: Key Area – Economic Development Goal 1, Objective A.
2. HighWater Clays continue to invest in riverfront area.

Staff recommends approval of the resolution approving an economic development incentive grant to HighWater Clays, Inc.

Mayor Worley closed the public hearing at 8:34 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-235. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 414

F. **PUBLIC HEARING TO CONSIDER A MODIFICATION TO THE CONDITIONAL USE PERMIT FOR PHASE I OF RIVER BEND MARKET PLACE (SAYLES BLEACHERIES) TO ALLOW FOR AN INCREASE IN DEVELOPMENT INTENSITY THAT MAY INCREASE TRAFFIC ON SWANNANOA RIVER ROAD (CITY OF ASHEVILLE ORDINANCE NO. 2939, CONDITION NO. 2)**

ORDINANCE NO. 3178 - ORDINANCE AMENDING THE CONDITIONAL USE PERMIT FOR PHASE I OF RIVER BEND MARKET PLACE (SAYLES BLEACHERIES) TO ALLOW FOR AN INCREASE IN DEVELOPMENT INTENSITY THAT MAY INCREASE TRAFFIC ON SWANNANOA RIVER ROAD (CITY OF ASHEVILLE ORDINANCE NO. 2939, CONDITION NO. 2)

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is amending a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 8:41 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning and Development Director Scott Shuford said that this is the consideration of amending the conditional use permit for Phase I of River Bend Market Place to allow for an increase in development intensity that may increase traffic on Swannanoa River Road. City Council will also be considering a modification to the Urban Village Master Plan for Phase 2 of the River Bend Market Place to permit an increase in development intensity. Both public hearing will be summarized in this one staff report, however, City Council will need to hold separate public hearings and take separate votes.

City Council must consider both the conditional use permit modification and the modified master plan pursuant to the revision process for such permits and plans. For technical reasons, the Planning and Zoning Commission will not formally review this master plan (the code process involves only City Council review of master plan changes). Two separate votes will be needed.

The applicant *River Bend Business Park, LLC, is proposing an expansion of the scale of development associated with the Urban Village approved as Phase 2 of the Sayles Bleacheries redevelopment project. As a result, the City Council must consider a proposed modification to the Conditional Use Permit (CUP). Specifically, the applicant proposes a modification to Condition 2 that limits the total development potential for traffic impact reasons. Condition 2 is quoted in part below (emphasis added). The applicant wants to add additional traffic to Swannanoa River Road without adding additional traffic impact mitigation measures.

*2. No changes shall be made in the level of development intensity (Exhibit A) that **will or may increase traffic on Swannanoa River Road unless further traffic impact mitigation measures are implemented**.*

Additionally, the Council must consider modifying the Urban Village Master Plan to accommodate the additional development proposed by the applicant. Staff review of that modification indicates that the applicant is in compliance with the design standards for urban villages. We feel that the development intensity is much more likely to make this a successful project than the limited amount provided for in the original approval. As conditions for added intensity, we feel the applicant should provide 17 of the added 115 units (or 15% of the added residential development) as affordable housing and that a transit stop should be added to the project in a central location.

He summarized that two actions that City staff recommends:

(1) That the City Council approve the proposed modification of the first sentence of Condition #2 of the previously-approved conditional use permit to read as follows:

2. The attached Exhibit A, the level of development intensity approved for this project, is amended to permit the following level of development for Phase 2 (the urban village) of the project: 96,858 sq. ft. of commercial uses (retail, office, restaurant, etc.) and 240 residential condo/townhouse units. There shall be no further changes to Exhibit A that will increase traffic on Swannanoa River Road unless further traffic impact mitigation measures are implemented. *{The remainder of the condition remains unchanged.}*

(2) That the City Council approve the proposed modification of the Urban Village Master Plan to permit 240 residential units and 96,858 sq. ft. of commercial space subject to the following conditions: (1) All Technical Review Committee conditions shall be met; (2) Not less than 17 residential units shall be priced at an affordable level ($130,000 for a 2 or more bedroom unit) at time of initial sale; and (3) A transit stop shall be provided at a central location in the urban village, the location of which shall be subject to the approval of the Transit and Parking Director.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

The Asheville City Development Plan 2025 recommends mixed use commercial and residential centers around the City as a way to provide variety to the marketplace, strengthen the tax base and provide areas for growth within the City limits. The subject property is identified as a possible urban village location on the Future Land Use and Transportation Map.

The original Conditional Use Permit for the River Bend Development was approved on July 23, 2002. The Order issuing the Conditional Use Permit was signed on August 13, 2002.

Mr. Glines showed the properties in question (City Exhibit 4) and the different connecting points to the site (City Exhibit 5). The conditional use permit must be modified because some traffic is generated by the proposed expansion and will be using Swannanoa River Road. A recent traffic study was conducted to understand the impacts of traffic in the vicinity of the project. Three entrances are provided for the River Bend Market Place Shopping Center. The Swannanoa River Road and the Fairview Road entrances were illustrated in the same format in that original proposal. He showed the third entrance from River Ridge Shopping Center (City Exhibit 5). Since 2002, Horne Properties, who is developing the River Bend Market Place project acquired the River Ridge Shopping Center. This common ownership makes more formal efforts to provide a viable third access point more feasible. But even with the third entrance some

additional traffic generated by the project is anticipated to use Swannanoa River Road. The conditional use permit must be modified to allow more traffic generated by the project to use Swannanoa River Road. Specifically, the applicant proposes a modification to Condition 2, that limits the total development potential for traffic impact reasons. The applicant wants to add additional traffic to Swannanoa River Road without adding additional traffic impact mitigation measures. He read Condition No. 2 as follows: "2. *No changes shall be made in the level of development intensity (Exhibit A) that* will or may increase traffic on Swannanoa River Road unless further traffic impact mitigation measures are implemented." The Exhibit A of the conditional use permit provides for the following level of development in the Urban Village: "That 54,000 square feet of general office development and 125 residential condo or townhouse units" be provided in that original permit. The applicant is requesting to build 96,858 square feet of commercial uses and 240 residential units in the new proposal. The proposed level of new development will result in a small increase in traffic on Swannanoa River Road. No mitigation measures have been proposed or appear feasible to address this added traffic. The intent of this Condition No. 2 is to allow some traffic carrying capacity to remain on Swannanoa River Road after Phases 1 and 2 of the development project come online. The standard approved by City Council was for a level of service on Swannanoa River Road to not be decreased below 90% of a level of service "D" volume. In other words, 10% of a level of service "D" volume capacity was to remain after construction of the project. The applicant's proposed impact is 5% to Swannanoa River Road, based on the Traffic Impact Analysis (TIA) submitted by the applicant's traffic engineer.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and ordinarily must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Since this is a modification to a previously-established condition, only those standards directly relating to that condition need to be met. Staff's review indicates that all applicable standards are met as proposed in the site plan.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   Not applicable.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   Not applicable.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   Not applicable.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   Not applicable.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

Not applicable.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   Not applicable.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The proposed development will incrementally increase traffic at all intersections nearby. The increase is small, typically not exceeding 2.1% at the critical intersection (Swannanoa River Road & South Tunnel Road) during the critical period (Saturday). With modifications to signal timing, all intersections appear to function at level of service "D" or better. Based on this information, this condition appears to be satisfied.

Pros:

- The additional square footage and type of nonresidential uses and the increased number of units has the potential to ensure a more successful urban village project.
- The urban village project will allow significant new development with minimal traffic impacts because many of the trips generated by the project will be internal.

Cons:

- There will be a minor increase in traffic volume on Swannanoa River Road from the project.

Staff recommends that the City Council approve the proposed modification of the first sentence of Condition #2 of the previously-approved conditional use permit to read as follows: "2. The attached Exhibit A, the level of development intensity approved for this project, is amended to permit the following level of development for Phase 2 (the Urban Village) of the project: 96,858 sq. ft. of commercial uses (retail, office, restaurant, etc.) and 240 residential condo/townhouse units. There shall be no further changes to Exhibit A that will increase traffic on Swannanoa River Road unless further traffic impact mitigation measures are implemented. *{The remainder of the condition remains unchanged.}*"

Mr. Glines then reviewed with Council the request for a modification to the Urban Village Master Plan for Phase 2 of the River Bend Market Place to permit an increase in development intensity.

Using maps (City Exhibits, 6, 7 and 8), Mr. Glines showed the Urban Village District and the central drive through the Urban Village. The Master Plan for the Urban Village has also been adjusted to make the uses and buildings more integrated compared to the original submission in 2002. The core of the Urban Village is comprised of 5 multi-story buildings (City Exhibit 8) that will support ground floor commercial uses and upper floors will be comprised of residential units. Wide sidewalks front these buildings as well as a park space that runs the length of the street that separates the traffic (City Exhibit 8). Along the east and south sides of the development, townhouse style development will be provided. Eighty residential units will be provided as townhouses (City Exhibit 8). There is also an internal street that will provide access to these units. Using a map of building elevations (Attachment to City Exhibit 3 – Elevation Study of Buildings Three and Four), he illustrated the character of the buildings. Some of the buildings have pitched roofs and others have flat roofs. Windows and balconies are plentiful. Parking will be located on-street, which is a requirement of the Urban Village District, and some are providing parking lots under the buildings as well. The townhouse units will have garages. Other Urban Village requirements appear to be met and TRC conditions will be specifically reviewed for compliance during formal plan submittal, should the conditional use permit modification and the

modification to the Urban Village Master Plan be approved. Staff feels that the increased development intensity is much more likely to make this a successful project than a limited amount of uses contained in the original approval. As conditions for added intensity, staff would like for the applicant to provide 17 of the added 115 units as affordable housing and that a transit stop be added to the project in a central location. In summarizing the proposal, the additional square footage and type of non-residential uses and the increased number of residential units has the potential to ensure a more successful Urban Village project. The Urban Village project will allow significant new development with minimal traffic impacts, as many of the trips are generated by the project will be internal. Also with that integral activity, pedestrian and bike movement is also a viable option as well. The only real item of concern is that there will be minor increase in traffic volume on Swannanoa River Road from the project.

Staff recommends that the City Council approve the proposed modification of the Urban Village Master Plan to permit 240 residential units and 96,858 sq. ft. of commercial space subject to the following conditions: (1) All Technical Review Committee conditions shall be met; (2) Not less than 17 residential units shall be priced at an affordable level ($130,000 for a 2 or more bedroom unit) at time of initial sale; and (3) A transit stop shall be provided at a central location in the urban village, the location of which shall be subject to the approval of the Transit and Parking Director.

Mr. Anthony Butzek, City Traffic Engineer, said that regarding the increase of traffic on Swannanoa River Road, the River Bend development was approved with a condition that traffic volumes would not exceed 90% of the theoretical capacity of the street. This development will put it over that threshold. The composition of the traffic on Swannanoa River Road, composed of the Urban Village, we expect to be about 5%. Additionally in the past two years since the Wal-Mart was approved, we expect the traffic has grown, which constitutes another 2.5%. The previous Urban Village plan also generated about 2.5%, so the increase is from 2.5% of the capacity of Swannanoa River Road to 5%, that would be generated by the Urban Village. Coupled with the growth over the past couple of years, that puts us at about 95% of the theoretical capacity.

Mr. Butzek said the second issue, and this is where the traffic study comes in, is the actual operation of the studied intersections with the addition of growth and with the addition of project traffic. The study looks in a very high level of detail at the critical intersection in the study area. South Tunnel Road and Swannanoa River Road; Swannanoa River Road and the Wal-Mart entrance (with the bridge over the river); Fairview Road and the new street (Bleachery Boulevard); and Fairview Road and the River Ridge entrance (in addition to the internal intersections). All of those intersections are projected to operate at a level of service "D" or better during the morning peak hour, the afternoon peak hour and the Saturday peak hour. One of the reasons why this development does have the ability to handle the traffic load is because we have three good connections to public streets – all of which come out at traffic signals. One thing he sees as favorable in this project is that it allows a fairly high level of development without generating the same level of traffic volumes that the comparable amount of density done in a not so appropriate way would. The synergy created by having a mix of retail and residential uses results in a variety of travel choices to people – they can walk, bike, use transit vs. the more sprawled out development, which really encourages driving. This particular type of development encourages a variety of modes of transportation. The conditions he is recommending based on the review of the traffic study are as follows: (1) to change the plan for the roadway striping on the new bridge that is being constructed over the Swannanoa River. The bridge is being built as a 5-lane bridge with two lanes in and two lanes out and a stripped out median, which will be reserved for a future turn lane. He is recommending that they add that turn lane, so that they will have a left, a through and a right coming out of the development, since there will be a new development across Swannanoa River Road. This adds a very small amount of capacity but it is a very minor improvement; (2) that a roundabout be constructed at the intersection of Bleachery

Boulevard with the River Ridge connector. Without that improvement, and going with an uncontrolled intersection, there is one movement that operates at a level of service "F", which means traffic experiences a high level of delay. That would be making a left turn out of the Shopping Center traveling down Bleachery Boulevard. The roundabout will ensure that the intersection operates at a level of service "A", which means the average car waits less than 10 seconds at the intersection. The only other long-term solution that we can utilize at that intersection would maybe someday need a traffic signal. What the traffic signal would do is delay drivers who have stopped at the red light coming through there, more so than a roundabout, and given that we want to encourage people to use this connection (since we know Swannanoa River Road will be congested), he feels a roundabout will best handle that traffic; (3) that the developer provide a walking path and a right-of-way to connect to the River Ridge Shopping Center. That will ensure that people who live in the River Ridge apartments don't have to get in their cars, drive out to Fairview Road and then drive all the way back in. They can simply walk across; and (4) that the developer implement changes in the traffic control to the River Ridge Shopping Center internal intersection (City Exhibit 4). That traffic control would favor movements following the new connection in and out and that appropriate signage be installed to make sure that is a safe movement.

Mr. Harley Dunn, an owner of River Bend Development, reviewed the background of the project stating that they started the project five years ago. The first phase is well on its way to completion. The second phase is the mixed use project. Throughout the project members of City staff have encouraged them to increase the density in this project. Over a period of time, they agreed with staff after looking at these kinds of projects around the country. He noted there is 3.5 miles of sidewalks just with in the Urban Village, and they connect to 4 miles of sidewalks in Phase I of the large shopping center development – not to mention attaching to the greenway. It is our desire to see a development built that will be a source of pride for Asheville and western North Carolina. He urged Council to approve the modification to the conditional use permit and to also approve the modification of the Urban Village Master Plan.

Mr. David Day, Licensed General Contractor and developer of this project, briefed Council on other projects he has worked on in Asheville. He feels this project is good for Asheville. We have worked with the City for approximately four months in trying to come up with goals to make this a successful project. The first goal was that in order for the project to be successful, we need to maximize density. In order for an Urban Village to be a success, it has to have a mixed use of residential and commercial. It has to have enough density to it that it creates a great environment where people can interact. The second goal was to minimize the traffic. The increase is approximately 2.1%. By doing this type of development, we have created an area where people can live, work and play. He said that the project is approximately 96,000 square feet, consisting of a restaurant, retail space, office space, and also 240 residences. The perimeter of the project will consist of 80 townhouses, a club house and a pool. The five larger buildings shown on the plan will be four stories. The reason we have gone with a four story type of building is to minimize the building footprint. By minimizing the footprint, it allows more green space and a lot more common areas that enhance the project. We have placed parking in the basements. The main floor on grown level will be a retail-type of center that has restaurant, etc. Using elevation drawings (Applicant Exhibit 1), he described the atrium in the building. The second, third and fourth floors will be the residential areas. Each one of the residential areas in the multi-story buildings will have their own private balconies, which will overlook the streetscape. The streetscape located in the center will be a large landscaped courtyard type of area where there will be three large fountains, 91 park benches and more than 220 large trees. Regarding sidewalks, they tried to create a pedestrian friendly environment where this will become a neighborhood where people can access through walking and bicycle-riding. The project is located close enough to the Oakley community where children can get out of Oakley school and walk on a sidewalk all the way into the Urban Village for entertainment and recreation. We believe that the Urban Village will be an excellent neighborhood and that it will be lively and a

good place for people to live, work and play. He said they do not have a problem with a roundabout or helping out with any kind of turn lanes that may be recommended by the City's Traffic Engineer. However, this afternoon he has just found out about the recommendation of 17 affordable housing units and he hasn't had an opportunity to review that recommendation. He did not know what kind of an impact that would have on the project. In the alternative, he would be willing to have a mixed residential area where we have one, two and three bedroom units that will be able to accommodate a family, as well as someone who just needs a one bedroom.

Ms. Gay Sprague, Registered Engineer in three states and Traffic Engineer on the project, said that she did the TIA for this new version of the Urban Village.

Mr. Marvin Slosman, local developer, briefed Council on the successes in Asheville on mixed-use projects. He feels this is a win/win project for all parties. Regarding the affordable housing issue, he said that it is hard to drive a number into affordable housing and what that really means to people. One of the things that is very common in these types of projects is to do a pre-sale effort, which is in effect discounting the market value, so that people that get in early and in effect get a discount on what the market will drive in terms of supply and demand. It is always difficult when you look at the price per square foot. When you talk about affordable housing many times people refer to that as subsidized housing and that is difficult to do because as a developer and builder you don't get the same discount effect from the suppliers that you have and therefore it is hard to pass those along. He felt the pre-sale effort approach might be a solution other than designating a specific number of affordable homes.

The following residents spoke against the modification of the conditional use permit for various reasons, some being, but are not limited to: the third entrance through River Ridge Shopping Center was on the original conditional use permit; the traffic number estimates are on the low side and are subject to error and assumptions; traffic counts are not representative of normal, average traffic – in that they were taken on a rainy day, snowy day, and when Hurricane Ivan came through Asheville, thus reducing traffic counts; earlier traffic count numbers in front of the new bridge disagree with the N. C. Dept. of Transportation (NC DOT) numbers – showing a two year growth rate of approximately 22%; the traffic survey did not consider the gridlock at the South Tunnel Road intersection; the number of vehicles from the side streets were not considered in the input data; we are working toward capacity on Swannanoa River Road right now; there is gridlock even without the Wal-Mart being open; request that the lower end of Beechwood Road be closed; Council should not allow further development until the City has sufficient traffic infrastructure; there will be additional cut-through traffic on Overbrook Road because frustrated people who are tired of waiting will seek alternative routes; Overbook Road is small, has a single-lane, is winding and has a blind-curve and cannot handle cut-through traffic; do a pre-emptive traffic calming measure on Overbrook Road by either closing their road or installing speed bumps; current project will dramatically change the charm of the surrounding neighborhoods and the lifestyles of its residents; any additional square footage will ruin area's property values, peacefulness and sanity; there has been additional commercial development along Swannanoa River Road since the project was approved in 2002, thus increasing the traffic; most pedestrian traffic will contained in the Urban Village and is therefore not a traffic mitigation solution; changes are being made in neighborhoods and the residents are asking the City to compromise too; what will happen when the other businesses on Swannanoa River Road want to expand and they can't because the capacity of the road is full; the third access in River Ridge Shopping Center is not user-friendly; if intersections can be improved with synchronizing the lights, why hasn't it already been done; this has proceeded with the TRC, Planning & Zoning Commission and City Council too quickly and doesn't give the neighborhood associations to meet and prepare the this hearing; what will influence the owners at River Ridge Shopping Center to make improvements to the access there; request for a bike lane to be constructed on Swannanoa River Road; and request for a speed limit reduction on River Ridge Road:

Mr. Ned Guttman, President of the Redwood Forest Homeowners Group
Mr. John Granados, resident at 26 Overbrook Place (Neighborhood Exhibit 1)
Mr. Don Baker, resident at 15 Overbrook Road
A resident at 60 First Street
Mr. David Bailey; resident at 6 Beechwood Road in Redwood Forest
Mr. Christopher Fielden, President of the Community Supported Development
Mr. Fred English, Haw Creek resident
Ms. Barber Melton, member of Coalition of Asheville Neighborhoods
Ms. Debbie Applewhite, resident in Beverly Hills
Mr. Mike Moody, resident in Beverly Hills
Mr. William Lance, property owner in Beverly Hills
Ms. Bonnie Bailey
Mr. Steve Ritt, resident of 24 Swannnaview Drive

Ms. Sprague responded to various level of service questions from Mr. Guttman. Mr. Guttman stated that a statement was made that the overall level of service at the intersections at all times was level of service "D" or better. He wanted to ensure that was true even though there are many turning movements at various times at different intersections that have a level of service that is rather poor and in some cases gridlock.

Upon inquiry of Councilman Dunn, Ms. Sprague said that in performing a traffic analysis at an intersection, you take the peak hour and apply an additional peak hour factor, which means that you have it down to the worst 15 minutes. Her report was for a routine situation but also included the worst 15 minutes as well. In addition, she said that Mr. Butzek requested she look at the volume to capacity ratios of these movements, which she did. She said you can look at delay, which is what level of service is based on, and you can also look at volume to capacity ratio. She did both and Mr. Butzek reviewed them.

Upon inquiry of Mayor Worley, Ms. Sprague explained the TIA in the overall context of how you can have a number of intersections that are rated level of service "E" and yet come out with an overall analysis in the TIA that says it is an acceptable level of service.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that after review of the TIA, he is satisfied the TIA is a realistic estimate that looks at a reasonable estimation of the amount of traffic, the distribution of traffic, and what means are necessary to mitigate the traffic.

Mr. Butzek said that one of the conditions of Target's approval was that they widen Swannanoa River Road at South Tunnel Road by adding a second left-turn lane. We do expect that to be completed and that will help the gridlock at that intersection significantly. Regarding the congestion along South Tunnel Road, it is true there are many traffic signals through there that require very good coordination to move the traffic through. NC DOT has been working to install a coordinated system from the tunnel down to the last intersection near the Circuit City. Once that goes on line, that should improve conditions somewhat on South Tunnel Road.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that the original approval on the conditional use permit was based on three access points. He said the third was a little nebulous because it was through the River Ridge Shopping Center, which at the time was under separate ownership. We were unsure of what kind of connection we would get. Home Properties now owns the River Ridge Shopping Center and is expected to make some improvements to that connection to better facilitate the traffic. There is some expectation that more traffic will utilize that connection. There is a very small amount of traffic put onto that connection when it was originally approved, but the current traffic study does anticipate more traffic using that connection.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that on a consistent basis there will be a marginal increase in traffic but it will fall within the typical standards.

At Councilman Newman's request, Mr. Butzek explained there will be a new traffic signal along Swannanoa River Road, which will be a location where people can currently drive straight through without stopping for a traffic signal. That signal operates at a level of service "C" or "D". At the intersection of Swannanoa River Road and South Tunnel Road, there is some increase in delay that will come from that additional traffic. It currently operates at a level of service "F" because of the turn-lane improvement that Target needs to make. Once that improvement comes on line and with the increase in traffic, that will bring our level of service to "D".

Upon inquiry of Councilman Newman, using a table (City Exhibit 9), Mr. Butzek explained what the existing traffic is on Swannanoa River Road, what the increase of 2% per year for two years will be, what traffic will be from the Wal-Mart/associated development; what traffic will be from the Urban Village; and what traffic will be from outparcel development.

In response to Councilman Newman, Mr Butzek explained why be believed that the 2% per year increase is a reasonable estimate.

Upon inquiry of Councilman Newman, Mr. Butzek described what a level of service "E" will look like on Swannanoa River Road.

Councilman Newman asked if the City will not recommend any further development on this part of the City that would add additional capacity to Swannanoa River Road when we reach level of service "E". Mr. Butzek said that his recommendation would be that if there is an improvement that can be made to reasonably mitigate that, he would recommend that. He feels that is a policy determination the City needs to make as to what level of service they want to commit within the City limits. "D" is the most common and we would recommend mitigation measures to preserve a level of service "D". There are other intersection improvements that could be made on Swannanoa River Road but they do get progressively more expensive, for example, adding lanes on South Tunnel Road at Swannanoa River Road. There are some other turn lanes that could be added at some fairly high costs and at some point it may mean widening the bridge on Wood Avenue to increase capacity if that becomes the most appropriate route.

Upon inquiry of Councilman Newman, Mr. Butzek explained that some of the 5% growth on Swannanoa River Road is attributed to the growth over the past two years.

Vice-Mayor Mumpower said that the 90% level is the level that we were considering in the original conditional use permit for Wal-Mart and the existing plan for the Urban Village. At that time staff recommended to us that we leave room for growth. He feels that this is considered new good growth - housing.

Upon inquiry of Mayor Worley, Mr. Shuford explained that growth of this type in some ways may generate less traffic than the same growth somewhere else.

Councilman Newman said that the irony to him is that this is a good development idea, but the problem is that the big box development adjacent to it has consumed all the highway capacity. Now we don't have the capacity to do redevelopments like this without using up most of the rest.

Mr. Butzek said that for the amount of traffic that is being generated on Swannanoa River Road from this development, he feels it is a good deal for the City (City Exhibits 10, 11 and 12).

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that the City is not considering any traffic calming for Overbrook Road at this time. He said we will continue to monitor that area and consider it for prioritization in the traffic calming project. If Council determines that a specific allocation should be made, that would need to be done separately for this area, otherwise it will follow the same prioritization.

When Vice-Mayor Mumpower asked is the $50,000 a year allocation for traffic calming projects was enough, Mr. Butzek said that we would be more successful with a larger allocation. Fifty thousand dollars accomplishes typically one street per year. City Manager Westbrook said that the traffic calming process takes time and we are only able to do about $50,000 a year.

In response to Vice-Mayor Mumpower, Mr. Butzek said that the developer contributed $65,000 for traffic calming and that is being utilized in Redwood Forest to mitigate their traffic. We feel that once the traffic calming is complete, we will have mitigated that and improve the quality of life in that neighborhood. As with any transportation funding, more money accomplishes more, but as the City Manager pointed out, City staff is stretched trying to accomplish the projects we need to accomplish in neighborhoods around the City. If additional projects are developed, we would be requesting some portion of that to hiring a consultant or additional staff to augment our current forces. There are additional streets in that area that would love to have traffic calming. It would be beneficial to those communities if Council decides to make that recommendation.

Vice-Mayor Mumpower felt that if we are going to ask anything from the developer, rather than force affordable housing components on him, it seems like for asking some additional traffic mitigation monies might be a more appropriate course.

When Vice-Mayor Mumpower asked for a guesstimate on what might help have a further impact, Mr. Butzek said that the more allocated, the more they can do. He felt maybe an additional $50,000 might be fair to be used in other neighborhoods.

Upon inquiry of Councilman Davis, Mr. Butzek said that the developer is responsible for doing improvements in River Ridge where the intersection comes onto Fairview Road. That work is fairly minimal, which is limited to signs and markings. There was a condition placed on the Wal-Mart approval that Horne Properties spend a certain amount of money to improve that access road. That is separate from the operational changes that he is recommending.

In response to Vice-Mayor Mumpower, Mr. Shuford said that about October 19, 2004, City staff suggested that since the applicant had increased the amount of residential units from 164 to 240, there was an opportunity for affordable housing to be accommodated in that increase. City staff suggested a much larger number than 17 (40). We received a letter back from Mr. Day indicated that number was unacceptable so we put a smaller number in the staff report to Council. The basis we did that is because we have a city-wide policies to promote affordable housing opportunities. This is a fairly large scale development. It is a development that will have characteristics which will be very facilitative for affordable housing, such as the ability to be served by transit, the ability for people to walk easily to places of employment, and to walk for groceries and other services. It seemed like a natural opportunity to suggest that to the developer.

Vice-Mayor Mumpower can understand why we would want to have affordable housing there, but it seems like official blackmail to force them to do it. Mr. Shuford said this is a staff recommendation to City Council. Staff makes many recommendations to Council, some of which Council agrees with and some Council does not.

After hearing no further rebuttal, Mayor Worley closed the public hearing at 10:45 p.m.

Councilman Newman moved to deny the conditional use permit modification to Phase I of River Bend Market Place to allow for an increase in development intensity that may increase traffic on Swannanoa River Road. This motion was seconded by Councilwoman Jones.

Councilman Newman felt this fails to meet Condition No. 7 in terms of traffic impact. He thinks this is a really good development concept, but due to the other developments that have been approved as part of the larger development, we have used up almost all the capacity we have on Swannanoa River Road. We know that traffic will continue to grow on Swannanoa River Road even if there is no other development of other properties on that Road. We will very soon have an unacceptable level of service on Swannanoa River Road and if we approve this additional development intensity on the site, we will greatly hasten that day. Again, he feels the development concept is good and it's the kind of development we need more of in our community, but because of the transportation capacity limits we have on Swannanoa River Road, he doesn't think that it makes sense to approve it.

Vice-Mayor Mumpower said that based on the testimony, there is no question that it will have an impact, but this is new development. If we had a choice between another big box development or some of the other options down there, new residences is good. This is the epitome of everything we say we're going to support in this city and that we try to support in this city – it's an urban village. That is good growth. If we are going to be using that additional capacity at the artificial point of 90%, he can't imagine there is anything we could use it on that would meet our city guidelines, plans and our intent better than this.

Councilwoman Jones said that 90% was an artificial number, but it perhaps is artificially high. While this is a good development proposal, it is probably the largest development proposal that Asheville has seen in years and one neighborhood is taking the brunt of it. We all have good intentions but this is about public trust and for her, that 90% was a real big stretch and now to whittle away at it really is not fair to the neighborhoods that will be significantly impacted.

Councilman Newman said he didn't think this is a new development. This is the same development that came before City Council two years ago modified. He respects the integrity of the studies that have been done, but the original level of capacity on Swannanoa River Road was around 60%. If you have one development that goes from 60% of capacity to around 95% and that doesn't have a level of unacceptable traffic impact, it begs the question what would. He thinks it is too much.

The motion made by Councilman Newman and seconded by Councilwoman Jones to deny the conditional use permit modification failed on a 2-4 vote, with Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Councilman Dunn moved for the adoption of Ordinance No. 3178, amending the conditional use permit for Phase I of River Bend Market Place to allow for an increase in development intensity that may increase traffic on Swannanoa River Road, by amending Exhibit A, the level of development intensity approved for this project, to permit the following level of development for Phase 2 (the urban village) of the project: 96,858 sq. ft. of commercial uses (retail, office, restaurant, etc.) and 240 residential condo/townhouse units. There shall be no further changes to Exhibit A that will increase traffic on Swannanoa River Road unless further traffic impact mitigation measures are implemented *{The remainder of the condition remains unchanged.}* This motion was seconded by Councilman Davis and carried on a 4-2 vote with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Jones and Councilman Newman voting "no."

G. PUBLIC HEARING TO CONSIDER A MODIFICATION TO THE URBAN VILLAGE MASTER PLAN FOR PHASE II OF RIVER BEND MARKET PLACE TO PERMIT AN INCREASE IN DEVELOPMENT INTENSITY

ORDINANCE NO. 3179 - ORDINANCE GRANTING A MODIFICATION TO THE URBAN VILLAGE MASTER PLAN FOR PHASE II OF RIVER BEND MARKET PLACE TO PERMIT AN INCREASE IN DEVELOPMENT INTENSITY

Mayor Worley opened the public hearing at 10:51 p.m.

Mr. Alan Glines, Urban Planner, said that this is the consideration of granting a modification to the Urban Village Master Plan for Phase II of River Bend Market Place to permit an increase in development intensity. This public hearing was advertised on October 29 and November 5, 2004.

Mr. Glines said that his presentation on this matter was covered with the earlier public hearing on the conditional use permit modification.

Mr. Robert Deutsch, attorney for the developer, urged City Council support for this modification to the Urban Village Master Plan.

Mr. Steve Ritt asked how with the developers be financially responsible for the long-term environmental and socioeconomic factors. He said the large parking lot acts just like a roof washing all the water to the river.

Vice-Mayor Mumpower was uncomfortable with the way Council is going about the affordable housing aspect. He feels we should approve or disapprove the project on the basis of its merits.

Mr. David Day, Licensed General Contractor and developer of this project, said that after the Technical Review Committee meeting there was no mention was of doing affordable housing. However, after the meeting he received an e-mail requesting that they be able to incorporate an affordable housing component. We e-mailed them back and said no, that there is no way we can see that would happen. To his knowledge, he has not heard anything for sure that it would be a staff recommendation until a fax he received today. There was a discussion back then, but he did not realize it was going to become a recommendation.

Upon inquiry of Vice-Mayor Mumpower about the impact of the affordable housing component on the development, Mr. Day did not know financially. He said they would be willing to mix some 1, 2 and 3 bedroom units in the development so it would be more affordable for families or singles He said that to address the City's traffic concerns, other areas impose an impact fee on transportation and education; however, he doesn't recommend it but feels it should be considered. He would rather see $50,000 go toward transportation needs to help the neighborhoods, than to go toward demanding that they do affordable housing.

Regarding impact fees, City Attorney Oast said that our ability to use those in North Carolina is limited. Some cities have that authority and some cities don't. He thinks it is something that is being discussed at the legislative level, but it has not been authorized on a broad scale yet.

In response to Vice-Mayor Mumpower, Planning & Development Director Scott Shuford said that the City may see more revenue from the 18 acres of the Urban Village than from the 60 acres of the big box. He anticipated a $60-70 Million tax base.

Vice-Mayor Mumpower asked if the City took affordable housing off the board, is there anything the developer might propose to Council to further assist us with traffic mitigation in the area of this project. Mr. Day felt the problem is that the City needs to acquire more right-of-way for more lanes.

Mr. Butzek said that there are two types of traffic mitigation. One is capacity improvements (turn lanes, etc.) which some may need right-of-way. The other was neighborhood traffic management. From a neighborhood traffic management standpoint additional funds could be used, with the understanding that some of that money may be used to hire a consultant to bolster our staff.

Upon inquiry of Councilwoman Jones about the traffic generated from a proposed movie theatre in one of the outparcels, Mr. Shuford said that the movie theatre is shown as a potential future development. Should a movie theatre be proposed, the peak hours for the movie theatre are not lining up typically for some of the other things He said that in the Wal-Mart project proper there were two outparcels proposed for that location. One outparcel was permitted under the original conditional use permit and the one was taken off the table to make the transportation numbers work. The one outparcel that was taken off the table may come back to Council in a process similar to this. The are talking about a 7,500 square foot restaurant use.

Upon inquiry of Councilman Davis, Mr. Shuford said there is a large number of recommendations about affordable housing in the 2025 Plan. We didn't specifically target them to any specific type of development.

In response to Vice-Mayor Mumpower, Mr. Shuford said that we have a variety of different incentives for developers to build affordable housing. Councilman Newman pointed out that an affordable housing component was a requirement of the contract with the Grove Park Inn for the development of the City-owned property.

Mr. Day said that one of staff's recommends is that a roundabout or a turn lane from the Wal-Mart coming into the Urban Village be constructed as a result of the TIA. He offered that the developer construct the roundabout, which will cost about $125,000. In addition, he offered $25,000 to go toward transportation needs in the City and hoped the City would match that amount.

Councilman Dunn felt that that the City should not be forcing the developer to build affordable units. He also felt that to require the developer to pay for the roundabout and also pay for more traffic mitigation was a little heavy handed too.

Upon inquiry of Councilwoman Jones, Mr. Day said that a 3-bedroom condominium will be approximately $275,000, and one and two bedrooms will be adjusted accordingly.

In response to Councilman Newman, Mr. Shuford said that other than what was discussed here, he did not know of any other developments proposed on Swannanoa River Road.

Mr. Shuford pointed out that the Wal-Mart developer built a new public road, which is a substantial transportation enhancement to the betterment of the City of well over $1 Million. They also gave $65,000 for traffic calming for other areas.

In response to Councilwoman Jones, Mr. Shuford said that in his study of urban villages that have most recently occurred, they have not really been affordable from a residential standpoint.

Councilwoman Jones said that she appreciates staff trying to fold the affordable housing aspect in. She felt we need to educate people what affordable housing is, and that it is not public housing. Affordable housing is for our working professionals. She thinks this is a way to improve our community. She felt that 17 affordable units is a very small number compared to the huge increase of residential units they requested.

Councilman Newman said that if the project of this scale is approved, in conjunction with all the other related developments on it, it basically uses up all our development capacity in this entire part of the City, unless we widen Swannanoa River Road that we built with our taxpayer money. We may not be able to build other projects that have affordable housing over in this part of the City because we don't have any highway capacity left. If we don't get some affordable housing in projects like this, we may not be able to do a lot more. He noted that the City is only requesting 7% of the units be priced at $130,000 or less.

Councilman Dunn said that the tax revenue generated from this development will allow the City to build infrastructure elsewhere in the City for affordable housing. This is a significant amount of tax base coming to the City.

At 11:22 p.m., Mayor Worley closed the public hearing.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3179, granting a modification to the Urban Village Master Plan for Phase II of River Bend Market Place to permit 240 residential units and 96,858 sq. ft. of commercial space subject to the following conditions: (1) All Technical Review Committee conditions shall be met; (2) A transit stop shall be provided at a central location in the urban village, the location of which shall be subject to the approval of the Transit and Parking Director; (3) the developer construct and assume all costs for a roundabout at the intersection of Bleachery Boulevard with the River Ridge connector; (4) the developer pay an additional $25,000 for traffic mitigation; (5) that the developer change the plan for the roadway striping on the new bridge that is being constructed over the Swannanoa River to show a left, a through and a right coming out of the development; (6) that the developer provide a walking path and a right-of-way to connect to the River Ridge Shopping Center; and (7) that the developer implement changes in the traffic control to the River Ridge Shopping Center internal intersection, which traffic control would favor movements following the new connection in and out and that appropriate signage be installed to make sure that is a safe movement. This motion was seconded by Councilman Davis and carried unanimously.

Councilman Jones moved to amend the motion to include the condition that not less than 17 residential units shall be priced at an affordable level ($130,000 for a 2 or more bedroom unit) at time of initial sale. This motion was seconded by Councilman Newman and failed on a 2-4 vote, with Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

The original motion made by Vice-Mayor Mumpower and seconded by Councilman Davis carried on a 4-2 vote, with Councilwoman Jones and Councilman Newman voting "no."

ORDINANCE BOOK NO. 21 - PAGE 376

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 3180 - ORDINANCE AMENDING THE FEES AND CHARGES MANUAL ESTABLISHING FEES TO SUPPORT AFFORDABLE HOUSING AND THE OPERATIONS OF THE BUILDING SAFETY DEPARTMENT

Building Safety Director Terry Summey said that this is the consideration of amending the Fees & Charges Manual to implement portions of the City Council's 2004 Strategic Operating Plan.

The Fiscal Year 2004/05 budget proposed amendments to the Fees and Charges Manual to promote the construction of Affordable Housing (AH) and provide 95% operational cost to the Building Safety Department. Council members requested that the proposed amendments receive further review from the public. For the past 6 months, the proposed amendments have been in the possession of the public. To date, no objections or changes have been received from the public or the Development Review Task Force. The amended fees incorporate several proposed goals in the Strategic Operating Plan to include the following:

- Housing Opportunities Goal #1: Increased development incentives for AH – Create incentives and revise the permitting process throughout the City to encourage AH.
  - Objective A. Increase incentives to invest in AH (work to decrease fees and revise development specifications.
    Task#1: Revise fees- (new ranges and reductions) increase AH incentives.
    Task#2: Increase AH Cap-extension of incentives to ensure more AH

- Economic Development Goal #2: Efficient/economical permitting process – Reform to make more conducive to do business in Asheville.
  - Objective B. Encourage independent business development-reduce permitting costs for subcontractors and small renovation projects.
    Task #1: Revise fees/charges structure (subcontractors- more work/smaller fee).

Pros
- Fees support public relations: encourages the development of affordable housing.
- Fee changes support the cost of services provided.
- Public/Industry: No changes or negative comments received in over 6 months of promotion.

Cons - None

Staff recommends City Council adopt the ordinance to amend the Fees and Charges Manual to support AH and the cost of services, effective December 1, 2004.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3180. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 377

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of October 1-14, 2004: Ben Pace (Water), Linda Black (Sanitation), Amy Lunsford (Sanitation) and Asheville Investments (Police).

The following claims were received during the period of October 15-28, 2044: BellSouth (Streets), Jamie Hutchison (Water), Terry Lee Edgerton (Parks & Recreation), John Petty (Police), Larry Sanders (Transit Services), Charter Communications (Water) and Aban Fritsch (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English, resident in Haw Creek, showed pictures to Council of the poor condition of his street on Pressley Road in Haw Creek. He requested funds be allocated for improvements in the Haw Creek area.

After Vice-Mayor Mumpower discovered that City Council voted on the ordinance regarding fees and charges for affordable housing and fees for the Building Safety Department while he was out of the room (he stated that he indicated he was going to take a break after three hours, which was after the modification to the Urban Village District motion), he felt it was inappropriate to move forward with that vote.

A man who spoke earlier in the modification to the conditional use permit for River Ben Market Place, felt that traffic should have been mitigated by having a mixed residential use in the Urban Village so that people who work in that development could walk to work. He also noted that the traffic mitigations have not been approved by the Redwood Forest neighborhood.

Mr. Michael Patterson, representing Horne Properties, said that the traffic from the outparcel on Phase I of the River Bend project is already incorporated in the Traffic Impact Analysis approved by Council tonight in the conditional use permit modification for River Bend Market Phase.

Ms. Tiffany Kyle, said that in the State's ABC audit of Store No. 3 there was $244,411 reported in 2002 of employee theft and employee embezzlement. After working for the ABC for 13 years, her mother Robin Jones, was wrongfully charged with around $119,000 embezzlement. She questioned where is the rest of the money is that was embezzled. With all of the findings and all of the misused funds found by the Deloitte report and State auditors, why hasn't the SBI or a CPA been brought in to look at everything from 2000 to the present. After that is done, the real truth will be brought out.

Mr. Joe Smith felt that when the Chair of the ABC Board was brought in before Council she failed to adequately answer Council's questions. He felt she should not be reappointed and that she should have been coming forthcoming with answers. Councilman Dunn noted that the District Attorney has advised him that the ABC Board records from 2001 back have all disappeared.

Vice-Mayor Mumpower made the following announcements: (1) a vacancy on the Recreation Board; (2) the importance of Veterans Day on November 11; (3) appreciation to everyone for the For Our Kids day event at McCormick Heights; and (4) recognition of Kathryn Reynolds , Hillcrest resident, for her exceptional effort of cleaning up around her development.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 11:42 p.m.

Magdalen Bourdeaux
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – November 16, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Community Meeting – November 30, 2004 – Central Area – Public Works Facility

It was the consensus of City Council to postpone this meeting until the next fifth Tuesday of the month.

Budget Amendment for Traffic Calming Improvements from River Bend Development

Summary: The consideration of a budget ordinance amendment, in the amount of $65,000, from Riverbend, LLC, for traffic calming improvements in area adjacent to the Wal-Mart site on Swannanoa River Road.

As part of the conditional use permit for the River Bend Development on Swannanoa River Road, City Council approved a requirement that the developer contribute $65,000 to traffic calming improvements to the surrounding neighborhoods. Staff has been working with Redwood Forest to develop a traffic calming plan. If any funds are remaining after the work in the Redwood Forest Community is completed, staff will work with the Beverly Hills and Oakley neighborhoods to see if any traffic calming measures can be installed in these areas.

Pro

- This money allows traffic calming to be installed in a neighborhood without the City taxpayers funding the improvements.

Con

- The money collected from the developer may not be enough to do as much traffic calming as staff and the neighborhoods would like to complete in the neighborhoods that are impacted by the development.

This request meets Goal #2 in the focus area of Planning in the Strategic Operating Plan:

Goal #2: A multi-modal and congestion management transportation program - In conjunction with major employers and traffic generators, develop and implement a comprehensive multi-modal transportation and congestion management program that works for Asheville. Objective 1 Develop a framework for multimodal transportation planning that is based on system performance, is responsive to decision makers and customers, and provides the basis for allocating resources. Task 2) Leverage outside funding to achieve multiple transportation goals where possible

City staff recommends City Council approve the budget amendment, in the amount of $65,000, from River Bend, LLC, for traffic calming improvements in area adjacent to the Wal-Mart site on Swannanoa River Road.

City Engineer Cathy Ball responded to questions from Council about the plan for improvements and what if the improvements are more or less than the $65,000 allocated.

Re-Designation of State Development Zone

Summary: The consideration of a resolution to re-designate the Asheville State Development Zone as proposed.

The State of North Carolina has designated certain census tracts and census block groups in and around the City of Asheville as qualified for inclusion in a State Development Zone. Development zones were created to provide economic incentives to stimulate new investment and job creation in economically distressed urban areas.

The current State Development Zone for Asheville will expire on December 31, 2004. Application for re-designation is due and, if approved, will take effect January 1, 2005, for a period of one year.

While complete data from all previous years of the State Development Zone program are not available, figures from the years 1999 to 2001 reflect that Asheville saw 19 new jobs created, $6,789,365 invested in machinery and equipment, and $300,235 in tax credit generated within the Development Zone.

Pursuant to the state-mandated guidelines, staff has determined the largest possible area for inclusion in the Development Zone. This area is unchanged from the current designation, approved in 2002. The total zone must have a minimum of 20% population below the poverty level.

Re-designating the Development Zone would provide multiple opportunities to further the City of Asheville's goals as described in the Strategic Operating Plan. The program is designed to stimulate new job creation and employment training, giving more citizens a chance to prosper. The economic incentives also encourage small business development, as well as downtown development, as the Central Business District is located within the Development Zone.

Advantages: Continued incentives for investment in economically distressed areas.

Disadvantages: None.

Staff recommends approval of the resolution defining the State Development Zone to be effective January 1, 2005, through January 1, 2006.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

URTV MANAGEMENT AGREEMENT

Assistant City Manager Jeff Richardson said that this is the consideration of a resolution adopting a final draft of the Management Agreement.

Asheville City Council passed an ordinance on December 16, 2003, authorizing the City Manager to negotiate with URTV, Inc. on behalf of the City, to manage and operate the public access channel provided for in City Ordinance 2500, subject to the following:

1. Compliance with the interlocal agreement adopted on November 25, 2003, with Buncombe County government.

2. That the by-laws of URTV, Inc. provide that the City Council and Buncombe County Commissioners shall each appoint two members to the board of directors of URTV, Inc., and that said appointment power be perpetual for the life of URTV, Inc., and that the membership shall not exceed eleven.
3. That the agreement as negotiated be subject to final approval by City Council.

City Council provided direction to staff that the following must be included in the final draft of the management agreement:

1. There needs to be a unilateral way to cancel the agreement, with or without cause.
2. All financials must be open for public inspection.
3. Diversity language is included.
4. Council liaison role must be stated in the contract, with a copy of the meeting agenda shared with the City of Asheville.
5. URTV, Inc is not able to switch funding between capital and operating fund accounts without City Council approval, once yearly funding allocations are made.

Based on this direction, staff worked to insure this language is included in the enclosed draft.

Other key components of the agreement include:

- A performance review clause that enables the City to conduct performance review audits annually by an independent entity chosen by the City.
- Language encouraging a minimum of four hours of programming per month which discusses local issues and meets the needs of an underserved segment of the community
- Quarterly reporting to the City Manager that includes information on budget tracking, program production, uses of resources and services, revenue generation, to include efforts on grant funding, and other related reporting.

Staff has reviewed URTV's proposed budget for the initial year of inception and operation and has determined that the list of capital items as outlined is consistent with necessary initial start-up costs associated with equipment, maintenance, support, and facilities.

Finally, please be advised that Buncombe County Commissioners, in coordination with the Asheville City Council, will need to formally address and consider URTV, Inc. and their operational needs for initial start-up and on-going needs throughout the first year. The County's final allocation will have a direct affect on URTV, Inc.'s ability to provide services as outlined.

With Council's approval, a budget amendment will be forthcoming after the Buncombe County Commissioners have made a final decision on the level of funding for this fiscal year to ensure that the capital and operating budgets align accordingly.

Staff recommends City Council consider adoption of the proposed management agreement with URTV, Inc., to be used as the primary tool for the City to use regarding PEG fee funding allocation on a year-to-year basis, unless otherwise stipulated by City Council.

Mr. Mark Wilson, Vice-Chair of the URTV Inc. Board of Directors, said they have grown their board to its full size, organized committees, visited potential locations, developed budgets and equipment lists and participated in forums about the larger media industry in western North Carolina. Their most significant accomplishment has been the negotiation of this management agreement with City staff. The Board is in complete accord regarding the management agreement as it has been recommended to Council by City staff. With Council's approval of the

agreement, they can begin the process of building this facility in earnest. When it is complete and operational citizens of Asheville and Buncombe County will be able to participate in a shared resource that will reflect all of the excitement, all of the voices and all of the values that make up this community. This agreement outlines URTV's responsibilities. URTV will provide local producers with the equipment, space and training to develop and produce programming which will air on the cable channel provided by Charter. We will not be producing any programming of our own. Responsibility for program content will be borne by the producers, each of whom will be required to sign an agreement that they will abide by the content guidelines we have established and that reflect community and FCC regulation standards. Conflicts and complaints about program content will be referred to a separate independent advisory panel who will recommend appropriate action. All of the money that URTV will receive from Charter through the City will go toward capital expenditures only. All operational funding will come from Buncombe County and will governed by a separate management agreement. We believe that the URTV Center will become the focal point of this important economic and cultural phenomenon. URTV will be a state of the art tool that will give voice to educators, social service providers, artists, churches, performers, government organizations, and ordinary citizens. It will help train and educate a potential future workforce for this growing segment of our local economy and it will help to unify and celebrate our unique mountain culture. We hope that the City Council share the sense of partnership and interest demonstrated by City staff as we crafted this management agreement. We are confident that once URTV is operational that Council will be able to take no small measure of pride in providing such a vital, important and enduring opportunity to the citizens of Asheville.

Throughout the discussion by Council, Mr. Wilson and members of the URTV Board answered various questions from Council, some being, but are not limited to: is the rent factor in the budget realistic; does the management agreement provide parameters for a reasonable opportunity to operate; what specific criteria will the producers have to follow; is the City open up for a lawsuit if programming is inappropriate; what are the termination provisions of the management agreement; how is the board functioning as a group; will individuals be able to block the channel or is there a way for people to opt out of the channel altogether in their basic package; will religious and political programming be allowed; how will the equipment and materials be maintained; does our agreement dovetail with the agreement with Buncombe County; is the programming non-commercial; if a programming was played consistently or out of primetime, would that invalidate our agreement; what would happen if a candidate raised an issue that they are not being treated fairly regarding program time; and has the City appointed a liaison to the Board.

Councilman Dunn felt that if Charter has the capability of letting the City know how many people are blocking the channel, it can be a useful tool to measure the success in two years from now.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ASHEVILLE STORMWATER PROGRAM UPDATE

City Engineer Cathy Ball said that this is an update City Council on the status of the recommendations from the Asheville Stormwater Advisory Committee (SAC).

In November 2003, City Council authorized City staff to complete a study to determine if a stormwater enterprise fund was a feasible method for funding stormwater quantity and quality needs in the City of Asheville. Part of this feasibility study was to establish a stakeholders group to evaluate the needs of the Stormwater Program and recommend a funding mechanism.

As you may recall, the City of Asheville must comply with the Environmental Protection Agency's National Pollution Discharge Elimination System (NPDES) Permitting and Stormwater Phase II Regulations as part of the Federal Clean Water Act. In March 2003, City Council approved a plan to comply with the "Six Minimum Measures" of the regulations, including strategies for:

- Public Education and Outreach
- Public Participation and Involvement in Implementing the Plan
- Detection and Elimination of Illicit Discharges
- Construction site Run-off Control
- Post-Construction Run-off Control, and
- Pollution Prevention and Good Housekeeping by the Municipality.

The SAC has served as an advisor to the City Manager since June 2004. City staff contracted with McGill Associates to serve as facilitator to the group as well as provide engineering and financial assistance to the group.

Pros:

- An enterprise fund would provide a dedicated funding source to address stormwater needs.
- The fee would be equitable in that users would pay a fee based on the amount of impervious surface they have.
- Non-residential customers would pay the majority of the cost of the program.
- This fee does not distinguish between for-profit and non-profit organizations

Con:

- Staff would need to spend time educating the public on the need for this program.

This recommendation meets the City's Strategic Goal in the focus area of Natural and Built Environment:

Goal #1 - A high quality of air and water – Enhance and preserve air and water quality through comprehensive efforts.
Objective D - Improve water quality by complying with EPQA Federal NPDES – Phase II Stormwater Rules.
Task #2 - Adopt and implement a stormwater fee.

City staff requests City Council take action on the SAC's recommendation on December 14, 2004, which is to adopt an ordinance establishing an enterprise fund to pay for a comprehensive stormwater program. The ordinance would not be effective until July 1, 2005. She said that staff is not asking Council to set the rates at this time, as the rates will be a part of the budget structure and would be developed as part of the 2005-06 budget.

Mr. Joel Storrow, President of McGill Associates, made a brief presentation of the SAC's findings and recommendations. He said that managing stormwater has become a strategic issue in Asheville.

Mr. Storrow explained the federal and state mandate: (1)under EPA's Phase II Rules, Asheville must develop, implement and enforce a stormwater management program; (2) the program must reduce the discharge of pollutants to the "maximum extent practicable" to protect water quality; (3) the program must address 6 minimum control measures: (a) public education and outreach; (b) public participation/involvement; (c) illicit discharge detection and elimination; (d) construction site runoff control; (e) post-construction runoff control; and (f) pollution prevention/good housekeeping; (4) Asheville must select "Best Management Practices" (BMP)

and measurable goals for each minimum measure; and (5) This program must be approved by the State.

Asheville's permit status is (1) The City's present stormwater program addresses only construction site runoff control; (2) Asheville has been issued a 5-year permit for a proposed stormwater program; (3) The permit addresses the 6 minimum measures and prescribes a schedule and BMP's for each measure; and (4) The initial permit requirements must be implemented by March 10, 2005.

He explained that the City Manager appointed the Stormwater Advisory Committee in June, 2004. The SAC was established to advise the Manager on matters related to the Phase II stormwater requirements. The established objective of the SAC is to: "Assist the City in implementation of a compliant stormwater program that serves the best interests of the community." He then introduced the SAC members and the areas they represented. He outlined SAC's activities: (1) they held 6 general meetings; (2) reviewed federal and state stormwater mandates and the requirements of the City's stormwater permit; (3) became familiar with City's current soil erosion, sedimentation control, and stormwater ordinances; (4) reviewed the impervious surfaces inventory; (5) heard case studies of other NC Stormwater Programs; (6) identified and prioritized key features of a local stormwater program; (7) developed an annual budget for the stormwater program; and (8) considered alternative program funding vehicles.

He outlined the stormwater priorities: (1) at a minimum, comply with federal and state mandates by protecting and improving water quality; (2) the City must dedicate resources to improve the condition of the existing stormwater system; (3) additional resources are needed for education on water quality issues; (4) attention must be given to the existing system to support future growth; and (5) already our inattention is demonstrated by area flooding and property damage.

He said that key elements of the proposed stormwater program consist of the Engineering Department being responsible for (1) public education about stormwater; (2) program administration and planning; and (3) regulation of stormwater releases. The Public Works Department would be responsible for (1) system operation and maintenance; and (2) rehabilitation of infrastructure.

Regarding current program costs, he said the City will spent about $800,000 for its stormwater program in the current fiscal year. These costs are itemized as follows: (1) in City Engineering, mapping is $12,000 and construction site runoff control is $90,000; and (2) in the Public Works Department, system maintenance is $226,200 and construction is $471,000. Total budget - $799,200.

Regarding allocation of future program costs, (1) the annual stormwater program costs would increase to increase to $2.5 Million (64% would be allocated to increasing capital expenditures to improve the stormwater system and 36% of the increased cost is attributed to stormwater planning, education and regulation); (2) the projected costs are considered minimum for (1) compliance with the federal and state mandate; (2) public education; (3) capital planning; (4) maintenance of the current system; and (5) development of new infrastructure and major repairs to existing facilities.

Their decision is not whether there will be a stormwater program, but what will the scope of the program be and how to pay for it. There are two options for funding the program: The General Fund and an Enterprise Fund.

Regarding the General Fund, the current stormwater program is funded from the General Fund, where the burden of the program is borne solely by those who pay taxes. The burden of

General Fund programs is borne solely by those who pay property taxes. Tax-exempt properties such as hospitals, schools, churches and institutions are contributors, but do not pay. There is no relationship between who pays and who benefits. Those properties which generate stormwater and the quantities of stormwater generated do not influence the monetary contributions. This raises a question of equity.

Regarding the Enterprise Fund, the fundamental concept is that the properties that contribute pay in proportion to their contribution. This is accomplished by calculating the magnitude of impervious surface for each contributor. This system recognizes the contribution of contributors such as UNC-Asheville, hospitals, state government, federal institutions and others that pay no property taxes. This eases the burden on residences and businesses. There is a direct relationship between stormwater contributions and payments.

He explained the comparison of funding alternations. The proposed stormwater program would require approximately 3.87 cents on the tax rate, if it remains in the General Fund. Based on the present estimates of the impervious areas, a basic residential equivalent fee of $2.00 to $2.50 per month would yield revenues to support the proposed annual program. Fee would increase according to the amount of impervious area. The majority of the estimated revenue for the program would come from non-single family land uses.

He then reviewed with Council the monthly residential fees for other stormwater programs in North Carolina cities.

Mr. Storrow reviewed with Council the SAC's recommendations: (1) They recommend that the existing stormwater program be expanded to meet the regulatory mandate to protect and preserve water quality and educate the public; (2) They recommend that the stormwater program be expanded to provide capital necessary to operate and maintain the system and provide for future needs; (3) They recommend funding the stormwater program with a newly created self-sustaining Enterprise Fund; (4) They suggest tiering residential billing categories to promote affordability; and (5) They recommend developing a credited system that encourages users to improve water quality.

He said that establishing an effective stormwater program is the important matter before the City. The scope of the proposed program represents a balanced affordable starting point.

Throughout the discussion, Ms. Ball responded to various questions and comments from Council, some being, but are not limited to: when will the technical component be completed so developers will know what they have to comply with; what will the educational program consist of; how was the non-residential fee range calculated; how are the measurements taken; are aerial maps and field inspections used to determine the amount of impervious surfaces; is the a process for the customer to question a bill; will individuals that go above and beyond the ordinance be apply to have a reduction in their fee; what is the difference from our existing stormwater ordinance; has City Council sent out a letter to our legislators protesting this unfunded mandate; is 36% too much for education when it seems like this is more of an infrastructure issue; how many staff will needed to be hired to implement this program; will the new staff hired do more than education; will this program address localized flooding; will there be some investment the City can make in areas like Pebble Creek, Crowfields and Ballentree; will poor development issues be addressed with this money; what is the specific outcomes that we would want to be different than if we didn't invest in education; will the master plan be done in phases; is the education percentage flexible; what components does Buncombe County have to comply with;

City Manager Westbrook said that the City has never invested the amount of money really needed for stormwater. We don't have some basic backbone infrastructures. We have stormwater control in some areas, but we don't have it networked together to where it finally

winds up in the river and it's filtered the best we can. You overlay that issue of funding in the past with our topography and we will need to spend several years to get curselves in a position to start making major progress.

Councilwoman Jones felt this is a quality of life issue. It sounds like this will really help our community. It would have been great if the federal government could have helped with funding, but in terms of the product we will have, it will help our life in Asheville.

Ms. Ball requested Council to make a decision on December 14, 2004, if this is an appropriate way to fund this unfunded mandate. Is this methodology appropriate to assess people based upon the amount of impervious surface that they have. Other than saying there will be a crediting system, it will be set up in tiers, and it will be implemented on July 1, 2005 - that is all Council is making a decision on. The Enterprise Fund budget will be put together along with what we are going to do with it and presented to Council as part of the budget. Council will then, as part of the budget process, decide on how much the City wants to spend, what we are going to get for that money, and how much on a per user fee will that cost the residential user. The whole separate issue is the technical part - what will the development community have to do when they develop. That ordinance will have to be adopted prior to March 10, 2005.

Councilman Davis wanted an emphasis put on this during the budget process so that there is an opportunity to review this in more detail than we may for one that has been in place for the past five years. City Manager Westbrook also noted that City Council will set the budget for the educational component.

Councilman Newman wanted to learn more about the thinking in terms of what we hope to get out of the educational initiative. This might be the kind of issue that there may be some key groups or organizations that we need to target education around, like the development community. He hoped there will be an opportunity to learn more about SAC's ideas around education before we get fully into the budget process itself.

Councilwoman Jones felt that to develop an Enterprise Fund now will take a little bit of the burden off our taxpayers, because organizations like hospitals, etc. will have to pay a fee for their participation in water quality.

Vice-Mayor Mumpower felt the 36% for education was too high a figure and felt that more money should go into infrastructure.

Councilwoman Jones thanked SAC for their work and recommendations on this issue. As with all other Council committees that bring recommendations to the table, City Council has the discretion and judgment whether or not to implement all, some or none of those recommendations.

On behalf of City Council, Mayor Worley thanked the members of SAC for their hard work and effort on bringing these recommendations to Council.

At 4:52 p.m., Mayor Worley announced a short break.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UDO AMENDMENT REVIEW

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on November 23, 2004. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Clarification of Two Standards for Bed and Breakfast Inns

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide clarification of two standards for bed and breakfast homestays and inns.

In working with the Unified Development Ordinance (UDO) requirements for bed and breakfasts, the Planning & Development staff has found two statements requiring clarification for the intent to be more clearly understood by developers and property owners. Specifically, the question of how to measure square footage is further defined as "gross floor area" (as defined in Section 7-2-5). The other amendment is intended to clarify that existing bed and breakfast homestays and inns that are legal, nonconforming only due to the separation requirements of 500 feet can be further expanded as long as they comply with other applicable development standards.

Pros –

- Requirements for bed and breakfast uses will be more easily understood and interpreted by staff and the public.
- The intent of the ordinance will be made clearer and less subject to legal challenge.

Con –

- It is possible that certain property owners will disagree with the intent to allow existing bed and breakfasts to expand if only nonconforming due to the separation requirements.

The Planning and Zoning Commission unanimously recommended approval of these code amendments on October 6, 2004, by a vote of 6-0. City staff also recommends approval of the proposed code amendment as well.

Elimination of Level III Review of Industrial Uses

Planning and Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to eliminate Level III review of industrial uses.

This code amendment deletes the requirement for industrial developments to receive Level III review, thereby allowing them to be approved without public hearing by the Planning and Zoning Commission and City Council. The intent is to expedite the review and permitting of industrial developments consistent with Goal 2/Economic Development of the Strategic Operating Plan which states: Reform the permitting process to make it more conducive to do business in Asheville.

Large projects would still be heard by the Technical Review Committee (TRC); all existing buffering, landscaping and other site design requirements would apply to the projects. In addition, the change would apply only to properties already zoned for industrial uses; any needed

zoning changes (for example, a change from Highway Business to Industrial) would still require Planning and Zoning Commission and City Council consideration.

Pros:

- Provides a tool to make Asheville more competitive in economic development
- Streamlines the development review process consistent with general Council direction

Con:

- Removes opportunities for the public to be heard on site design issues (although these projects will still receive TRC review)

On November 3, 2004, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Upon inquiry of Councilman Newman, Mr. Shuford said that he would provide a map prior to the public hearing on the areas in which Industrial and Community Industrial zoning categories would apply.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these public hearings on the formal City Council agendas.

HOUSING REHABILITATION LOAN APPROVAL PROCESS

Field Services Coordinator Ed Vess said that this is the consideration of a resolution affirming the revisions to the city-wide housing rehabilitation loan approval process.

The Community Development Director and Planning and Development Director were authorized by City Council Resolution # 95-116 on July 25, 1995, to approve housing rehabilitation loans, with the form of the documentation for such loans to be subject to the approval of the City Attorney. No loan limit was established by Resolution # 95-116, rather the underwriting guidelines and budgetary authority are the effective loan limits.

In 1995, the loans did not generally exceed $40,000. Over the years since then the loans have regularly exceeded that amount and with the authorization of the Section 108 funding of CARROT loans in 1999, some multi-family projects have been approved for several hundred thousand dollars.

Loan applications go through a very stringent underwriting process to assess the credit worthiness of the borrower and the financial strength of the project. Loans to low income homeowners must be affordable. Multi-family projects must be able to operate independently and produce a positive cash flow.

Although the underwriting process provides the technical information required to make the loan approval decision, staff along with guidance from the Housing and Community Development Committee and City Manager have established the following process which provides a higher level of review and approval for larger loans:

"Applications for FAIR and CARROT loans not to exceed the maximum allowed for rehabilitation of a single unit under the FAIR program may be approved by the Community Development Director or the Planning and Development Director. All other rehabilitation loan applications may be approved by the City Manager upon recommendation by the Rehabilitation Loan Committee which shall consist of the Director of Finance or her/his designee, the Director of

Audit and Budget or her/his designee, and the Director of Planning and Development or her/his designee."

The advantages of this process are:

- The expertise of senior staff is availed to review the work of Division staff before large loan commitments are issued.
- Approval authority for large loan is more appropriately placed at the highest administrative level.
- Smaller homeowner loan approval remains at the Department/Division level for efficiency.
- Administrative review and approval of loans helps maintain the financial privacy of applicants.

City staff recommends City Council adopt the resolution affirming the revisions to the housing rehabilitation loan approval process.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

REVISIONS TO THE OUTSIDE AGENCY POLICY

Budget Director Ben Durant said that this is the consideration of a resolution approving revisions to the City's Outside Agency Policy.

Staff has developed proposed revisions to the City's Outside Agency Policy, which was first adopted in 2001, to guide the Outside Agency Committee's process for evaluating outside agency funding requests. The purpose of the proposed changes is to strengthen the current outside agency review process and allow, on a limited basis, for Council to award non-compatitive grants. Specific revision and/or additions to the policy are as follows:

- The Committee may conduct formal interviews with specific agencies as needed to resolve questions about specific programs.
- The grant application requires a complete agency budget and an annual outside audit, as well as a certification of complete and accurate financial data.
- Under very limited circumstances, City funding may be given in the form of non-competitive grants. These grants may be made to organizations that function as quasi-divisions of the City, or as payment under existing contracts authorized by City Council.
- The Outside Agency Committee will complete its review of outside agency requests prior to May and will present its recommendations, along with staff's recommendations, to the full City Council as part of the City Manager's presentation of the annual operating budget.

The Outside Agency Committee has reviewed a draft of the revised policy.

The proposed revisions relate to the City's Strategic Operating Plan in the *Community Building* focus area, and more specifically, Council's goal to "re-evaluate Council decision-making and public input processes and develop a strategy that results in both healthy dialogue and effective decision making".

Pros: The policy revisions will strengthen the review process and make the City requires for the outside agency program clear to various non-profit agencies.

Con: The City may see a proliferation of agencies seeking non-competitive grant status.

City staff recommends City Council adopt the City's revised Outside Agency Policy.

In response to Councilwoman Jones, Mr. Durant said that the agencies will be given a form to sign that will serve as the certification of complete and accurate financial data.

Upon inquiry of Councilwoman Jones, Mr. Durant explained how the Outside Agency Committee is using the feedback that the agencies give to the City on the process.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

USE OF INFRASTRUCTURE FUNDS TO ASSIST AFFORDABLE HOUSING

Field Services Coordinator Ed Voss said that this is the consideration of a resolution approving the use of $200,000 in capital funds for affordable housing infrastructure.

The Fiscal Year 2005 budget includes a capital appropriation of $200,000 for infrastructure improvements to assist the development of affordable housing. At its meeting on November 8, 2004, the Housing and Community Development Committee considered a range of possible uses for this funding that would:

a. Remove specific barriers, e.g. inadequate water supply, so that hard-to-develop land becomes available for development
b. Encourage infill development on vacant urban lots rather than extending infrastructure to 'green field' sites
c. Get the greatest possible housing benefit (no. of affordable units for $$ spent)
d. Make funds available in an equitable manner
e. Increase the tax base
f. Spend funds within a reasonable time period

The Committee recommends using the funds in the first place to support developments that receive low interest loans from the Housing Trust Fund. By offering City funds to pay for necessary offsite infrastructure improvements, such as water line upgrades, or sewer line extensions, it is hoped to encourage the development of affordable housing on sites that have had significant barriers to development.

This approach has advantages over using the funds to address one or more priority infrastructure needs Citywide, since it will be certain that affordable housing will be built as a result of the expenditure.

Other uses of funds considered feasible by the Committee were:

- To hold funds in reserve to address infrastructure concerns arising in relation to future affordable housing developments, case by case
- To resolve infrastructure problems on City-owned lots to make them suitable for housing development

If Council wishes to pursue the Committee's first recommendation, time is of the essence, as this year's Housing Trust Funds Request for Proposals (RFP) has already been issued, with a deadline of January 7.

Advantages:

- Encourages development of sites that have infrastructure barriers

- Ties expenditures to development of affordable housing
- Increases tax base
- Depending on nature of improvements, may spur development of nearby sites
- Makes funds available in an equitable manner, through a competitive RFP process

Disadvantages:

- 2005 Housing Trust Fund RFP has already been issued – all applicants may not see this additional source of assistance
- May be too late for developers to reconsider sites previously considered undevelopable
- Once-a-year RFP may not identify the best possible projects
- May not use all the funds in this round

City staff recommends City Council use all or part of the $200,000 capital appropriation to provide off-site infrastructure improvements necessary for the development of affordable housing that is also assisted with the City's Housing Trust Fund.

Councilman Newman felt this was a good approach to the use of these resources. He felt Council needs to think through whether this is a one-time investment to address the creation of more affordable housing and similar related issues around quality of life in neighborhoods that have high concentrations of poverty.

After Vice-Mayor Mumpower confirmed that this is the $200,000 Council appropriated for the safe neighborhood initiative, he questioned whether this is the appropriate utilization of our limited funds. Our charge to address affordable housing, as a city government, is directly with funds is suspect at best and although he philosophy wouldn't agree with us getting involved in that he would disagree with us getting involved in it to the extent that we pull money away from what is a major responsibility – law enforcement, specifically hard drug intervention. That $200,000 that we would put into something that may indirectly have an impact on our hard drug problem could be much more directly potentially effective if it were put into law enforcement. He said we don't have enough law enforcement officers. We are the only body that has the primary responsibility of protecting our citizens. He didn't think this is a bad thing and he wouldn't argue against the need for affordable housing, but he would argue government being the real solution. He thinks developers are going to be the primary key and our economy and other factors. This is so much more indirect than our law enforcement is. He encouraged City Council to consider using this money for law enforcement that will help us address our hard drug issue.

Councilman Newman said that this is an important area to be looking at because it was governmental policies that created, to a very significant degree, the concentrations of poverty we have in certain parts of the community. Therefore, if we know that those dynamics contribute to crime and some other very significant social challenges that law enforcement will not solve by itself, then we have an obligation to look at what we can learn from our past. We may be able to rectify some of the problems that the government locally and at all levels of government have contributed to creating those concentrations of poverty. There is a Hope 6 process that has started in the community to look at some of these issues.

Vice-Mayor Mumpower agreed that this is an important policy discussion, but right now we have an open air hard drug market in Asheville. We have people dealing hard drugs openly with very limited deterrent. That has a much more dramatic affect on the quality of people's lives.

Mayor Worley was concerned about using the funds in the way specified here. The Hope 6 program, which needs about $15-20,000 in funding for the consultant to come in and help us develop that program to deal specifically with low income housing, and more specifically with that low income housing where so much of the drug activity is taking place. He would like to see

Council have the flexibility to look at this funding source for that. Councilwoman Bellamy and he are on a committee with some members of the Housing Authority and they had a review of the Hope 6 program. There is a lot of promise for some Hope 6 funding but it will need about $15-20,000 to move forward with that project. He felt that is an ideal use of these funds. It will be coming to Council for approval at the appropriate time. Again, he wants us to retain the flexibility in this pool of money to be able to do something like that and maybe something else that we don't know about yet. He thinks we can make it available with our Housing Trust Fund to some degree, but he doesn't want it all tied up with that.

Councilman Newman would support the funding for the Hope 6 program.

Councilwoman Jones felt the staff's recommendation for that flexibility is evident in that Ms. Caplan recommends Council to "use all or part of the $200,000."

Councilwoman Bellamy said that in addition to the Hope 6 funding, which could have a long-term impact on possibly removing some congregated housing within our community, there are other ideas that the Housing Authority staff is coming up with to address the open air drug market that deals with infrastructure needs, e.g., street closings, gates and more tangible ways where it is harder for clients to get into residential areas. She would like for Council to have an opportunity to work with the Housing Authority staff to see if we can get a better proposal to look at each of their developments to see what we can do and hopefully use some of those funds. She suggested that be reviewed by the Housing & Community Development Committee prior to going to the full Council.

Vice-Mayor Mumpower felt that seems a more targeted effort.

Mayor Worley felt this item should not be brought forth to the next formal meeting in that Council may need more time.

Councilwoman Jones felt the $200,00 should be able to do all of this - the Hope 6 program, probably some of the Housing Authority initiatives, and some of things we were initially envisioning. She doesn't want to lose site of that because that is a big part of where we need to go. She feels there is a lot of flexibility in that $200,000 figure. She thinks Ms. Caplan phrased the recommendation so she could have some guidance that identifies some opportunities along the way with Council's approval.

Vice-Mayor Mumpower said that in its current format, there is no mention to hard drugs at all. He felt some Council might be more comfortable in supporting it if there was a more specific plan.

Mayor Worley felt that the resolution is very specific and limiting. He didn't think the resolution wording would allow the use for the Hope 6 program.

Mr. Vess suggested Council not place this on the next formal meeting agenda and let staff work with the Housing & Community Development Committee.

Councilwoman Jones was agreeable to not voting on this next week; however, the trade-off is that we will have some concrete proposals through the Housing Trust Fund for the investment of infrastructure that might be a good match and give some synergy around those developments.

I-26 CONNECTOR

Councilman Newman said that the issue of the lane alignment questions on the I-26 Connector have been significant issues in front of our community for a long time. We have looked at the different information about traffic models that have been developed and what they mean. Until very recently he thought we were getting to a point where we have heard everything there was to hear and we needed to have a voice in the matter. However, there is a possible way for us to move forward that doesn't involve Council taking a specific position on what the lane alignment in West Asheville should be. This past summer, our Traffic Engineer Anthony Butzek, brought this up last summer.

In response to Councilman Newman's question of why he wrote to the NC DOT last summer and requested them to perform a CORSIM analysis for the West Asheville Connector, Mr. Butzek said that there was discussion at that time around the number of lanes and the justification for choosing the number of lanes. Mr. Michael Moule, Traffic Engineer who was retained by the Southern Environmental Law Center, had requested some information from the NC DOT on the analysis they did and he reviewed that analysis. Mr. Moule found some concerns with it. Mr. Butzek felt that a more detailed analysis would provide a real resolution, since there was some disagreement in the different analyses of what the level of service would be for varying scenarios and differing number of lanes. He said that CORSIM analysis is really the state of the art practice for analyzing the operation of freeway segments. The segment that he has seen that was performed by NC DOT was somewhat more simplistic. Simplistic analyses are used all the time; however, since that simplistic analysis showed a result that kind of put it on the borderline, he felt that doing a more detailed analysis might be an appropriate way to resolve that issue. If the basic CORSIM analysis is performed, he expects it will give a lot better information than we have now.

Councilman Newman said that Mr. Butzek does have professional training in the implementation of the CORSIM analysis. Upon inquiry, Mr. Butzek said to do the basic analysis, which is much more detailed that what has been done, would take about 30 hours. With his other work responsibilities, he estimated it would take about a month from the time we acquired the necessary software, which may be two weeks and would cost approximately $500.

In responding to Councilman Newman as to why the NC DOT did not want to perform the study, Mr. Butzek said that NC DOT's response was essentially was that they did not feel it was necessary. They had a differing opinion on the number of hours it would take to complete and putt it in a comparison. They wanted to do a full and complete analysis which is the Cadillac of the analysis. It would be correct to do that, but it is his opinion that to do the basic analysis would be much better than the very simplistic analysis that has been done. The reasons they gave were (1) the amount of time required for them to do the full analysis; and (2) the fact that the Metropolitan Planning Organization (MPO) has passed resolutions in the past in support of the 8-lanes.

Councilman Newman asked Council to instruct City staff to conduct the CORSIM analysis for the I-26 Connector in West Asheville. It is his hope that doing this will accomplish a couple of things. First, it is his hope that it would provide a final and objective basis for all the decision-makes to have to make a decision on how to move forward on this project. It is hope that if the analysis does show that a smaller, with less impact, lane alignment is really viable and will carry future traffic far into the future. It is also his hope that if the analysis shows that only an 8-lane facility will be adequate to carry future traffic that all the people in the community that have been working on this for a long time will understand that and consider it as well. In short, it is his hope that rather than us taking a position now on any particular lane alignment that a better decision would be to get this final piece of objective information, the best information that could be available to us, and have that developed so that the decision-makers in this process can base their decision on solid, scientific information.

City Manager Westbrook asked that if Council wants to have that analysis done, he recommended the "how to" be left up to City staff, whether it be a staff person or someone we hire.

Upon inquiry of Mayor Worley, Mr. Butzek said that the NC DOT would have the software in Raleigh.

Discussion surrounded the NC DOT being the appropriate body to do the study. Even though City staff has made a request to the NC DOT to perform the study and they have refused, City Council has not formally requested they perform the study. If the NC DOT refuses to do the study, then the City will perform it.

Councilman Newman said that this Thursday the MPO is poised to pass a resolution that says we want to move forward with the smallest lane alignment possible to minimize impacts, but it needs to technically be defensible. As one of the City's MPO members, Vice-Mayor Mumpower said he would ask the MPO to postpone their decision until the more definite research is performed.

Councilwoman Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Newman said that after this study is complete, then Council's part is complete in trying to get to the bottom of what is the best choice on this issue. It is his hope that the decision-makers will consider this best start of the art information.

Upon inquiry of Councilwoman Jones, Mr. Butzek explained the difference between a Cadillac analysis and a basic CORSIM analysis.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that he could not say what conclusions the NC DOT will draw even if we do the CORSIM analysis and it shows different results.

In response to Vice-Mayor Mumpower, Mr. Butzek said that a reasonable timeframe in which the NC DOT should be able to perform the study would be about 3-4 months, taking into account they would have to adjust their workload. It is his understanding that a 3-4 month delay in which to get this research will not delay the NC DOT from moving forward as long as there is a finite point in which the issue is to be resolved.

The following individuals spoke about the I-26 Connector and their support for the CORSIM analysis:

Mr. Willis, County resident
Ms. Leesa Kulba
Mr. Roger Darrow
Ms. Betty Lawrence
Mr. Ron Ainspan

Councilman Newman moved to authorize the Mayor to write a letter to the NC DOT asking them to perform the basic CORSIM analysis (not the Cadillac) in 3-4 months, or a time in which it does not impact the final determination, and let us know with 7-10 days if they will perform that study. If we have not heard back from them within the 10 days, then the City will proceed with performing the CORSIM analysis. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

Upon inquiry of Councilwoman Jones, City Manager Westbrook asked that the City staff be allowed to find out the best way to proceed with the study - an engineering firm that may already have that software vs. City staff. If an engineering firm is used, Mr. Butzek will oversee the study.

BOARDS/COMMISSIONS

It was the consensus of City Council to arrange interviews for Eleanor Campbell and Andrew Gall for a vacancy on the Recreation Board.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Robert E. Shepherd to the River District Design Review Committee.

CLOSED SESSION

At 6:45 p.m., Councilman Dunn moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilman Davis and carried unanimously. The following actions occurred in closed session:

Resolution No. 04-236 – Resolution establishing just compensation and authorizing the use of eminent domain to acquire an easement over certain property on New Haw Creek Road for greenway purposes. The appraisal by Mark Morris is hereby accepted, and just compensation for the easement over the property identified by PIN No. 9658.08-78-5543 and owned by Ricky K. Wallin and wife, Diana L. Wallin on New Haw Creek Road is hereby established at $1000.00. Acquisition of said easement by the use of eminent domain is hereby authorized in accordance with the provision of Chapter 40A of the N. C. General Statutes. Resolution Book No. 28 – Page 415.

Resolution No. 04-237 – Resolution establishing just compensation and authorizing the use of eminent domain to acquire an easement over certain property on New Haw Creek Road for greenway purposes. The appraisal by Mark Morris is hereby accepted, and just compensation for the easement over the property identified by PIN No. 9658.08-78-6513 and owned by Ricky K. Wallin and wife, Diana L. Wallin on New Haw Creek Road is hereby established at $900.00. Acquisition of said easement by the use of eminent domain is hereby authorized in accordance with the provision of Chapter 40A of the N. C. General Statutes. Resolution Book No. 28 – Page 416.

Resolution No. 04-238 – Resolution establishing just compensation and authorizing the use of eminent domain to acquire an easement over certain property on New Haw Creek Road for greenway purposes. The appraisal by Mark Morris is hereby accepted, and just compensation for the easement over the property identified by PIN No. 9658.08-78-8554 and owned by Jolly SIS & B, LLC, Jean Jolly Jaynes, and George Frederick Jaynes on New Haw Creek Road is hereby established at $4200.00. Acquisition of said easement by the use of eminent domain is hereby authorized in accordance with the provision of Chapter 40A of the N. C. General Statutes. Resolution Book No. 28 – Page 417.

At 6:57 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:57 p.m.

Marjorie Bowerson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – November 23, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Dunn led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 9, 2004, AND THE WORKSESSION HELD ON NOVEMBER 16, 2004**

B. **MOTION AMENDING THE 2004 CITY COUNCIL MEETING SCHEDULE TO CANCEL THE NOVEMBER 30, 2004, COMMUNITY MEETING**

C. **ORDINANCE NO. 3181 - BUDGET AMENDMENT FOR TRAFFIC CALMING IMPROVEMENTS FROM RIVER BEND DEVELOPMENT**

Summary: The consideration of a budget ordinance amendment, in the amount of $65,000, from Riverbend, LLC, for traffic calming improvements in area adjacent to the Wal-Mart site on Swannanoa River Road.

As part of the conditional use permit for the River Bend Development on Swannanoa River Road, City Council approved a requirement that the developer contribute $65,000 to traffic calming improvements to the surrounding neighborhoods. Staff has been working with Redwood Forest to develop a traffic-calming plan. If any funds are remaining after the work in the Redwood Forest Community is completed, staff will work with the Beverly Hills and Oakley neighborhoods to see if any traffic calming measures can be installed in these areas.

Pro

- This money allows traffic calming to be installed in a neighborhood without the City taxpayers funding the improvements.

Con

- The money collected from the developer may not be enough to do as much traffic calming as staff and the neighborhoods would like to complete in the neighborhoods that are impacted by the development.

This request meets Goal #2 in the focus area of Planning in the Strategic Operating Plan:

Goal #2: A multi-modal and congestion management transportation program - In conjunction with major employers and traffic generators, develop and implement a comprehensive multi-modal transportation and congestion management program that works for Asheville. Objective 1 Develop a framework for multimodal transportation planning that is based on system performance, is responsive to decision makers and customers, and provides the basis for allocating resources. Task 2) Leverage outside funding to achieve multiple transportation goals where possible

City staff recommends City Council approve the budget amendment, in the amount of $65,000, from River Bend, LLC, for traffic calming improvements in area adjacent to the Wal-Mart site on Swannanoa River Road.

ORDINANCE BOOK NO. 21 – PAGE 316

D. RESOLUTION NO. 04-239 -RESOLUTION RE-DESIGNATING THE ASHEVILLE STATE DEVELOPMENT ZONE

Summary: The consideration of a resolution to re-designate the Asheville State Development Zone as proposed.

The State of North Carolina has designated certain census tracts and census block groups in and around the City of Asheville as qualified for inclusion in a State Development Zone. Development zones were created to provide economic incentives to stimulate new investment and job creation in economically distressed urban areas.

The current State Development Zone for Asheville will expire on December 31, 2004. Application for re-designation is due and, if approved, will take effect January 1, 2005, for a period of one year.

While complete data from all previous years of the State Development Zone program are not available, figures from the years 1999 to 2001 reflect that Asheville saw 19 new jobs created, $6,789,365 invested in machinery and equipment, and $300,235 in tax credit generated within the Development Zone.

Pursuant to the state-mandated guidelines, staff has determined the largest possible area for inclusion in the Development Zone. This area is unchanged from the current designation, approved in 2002. The total zone must have a minimum of 20% population below the poverty level.

Re-designating the Development Zone would provide multiple opportunities to further the City of Asheville's goals as described in the Strategic Operating Plan. The program is designed to stimulate new job creation and employment training, giving more citizens a chance to prosper. The economic incentives also encourage small business development, as well as downtown development, as the Central Business District is located within the Development Zone.

Advantages: Continued incentives for investment in economically distressed areas.

Disadvantages: None.

Staff recommends approval of the resolution defining the State Development Zone to be effective January 1, 2005, through January 1, 2006.

RESOLUTION BOOK NO. 28 – PAGE 418

E. RESOLUTION NO. 04-240 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO THE URTV INC. MANAGEMENT AGREEMENT

Summary: The consideration of a resolution adopting a final draft of the Management Agreement.

Asheville City Council passed an ordinance on December 16, 2003, authorizing the City Manager to negotiate with URTV, Inc. on behalf of the City, to manage and operate the public access channel provided for in City Ordinance 2500, subject to the following:

1. Compliance with the interlocal agreement adopted on November 25, 2003, with Buncombe County government.
2. That the by-laws of URTV, Inc. provide that the City Council and Buncombe County Commissioners shall each appoint two members to the board of directors of URTV, Inc., and that said appointment power be perpetual for the life of URTV, Inc., and that the membership shall not exceed eleven.
3. That the agreement as negotiated be subject to final approval by City Council.

City Council provided direction to staff that the following must be included in the final draft of the management agreement:

1. There needs to be a unilateral way to cancel the agreement, with or without cause.
2. All financials must be open for public inspection.
3. Diversity language is included.
4. Council liaison role must be stated in the contract, with a copy of the meeting agenda shared with the City of Asheville.
5. URTV, Inc is not able to switch funding between capital and operating fund accounts without City Council approval, once yearly funding allocations are made.

Based on this direction, staff worked to insure this language is included in the enclosed draft.

Other key components of the agreement include:

- A performance review clause that enables the City to conduct performance review audits annually by an independent entity chosen by the City.
- Language encouraging a minimum of four hours of programming per month which discusses local issues and meets the needs of an underserved segment of the community
- Quarterly reporting to the City Manager that includes information on budget tracking, program production, uses of resources and services, revenue generation, to include efforts on grant funding, and other related reporting.

Staff has reviewed URTV's proposed budget for the initial year of inception and operation and has determined that the list of capital items as outlined is consistent with necessary initial start-up costs associated with equipment, maintenance, support, and facilities.

Finally, please be advised that Buncombe County Commissioners, in coordination with the Asheville City Council, will need to formally address and consider URTV, Inc. and their operational needs for initial start-up and on-going needs throughout the first year. The County's final allocation will have a direct affect on URTV, Inc.'s ability to provide services as outlined.

With Council's approval, a budget amendment will be forthcoming after the Buncombe County Commissioners have made a final decision on the level of funding for this fiscal year to ensure that the capital and operating budgets align accordingly.

Staff recommends City Council consider adoption of the proposed management agreement with URTV, Inc., to be used as the primary tool for the City to use regarding PEG fee funding allocation on a year-to-year basis, unless otherwise stipulated by City Council.

RESOLUTION BOOK NO. 28 – PAGE 419

F. MOTION SETTING A PUBLIC HEARING ON DECEMBER 14, 2004, TO CONSIDER AN ORDINANCE ESTABLISHING AN ENTERPRISE FUND TO PAY FOR A COMPREHENSIVE STORMWATER PROGRAM

G. RESOLUTION NO. 04-241 - RESOLUTION AFFIRMING THE REVISIONS TO THE CITY-WIDE REHABILITATION LOAN APPROVAL PROCESS

Summary: The consideration of a resolution affirming the revisions to the city-wide housing rehabilitation loan approval process.

The Community Development Director and Planning and Development Director were authorized by City Council Resolution # 95-116 on July 25, 1995, to approve housing rehabilitation loans, with the form of the documentation for such loans to be subject to the approval of the City Attorney. No loan limit was established by Resolution # 95-116, rather the underwriting guidelines and budgetary authority are the effective loan limits.

In 1995, the loans did not generally exceed $40,000. Over the years since then the loans have regularly exceeded that amount and with the authorization of the Section 108 funding of CARROT loans in 1999, some multi-family projects have been approved for several hundred thousand dollars.

Loan applications go through a very stringent underwriting process to assess the credit worthiness of the borrower and the financial strength of the project. Loans to low-income homeowners must be affordable. Multi-family projects must be able to operate independently and produce a positive cash flow.

Although the underwriting process provides the technical information required to make the loan approval decision, staff along with guidance from the Housing and Community Development Committee and City Manager has established the following process, which provides a higher level of review and approval for larger loans:

"Applications for FAIR and CARROT loans not to exceed the maximum allowed for rehabilitation of a single unit under the FAIR program may be approved by the Community Development Director or the Planning and Development Director. All other rehabilitation loan applications may be approved by the City Manager upon recommendation by the Rehabilitation Loan Committee which shall consist of the Director of Finance or her/his designee, the Director of Audit and Budget or her/his designee, and the Director of Planning and Development or her/his designee."

The advantages of this process are:

- The expertise of senior staff is availed to review the work of Division staff before large loan commitments are issued.

- Approval authority for large loan is more appropriately placed at the highest administrative level.
- Smaller homeowner loan approval remains at the Department/Division level for efficiency.
- Administrative review and approval of loans helps maintain the financial privacy of applicants.

City staff recommends City Council adopt the resolution affirming the revisions to the housing rehabilitation loan approval process.

RESOLUTION BOOK NO. 28 – PAGE 420

H. RESOLUTION NO. 04-242 - RESOLUTION APPROVING REVISIONS TO THE CITY'S OUTSIDE AGENCY POLICY

Summary: The consideration of a resolution approving revisions to the City's Outside Agency Policy.

Staff has developed proposed revisions to the City's Outside Agency Policy, which was first adopted in 2001, to guide the Outside Agency Committee's process for evaluating outside agency funding requests. The purpose of the proposed changes is to strengthen the current outside agency review process and allow, on a limited basis, for Council to award non-competitive grants. Specific revision and/or additions to the policy are as follows:

- The Committee may conduct formal interviews with specific agencies as needed to resolve questions about specific programs.
- The grant application requires a complete agency budget and an annual outside audit, as well as a certification of complete and accurate financial data.
- Under very limited circumstances, City funding may be given in the form of non-competitive grants. These grants may be made to organizations that function as quasi-divisions of the City, or as payment under existing contracts authorized by City Council.
- The Outside Agency Committee will complete its review of outside agency requests prior to May and will present its recommendations, along with staff's recommendations, to the full City Council as part of the City Manager's presentation of the annual operating budget.

The Outside Agency Committee has reviewed a draft of the revised policy.

The proposed revisions relate to the City's Strategic Operating Plan in the *Community Building* focus area, and more specifically, Council's goal to "re-evaluate Council decision-making and public input processes and develop a strategy that results in both healthy dialogue and effective decision making".

Pros: The policy revisions will strengthen the review process and make the City requires for the outside agency program clear to various non-profit agencies.

Con: The City may see a proliferation of agencies seeking non-competitive grant status.

City staff recommends City Council adopt the City's revised Outside Agency Policy.

RESOLUTION BOOK NO. 28 – PAGE 421

I. RESOLUTION NO. 04-243 - RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Summary: The term of Laura Webb, as a member of the River Design Review Committee, expired on September 1, 2004.

On November 16, 2004, it was the consensus of City Council to appoint Mr. Robert E. Shepherd to the River District Design Review Committee to serve as one of the two members of the RiverLink Board of Directors for a three-year term. Mr. Shepherd's term will begin immediately and expire on September 1, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 425

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY IDENTIFIED AS 44 BEN LIPPEN ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED COTTAGE INDUSTRY (SPECIALTY MACHINE SHOP) AND AN OWNER-OCCUPIED SINGLE-FAMILY DWELLING

ORDINANCE NO. 3182 - ORDINANCE REZONING 44 BEN LIPPEN ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3183 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR 44 BEN LIPPEN ROAD FOR A PROPOSED COTTAGE INDUSTRY (SPECIALTY MACHINE SHOP) AND AN OWNER-OCCUPIED SINGLE-FAMILY DWELLING

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:04 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of a request to rezone property located at 44 Ben Lippen Road from RM-6 Residential Multi-Family Low Density District to Community Business I District/Conditional Use, and a request to issue a conditional use permit for a proposed cottage industry (specialty machine shop) and an owner-occupied single-family dwelling.

The site is located at the edge of City zoning. Nearby properties located on the north side of the road are in unzoned unincorporated Buncombe County.

The *Asheville City Development Plan 2025* calls for strengthening and enhancing neighborhood viability through the encouragement of compatible development that preserves architectural diversity and protects neighborhoods from inappropriate non-residential encroachment. It also suggests that, due to changes in technology, there can be a wider range of uses considered compatible with neighborhoods. Smart Growth Policies encourage staff to utilize existing zoning tools that allow flexibility in site design to promote compatible land use projects and protection of industrial and environmentally-sensitive land.

The applicant, David Ingram, is requesting a conditional use rezoning of a 2.02-acre parcel located at 44 Ben Lippen Road (Attachment to City Exhibit 3 – Aerial Map). The property, consisting of a single-family dwelling, is currently zoned RM-6 and is located in the City's extraterritorial jurisdiction area. Surrounding land uses and zoning include single-family and multiple residential dwellings zoned RM-6 to the east and south of the site, the Eliada Home orphanage zoned Institutional to the west and single-family manufactured housing to the north.

Mr. Ingram is requesting a conditional use rezoning of the entire parcel to Community Business I (CB-1) in order to permit a "cottage industry" (a specialty machine shop) and the construction of a 6,000 square foot building on the lot. The single-family residence located on the east side of the site will remain occupied by Mr. Ingram.

The RM-6 zoning district is intended to permit a limited range of low-density multi-family housing types with single-family detached and attached residences. The district is also intended for areas where low-density multi-family development is appropriate but where environmental constraints and infrastructure limit development potential. RM-6 also allows other non-residential uses appropriate for providing the basic elements of a balanced add attractive area including schools, places of worship, home occupations, recreational and public uses.

The CB-1 district is to provide areas for medium-density business and service uses serving several residential neighborhoods. The Community Business I District is designed to be located primarily along streets that serve multiple residential neighborhoods.

The concept plan illustrates the location of the existing single-family residence and the proposed location of the 6,000 square foot block building that will be used to house the cottage industry (Attachment to City Exhibit 3 – Site Plan). A 4-space parking lot and loading area to the rear of the building will serve the use. A 20-foot vegetative buffer will be required along the east and south sides of the site where adjacent to residential uses (Attachment to City Exhibit 3 – Building Perspective). The applicant is proposing a thick evergreen buffer along Ben Lippen Road in lieu of the standard street tree requirement.

Mr. Ingram currently has two employees who assist him in the operation of the specialty machine shop. Deliveries to the shop are expected daily via small delivery truck. Approximately 4,000 square feet of the proposed building space will be utilized for storage of large machinery. The remaining 2,000 square feet will provide office space and workshop area.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The applicant is utilizing the existing topography on the site by locating the proposed building along the west side of the property. This side of the property sits below Ben Lippen Road and much lower than the single-family dwelling located along the east side of the property. The building will be located at least 250-feet from Ben Lippen Road and adjacent to the property owned by Eliada Home, zoned Institutional. In addition to the gradual slope of the land, the applicant is proposing a thick evergreen buffer along Ben Lippen Road. Vegetative buffers required by the UDO will further mitigate the impact of the development from adjacent residential uses.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The applicant is utilizing the existing topography on the lot to minimize land disturbance and locate the building where it is less visible to adjacent residential uses. Vegetative buffers will be provided along the north, east and south sides of the site that will assist in mitigating the impact of the development.

   The proposed use, however, has the potential to injure the value of adjoining and abutting properties if not properly constructed to mitigate noise generated from the use of large machinery and other site activities that could be associated with the development. Specific conditions have been added to the project that will assist in mitigating any negative impacts the development may have on abutting and adjoining properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The site is surrounded by residential uses on the north, east and south sides of the property, zoned RM-6. It is problematic to locate an intense use of this nature in close proximity of residentially zoned and developed areas due to the potential negative

impacts it may cause to the adjoining properties. The site is, however, being developed in a manner that works with the existing topography of the land. The proposed building is being designed to resemble a barn-like accessory structures typically found on large lots in rural areas. The site will be fully buffered from adjacent residential uses with the installation of a 20-foot vegetative buffer and screened from the street with a dense evergreen buffer.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

The proposed development may not be directly consistent with some goals and strategies outlined in the City Development Plan that call for strengthening and enhancing neighborhood viability through the encouragement of compatible development that preserves architectural diversity and protects neighborhoods from inappropriate non-residential encroachment. It may, however, be consistent with the Plan's direction that compatibility may be dependent on appropriate mitigation of the impacts of uses such as that proposed by the applicant. Utilizing the conditional-use zoning tool, one of the City's smart growth policies, can provide mitigation controls that enhance neighborhood compatibility through design and can also assist in mitigating any negative impacts to neighboring properties.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

This project is located in an area of the City's ETJ where transit service is currently unavailable. Fire and police protection are handled by Buncombe County. Additionally, the proposed development was reviewed by the City's Technical Review Committee that includes representatives of the Water Resources Department, Engineering Department, MSD, and Public Works Department who suggested that adequate infrastructure was available to support the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The proposed use is not expected to generate any noticeable amounts of traffic. The site will be developed with an off-street parking and loading area that will adequately serve the proposed use.

Pros:

- The applicant is working with the existing topography of the land by locating the building on the lower areas of the property that will assist in mitigating the visual impacts of the structure.
- The building is being designed to resemble a barn-like structure that may strengthen its compatibility with the neighborhood.
- By using the conditional use rezoning process, conditions can be placed on the design and development of the site that can further limit any negative impacts it may have on adjacent residential properties.
- Approving the application will allow the owner the opportunity to relocate a small specialty business from its current location on Amboy Road that has been subject to repetitive flooding and operate it from his residence.
- The proposal moves a business from an environmentally- sensitive flood-prone location and allows it to remain in operation.

142

- Staff has not received any negative comments or concerns from any of the surrounding property owners.

Cons:

- The proposed project may not specifically meet or support goals concerning compatible development.
- The development will result in the loss of multi-family residential property for multifamily uses.
- The development could set a precedent for similar requests for non-residential uses in neighborhoods.
- Noise pollution may be generated from the use of large machinery associated with this type of business. Staff has, however, suggested several conditions that may assist in mitigating any negative impacts the proposed development may have on abutting properties.

During the Planning and Zoning Commission meeting on Wednesday, November 3, 2004, staff was hesitant to fully support the proposal due to compatibility concerns. Staff encouraged the Commission to utilize public input concerning compatibility with the surrounding neighborhood. The project did not receive any negative comments or produce any persons in opposition to the project during the public hearing portion of the review. After carefully considering the steps the applicant is taking to mitigate potential impacts and including the facts that the use is occurring on the home-site of the applicant, the limited number of employees and the site design, the Commission voted unanimously to recommend approval of the project subject to the TRC conditions, conditions recommended by staff, and three additional conditions (listed below) that the Commission felt would further enhance the projects compatibility with surrounding properties.

Based on the seven findings and that the project has not received any negative comments or concerns from those most affected by the development, staff concurs with the Planning and Zoning Commission by recommending approval of the project subject to the following conditions:

1. That all TRC conditions be met;
2. No outdoor activities associated with the business shall occur between the hours of 9:00 p.m. - 8:00 a.m.;
3. That the building be constructed in a manner that reduces noise generated by the use of the machinery;
4. The maximum size of any delivery vehicles serving the site shall be limited to panel truck sized vehicles;
5. No commercial outdoor lighting shall be permitted;
6. Signage shall be limited to 8 feet in height, 32 square feet in size, and not be internally illuminated;
7. The maximum number of employees shall be limited to four; and
8. The business owner/operator shall live on the property.

The following added conditions by the Planning and Zoning Commission:

1. There shall be no outdoor storage.
2. The building shall be constructed with split-faced block as proposed by the applicant.
3. There shall be no testing of engines on-site.

After hearing no further rebuttal, Mayor Worley closed the public hearing at 5:10 p.m.

Responding to Councilman Dunn and Councilman Davis, Mr. David Ingram, property owner, said that he has no problems complying with any of the conditions, specifically the no outdoor activities between the hours of 9:00 p.m. - 8:00 a.m. and the size of any delivery vehicles.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3182 to approve the conditional use rezoning for property located at 44 Ben Lippen Road from RM-6 Residential Multi-Family Low Density District to Community Business I District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 318

Vice-Mayor Mumpower moved to adopt Ordinance No. 3183 to issue a conditional use permit for property located at 44 Ben Lippen Road for a proposed cottage industry (specialty machine shop) and an owner-occupied single-family dwelling, subject to the following conditions: (1) That all TRC conditions be met: (2) No outdoor activities associated with the business shall occur between the hours of 9:00 p.m. - 8:00 a.m.; (3) That the building be constructed in a manner that reduces noise generated by the use of the machinery; (4) The maximum size of any delivery vehicles serving the site shall be limited to panel truck sized vehicles; (5) No commercial outdoor lighting shall be permitted: (6) Signage shall be limited to 8 feet in height, 32 square feet in size, and not be internally illuminated; (7) The maximum number of employees shall be limited to four; (8) The business owner/operator shall live on the property; (9) There shall be no outdoor storage; (10) The building shall be constructed with split-faced block as proposed by the applicant; and (11) there shall be no testing of engines on-site. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 319

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF 290 MACON AVENUE (GROVE PARK INN) FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RESORT DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO PERMIT CONSTRUCTION OF CONDOMINIUM UNITS AND FOR A MASTER PLAN APPROVAL

ORDINANCE NO. 3184 - ORDINANCE REZONING 290 MACON AVENUE (GROVE PARK INN) FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RESORT DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3185 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT TO THE GROVE PARK INN TO PERMIT CONSTRUCTION OF CONDOMINIUM UNITS AND FOR A MASTER PLAN APPROVAL

ORDINANCE NO.3186 - ORDINANCE GRANTING CONDITIONAL USE PERMIT FOR THE GROVE PARK INN MASTER PLAN

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed regarding the conditional use zoning of 5.8 acres associated with the Bynum House property, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit part of the conditional use zoning is subject to a simple majority vote. If the conditional use rezoning does not pass and Council does not move on to the conditional use permit part of that conditional use rezoning, Council can still proceed to consider the conditional use permit for the Master plan, which is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:25 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located at 290 Macon Avenue (Grove Park Inn), from RS-4 Residential Single-Family Medium Density District to Resort District/Conditional Use, and a request to issue a conditional use permit to permit construction of condominium units and for a Master Plan approval.

The Bynum House and Country Club are both designated as local historic landmarks. The Grove Park Inn neighborhood is a nationally registered historic district.

The *Asheville City Development Plan 2025(ACDP 2025)*, through its Smart Growth Land Use Policies (adopted by the Asheville City Council in 2000), clearly supports and encourages adaptive reuse and sustainable and compatible infill development. It also encourages City staff to employ zoning tools (Conditional Use Rezoning) to ensure some level of protection for compatibility and environmental sensitivity. Historic Preservation and its relationship to Smart Growth are also clearly described as being an effective way to revitalize and stabilize neighborhoods. Lastly, there is significant discussion regarding the need to adapt the economically sustainable tourism industry to meet changing needs and provide a wider variety of recreational and retail options while incorporating a high quality "package experience" including attention to aesthetics and character.

The Grove Park Inn Resort and Spa (GPI) originally submitted an application and master plan documents in June 2003 (Attachment to City Exhibit 3 – Location Map); the application was subsequently withdrawn before moving forward and in the intervening months, representatives from the GPI met with representatives of the neighborhood in an effort to re-examine the proposed expansion plan. The revised application and Master Plan documents are, at least in part, a reflection of these discussions and have been scaled back from the original application.

Because the details surrounding the project are not very typical of the average application, Ms. Tuch explained the process associated with the application. The GPI is requesting both a conditional use rezoning and Master Plan approval. The Unified Development Ordinance (UDO) requires that all projects done by the same developer within 1500 feet and/or three years of each other be reviewed as a single project. Because of this, the separate phases

of the project are all being reviewed in conjunction with one another as one large level 3 project. All level 3 projects in the City, because of their scale and impact, also require a conditional use permit. In this particular case, we also have a conditional use permit associated with the conditional use rezoning. For the purposes of this discussion, the conditional use permits for both aspects of the project are rolled together since the rezoning is part of the multi-phase development plan but they will require separate votes, as described by City Attorney Oast.

Because of the conditional use aspect of the project, we do allow the applicant to proceed with concept plans only. If council were to approve this project, then the different phases of the Master Plan would have to return to the Technical Review Committee (TRC) for a much more detailed technical review; and then, even once the technical review is complete, before any final approval would be given, the applicant would have to secure any other applicable permits that may be issued outside of the Planning Department or the City.

The revised application requests a conditional use rezoning of a five acre RS-4 Residential Single Family Medium Density District parcel to Resort/Conditional Use to allow for the construction of 20 single family detached condominium units along with preservation of the locally designated historic Bynum House. Along with the rezoning request, review of an associated Master Plan showing four additional project areas on the larger resort property along with road and traffic improvements is being requested (Attachment to City Exhibit 3 – Aerial Map). It is the intention of the owner to initiate development of subsequent phases of the master plan as earlier phases are completed. Other phases of the larger project include (Attachment to City Exhibit 3 – Resort Master Plan):

Phase 1, Battle House Condominiums – Removal of the old Battle House and redevelopment of a new building into 30 residential condominium units, approximately 1600-1700 s.f. each with basement storage, underground parking (56 spaces) and a 30,000 s.f. open space terrace area. The new building will be larger in size but is intended to architecturally reflect the original structure (Attachment to City Exhibit 3 – Phase I Master Plan Details).

Phase 2, Parking Terraces, Old Toll Road Suites, & Traffic Roundabout – 3-½ level parking terrace to occupy an existing low area internal to the Inn property. Terrace will provide a total of 350 parking spaces displacing 87 existing spaces for a net gain of 263 spaces. The Old Toll Road Suites will consist of four separate 2-story buildings housing 20 units total with a reconfigured 43 space surface parking lot. Also part of this phase is the construction of the new traffic roundabout and entry feature located on Macon Avenue at the main entrance to the Inn (Attachment to City Exhibit 3 – Phase 2 Master Plan Details).

Phase 3, Sunset Mountain Condominiums (Conditional Use Rezoning) – Renovation of the Bynum House, a locally designated historic landmark, into a single family residence or clubhouse amenity along with the new construction of 20 single family detached condominium cottage homes and their associated drives, sidewalks, and open space areas (Attachment to City Exhibit 3 – Phase 3 Master Plan Details).

Phase 4, Country Club Improvements & Vanderbilt Pools – Renovation of the existing Country Club to include the addition of 11 new resort "golf" suites. In addition, renovation of the existing Cabana along with construction of a new covered "All Season" Pavilion and 10,000 s.f. pool and terrace. Also part of this phase is the addition of the new Vanderbilt Pools along with 45 surface parking spaces located adjacent to the Vanderbilt wing of the Inn (Attachment to City Exhibit 3 – Phase 4 Master Plan Details).

Phase 5, Old Toll Cottages – 13 new buildings for a total of 26 new resort units. Each building is to house two 1,000 s.f. suites and one outdoor parking space per building. In association with

this project is the reconfiguration of a 72 space surface parking area and walking trails (Attachment to City Exhibit 3 – Phase 5 Master Plan Details).

In total, all five phases of development will include:

- 48-51 privately owned residential units (with parking and amenity areas)
- 57 new resort suites (for a total of 48,800 s.f.)
- 432 new parking spaces (263 in parking terrace, 56 underground parking spaces, 45 new surface parking spaces, plus 68 individual parking spaces associated with resort suite and residential development)
- Construction of a covered pavilion, parking terrace, amenity areas, 2 pools, traffic roundabout & entry feature, and new sidewalk
- Preservation of open space and existing vegetation (where possible)
- Renovation of the designated local historic landmarks of the Bynum House and Country Club/Cabana.
- Reconstruction of the old Battle House

The project site is located within City limits in North Asheville on, or adjacent to, the larger resort property. The majority of the development plan is located on the already developed larger resort property currently zoned Resort District. The subject property is surrounded almost entirely by single family residential uses with a small corner (northwest) occupied by the Biltmore Industries property which houses artist studios, galleries, museum and restaurant.

Skipping the first two phases of the project for a moment, she discussed the conditional use zoning. The rezoning request is for the 5.8 acre parcel that currently houses the Bynum house, which is a designated local historic landmark. This 5.8 acre parcel is a moderate to steep sloping site with significant natural vegetation and access off of Macon Avenue (no new vehicular access points are proposed as a result of the development plan). In addition to the restoration of the home as a private residence or clubhouse amenity, the GPI is proposing the addition of 20 new condominium homes. Originally, it was believed that the rezoning was not being sought for density purposes since the 5.8 acre lot could support up to 23 units under RS-4. However, now that we know that the property would be subject to hillside development standards, which for this particular piece of property would cut the density in half. This means that a rezoning would be required for anything over 12 units. In addition to the extra density, the rezoning is being sought for use. Normally, the RS-4 zoning district does not permit more than one principle structure on a lot at a time and would not allow any kind of residential development that was anything other than single family detached homes. Although the proposed residential units have the appearance of single family detached homes and will be privately owned, they are, technically, condominium homes and as such, would require the rezoning (Attachment to City Exhibit 3 – Mountain Cottages Sketch). It is the developer's intention to avoid a major subdivision and place the proposed cottage homes relatively close together off of a common drive that follows topography in order to minimize grading and other land disturbances, and maximize preservation of the existing natural vegetation.

The Resort zoning designation is being requested for consistency's sake since the rest of the GPI property is zoned Resort and the grounds will be maintained and kept in character with the rest of the resort property. Now although it is true that a rezoning is required for the proposed 20 units, the 16 units an acre normally allowed in Resort isn't being maximized. If you apply the hillside standards to Resort density, then you get about 8 units an acre and the proposed project only needs about 4 units an acre. Nevertheless, when City staff realized that the hillside standards ordinance was going to come into play, it caused us to examine the density and hillside issue a little more closely before making a recommendation. (City Exhibit 5 – Density Comparison of Bynum Property to Adjacent Properties) (City Exhibit 6 – Sunset Mountain Cottages Overlay).

She then reviewed the other phases of the development again:

Phase I – The development of the Battle House will involve, essentially, the tear down of the existing structure that would be replaced with new construction that is a little larger than the original, but architecturally reminiscent of the previous building. This new structure will house up to 30 units and include underground parking, storage and a 30,000 square foot terrace.

Phase 2 – This phase is for the parking terrace and Old Toll Suites. The terrace is positioned to take advantage of the existing low spot on the property and will displace a number of existing surface spaces to result in a net gain of 263 spaces. The Suites are additional resort suites that will include 4 separate 2-story buildings for a total of 20 units. This phase would also include the addition of the traffic roundabout.

Phase 3 – This phase is for the conditional use rezoning and condominium homes previously discussed.

Phase 4 – This phase includes improvements to Country Club (another locally designated landmark), which would include the addition of another 11 resort suites, renovation of the Cabana, and construction of a new Pavilion and pool area. In addition, there will be the creation of 45 new surface parking spaces.

Phase 5 – This final phase is the Old Toll Cottages consisting of 13 new buildings with 2 (1000 square feet) units per building. In addition, there will be one outdoor parking space per building along with walking trails.

She reviewed with Council the proposed elevation drawings (Attachments to City Exhibit 3 –Building Elevations).

At their October 6, 2004, meeting, the Planning and Zoning Commission reviewed the conditional use rezoning and Master Plan proposal and made a positive recommendation that the project be forwarded to the Asheville City Council, stipulating the following conditions summarized as follows:

1. All TRC recommendations must be met;
2. GPI shall coordinate with staff, and in consultation with the neighbors, in the development of a comprehensive construction plan and construction traffic plan, to include:
   a. designation of and funding by GPI of an ombudsman for dealing with construction issues from the residents during the construction project;
   b. implementation of traffic calming measures on all roads identified in the Staff Report as "affected roads" and on Edwin and Kimberly (South of Country Club) prior to any construction beginning on the project;
   c. such traffic calming measures shall be fully funded by GPI;
   d. construction hours shall be limited to avoid any school transportation issues, compliance with noise ordinances, and no staging of construction shall occur on public roads or on private property owned by persons/entities other than the GPI;
   e. violation of the comprehensive construction plan shall result in structured, graduated monetary penalties (established in the construction plan) with such monetary penalties being paid to the City's sidewalk repair and construction fund;
3. GPI shall pay all construction costs for sidewalks from Bynum House to Latrobe, and the planning and construction of such sidewalks shall be done in consultation with the residents whose property is affected; and
4. GPI shall pay for bicycle stripping on those roads listed as "affected roads" in the Staff Report and on Edwin and Kimberly where feasible, or erection signage warning of bicycle

and pedestrian, or where striping is not feasible create shared use lanes and erect signs warning of bicycles.

In addition, the City Engineering Department would like to reiterate, as a condition, the need for sidewalk from the edge of the Bynum property south along Macon to where it can connect with the existing sidewalk as well as sidewalk along the frontage of Club View Road. In exchange, the City is willing to exempt the GPI from sidewalk requirements along the other frontages surrounding the property including: Woodlink, Kimberly Avenue, Country Club, Club Knoll, Grovewood, Innsbruck, Old Toll and Charlotte Street. That is with the understanding that easements will be provided for future sidewalk construction.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

Several phases of the project involve the redevelopment of existing structures and features and it is expected that these activities will not significantly contribute to land disturbance. Other phases attempt to either take advantage of existing topography (parking terrace) or place structures appropriately in respect to topography so as to minimize grading and other land disturbances. In addition, retaining walls are shown around the proposed resort suites (Old Toll Suites and Old Toll Cottages) along with the new residential units (Sunset Mountain Condominiums) and proposed roundabout, which will effectively reduce hillside disturbance and allow for the preservation of existing vegetation. Lastly, the developer has contacted storm water consultant(s) specializing in Low Impact Development (LID) techniques that improve water quality as well as quantity and velocity in an effort to better control existing and future run-off.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

Property values around the Inn property have continued to rise for the surrounding homes despite increases in resort activity over the years. Professional Literature has well documented that homes located near open space areas (including golf courses) and historic structures experience an appreciation in value due to the proximity of these amenities. In addition, the applicant has been in communication with residents of the adjacent neighborhood(s) in an effort to better understand their concerns and priorities.

As a result, GPI has revised their Master Plan and established new policies in an attempt to be a "better neighbor" both during construction and regular operation. More sensitive design and operation is expected to maintain or improve current conditions through improved storm water management, preservation and supplementation of existing landscape buffers, and installation of new traffic control measures, sidewalk, and walking trails.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

Several of the proposed phases of development involve the renovation of existing features with modest expansion/improvements and/or are internal to the resort property. The renovations are not only in harmony but also help preserve the existing character while those uses that are internal are very appropriately in perfect harmony, scale, and character with the rest of the resort property. Other phases such as the Sunset Mountain Condominiums appear to be in scale, density, and character with other homes in the area, most notably, the cottages located on Sunset Terrace. Similarly, the rebuilt Battle House condominiums, the most visible phase of development, will architecturally reflect the character of the former structure and be well within scale, density of the adjacent resort property and Long Champs Condominiums.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The Asheville City Development Plan 2025(ACDP 2025), through its Smart Growth Land Use Policies (adopted by the Asheville City Council in 2000), clearly supports and encourages adaptive reuse and sustainable and compatible infill development. It also encourages City staff to employ zoning tools (Conditional Use Rezoning) to ensure some level of protection for compatibility and environmental sensitivity. Historic Preservation and its relationship to Smart Growth is also clearly described as being an effective way to revitalize and stabilize neighborhoods. Lastly, there is significant discussion regarding the need to adapt the economically sustainable tourism industry to meet changing needs and provide a wider variety of recreational and retail options while incorporating a high quality "package experience" including attention to aesthetics and character.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

This proposed development is within close proximity to transportation facilities with the Route 5 bus line running regularly down Charlotte, Macon, and Kimberly including hourly stops at the Grove Park Inn. Any adjustment of the existing bus circulation pattern and shelter location shall be coordinated with the Transit Services Department and shall include installation of a bus shelter. In addition, tests to try to determine the extent of impact to the surrounding neighborhood utilities will be conducted and may result in improved infrastructure. Lastly, technical review has not identified any problems for future emergency service.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The applicant is proposing significant road improvements with the addition of a traffic circle (roundabout) at the main entrance along with pedestrian paths and sidewalks. The

applicant has also submitted a detailed Traffic Impact Analysis that acknowledges an increase in traffic loads to surrounding roads that although are within capacity, could benefit from traffic calming measures. Based on current and extrapolated conditions, adjacent roads have been prioritized to receive additional traffic calming measures. These measures have not been specifically described since it is the desire of all affected parties to involve the surrounding community in the design and application. In addition, the applicant wishes to have some delineation of responsibility and financial contribution before proceeding.

Pros:

1. Allows for infill residential development.
2. Promotes the renovation of several local historic landmarks.
3. Will result in public road improvements including traffic calming.
4. Will result in a more interconnected pedestrian network of sidewalk and walking trails.
5. Contributes to the economic sustainability of one of the City's largest employers.
6. Promotes the adaptation of the growing tourism industry.
7. If determined to be needed, project will result in infrastructure improvements.

Cons:

1. Adds traffic to already heavily trafficked residential roads.
2. Will result in the disturbance of natural areas with steep topography.
3. Construction activity will have to utilize residential roads.
4. Removal of the old Battle House.

For the reasons outlined in this report, City staff concurs with the Planning and Zoning Commission and recommends approval of the zoning change from RS-4 to Resort/Conditional Use and approval of the associated conditional use permit with detailed Master Plan.

Mr. Gerald Green, representing the GPI, gave a brief history of the GPI, in that it is the fifth largest employer in Buncombe County and one of the oldest on-going businesses in Asheville and Buncombe County. The GPI is also the largest provider of open space in North Asheville with the historic golf course, which has recently received an award. The improvements to the property epitomize the City's smart growth principles. We are preserving historic structures and historic landscapes and providing a variety of housing types. Unfortunately there are no affordable housing units due to the cost of the land in the area and the existing property values. The Inn is not within the Grove Park Historic District, however, they are trying to preserve the integrity of the neighborhood. Although the plan is a 10-year plan, he didn't anticipate 10 years of construction. It may possibly be 5 years of construction – depending on how they phase the projects and the gaps in between the different phases. Regarding the rezoning of the Bynum property (Attachment to City Exhibit 3 – Resort Master Plan), it is in Phase 3 and has 5.8 acres and the historic Bynum House, which will be renovated. We will be able to cluster development in order to take advantage of the existing topography. We will work with the existing topography in designing the road. We have a design concept to assure that the homes that are built on this property are compatible with the existing historic homes in the neighborhood. We will limit the tree cutting and clearing. One provision is that they maintain a minimum 25-foot undisturbed buffer along the adjacent residential property lines and along Macon Avenue to limit the visibility of these homes. We will maintain the property to a certain standard. The closest home to the property line under this plan is over 100 feet away. Under the standard subdivision regulations under the current zoning, the setback would be either 6 or 15 feet. There will also be increased

property tax revenues because of more homes being built. He explained what could happen with the standard subdivision of that property as an option (Applicant Exhibit 2 – Resort Master Plan). Because, the decision before Council is not whether this property will be developed, but how it will be developed. Regarding traffic, the GPI did have a Traffic Impact Analysis (TIA) prepared. In looking at the traffic generated by this proposed improvement, we saw approximately 90 trips per hour, which is below the threshold required by the City for a TIA, which is 100 trips per hour. The GPI proposes to take reasonable steps and incur reasonable costs to mitigate those impacts. The mitigation measures they have identified include traffic calming, construction of new sidewalks and consideration of a provision for bicyclists. The traffic generated by the residential uses on the Bynum and Battle properties will not be greater than that what was generated by the previous user of the Battle House, WLOS-TV. We have heard from the neighborhood their environmental concerns for streams and forested areas. We have contacted an arborist/forester to review the area and identify how they can protect existing trees, improve their health and overall manage the wooded area, while doing some development in the area. We are also working with a stream mitigation specialist to address water quality and other issues related to the stream that flows through the Bynum property and onto the golf course. In terms of working with the neighborhood, our plan was originally brought forth in June of 2003 and we went back and worked with the neighborhood to identify and address those concerns. We met with the neighborhood committee 12 times over the past year. In addition to those meetings, we have undertaken a number of other steps to improve relations with the neighborhood. We created a quarterly newsletter (Applicant Exhibit 2) that goes out to all neighbors. We have changed the plans significantly over what was presented last June. We have reduced the scale; reduced the density of development; changed guest units to owner-occupied units; reduced the number of residences; relocated buildings, especially on the south end and the north end, to move them away from existing neighborhoods; preserved the buffer; included parking because parking on Macon Avenue was a major concern to the neighbors and to the City; and we are redesigning the entrance so that guests and visitors can better identify the Inn and not go wandering through the neighborhood. Overall, these improvements to the property will permit the Inn to use underutilized and vacant properties. They will address the concerns and add value to the Inn, the neighbors and the City.

Upon inquiry of Councilman Newman, Mr. Green said that there will be about 4-5 different basic architectural design plans.

Mr. Michael Moule, Traffic Engineer for the GPI, said he and the City's Traffic Engineer identified that the major traffic issues aren't congestion at intersections or traffic operations intersections. The major issue is the impact of traffic on residential streets. The GPI is within a residential area and the concern there is how much of the increased traffic on the streets would impact the neighborhood residents. The trip generation of 85-90 trips per hour doesn't even meet the threshold for requiring a TIA. We did this TIA in order to identify the impact on the residential streets because the GPI wants to be a good neighbor and mitigate that impact. This analysis was intended to look at the need for traffic calming on streets. It looked at the environmental capacity, which is a volume threshold for a given type of street. Some streets (e.g., Macon Avenue) already exceed the environmental capacity and in the projected future years others will exceed it as well. The major streets (Macon Avenue, Edgemont, Country Club, Club View, Grovewood Road) have very significant GPI traffic. The recommendation from City staff for traffic calming on most of those streets is something that the study will support. He noted that speeds can be reduced through traffic calming as well. The streets that were added most recently to the list of streets where traffic calming should be required is a concern for the GPI. Two of those streets are Evelyn Place and Grovewood Road. The main reason those are in question is because he didn't have good traffic data from the City to evaluate the full impact of the existing speeds and existing volumes. The streets that the Planning & Zoning Commission added – Edwin Place and Kimberly Avenue – while they are heavily traveled streets, the TIA (Applicant Exhibit 3) shows that in the build-out year 2010, the new traffic from the GPI on those streets would represent

about 2-3% of the total traffic on those streets. The total traffic estimated on those streets currently is 10,000 vehicles per day and in the build-out year of 2010 it is estimated to be higher, in part from the natural growth of 2% per year, and in part from the 2-3% GPI traffic to where they are closer to 11-12,000 vehicles per day. The existing traffic on Kimberly Avenue is about 10% of GPI traffic. Most of the traffic on those streets is traffic going to the Beaverdam area, people using Kimberly and Edwin as an alternative to Merrimon Avenue, and other places north of town. The point is it doesn't seem reasonable to require the GPI to pay for traffic calming on those streets since the existing problem and the future build-out isn't created by the GPI traffic.

In response to Councilman Newman, Mr. Moule said that the only place he would have a potential concern is the intersection of Edwin Place and Charlotte Street, which has been studied in the past. The projected increase in traffic at this intersection from this project is about 4-5%. Although he didn't do that sort of analysis, he didn't feel it would make a significance difference based on that small percentage growth.

Upon inquiry of Councilwoman Jones, Mr. Moule said that the current traffic on Macon Avenue is estimated to be 80-90% of GPI traffic. In 2003, 2,600 vehicles per day was counted on Macon Avenue. It was his opinion that the lowest capacity of Macon Avenue would be around 14,000 vehicles per day.

Councilman Newman asked if resort traffic generates different peak hours. Mr. Moule said that sometimes people are leaving for work when the hotel employees are going to work going in opposite directions. Right now, a lot of the traffic to the GPI is employees.

Councilman Newman asked if there was any discussion about shift changes as a possible way to manage traffic congestion. Mr. Moule said that the issue of shift changes has been done in areas where the real capacity of the street is an issue - where you would want to shift something away from the peak hour. He doesn't see that as a major issue because of the fact that they are not near the actual capacity thresholds on these streets and intersections.

Councilwoman Jones asked about if any of the traffic improvements would alleviate the bottle-neck of traffic on Macon Avenue when the GPI holds special events. Mr. Moule said that the GPI is proposing parking terraces and that may eliminate the back-ups on Macon Avenue. In addition, the roundabout may move traffic a little smoother around the entrance as well with improved signage.

Upon inquiry of Councilman Newman about parking on Macon Avenue, Mr. Moule said that the GPI can only control where their employees park and that better enforcement of the no parking will have to be enforced by the Police Department. Mr. Green also said that starting at the entrance to the Battle and Bynum House, we will be working with the City's Traffic Engineer to narrow Macon Avenue in that area. That will be either through a median in the street or by bringing in sidewalks on either side and plantings to narrow down the street – to make it less attractive for parking. We are taking a pro-active approach to providing the parking, making the street less attractive and also working with the Police Department to minimize the parking on the street.

The following residences spoke in opposition to the conditional use rezoning for various reasons, some being, but are not limited to: improvements are too large, too long in duration and too burdensome for the neighborhood; neighborhood integrity is being compromised by this massive 10-year construction project in the heart of a mature, historic community; TRC and Planning & Zoning Commission did not consider the affect of the hillside ordinance; hillside ordinance should be fairly, consistently and equitably applied to all; GPI bought Bynum property knowing it was RS-4; proposal encroaches on existing neighborhood; Sunset Terrace is much less dense than proposal on Bynum House property; historic fabric of neighborhood will be

destroyed with the addition of 20 modern houses; GPI intends to clear entire communities of mature forest from steeply-sloped land; loss of irreplaceable greenspace; slopes will be destabilized and runoff and surface erosion will increase dramatically; additional sediments will be deposited in stream, increasing the likelihood of extension flooding; blasting will jeopardize the structural integrity of the historic homes and further destabilize the steeply-forested areas; natural environment will be irreparably harmed; there will be 10-years of construction traffic, noise and pollution; complaining of issues of prior GPI expansions to the City and to the GPI did very little to solve the problems; there needs to be a comprehensive traffic calming plan in place and a network of sidewalks completed on all approach roads before the project begins; streets are already over-burdened and area has inadequate sidewalks; safety problem for children taking the school bus when construction traffic begins; sidewalk improvements should be totally paid by the GPI and the City; project needs to be scaled back; if approved, keep all Planning & Zoning Commission's recommendations; if approved, firm rules regarding construction must be adhered to; need for ombudsman paid for by the GPI with authority to intervene when the GPI breaks the construction rules; need strong control on the areas that have daily and weekly rental units with appropriate fencing; request to include Evelyn Place in traffic calming because it carries a lot of the GPI traffic; two solutions to traffic problems would be to (1) tunnel under Charlotte Street and the golf course, and (2) construct a transfer station where 18-wheelers can download and shift employees can meet to carpool; additional pollution will be created by cars, trucks and tour buses; concern of maintenance of buffer areas; the GPI cannot be trusted since during the transfer of the property to the GPI, the GPI said the property would not be rezoned; if approved, it will open the doors for the GPI to do anything they want; the Resort District in the middle of the City is inappropriate; Macon Avenue is a narrow, two-lane road with many curves and no sidewalks and any increase in traffic will be too much; the use will only benefit the GPI and will not provide an essential service to the community; property near the GPI will become less desirable; development is out of character with the neighborhood; GPI has ignored City plans; low water pressure in the neighborhood currently exists; include Kimberly Avenue for traffic calming; alternative connection along a cart path should be made to eliminate GPI traffic on residential streets; on-street parking on Macon Avenue should remain because it protects pedestrians; to construct the roundabout on two public streets (Macon Avenue and Old Toll Road) will require extensive grading on the side of Sunset Mountain and is not an appropriate use of a public thoroughfare; allowing the GPI to expand will encourage urban sprawl; homes in the GPI area are being viewed as less desirably due to its proximity to the GPI because of the loud noise of City buses, mammoth tourist coaches and delivery trucks; existing incessant 24/7 noise from the Sammons' wing, including repetitive beeping, crashing and banging of industrial dumpsters being emptied; speeding hotel traffic; expansion will eliminate buffers between existing neighborhood and the Inn; GPI should build in downtown Asheville, but not on the publicly-owned park on which they proposed to build on earlier; project does not comply with the 2025 City Plan; if approved, request a TIA for the segment of Charlotte Street to I-240 because Charlotte Street Corridor Plan notes area on Charlotte Street to I-240 operates at a Level of Service "D" and "E"; if approved, establish an oversight panel to review architectural designs, building materials and construction to ensure that the cottages and condominiums be in character with the existing homes; Edgemont Road residents have requested help in traffic calming and now the GPI will be placing additional traffic on their road; impact on the City as a whole will result in over-expansion, poor development and unmanaged growth; GPI is not salvaging history of the area; City residents will have to bear the costs of upgrading infrastructure; guests of GPI stay on the GPI property and money does not circulate to Asheville businesses; job generated by GPI will be low paying jobs; and Council should recall their obligation promises to protect neighborhoods:

Mr. Joe Franklin, resident at 26 Sunset Terrace
Mr. Gordon Pirie, resident at 48 Sunset Terrace (Neighborhood Exhibit 1)
Mr. Clay Ballentine, resident at 63 Macon Avenue
Mr. Bob Burgin, resident on Old Toll Road
Ms. Barbara Hodgson, resident at 107 Evelyn Place

Ms. Judy Williams, resident at 98 Kimberly Avenue
Ms. Gloria Dastoli, resident at 31 Innsbruck Road
Mr. Sherman Fearing, resident at 163 Macon Avenue
Mr. Tom Smith, resident who lives off Macon Avenue (Neighborhood Exhibit 2)
Ms. Leah Karpen, resident at 400 Charlotte Street (Neighborhood Exhibit 3)
Mr. Max Haner, resident at 5 Kimberly Avenue
Mr. Fred English, Haw Creek resident
Ms. Kathryn Scott, resident at 54 Macon Avenue (Neighborhood Exhibit 4)
Mr. Tom Hartmann, resident at 180 Patton Mountain Road
Ms. Sue Hunter, resident at 4 Evergreen Lane (Neighborhood Exhibit 5)
Mr. Chris Lambrecht, resident at 81 Edgemont Road (Neighborhood Exhibit 6)
Ms. Mary Lois Kirby, resident at 185 Macon Avenue
Ms. Grace Curry, resident at 59 Edgemont Road (Neighborhood Exhibit 7)
Mr. Tommy Hayes, resident on Edgemont Road
Mr. Joe Scott, resident at 54 Macon Avenue (Neighborhood Exhibit 8)
Mr. Mike Lewis, resident at 48 Gracelyn Road
Ms. Jane Northway, resident at 80 Edgemont Road
Ms. Kim Wood, resident at 23 Sunset Terrace

Ms. Leesa Kulba, resident at 354 Kimberly Avenue, spoke in support of the GPI expansion and felt it big of the GPI to pay for traffic calming to develop their own property.

Mr. Don Martin, resident at 107 Norwood Avenue, spoke in support of the development and would be honored to live in the Battle House Condominium.

At 7:47 p.m., Mayor Worley announced a short break, at which time there will be no deliberations of this issue.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek did not expect the level of service to change. The amount of traffic generated is large enough to have a significant on the neighborhoods, but it is small enough that it does not present any particular capacity concerns or level of service concerns for the street network. He explained the different ways to analyze level of service. He said that level of service "E" is fairly common for an urban area and he did not have a strong concern in the segment of Charlotte Street and I-240. He said the signal coordination effort City-wide will provide some benefit.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek was not aware of any old studies regarding the traffic generated by WLOS-TV when they were housed in the Battle House.

In response to Vice-Mayor Mumpower about the traffic calming measures be implemented before construction begins, Mr. Butzek said that phasing the project is something for Council to consider. Typically, the City requires the traffic calming to be in place either prior to the Certificate of Occupancy (CO) or for the money to be transferred to the City, if the City was to do the work prior to the CO. We certainly would prefer measures to be in place prior to any CO. To have the traffic calming completed prior to any construction work beginning would be a little different that what happened in other projects, which is not to say that it would be wrong. He thinks it could be doable, but he hasn't talked with the GPI on that matter. But he felt it is physically possible. They may have to delay constructing their site to do all the traffic calming first, but he would consider it feasible.

In response to Vice-Mayor Mumpower about costs, Mr. Butzek said that some rough preliminary cost estimates on what we felt would be appropriate were developed. For the streets that were initially recommended by staff, which included Macon Avenue, Edgemont Road, Country Club Road, Grovewood Road, a short section of Charlotte Street and Evelyn Place, we

estimated the cost of that at about $125,000 in construction costs. The Planning & Zoning Commission recommended Edwin Place and a section of Kimberly Avenue be considered as well. We estimate that at about an additional $50,000.

When Vice-Mayor Mumpower asked for clarification on a study that illustrated 85% of the traffic on Macon Avenue was traveling an average speed of 35 mph, which is 10 miles above the posted limited of 25 mph. Mr. Butzek understood that the top 15% are going 35 mph or above.

Councilman Davis wondered if we could limit the streets for construction traffic. Mr. Butzek said that every street goes through a neighborhood and so there is no good route to limit construction traffic. He has heard discussions from neighbors that the people on Macon Avenue don't want to bear all the brunt and neighbors on the other side don't want to bear the brunt either. What may be a fair resolution is that the traffic be distributed along several different ways and no one neighborhood bears the complete brunt of the construction.

Upon inquiry of Councilman Davis about the connectivity from the end of Charlotte Street to the GPI, Mr. Butzek said that it is his understanding that the GPI has explored that option. His understanding from them is that it is not a feasible route in terms of existing property and existing topography. Mr. Green also responded that the connectivity alternative was so extreme, including the acquisition of additional right-of-way, it would make the project financial unfeasible and it would also destroy the historic integrity of the neighborhood.

When Vice-Mayor Mumpower asked about the 10-year construction schedule, Mr. Green said that they have heard concerns about the scale of the construction schedule and also the time period over which it would be. We might be able to compress the phases and do parts of phases together to create maybe 3 phases in possibly 5 years. We have made a commitment to continue working with the neighborhood through the construction process. Ideally, instead of the ombudsman, they would like to continue to work with the neighborhood committee and have a representative of the City too.

In response to Vice-Mayor Mumpower, Mr. Craig Madison, Chief Executive Officer of the GPI, said that they did not make a commitment to not rezone the Bynum House when they purchased it.

In response to Vice-Mayor Mumpower about the concerns the GPI has with the recommendations, Mr. Green said that there will be a precedent set by requiring the GPI to do traffic calming on Kimberly Avenue, which only 1.5% of the traffic on Kimberly will be generated by the proposed improvements. The GPI does not mind, and they fully intend to addressed, those impacts on the streets in other places that are caused by their construction. The ombudsman recommendation is loose and they would rather work on that.

In response to Vice-Mayor Mumpower, Mr. Green said that $125,000 for a total cost for traffic calming seems appropriate. We also talked with Mr. Butzek about the sidewalk improvements which is about $150,000 for the off-site sidewalk improvements and about $10,000 for the bicycle lanes and signage. That would be a total cost of $285,000 the GPI will be providing to the City to address traffic calming, sidewalks and bicycle lanes – all off-site.

Mr. Butzek said that one of the things he is recommending with those improvements is that one of two things happen. One is that the GPI administer the process, including administration of the design. The other is that an amount be added to that figure to pay those engineering administrative design cots. We estimate for the sidewalk would be 50% which would include easement acquisition and 25% for the traffic calming to hire a consultant and to absorb administrative costs.

Mr. Green felt that 50% for administration and engineering is a bit high for sidewalks. He said that a 25% adc on to that $285,000 for administration and engineering fees appears to be adequate. Also, the GPI would rather have the City manage that process.

City Engineer Cathy Ball responded to Mr. Green about the 50% figure being too high. She said a lot of that is in right-of-way acquisition. There is a whole process aside from the design and construction of the sidewalk that includes doing easements and obtaining property from adjacent property owners on this project. That is the reason why the sidewalk figure is higher than the one for traffic calming.

Ms. Tuch clarified the costs would be approximately $360-400,000.

Upon inquiry of Mayor Worley, Mr. Green explained the neighborhood process they have gone thorough over the past 1.5 years, noting that they have met 12 times. Those meetings resulted in many changes to their original plan, some being, but are not limited to: the southern portion of the site is residential to blend in with the residential component; addressed the scale; moved units further away from residential property lines on both the north and south end; reduced the number of homes in Sunset Mountain condominium units; increased the undisturbed buffer area adjacent to residential properties; addressed concerns resulting in a roundabout; and addressed concerns resulting in a parking garage. We have tried to address the many concerns over the past 1.5 years. They had made a commitment to have someone work with the neighborhood and interface with the construction contractors to distribute the traffic on different roads.

In response to Mayor Worley, Mr. Green said that a comment was made that they might be building too much parking, so the 45-space parking lot proposed near the southwest portion of the Vanderbilt Wing may not be constructed, if it proves that we have adequate parking.

In response to Councilwoman Jones, Mr. Green said that initially there was no residential component in the original Master Plan. In addition, the parking deck was thought of, but it evolved totally different after hearing neighborhood concerns.

Councilman Newman hoped that the GPI will continue to look at the alternative connectivity for the long-term future if there is going to be other development in order to avoid the overloading of traffic on existing residential streets.

In response to Councilman Newman, Mr. Green said that the shift change schedule to manage traffic during the peak hours is something the GPI can look at. They have looked at an off-site location for a parking garage for employees to park and shuttle to the GPI. The owner of that property on Charlotte Street was not amenable to releasing it so we could not do that. He felt the GPI will continue to look at those types of options to address the traffic problems.

Upon inquiry of Mayor Worley, Mr. Green felt that if the property is not conditionally rezoned, then the property will be developed, whether the GPI does it or sells it to another entity. He stated that they do have an arborist/forester who will be working with the GPI to assure that they preserve as many trees as possible.

In response to Councilwoman Bellamy about including Edwin Place for traffic calming, Mr. Green said that less than 1-2% additional traffic on Edwin Place would be generated by the proposed improvements. He did not think that was fair for the GPI to pay for the traffic calming on that street.

In response to Mayor Worley regarding the roundabout width, Mr. Green said that they will have to do a bit of grading on the right side, but they will try to minimize it as much as possible.

In response to Vice-Mayor Mumpower, Ms. Tuch said that City staff tries to be very balanced in terms of development and the neighborhood needs. In terms of the residential development, Mr. Green showed the 11-12 lot subdivision and that is a very high likelihood and that is something that City staff would consider, given the desirability of this real estate. If this doesn't get rezoned, there is the likelihood that a single-family lot subdivision could be built, and if that were to be the case, it would result in a higher impact. As far as grading or clearing, we are talking about the difference of 8 units.

Responding to Vice-Mayor Mumpower about the hillside ordinance, Ms. Tuch said that the hillside ordinance reduces the amount of density that could happen in an area. And, in this particular case, we evaluate that based on a mathematical formula to determine the average natural slope. When you determine the average natural slope, anything over 15% and above the elevation 22/20, kicks in the hillside development standards. In this particular case, that average natural slope cut the density in half and that would be the underlying density of any zoning district. Our original review of the application we originally thought under RS-4 they could develop up to 23 units, so they are not seeking the rezoning for density purposes. Later when we determined that it would be subject to hillside standards, we realized they do need the rezoning for density purposes. It reduces the underlying density in half – the Resort District allows 16 units an acre and that would reduce it to 8 units an acre. The applicant is proposing a density of less than 4 units an acre (City Exhibits 5 and 6). She further explained that if Council rezones the Bynum House property to Resort, they are in full compliance with the hillside standards. Currently, if the rezoning does not occur, the GPI cannot build that many units.

Ms. Tuch also clarified about the hillside standards is in addition to reducing the density, it restricts the total amount of area that can be graded. That amount, in this particular case, is somewhere between 45-50%. That 45-50% is based on the slope (not the density). So whether we are looking at 5 units vs. 20 units, the total amount of area that can be cleared would be exactly the same.

In response to Councilman Davis, Ms. Tuch said that the GPI is showing a clustered development along the road, in order to try to minimize grading and clearing. She said that we cannot control the footprint of single-family homes. Even after that home is built, there is no mechanism in place to stop that homeowner from doing additional work. It is common to see additional areas being cleared and graded for patios, additional parking spaces, improvements to a driveway, or the removal of some trees for a better view. She said that given the contours in that area, this is the only way we can ensure that there is a buffer left in place, that the homes are placed sensitively, and that the homes are in character with the neighborhood.

Upon inquiry of Councilwoman Bellamy of what can be built on the property without Council's approval, Ms. Tuch said that the bulk of the property is currently zoned Resort. We have the clause in the ordinance that catches developments that are within 1500 feet in 3 years of each other to be reviewed as one project. The GPI could break this down into smaller pieces and only go to the TRC. There would be no conditional use permit involved. They could even take two phases of the site plan that are further than 1500 feet apart and develop those, then wait 3 years and do another phase, and then wait 3 years and do another phase. That would not have any of the Planning & Zoning Commission's recommendations – only the TRC recommendations.

Councilman Newman asked if Council approves the Master Plan, does that mean that the GPI could not do other development during that 10-year period. Mr. Shuford said that Council can condition the Master Plan to require any further substantial development to the areas covered

by the Master Plan to come back before City Council within a 10-year period. City Attorney Oast said that as to the other development on the property, not covered in the Master Plan, he didn't think Council can require them to bring that back. Mr. Shuford also noted .hat most of the developable areas are in the Master Plan, so it would be fairly unlikely for the GPI to do additional developments that would be outside the 1500 feet unless they modified the golf course.

Upon inquiry of Vice-Mayor Mumpower about low water pressure, Ms. Tuch said that issue has been brought to the attention of the Water Resources Department. The TRC asked that some of those property owners who were experiencing problems with water pressure to get in touch with the Water Resources Department so they could test it in a more specific location. The TRC did indicate that any infrastructure improvements would have to be undertaken by the GPI to maintain or improve that water pressure.

In response to Vice-Mayor Mumpower regarding erosion control, blasting and construction violations, Ms. Tuch said that staff would have to sit down with the neighborhood and the GPI to determine exactly what a violation would be and then what kind of fine would be assigned to the gravity of that violation. We have standards currently in place, irregardless of that condition, that would exact violation fines The typical zoning violation fine is $100 a day. If there were a perceived violation that maybe wouldn't technically be a violation by City standards, but could be perceived a violation by the neighborhood standards, that would not be caught. City Attorney Oast said that he will work on ways to strengthen the oversight in those areas.

Councilman Newman clarified that the Planning & Zoning Commission recommended that Council approve a provision to direct staff to develop a graduated set of penalties if there are violations of our conditional use permit. If staff is directed to sit down and evaluate a variety of violations and what their allotted penalty should be, she would like to involve a number of people from our Zoning Enforcement Office, City Attorney's Office, etc. City Attorney Oast noted that we do have a graduated penalty provision in our noise ordinance and that would be the kind of thing we would try to work on for this.

Ms. Tuch said that in addition to the $100/day penalty for zoning violations, we do have other measures that we have instituted, e.g., if a tree gets cut down in the buffer, we do require it to be replaced at a one-to-one ratio. We do have a number of measures in place, but whether that is adequate for the neighborhood, she wasn't sure.

City Attorney Oast noted that when Council adopts conditional use permits, they do it by ordinance and if Council imposes those kinds of conditions, that will be an ordinance and enforced like one.

In response to Councilwoman Jones about design oversight, Ms. Tuch said that typically when staff looks at architecture, we allow an application to proceed with concept plans or character sketches. In a case like this, she would consult with the Director of the Historic Resources Commission and determine what are the key elements that are important for that character, e.g., roof pitch, materials, etc. Those type of elements is what they would be looking for in that final product. That is part of staff's evaluation as to whether or not this application would be in harmony and character with the rest of the neighborhood.

Councilwoman Jones said there was a concern about the buffer on Old Toll Road when the leaves are off the trees. Mr. Tuch said that when the leaves are down it is difficult to screen against many things. There is a pretty substantial buffer left in place with this application. That is one of the reasons that staff encourages this kind of application because we can hold them to the buffer requirements.

When Councilman Newman asked why the City was asking the GPI to administer the sidewalk administration, Mr. Butzek said that it is not a lack of desire for the City to administer it, but a lack of having staff resources since it gets fairly complex when you get into the design, administration, right-of-way acquisition, etc. So, if Council felt that is something City staff should do, we would likely have to hire an engineer to actually do those design plans and work through that process.

Councilman Newman asked if we are counting administration to include acquisition of sidewalk right-of-way. Mr. Butzek replied yes and that is why it was a markedly different percentage than for the traffic calming because there is that added element and that was the major difference. He also added that any monies that are not spent, because these are rough estimates at this point, would be returned to the property owner.

Mr. Tuch said that she believes some of the GPI's hesitation about administering the sidewalk is that there are some property owners that would be affected by that new sidewalk who are not happy with the sidewalk being in their front yard. She feels the GPI would like some help in right-of-way acquisition so it doesn't look like the GPI is seizing their property. Councilman Newman confirmed that the City's only reservation about administering it ourselves is that we don't have the staffing and we would need to contract with someone to help administer it, if we were to administer it.

Councilman Davis felt that instead of an ombudsman, it might be a better for a committee to be formed with a neighborhood representative, a GPI representative and City staff. Ms. Tuch said that the Planning Department does not normally get involved in these type committees and it may be difficult to coordinate. If there was an ombudsman, he would be hired by the developer who would monitor the development and construction activity. If there was a concern or violation then he would contact the appropriate individual and take the necessary measures.

Vice-Mayor Mumpower would speak against a committee formation. He felt we should require the GPI to identify a contact person for the neighborhood and then hold the GPI responsible for any violations. And then for the City to do its job and enforce our ordinances, rather than creating another level of beau racy.

Councilwoman Bellamy also felt the GPI should be responsible for communicating with the neighborhoods on a regular basis. Mr. Shuford said the City can put some type of meeting process in place that when the GPI nears the start of another phase that they would hold a community meeting or send out notices. There are things you can do on the ground to indicate where grading and clearing will occur and that information can be shared as well.

Mr. Green said that the GPI has promised to continue it's quarterly newsletter to let the neighborhood know what is going on in the neighborhood. In addition, the GPI has committed to continue working with the neighborhood committee and develop special committees that would be composed primarily of people within the different areas affected. He said they will comply with existing ordinances.

Upon inquiry of Councilwoman Jones, City Attorney Oast was familiar with the court case presented in Neighborhood Exhibit 5 and it doesn't raise any concerns to him with respect to this conditional use permit. In fact, it reinforces a lot of the advice he gives Council every time a conditional use permit is being considered by City Council.

Upon inquiry of Councilwoman Jones about blasting, Mr. Green said that there have not been any slope borings on any of the properties so we don't know what lies under the top soil. Therefore, he could not answer if there would be any blasting.

160

Mr. Moule clarified the issue about the WLOS-TV use of the Battle House generating more traffic than the proposed development for the Battle and Bynum House combined. He said that in December of 2000, when WLOS was still in the Battle House, Macon Avenue showed 3,800 vehicles a day. Based on the 2002 count from the City, his TIA included a number of 2,600 vehicles a day.

Councilwoman Jones asked whether the GPI's vacancy rate has increased, decreased or stayed the same from 2000 to 2002 (spa opened in 2001). Mr. Madison said that the GPI's occupancy has stayed steady at about 71-72% throughout that period.

Hearing no further rebuttal, Mayor Worley closed the public hearing at 9:40 p.m.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3184 to approve the conditional use rezoning for property located at 290 Macon Avenue (Grove Park Inn – Bynum Property), from RS-4 Residential Single-Family Medium Density District to Resort District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 396

City Attorney Oast reminded Council to not base your decision on anything you have heard except at this hearing and that includes letters from the applicant, conversations with the applicant or letters or conversations with people in the neighborhood.

Councilman Newman moved to adopt Ordinance No. 3185 to issue a conditional use permit for property located at 290 Macon Avenue to permit to permit construction of condominium units, subject to the following conditions, plus any other stipulations that City staff and the Planning & Zoning Commission have recommended that are relevant to the Bynum House property:

1. All TRC recommendations must be met;
2. GPI shall coordinate with staff, and in consultation with the neighbors, in the development of a comprehensive construction plan and construction traffic plan, to include:
   a. designation of and funding by GPI of an ombudsman for dealing with construction issues from the residents during the construction project;
   b. implementation of traffic calming measures on all roads identified in the Staff Report as "affected roads" and on Edwin and Kimberly (South of Country Club) prior to any construction beginning on the project;
   c. such traffic calming measures shall be fully funded by GPI;
   d. construction hours shall be limited to avoid any school transportation issues, compliance with noise ordinances, and no staging of construction shall occur on public roads or on private property owned by persons/entities other than the GPI;
   e. violation of the comprehensive construction plan shall result in structured, graduated monetary penalties (established in the construction plan) with such monetary penalties being paid to the City's sidewalk repair and construction fund;
3. GPI shall pay all construction costs for sidewalks from Bynum House to Latrobe, and the planning and construction of such sidewalks shall be done in consultation with the residents whose property is affected; and
4. GPI shall pay for bicycle stripping on those roads listed as "affected roads" in the Staff Report and on Edwin and Kimberly where feasible, or erection signage warning of bicycle and pedestrian, or where striping is not feasible create shared use lanes and erect signs warning of bicycles.
5. GPI shall pay for all construction costs for a sidewalk from the edge of the Bynum property south along Macon to where it can connect with the existing sidewalk as well as sidewalk along the frontage of Club View Road. In exchange, the City is willing to

exempt the GPI from sidewalk requirements along the other frontages surrounding the property including: Woodlink, Kimberly Avenue, Country Club, Club Knoll, Grovewood, Innsbruck, Old Toll and Charlotte Street. That is with the understanding that easements will be provided for future sidewalk construction.

This motion was seconded by Councilman Davis.

Councilwoman Jones asked for a friendly amendment that the traffic calming and sidewalks be completed prior to construction.

Councilman Dunn felt that if we build the sidewalk first, there will be construction traffic next to the sidewalks. It might not be appropriate to have pedestrians around certain construction sites until the development is built, for their own safety.

Mr. Shuford said that doing a traffic calming process is a neighborhood involvement process and that will take some time to accomplish. In addition with regard to the sidewalks, it's clear that at least portions of the sidewalks are going to be built outside of the City's rights-of-way and we can easily have a property owner be reluctant to have the sidewalk cross his/her property. A lawsuit might be filed and then a considerable amount of time for that process. Taking those two things into account, a motion might be phrased to tie the traffic calming improvements being completed to some specific phase of the development process of perhaps no Certificates of Occupancy or something along those lines. With regard to the issue of safety, we certainly wouldn't want to do anything to attract people to the areas that are under construction, but we will still have pedestrian traffic in the area and they'll be safer off the road.

City Attorney Oast said that this is dealing specifically with the Bynum House property. His concern is that from an implementation standpoint. If Council approves the conditional use permit for the entire Master Plan, this is a process that could take 10 years and there may be phases of the project that are not built for another 6-7 years. He wasn't sure whether Council intends to require all the sidewalks be constructed prior to all those phases being built out.

Mr. Shuford suggested asking the GPI transfer the money to the City prior to any land disturbing activities occurring and then the City take the leadership on the traffic calming improvements sooner rather than over a 10-year period. Councilman Newman and Councilman Davis agreed to add this as a condition.

Upon inquiry of Vice-Mayor Mumpower, Mr. Green said that the developer will pay the City, prior to any land disturbing activities, $325,000. That figured was arrived at based on $100,000 for traffic calming, $150,000 for sidewalk construction, $10,000 for bicycle facilities and 25% administration costs. He asked for clarification from the City of graduated violation penalties. He felt that compliance with the existing City ordinances and compliance with a construction management plan would be more appropriate.

Councilwoman Jones asked for another friendly amendment that there be no blasting. She was concerned that we have rezoned to Resort in a residential neighborhood with historic homes around.

City Attorney Oast said that since the GPI doesn't know whether there will be blasting or not, he suggested that if the GPI determines that blasting will occur with respect to the Bynum House property or any of the other phases, that that part of the conditional use permit come back to City Council.

City Engineer Ball said that blasting has moved a lot so that you can actually do it safer than you can do some other types of construction. She suggested a condition that in the event

that blasting is required that City staff have the opportunity to review their requirements for blasting and to make sure that was the best option for them to go with and that they comply with all state and federal regulations when doing so. They have come a long way with the ability to blast to the point where you don't see some of the damage that you could with other ways of breaking up rock. Mr. Shuford also requested Council add to that condition, since the Fire Department and other agencies need to be notified for blasting purposes, that the developer also notify the neighborhood in advance. Councilman Newman and Councilman Davis agreed to add this as a condition.

Vice-Mayor Mumpower felt that we have existing ordinances to hold the developer accountable and legally liability for their blasting and for us to create another level of oversight seems too much.

Mr. Butzek reminded Council that one item staff is recommending is to exempt GPI from approximately 6,000 linear feet of sidewalk requirements around their frontage exchange for doing the off-site portion of Macon Avenue, which we feel is much more in the public interest. That portion of Macon Avenue we've estimated accounts for more than half of the total cost of approximately $450,000, if we include the sidewalk, traffic calming, including Kimberly and Edwin that was recommended by the Planning & Zoning Commission, and all the administrative costs. They have to construct the sidewalk along the frontage and we are recommending that they also pay for the construction of the portion down to where the sidewalk ends, near Latrobe. And that is an off-site improvement that we are recommending, in lieu of doing all the other frontages, which provide less public value. He noted that the amount we are exempting the GPI from doing is approximately $240,000.

Councilwoman Bellamy felt it would be appropriate to ask the GPI to pay the $450,000 amount as recommended by City staff.

Mr. Shuford said that City Council has another opportunity to consider a condition in the following conditional use permit request, however, we are going to expect to do adequate traffic calming and make the sidewalk connect. That will cost some figure and whether it will be the number that staff has generated or the number that came from the developer. If the number you choose is low, then the City will have to make up the difference. And, if there is any money left over, it will be returned to the developer. He also suggested Council specify the percent of whatever figure that will go to sidewalk and traffic calming.

Mr. Green said that the major reason for the difference in the figures is that Mr. Butzek recommendation of $450,000 includes traffic calming on Kimberly, Evelyn, Edwin and Grovewood. He said that two of those streets (Kimberly and Evelyn) we feel are completely inappropriate for the GPI to pay for traffic calming. These improvements will result in less than 3% increase in traffic on those streets. We are prepared to do the traffic calming on the streets that are impacted by the improvements. Based on Mr. Moule's calculations and the TIA, Edwin and Grovewood would not need traffic calming based on the improvements proposed under this conditional use permit.

Councilman Davis agreed with Mr. Green in that the developer should not have to pay for traffic calming on streets that are not impacted by the GPI improvements.

Councilman Newman felt that the amount required for traffic calming, sidewalks, bicycle facilities and administration should be in the conditional use permit for the overall Master Plan.

Councilwoman Bellamy called for the question.

Mayor Worley restated Councilman Newman's motion, and Councilman Davis' second as follows: To adopt Ordinance No. 3185 to issue a conditional use permit for property located at 290 Macon Avenue to permit to permit construction of condominium units, subject to the following conditions, plus any other stipulations that City staff and the Planning & Zoning Commission have recommended that are relevant to the Bynum House property:

1. All TRC recommendations must be met;
2. GPI shall coordinate with staff, and in consultation with the neighbors, in the development of a comprehensive construction plan and construction traffic plan, to include:
   a. designation of and funding by GPI of an ombudsman for dealing with construction issues from the residents during the construction project; prior to any construction beginning on the project;
   b. such traffic calming measures shall be fully funded by GPI;
   c. construction hours shall be limited to avoid any school transportation issues, compliance with noise ordinances, and no staging of construction shall occur on public roads or on private property owned by persons/entities other than the GPI;
   d. violation of the comprehensive construction plan shall result in structured, graduated monetary penalties (established in the construction plan) with such monetary penalties being paid to the City's sidewalk repair and construction fund;
3. GPI shall pay all construction costs for sidewalks from Bynum House to Latrobe, and the planning and construction of such sidewalks shall be done in consultation with the residents whose property is affected; and
4. GPI shall pay for bicycle stripping on those roads listed as "affected roads" in the Staff Report and on Edwin and Kimberly where feasible, or erection signage warning of bicycle and pedestrian, or where striping is not feasible create shared use lanes and erect signs warning of bicycles.
5. GPI shall pay for all construction costs for a sidewalk from the edge of the Bynum property south along Macon to where it can connect with the existing sidewalk as well as sidewalk along the frontage of Club View Road. In exchange, the City is willing to exempt the GPI from sidewalk requirements along the other frontages surrounding the property including: Woodlink, Kimberly Avenue, Country Club, Club Knoll, Grovewood, Innsbruck, Old Toll and Charlotte Street. That is with the understanding that easements will be provided for future sidewalk construction.
6. The GPI transfer an amount to be determined under the conditions of the Master Plan conditional use permit to the City prior to any land disturbing activities occurring and then the City take the leadership on the traffic calming improvements sooner rather than over a 10-year period.
7. In the event that blasting is required that City staff have the opportunity to review their requirements for blasting and to make sure that was the best option for them to go with and that they comply with all state and federal regulations when doing so. In addition, the developer is required to notify the neighborhood in advance of any blasting.

The motion re-stated by Mayor Worley which was made by Councilman Newman and seconded by Councilman Davis carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 341

Vice-Mayor Mumpower moved to adopt Ordinance No. 3186 to issue a conditional use permit for the Master Plan, including the Bynum House Property, for property located at 290 Macon Avenue, subject to the following conditions:

1. All TRC recommendations must be met;
2. GPI shall coordinate with staff, and in consultation with the neighbors, in the development of a comprehensive construction plan and construction traffic plan, to include:

a. designation of and funding by GPI of an ombudsman for dealing with construction issues from the residents during the construction project; prior to any construction beginning on the project;
b. such traffic calming measures shall be fully funded by GPI;
c. construction hours shall be limited to avoid any school transportation issues, compliance with noise ordinances, and no staging of construction shall occur on public roads or on private property owned by persons/entities other than the GPI;
d. violation of the comprehensive construction plan shall result in structured, graduated monetary penalties (established in the construction plan) with such monetary penalties being paid to the City's sidewalk repair and construction fund;

3. GPI shall pay all construction costs for sidewalks from Bynum House to Latrobe, and the planning and construction of such sidewalks shall be done in consultation with the residents whose property is affected; and
4. GPI shall pay for bicycle stripping on those roads listed as "affected roads" in the Staff Report and on Edwin and Kimberly where feasible, or erection signage warning of bicycle and pedestrian, or where striping is not feasible create shared use lanes and erect signs warning of bicycles.
5. GPI shall pay for all construction costs for a sidewalk from the edge of the Bynum property south along Macon to where it can connect with the existing sidewalk as well as sidewalk along the frontage of Club View Road. In exchange, the City is willing to exempt the GPI from sidewalk requirements along the other frontages surrounding the property including: Woodlink, Kimberly Avenue, Country Club, Club Knoll, Grovewood, Innsbruck, Old Toll and Charlotte Street. That is with the understanding that easements will be provided for future sidewalk construction.
6. The GPI transfer $325,000 to the City prior to any land disturbing activities occurring and then the City take the leadership on the traffic calming improvements sooner rather than over a 10-year period.
7. In the event that blasting is required that City staff have the opportunity to review their requirements for blasting and to make sure that was the best option for them to go with and that they comply with all state and federal regulations when doing so. In addition, the developer is required to notify the neighborhood in advance of any blasting.

This motion was seconded by Councilman Davis and carried unanimously.

Councilwoman Jones felt that exempting the GPI from $200,000 to serve the neighborhood better is good. And, that if any amount exceeds what is necessary, the remaining funds would be returned to the developer. She felt the $50,000 for traffic calming on Kimberly and Edwin is appropriate. Mr. Green said that the GPI would be willing to pay the City $375,000.

Vice-Mayor Mumpower and Councilman Davis agreed to amend their motion to include the following sub-condition under 2 above: "implementation of traffic calming measures on all roads identified in the Staff Report as "affected roads" and on Edwin and Kimberly (South of Country Club) prior to any construction beginning on the project." In addition, they agreed to amend their motion of No. 6 as follows: "6. The GPI transfer $375,000 to the City prior to any land disturbing activities occurring and then the City take the leadership on the traffic calming improvements sooner rather than over a 10-year period."

Councilman Dunn was sympathetic with the neighborhood, but stated that traffic is everywhere and no one in the City is not impacted by traffic. He explained how any plan (the 2025 Plan in particular) can change and it fills people with expectations and then they are disappointed when the plan changes.

The amended motion made by Vice-Mayor Mumpower and seconded by Councilman Davis carried unanimously.

At 10:25 p.m., Mayor Worley announced a short recess.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CLARIFY TWO STANDARDS FOR BED AND BREAKFAST INNS

ORDINANCE NO. 3187 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CLARIFY TWO STANDARDS FOR BED AND BREAKFAST INNS

Mayor Worley opened the public hearing at 10:34 p.m.

Mr. Scott Shuford, Director of Planning & Development Department, said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide clarification of two standards for bed and breakfast homestays and inns. This public hearing was advertised on November 12 and 19, 2004.

In working with the Unified Development Ordinance (UDO) requirements for bed and breakfasts, the Planning & Development staff has found two statements requiring clarification for the intent to be more clearly understood by developers and property owners. Specifically, the question of how to measure square footage is further defined as "gross floor area" (as defined in Section 7-2-5). The other amendment is intended to clarify that existing bed and breakfast homestays and inns that are legal, nonconforming only due to the separation requirements of 500 feet can be further expanded as long as they comply with other applicable development standards.

Pros –

- Requirements for bed and breakfast uses will be more easily understood and interpreted by staff and the public.
- The intent of the ordinance will be made clearer and less subject to legal challenge.

Con –

- It is possible that certain property owners will disagree with the intent to allow existing bed and breakfasts to expand if only nonconforming due to the separation requirements.

The Planning and Zoning Commission unanimously recommended approval of these code amendments on October 6, 2004, by a vote of 6-0. City staff also recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 10:35 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3187. This motion was seconded by Councilwoman Bellamy and carried unanimously.

166

IV. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3176, AN ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON SPRINGSIDE PARK DRIVE, LOCATED OFF WHITE PINE DRIVE, FOR THE CONSTRUCTION OF A 60 UNIT MULTI-FAMILY DEVELOPMENT (KENILWORTH FOREST VILLAGE APARTMENTS)

City Attorney Oast said that this is the second reading of an ordinance adopted on first reading at the November 9, 2004, meeting, granting a conditional use permit for Kenilworth Forest Village Apartments. Because this ordinance failed to pass by a 2/3 vote of Council, law requires a second reading of it.

On November 9, following a public hearing, Council voted 4-3 in favor of adopting an ordinance granting a conditional use permit for the Kenilworth Forest Village Apartments, a 60 unit apartment complex proposed for construction on Springside Park Drive, which is near the Tunnel Road end of White Pine Drive.

City staff has reviewed the testimony and material presented at the public hearing, and has attempted to draft the permit to reflect Council's deliberations.

A copy of the proposed ordinance has been shared it with the applicant and the attorney for the neighborhood for their review. He explained one change to No. 1 in the conditions in the findings and conclusions section as follows: "Obtaining an opinion from an attorney, satisfactory to a North Carolina title insurance company and evidenced by a commitment to insure or other document, that there is legal and adequate access from the Subject Property to Springside Park Drive, and the road must be made public prior to the issuance of a Certificate of Occupancy."

If Council approves of the proposed ordinance, adoption of it on second reading is recommended.

Councilman Newman moved to approve on the second and final reading Ordinance No. 3176, as amended by City Attorney Oast. This motion was seconded by Councilwoman Jones and carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 356

V. NEW BUSINESS:

A. RESOLUTION NO. 04-244 - RESOLUTION APPOINTING MEMBERS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Alcoholic Beverage Control Board.

The term of Debora Holmes Young expired on November 13, 2003, and the term of Barbara Field expired on November 13, 2004. Both are eligible for reappointment.

At City Council's worksession on October 19, 2004, City Council instructed the City Clerk to arrange interviews for Jim Ellis, Kenneth Kaplan, Fred Slosman, Duane Jarnecke and Lisa-Gaye Hall.

Councilman Dunn said that City Council is always looking for the most qualified people to serve on our boards. He felt that the current board members have been more reactive to issues than proactive to issues. He felt that the current board members have not done a good job. There have been three studies performed – all wanting to restructure the board. He felt that the Chairman does not have the educational background in accounting or business. He was disturbed that City Council had to approach the ABC Board and tell them that a management study was needed for their organization. He expressed concern with their financial statements. He felt that if Council reappoints Ms. Young and Ms Field, we are saying that incompetence is okay. He would vote against reappointment of Ms. Holmes-Young.

Councilwoman Jones said that in terms of a board, there are particular things you look to that are proactive. The firing and hiring of the person in charge are two of those things. It's a rare volunteer has to do both of those things and they are both very difficult. They both require pro-action. During the time they were looking for the best leader, they were in limbo for 18 months and subject to a lot of criticism. Another thing she looks for from a management point of view is when you receive the audit and you read the material weaknesses. You should not see those same weaknesses the next year and you do not seem them here. Those are proactive actions. In a volunteer position, the board also had to deal with a very sensitive personnel issue. That is a hardest job a volunteer has to do, whatever their qualifications. In terms of the documents alluded to, they all point to management issues of the supervisor, which goes back to finding the best possible candidate and that is what they have done. She said that she would be supporting both reappointment of Ms. Holmes-Young and Ms. Field.

Mayor Worley will be supporting the reappointment of Ms. Holmes-Young. He had extensive conversations with her during the course of the problems that the ABC Board encountered. He found her to be extremely competent and doing an outstanding job in dealing with a very difficult situation. As the City Council liaison, she kept him very well informed throughout the course of the situation. She made one mistake in judgment, but that one mistake does not rise to the level to not reappoint her to the Board. She has served as Chair of the board during a very difficult time taking on far more responsibilities than a chair normally would take on, due to the absence of a supervisor.

Vice-Mayor Mumpower said this is not a personal decision and he also pointed out that it's difficult to determine the timing issues of when they came on board, what happened when and how accountable they should be. However, he does believe there is overlap and questions the thoroughness of some of the investigative efforts. He has a specific concern about the former director and the existing Board made the decision to retain him. He would not support the reappointment of Ms. Holmes-Young.

Councilwoman Bellamy believes in fiscal responsibility, accountability and trust are critical when serving as a board member. Over the past 4 years, Council has heard extensively about the ABC Board's operations and board activities – increased revenue, dwindling profits, embezzlement charges and convictions, lack of leadership issues, employee morale problems, inappropriate or questionable hiring practices, people leaving employment seeking re-employment, increase support for local non-profits, hiring leadership, and a host of other items. However, when we heard all that, we need to think about the time period in which it was emphasized. One thing was clear was all the information was not given to Board members during the former director's tenure. If all information wasn't presented to the Board members, it is hard for board members who are new to the job to find out as much information as possible. It's quite possible that some board members might have received some information that might have been helpful, but others were not given that information. It causes problems. That type of undermining has been the culture of that organization. What the current Board members had to deal with is a lot of undermining – not being given all the information. She believes they sought answers and listened to complaints, but when it wasn't to the complainant's satisfaction, it

increased more problems. As volunteer board members, who receive a stipend, they worked hard to try to find the best solutions. They worked to enhance and improve the organization. Since the management report and since the new director has been hired, there have been constant improvements. Now that they have a true team in place and we should give them at least six months to see if the team really works. The Board needs full support of staff and to get the information they need to make responsible decisions. She requested a quarterly report from the ABC Board. She would also support reappointment of Ms. Holmes-Young.

City Attorney Oast said that the terms of the ABC Board members are set by statute and he didn't think Council has the ability to appoint for a partial term.

Councilman Davis was concerned of Ms. Holmes-Young's effectiveness as the Chair of the ABC Board. He felt her effectiveness has been compromised by all the allegations – right or wrong. At this point in time, he would support reappointment and see the accountability with the new team.

Councilman Newman felt Council has struggled with all the issues around the ABC Board. Some issues are difficult to determine whether they are true or not. The management audit identified areas for improvement, but the overall message of the audit was that there were no glaring problems with the agency. The ABC Board did a good job of hiring a new director who has already gone a long way in restoring the confidence in the future of the Board. He would be supporting reappoint of Ms. Holmes-Young.

Vice-Mayor Mumpower noted that Debora Holmes-Young received a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dun voting "no". Therefore, Ms. Holmes-Young was reappointed to serve her remaining three-year term, term to expire November 13, 2006, or until her successor has been appointed.

Ms. Barbara Field received a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no." Therefore. Ms. Field was reappointed to serve an additional three year term, term to expire November 13, 2007, or until her successor has been appointed.

In addition, the N.C. General Assembly adopted legislation to add two additional members to the Alcoholic Beverage Control Board. By Council individual votes, Jim Ellis received 3 votes, Kenneth Kaplan received 7 votes, Fred Slosman received no votes, Duane Jarnecke received 4 votes and Lisa Gaye-Hall received no votes.

Therefore, Duane Jarnecke was appointed to serve an initial one-year term, term to expire November 13, 2005; and Kenneth Kaplan was appointed to serve an initial two-year term, term to expire November 13, 2006. Both terms are until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 426

B. RESOLUTION NO. 04-245 - RESOLUTION APPOINTING AN ALTERNATE MEMBER TO THE BOARD OF ADJUSTMENT

Vice-Mayor Mumpower said that this is the consideration of appointing an alternate member to the Board of Adjustment.

Bradley Taylor has resigned as an alternate member of the Board of Adjustment, thus leaving an unexpired term until January 21, 2006.

At the City Council worksession on July 20, 2004, City Council instructed the City Clerk to arrange interviews for John Kiser and Ross Dryer. Mr. Dryer was interviewed on July 27, 2004; however, Mr. Kiser was unable to attend.

On October 19, 2004, City Council instructed the City Clerk to arrange interviews for Robert Middlemas, Starr Silvis and Penny Rush. Ms. Rush cancelled due to her pending move out of the area.

Ross Dryer received no votes, Robert Middlemas received 5 votes and Starr Silvis received 2 votes. Therefore, Robert Middlemas was appointed as an Alternate Member to the Board of Adjustment, to serve the unexpired term of Mr. Taylor, term to expire January 21, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 427

C. RESOLUTION NO. 04-246 - RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Civic Center Commission.

Peter Crosa has resigned as a member of the Civic Center Commission, thus leaving an unexpired term until June 30, 2006. In addition, Denise Goodson has resigned from the Civic Center Commission, thus leaving an unexpired term until June 30, 2005.

At the City Council worksession on October 19, 2004, City Council instructed the City Clerk to arrange an interview for Brian Turner. Mr. Turner was unable to attend the interview, however, was very interested in the position.

In addition, at the City Council's worksession on October 19, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint George Keller, as a member to the Civic Center Commission, to serve the unexpired term of Mr. Crosa, term to expire June 30, 2006, or until his successor has been appointed.

City Council instructed the City Clerk to re-advertise for the unexpired term of Ms. Goodson.

RESOLUTION BOOK NO. 28 – PAGE 428

D. RESOLUTION NO. 04-247 - RESOLUTION APPOINTING MEMBERS TO THE FILM COMMISSION

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Film Commission.

The terms of Councilwoman Terry Bellamy, David Schulman, Lee Nesbitt, Andrea Dray, Steven Lutz, Diedra Smith and Leni Sitnick, as members of the Film Commission, expired on November 1, 2004.

At the City Council worksession on October 19, 2004, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) appoint Vice-Mayor Mumpower to serve a three year term, or until his term on City Council ends, whichever occurs first; (2) reappoint David Shulman to serve a three year term, or until his successor has been appointed; (3) reappoint Lee Nesbitt to serve an additional three year term or until her successor

has been appointed; (4) reappoint Steven Lutz to serve a three year term or until his successor has been appointed; (5) reappoint Diedra Smith to serve a three year term or until her successor has been appointed; and (6) reappoint Leni Sitnick to serve a three year term or until her successor has been appointed.

Also at the City Council worksession on October 19, 2004, City Council instructed the City Clerk to arrange interviews for Diane Vander Linden, Rudy Rodriquez, Lisa Sarasohn and Melinda Rains. Mr. Rodriquez did not attend the interview.

On October 21, 2004, Leni Sitnick asked not to be reappointed due to personal responsibilities. Ms. Sitnick, as Chair of the Film Commission, recommended City Council interview David Craft. After consultation with City Council, Mr. Craft was added to the interview list.

By individual Council votes, Diane Vander Linden received 5 votes, Rudy Rodriquez received no votes, Lisa Sarasohn received no votes, Melinda Raines received 6 votes, and David Craft received 1 vote. Therefore, Dane Vander Linden and Melinda Raines were appointed to serve three-year terms respectively, terms to expire November 1, 2007, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 429

E. RESOLUTION NO. 04-248 - RESOLUTION APPOINTING A MEMBER TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Planning & Zoning Commission.

Nathaniel Cannady has resigned as a City appointment on the Planning & Zoning Commission, thus leaving an unexpired term until August 14, 2005.

On October 19, 2004, City Council instructed the City Clerk to arrange interviews for Joe Minicozzi and Jerome Jones.

By individual Council votes, Joe Minicozzi received 1 vote and Jerome Jones received 6 votes. Therefore, Jerome Jones was appointed as a member to the Planning & Zoning Commission, to serve the unexpired term of Mr. Cannady, term to expire August 14, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 430

F. RESOLUTION NO. 04-249 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Recreation Board.

Ann Babcock has resigned from the Recreation Board, thus leaving an unexpired term until June 30, 2005.

On November 16, 2004, City Council instructed the City Clerk to arrange interviews for Eleanor Campbell and Andrew Gall. Mr. Gall was unable to attend the interview due to an illness.

Eleanor Campbell received 7 votes and Andrew Gall received no votes. Therefore, Eleanor Campbell was appointed as a member to the Recreation Board, to serve the unexpired term of Ms. Babcock, term to expire June 30, 2005, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 431

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of October 29 – November 11, 2004: Betty Salter (Sanitation), Michael L. Spell (Water), Linda Hoover (Water), Evelyn Ashby (Streets) and Kris Spillars (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fisher Caudle, resident in the Pisgah View neighborhood, explained the lack of police enforcement in their area. He felt the area is discriminated against as the neighborhood has to deal with drug thugs, street trash and litter around the Pisgah View Apartments. He urged Council to clean up this public housing project because their individual property rights are being encroached upon.

Ms. Mary Stiger, resident near the Pisgah View Apartment, briefed Council on the terror residents live in around the apartment complex from illegal drug dealers. She urged City Council to find solutions to this devastating problem.

Mr. Joe Smith, Ms. Tiffany Kyle, Mr. Terry Bradley, Mr. D. Jones, and Mr. Peter Dawes all spoke about the need for accountability by the ABC Board and the many unanswered questions, including embezzlement and store proceeds, presented to the Board but no response. They urged City Council to have a full outside investigation of the Board by the State Bureau of Investigation or an accountant.

Mr. Mike Fryar commented about the alleged false statements provided to City Council by City staff in his recent annexation.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 11:49 p.m.

Ingleen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 7, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Minority Business Program Annual Report

Summary: This is the Minority Business Program Annual Report for Fiscal Year 2003-04.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan was subsequently amended in November 1998, December 1999, December 2001, and October 2002, to clarify provisions of the Plan and to reduce the Minority Business Commission from thirteen members to eleven and September 2004 to make administrative changes and update statute information.

The Plan requires the Office of Minority Affairs to present to the City Council and County Commissioners an Annual Report on the effectiveness of implementation of the Plan. The Report shall include, but not be limited to: the number of minority businesses; percentage of minority businesses contracting with the County and City either as a prime contractor or as a subcontractor; percentage of overall reported contracts awarded to minority businesses; percentage of contractors complying with good faith efforts; and percentage of goals achieved and goals waived.

The Annual Report for Fiscal Year 2003-04 has been reviewed by the Minority Business Commission and approved at its meeting on August 12, 2004.

Exchange of Property on Stratford Road

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

The City and Verdi Group LLC (Verdi) have negotiated an exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

The excess right-of-way property is along the east side of Stratford Road comprising 0.008 ± acre generally across the road from and between its intersections with Parkside Avenue and Pinewood Avenue.

The property owned by Verdi (PIN 9730.12-96-3375) is a 0.969 acre parcel zoned RS-4 Residential Single-Family Medium Density District located on Stratford Road contiguous with the right-of-way. As it is the parcel will only support three (3) houses. With the additional land from the excess right-of-way, the Verdi property will support development of four (4) houses. The right-of-way easement to be exchanged for the excess right-of-way will cover 0.131 acre and will provide a logical and consistent right-of-way boundary along the east side of Stratford Road extending ten (10) feet into the Verdi property for the full length of the street frontage.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It will provide a more logical and consistent right-of-way boundary along Stratford Road.
- It will enable maximum infill development consistent with the Strategic Operating Plan.
- The 10-foot easement makes a future sidewalk more constructible.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff and the Traffic Engineer recommends adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

New Street Name – Jan Drive

Summary: The consideration of a resolution accepting the new proposed street name "Jan Drive."

Southern Pride of WNC, owner of lots on Jan Drive off of Bellevue Road, has petitioned the City of Asheville to accept the street name " Jan Drive."
The new street will begin at Bellevue Road and end at the cul-de-sac on Jan Drive.

City staff recommends adoption of the resolution accepting the new proposed street name "Jan Drive."

Application for a Bicycle Planning Grant

Summary: The consideration of a resolution authorizing the City Manager to submit a proposal requesting $24,000 in planning funds for the purpose of developing a $40,000 comprehensive bicycle plan and to commit local match for Fiscal Year 2006 as needed.

This project supports the Asheville 1998 Greenway Master Plan and 2003 Update, the 2025 City Development Plan, and the 2004 Transportation Demand Management Program Work Plan. It also implements several tasks in City Council's Strategic Operations Plan in the areas of:

- Planning, Goal #2, Obj. A, Tasks 1 and 2 – to incorporate multi-modal uses of transportation options and to leverage outside funding to achieve multiple transportation goals where possible.
- Planning, Goal #2, Obj B, Tasks 1 and 2 – to determine opportunities for managing traffic demand and to explore public-private partnerships with major employers and education providers to increase the effectiveness of the transportation system.
- Sense of Place, Heritage & Arts, Goal #3, Obj. B, Task #1 – to construct infrastructure including bicycle facilities to accommodate growth downtown.
- Natural and Built Environment, Goal # 2, Obj. A, Tasks 1-4 – to implement the Wilma Dykeman Riverway Plan and the Completion of several Greenways. (Note that the Reed Creek Greenway, the Hominy Creek Greenway, and the Azalea Park Connector Greenway are all funded through the NCDOT Bicycle Program and that their staff is encouraging a bicycle plan proposal from the City.)
- Natural and Built Environment, Goal #2, Obj. B, Task 1 – to work with the State to fund greenway projects via the Transportation Improvement Plan.

This proposal is supported by the Blue Ridge Bike Club and the Asheville Bicycle and Pedestrian Task Force, a volunteer group of citizens whose mission is "to educate the public about bicycle and pedestrian transportation, to advocate for the development and maintenance of safe, convenient and inter-connected facilities, and to promote the benefits of walking and bicycling for individual and community health." The Task Force has assisted in the development of the proposal and is committed to assisting in the planning process.

The positives of this project are that it will:

- Better position the City to continue to pursue funding from the NCDOT Division of Bicycle and Pedestrian Transportation and through the Transportation Improvement Plan and Long Range Transportation Plan processes;
- Provide $24,000 or sixty percent of the total cost toward a $40,000 planning process and enable the City to bring in a bicycle planning specialist;
- Provide a process and opportunity to directly involve the Council, public and interested stakeholders in the development of goals, objectives, and tasks related to improving bicycling in Asheville; and
- Collate, clarify and direct information regarding local bicycle issues and initiatives into one document and series of maps that support the 2025 Plan, Greenways Master Plan, and Strategic Operations Plan.

The negatives of this project are that it will:

- Require time from City staff to manage the contracting process and supervise the consultant; and
- Require a local match of $16,000 beginning July 1, 2005. The Blue Ridge Bike Club has pledged support of $1,000 toward this local match requirement, but the remaining $15,000 will need to be committed for Fiscal Year 2006.

Staff recommends that City Council adopt the resolution authorizing the submittal of a proposal and the commitment of matching funds in the next fiscal year.

Adoption of Fiscal Year 2005-06 Budget Schedule

Summary: The consideration of a motion approving the Fiscal Year 2005/2006 budget schedule.

The proposed Fiscal Year 2005/2006 budget schedule identifies key dates for completion of all phases of the budget process leading to adoption. Several administrative steps in the budget process are already underway due to the need to get an early starting as a result of the pending retirement of the City Manager.

Key phases of the budget process, which involve City Council, include the City Council Annual Retreat, presentation of the proposed budget to City Council, a public hearing and formal adoption. This year's schedule includes five scheduled budget worksessions, allowing City Council sufficient time for effective budget deliberations. Adoption of the Fiscal Year 2005/2006 budget is scheduled for June 28, 2005.

City staff recommends City Council to adopt the Fiscal Year 2005/2006 budget schedule.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

10-YEAR PLAN TO END HOMELESSNESS

Mr. Jerome Jones, Chair of the Joint City/County Steering Committee, said that this is the consideration of a resolution approving the Plan "Looking Homeward: The 10-Year Plan to End Homelessness in Asheville and Buncombe County."

In May 2004 City Council and the Buncombe County Board of Commissioners appointed a joint advisory Task Force to prepare a 10-Year Plan to End Homelessness, with initial priority on the chronic homeless population.

The Task Force, has met six times and, with assistance from City and County staff and from Pisgah Legal Services, has produced the a report: "Looking Homeward".

He reviewed the Plan in that approximately 2,000 people experience homelessness in Asheville and Buncombe County at some time during the course of each year. Thousands more live doubled-up in the homes of family and friends, or they are at imminent risk of homelessness, living in substandard or overcrowded housing they cannot afford.

"Looking Homeward" is the culmination of a six-month planning effort by homeless service providers, government administration, housing developers, community leaders, and homeless people themselves. "Looking Homeward" is a long-range, comprehensive plan to help homeless people in our area return to healthy and stable lives in permanent housing. The Task Force's recommendations are evidence-based, and draw from the best practices of innovative programs and initiatives throughout the country.

"Looking Homeward" is intended to end long-term or "chronic" homelessness. This emphasis reflects a growing body of research demonstrating that members of this group are poorly served by existing efforts even though they use a disproportionate share of emergency services and resources. In Asheville and Buncombe County just 37 of approximately 300 chronic homeless people cost the community over $800,000 each year; this figure does not reflect the costs of the other 260+ chronic homeless.

Research also shows that the chronic homeless population is best served by utilizing a Housing First/Housing Plus model. This approach focuses on moving people out of homelessness and into housing as quickly as possible. A participant does not have to be sober or be treated for a mental illness to receive the housing. Supportive services are provided in permanent housing, not in emergency or transitional shelter. An Assertive Community Treatment Team (ACT Team) provides the service in a non-threatening, consumer-driven approach. Housing First/Housing Plus projects across the nation have been phenomenal results. After five years, as many as 90% of participants have remained in permanent housing.

Under the leadership of the United States Interagency Council on Homelessness, a national consensus has emerged that all levels of government must focus on improving efforts to house chronically homeless individuals and families. "Looking Homeward" is consistent with, and complementary to, the federal government's efforts in this area. Likewise, the State of North Carolina, through its Interagency Council on Coordinating Homeless Programs, is creating a plan that will coordinate state efforts with federal and local plans. Federal, state, and local plans must complement each other, because each level of government will play an integral part in implementation.

Other North Carolina and Southeastern localities developing plans include: Durham City/Durham County, Raleigh/Wake County, Winston-Salem, Gastonia, and Henderson/Vance County, North Carolina; Chattanooga and Memphis/Shelby County, Tennessee; Richmond,

Portsmouth, and Norfolk, Virginia; and Atlanta, Albany, Athens/Clark County, and August, Georgia.

The scope of "Looking Forward" is not limited to chronic homelessness alone. When implemented, over the next decade, the policy recommendations will also result in a significant reduction of all types of homelessness, including among families, youth and single adults who experience episodic homelessness. Successful implementation will depend on funding availability at local, state and federal levels. Funding decisions are left to the elected officials who charged the committee with creating this plan.

"Looking Forward" will end chronic homelessness and reduce all types of homelessness over the next decade by investing our resources in a coordinated, sustained effort that addresses the underlying causes of homelessness. This effort will (1) reduce the number of people who become homeless; (2) increase the number of homeless people placed into permanent housing; (3) decrease the length and disruption of homeless episodes; and (4) provide community based service and supports that prevent homelessness before it happens and diminish opportunities for homelessness to recur.

These goals will be accomplished through a five-prong approach:

1. **Leading the Way: Designation of a lead entity** – the Affordable Housing Coalition is recommended as the organization that will oversee implementation of the plan.

2. **Developing the Infrastructure: Homeless Management Information System (HMIS)** – HMIS, will link all services, screen for program eligibility, and gather data needed to monitor progress of implementation.

3. **Closing the Front Door: Prevention** – Better coordination of financial assistance and discharge planning for people leaving public institutions.

4. **Opening the Back Door: Housing First** – Development and implementation of a community-wide Housing First program that will include permanent housing for all homeless.

5. **Keeping it Going: Housing Plus** – A new approach to providing services to ensure that homeless individuals and families placed in permanent housing can remain housed in the long-term.

Addressing the Strategic Operating Plan: This plan directly addresses Housing Opportunities Goal #2 in the City's Strategic Operating Plan: "A community without homelessness – create a coalition to develop and implement the 10-year plan to end chronic homelessness through public and private partnerships."

Advantages:

- Addresses a major goal of the City's Strategic Operating Plan, and also a key recommendation of the Downtown Social Issues Task Force
- Is based on strategies that have proven successful elsewhere and have been subjected to extensive study and peer review;
- Brings together mainstream providers, non-profits, and local government in a concerted effort to focus policy initiatives and resources on homelessness
- If successful, will drastically reduce the human and economic cost of homelessness in our area;

- Builds on initiatives that are already under way (HMIS and development of suitable housing units);
- Is consistent with state and federal initiatives for ending homelessness and will position the City and County to apply for funding for implementation
- Lack of such a plan will eventually threaten continued federal and state funding from programs such as HOME, CDBG, Emergency Shelter Grant, HOPWA, and Supportive Housing Grants.

Disadvantage:

- The Plan does not identify specific costs or sources of funds; staff expects that some new federal funds will become available for housing and supportive services, but local funding may also be needed, including re-prioritization of CDBG and HOME funds.

Staff recommends City Council adopt the resolution approving the Plan "Looking Homeward: The 10-Year Plan to End Homelessness in Asheville and Buncombe County."

Mr. Jones and Ms. Robin Merrell, from Pisgah Legal Services, responded to various questions/comments from Council, some being, but are not limited to: where are the Woodfin apartments; reasoning why funding is not being addressed in the Plan; has the program assessed what kind of issues (social, substance abuse, mental issues, etc.) the chronic homeless have; why is this Plan different when the chronic homeless have not responded to that sort of help over the years; is it true that Asheville seems to attract homeless people; if the chronic homeless are helped, will they be replaced with another network of other predators; are the 37 chronic homeless from Buncombe County or from Western North Carolina; what is the average length of stay for the chronic homeless; do other cities in Western North Carolina have a homeless program; does this Plan work in conjunction with the mental health plan with Buncombe County; what kind of support services will be available; are there any assurances that more ACT Teams will be created; is there a ballpark figure on the cost of the Plan and what type of funding will be sought for this Plan; and what percentage of the housing dollars will be targeted specifically for the 37 chronic.

Vice-Mayor Mumpower expressed several concerns regarding the Plan and said that he would meet with Mr. Jones to discuss his concerns further.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the January 11, 2005, formal City Council agenda. It was also noted that questions that could not be answered would be addressed prior to the meeting on January 11, 2005.

ANNUAL AUDIT REPORT

Finance Director Bill Schaefer said that this is the presentation of the City of Asheville annual audit report for the Fiscal Year Ended June 30, 2004.

City Council retained an independent audit firm, Dixon Hughes Evans PLLC of Asheville, NC, to perform an audit of the City of Asheville for the fiscal year ended June 30, 2004, as required by North Carolina General Statute 159-34. The auditors gave the City an unqualified audit opinion. (The term "unqualified" means that the auditors' opinion, that the financial statements present fairly the financial position of the City, is not modified by reservations or restrictions.)

Advantages:

- Complies with State Statues regarding financial management.
- Increases public confidence in local government through independent review of financial management and reporting and by full and accurate disclosure of the City's financial transactions and fiscal-year-end status.

Disadvantages: None.

This recommendation contributes to the achievement of all of the goals of the City of Asheville Strategic Operating Plan through validation of good stewardship and sound financial management by the City that provides the foundation for progress in each of the Goals.

Ms. Deborah Hawkins, Senior Associate of Dixon Hughes, PLLC, gave Council a brief presentation of their findings. She said their report for the 2004 audit expresses and unqualified opinion (clean) on the fair representation of the basic financial statements in all material respects, in conformity with generally accepted accounting principles generally accepted in the United States of America. She summarized (1) the City's government-wide (primary government only) financial statements for the years ended June 30, 2004; (2) the fund balance in the General Fund; (3) the basic financial statements of property tax collections and collection rates; (4) General Fund revenues; and (5) General Fund expenditures.

Mr. Schaefer answered various questions from Council regarding the financial report.

APPROVAL OF THE SALE OF THE BROTHERTON SITE TO NEIGHBORHOOD HOUSING SERVICES

Community Development Director Charlotte Caplan said that this is the consideration a resolution approving the sale of City-owned property on Virginia and Brotherton Avenues to Neighborhood Housing Services (NHS) for a mixed-income housing development.

The City purchased a 7-acre site at the corner of Virginia and Brotherton Avenues from the Housing Authority in 2000 and contracted with a private developer to develop 32 units of mixed income condominium-type housing on the site, using Community Development Block Grant (CDBG) funds for the site improvements and private financing for the housing construction. The developer completed the site improvements but then withdrew in late 2003, having been unable to get construction financing for the housing development on terms he found acceptable.

In July 2004, staff issued a request for proposals for a new developer. Two responsive proposals were received and reviewed by a panel of outside experts and staff, appointed by the City Manager. This panel has recommended the proposal submitted by Neighborhood Housing Services of Asheville (NHS) in partnership with The Verdi Group. NHS proposes to purchase the improved site for $454,701 ($1,001 over appraised value) and construct 44 units of housing. The proposal combines the design and construction experience of the Verdi Group with NHS's experience in marketing to income-qualified buyers and its ability to obtain construction financing on favorable terms from its national affiliate: Neighborhood Housing Services of America.

The development is consistent with the City's Strategic Operating Plan (Housing Opportunities Goal #4) because it increases the supply of affordable housing through relatively dense infill on a vacant parcel and also provides mixed-income housing

The resolution authorizes the Mayor to enter into a contract for sale with NHS. NHS will then do its due diligence on the site and prepare construction plans. Council will have the opportunity of reviewing the plans in detail early next year, since NHS's proposal to increase the number of units requires modification of the Conditional Use Permit approved in 2003. The sale will not close until any required zoning process is completed.

The sale will be governed by the terms of N. C. Gen. Stat. 160A-279 (private sale of property to entities carrying out a public purpose). This does not require a public hearing or upset bid process.

Advantages:

- Authorizing the sale enables the development of the property to move forward.
- A strong partnership has been formed by NHS to acquire the necessary financing, and design, construct, and market mixed-income housing on the site.
- Council will have final approval of the project when design is complete and before the sale closes.
- The proposal offers 24 units of affordable housing and 20 units of market rate housing with the benefits of good design, energy efficiency, and preservation of open space on the site.

Disadvantage:

- The NHS/Verdi group's plan will require a modification of the Conditional Use Permit, and is therefore not ready to move into construction immediately

Staff recommends approval of the resolution authorizing the Mayor to enter into a contract for sale with NHS.

Discussion surrounded the various questions/comments Ms. Caplan responded to from Council, some being, but are not limited to: are there still water pressure problems in the area; has any taxpayer money been lost from any source on this project; how does the management work with the partnership; was this reviewed by the Housing & Community Development Committee; will sidewalks be required in the project; does NHS feel comfortable with the conditions already placed on them with the conditional use permit; what is a guesstimate of the total amount of money the City has invested on this site; what happened to the prior developer; will any intersection plans affect the site; will all units be affordable; was any other interest shown on this site; will they build energy efficiently; what did we get for our infrastructure improvements; and where in the process do we get confidence that NHS will get a construction loan.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

At 4:55 p.m., Mayor Worley announced a short break.

HAYWOOD STREET PARKING GARAGE (FORMERLY THE BATTERY PARK PARKING GARAGE

Amendment to Contract with Carl Walker for Design and Development Plans

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to amend the contract with Carl Walker, Inc., to include an additional $187,000 for the revisions to the design/development drawings and the construction documents for the Haywood Street Parking Garage (formerly know as the Battery Park Parking Garage.)

In 2000, the City of Asheville went through a formal process to select Carl Walker, Inc. to design the Haywood Street Parking Garage in the Battery Park area. The original contract was for a parking structure on the existing surface lot of the BellSouth lot. The original cost of the project was $510,000. Since that time several changes have been make in the scope of the work. These changes include:

- The location of the site has moved, causing the design cost of the project to increase because of the geometry of the site; and,
- The Engineering fees of the Consultant have gone up annually since 2000;
- The Consultant was requested to complete design/development drawings for the private development component of the project.

All of the additional costs for the contract amendment will be recovered with bond proceeds. This amendment brings the total cost of the project to $901,113.00. This change was approved by Council in February 2003.

The increase in costs associated with this amendment includes the following:

- Eliminating the lowest level of the parking garage and designing an additional level of parking to increase the height of the deck in order to retain approximately the same number of parking spaces in the deck. This change will reduce the cost of the construction of the parking garage significantly. (Approximately $1.5 Million)
- Redesign the roundabout on Haywood Street to reduce the need for BellSouth to relocate their service lines. This change will result in a cost reduction of $500,000 due to the elimination of the need to relocate BellSouth Utilities in this location.

This request would bring the total contract cost for the design of the project to $1,088,113, which is approximately 9% of the total construction costs. Typical design costs for a project of this nature is 6 to 10% of the total construction costs.

Money for this increase is in the requested budget amendment included as an item on this agenda.

Considerations

- The design costs would increase by $187,000.
- The overall construction cost would decrease by $1,700,000.
- The number of parking spaces would remain at approximately 650.

This will meet City Council's Strategic Plan in the focus area of "Sense of Place, Heritage and Arts. Goal #3: Downtown Development with improved gateways/corridors - Support and advocate for initiatives to encourage new downtown development including gateway/corridor improvements. Objective 2. Enhance and encourage new downtown development by establishing funding strategies to partner with or make downtown more attractive to private developers. Task: (1) Construct infrastructure including parking, shuttle/trolley service, sidewalks, streetscapes, and bicycle facilities to accommodate growth downtown.

Staff requests that City Council authorize the City Manager to amend the contract with Carl Walker, Inc. to include an additional $187,000 for the design of the Haywood Street Parking Garage in the Battery Park area.

Contract with Hanscomb, Faithful and Gould for Project Management Services

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to sign a contract with Hanscomb, Faithful and Gould, in the amount not to exceed $300,000, for project management services for the Haywood Street Parking Garage (formerly know as the Battery Park Parking Garage.)

In 2003, staff requested proposals from qualified firms to perform project management services for the development of construction documents, costs estimates and construction oversite for the Haywood Street Parking Garage in the Battery Park area. Staff reviewed the proposals and determined that Hanscomb, Faithful and Gould was the most qualified firm.

The role for project management as an independent service is a key element to reducing overall cost while receiving a good quality structure. Hanscomb, Faithful and Gould would work directly for the City of Asheville and represent the best interest of the City. We currently have them on retainer on an nourly basis. They have already played a crucial role in reducing the costs of the project.

All of the additional costs for the contract amendment will be recovered with bond proceeds. Money for this increase is in the requested budget amendment included as an item on this agenda.

Considerations

- The project costs would increase by $300,000.
- This cost could be offset by the savings recommend but the project manager because of their expertise.

This will meet City Council's Strategic Plan in the focus area of "Sense of Place, Heritage and Arts. Goal #3: Downtown Development with improved gateways/corridors - Support and advocate for initiatives to encourage new downtown development including gateway/corridor improvements. Objective 2. Enhance and encourage new downtown development by establishing funding strategies to partner with or make downtown more attractive to private developers. Task: (1) Construct infrastructure including parking, shuttle/trolley service, sidewalks, streetscapes, and bicycle facilities to accommodate growth downtown.

City staff requests that City Council authorize the City Manager to sign a contract with Hanscomb, Faithful and Gould in the amount not to exceed $300,000 for project management services for the Haywood Street Parking Garage.

Budget Amendment for Haywood Street Parking Garage

City Engineer Cathy Ball said that this is the consideration of a budget amendment in the amount of $ 9,000,000 (from $11.9 Million to $20.8 Million) for the Haywood Street Parking Garage (formerly know as the Battery Park Parking Garage.)

In the Capital Improvement Budget for Fiscal Year 1999-2000 $11.9 Million was appropriated for the construction of a parking garage in the Battery Park area. Since that time there have been several changes in the scope of work of the project. During the course of this project, staff has met with Council Members several times to inform them of some of the significant changes in the project. These changes are outlined below:

182

#	Description	Increase	Decrease	Total (M)
1.	Location of parking garage changed from Bell-South Lot to behind the Battery Park Apartments – This increase was in construction costs due to the change in shape of the structure (rectangle to L-Shape) (2000)	$500,000		$12.3
2.	Number of parking spaces increased from 400 spaces to 650 spaces. The Citizen-Times originally agreed to participate in the garage. This increase is offset somewhat by the private-development component of the project. (2002)	$3,000,000		$15.3
3.	Building the site below ground due to height restrictions imposed by Battery Park Apartments. (See Item 6) (2003)	$1,500,000		$16.8
4.	Increase in Bell-South Utility costs to relocate major trunk lines. (See Item 6) (2003)	$500,000		$17.3
5.	Increase in design costs to include private development component of the project. (2003)	$391,113		$17.7
6.	Increase in design costs to reduce the cost of constructing the parking garage underground and revising the roundabout. (Decrease in construction costs.) (2004)	$187,000	$2,000,000	$15.9
7.	Contract with Project Manager (2004)	$350,000		$16.3
8.	Increase in construction costs since 1999	$2,600,000		$18.9
9.	Huge increase in the cost of steel. (2004)	$1,800,000		**$20.8**

Some of this cost can be offset by the development of the private development component of the project. This money cannot be specified until the City enters into an agreement for the private development component of the project. Therefore, the City must pay these costs upfront.

Staff recommends that the number of parking spaces remain at 650 to allow for some growth in monthly parking spaces, an increase in hourly parking spaces and the opportunity to provide parking for the private development adjacent to the parking garage.

Considerations

- The project costs would increase by $9,000,000 some of which can be offset by the development of the private development component of the project.
- Eliminating parking spaces from the garage will not proportionally reduce the cost of the garage.

This will meet City Council's Strategic Plan in the focus area of "Sense of Place, Heritage and Arts. Goal #3: Downtown Development with improved gateways/corridors - Support and advocate for initiatives to encourage new downtown development including gateway/corridor improvements. Objective 2. Enhance and encourage new downtown development by establishing funding strategies to partner with or make downtown more attractive to private developers. Task: (1) Construct infrastructure including parking, shuttle/trolley service, sidewalks, streetscapes, and bicycle facilities to accommodate growth downtown.

City staff requests that City Council approve a budget amendment in the amount of $9,000,000 (from $11.9 Million to $20.8 Million) for the Haywood Street Parking Garage (formerly know as the Battery Park Parking Garage.)

Discussion surrounded the various questions/comments from Council that Ms. Ball and Mr. Bill Schaefer, Finance Director, responded to, some being, but are not limited to: what is the dollar figure for each parking space and what was the figure when the project first started; various questions regarding financing of the deck; will the City be able to recoup any costs once the deck is built; what is the debt repayment schedule on the Rankin Avenue and Wall Street decks; what does the Parking Services Enterprise Fund consist of; what did the original $11 Million budget in 2000 consist of; why is there a need in downtown Asheville for this large of a facility; will the money from the sale or lease of the outparcels go back to pay the debt service; how long will it be before the parking deck will be self-financing; what will be the on-going maintenance cost of the deck; if the City defaulted on the loan, what would be lost; what is the average across the county on the increase in steel; what would happen if the $20 Million deck was not built and what type of monetary losses would the City incur; is this the appropriate location for this parking deck; are there ways we can review the engineering study and find ways to modify the plans to reduce the $20 Million; have we tried to pre-sell the outparcels; why can't we build on top of the Rankin Avenue parking deck; how many spaces did we commit as part of the land acquisitions; the City needs to keep in mind that another parking deck (to be built by the Grove Park Inn) is in the future next to the City Hall Building; are there ways we can look at modifying the project to lower the $20 Million cost; what type of cosmetic work will be done on the deck; does the Council have the flexibility of using the funds in the Parking Services Enterprise Fund; will increases to the price we charge for on-street parking and deck parking be reviewed in the near future; how was the 650 parking spaces arrived at; how much surface parking will be lost as a result of the new parking garage; what parking garages will be used for monthly parkers and transient parkers; how many decks and how many parking spaces are in the Civic Center Parking Garage; and have other options to address the parking congestion been looked at.

Vice-Mayor Mumpower and Councilman Newman felt that a parking deck was needed, however, they expressed concern of how we can justify spending $20 Million on it.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

VACATE AND CLOSE THE ENTIRE DWELLING AT 1086 HENDERSONVILLE ROAD

Housing Code Officer Jeff Baker said that this is the consideration of a resolution setting a public hearing on January 11, 2005, for the adoption of an ordinance to vacate and close the remaining dwelling units located in the dwelling at 1086 Hendersonville Road.

The dwelling at 1086 Hendersonville Road is a wooden structure containing nine separate dwelling units. After unsuccessfully attempting to work with the property owners to bring the dwelling into compliance with the Housing Code since December of 1998, City staff's efforts to bring about compliance intensified during the summer of 2004. In August of 2004, the property owners entered into a Memorandum of Understanding but failed to honor their commitment to bring the dwelling units into compliance with the Housing Code. As a final effort to obtain compliance, City staff asked City Council to adopt an ordinance ordering certain of the dwelling units to be vacated and closed, which Council adopted. Despite the ordinance directing the property owners to vacate and close certain of the dwelling units, the property owners continue to offer said dwelling units as well as the remaining dwelling units for rent.

A second hearing was held on October 15, 2004, whereby Elizabeth Tate, one of the property owners, made it clear that she had no intentions of voluntarily vacating and closing the

dwelling. A Findings of Fact and Order was entered ordering the property owners to vacate and close the entire dwelling or otherwise bring the dwelling into compliance with the Housing Code by November 15, 2004. To date, the dwelling has not been brought into compliance with the Housing Code and neither has a housing certificate been issued.

After trying every possible approach to obtain the property owners' compliance with the Housing Code, such has failed. Meantime, the property owners continue to rent and receive rent for each of the unfit dwelling units, which is a violation of the City's Housing Code.

Mr. Baker noted that all the eviction signs have been removed from the units Council has previously authorized to be vacated and the three tenants have been notified that they will be evicted on December 20, 2004. He did note that the City and different housing agencies are working with the three tenants for replacement housing.

Staff recommends City Council adopt a resolution setting a public hearing on January 11, 2005, to consider an ordinance ordering the entire dwelling located at 1086 Hendersonville Road vacated and closed until brought into compliance with the City's Housing Code.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

RESOLUTION NO. 04-250 - RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION

City Manager Westbrook said that this is the consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $5,000. The grant offer must be accepted on or before December 10, 2004, therefore, he asked that Council waive their rules and take formal action at this meeting.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $5,000, is for the terminal roof repair, which was damaged by the recent hurricanes.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 37-0005-E1-2005.

Councilwoman Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilwoman Bellamy moved to approve Resolution No. 04-250. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 432

FUNDING FOR HOPE VI FEASIBILITY STUDY

Mayor Worley said that Councilwoman Bellamy and himself heard a presentation at the Housing Authority to ask the City for $18,000 plus expenses for a feasibility study to see if Asheville is eligible to obtain a Hope VI grant to do some redevelopment in conjunction with the Housing Authority in public housing projects.

Councilwoman Bellamy explained that other communities, who didn't do the study and research, did not receive a grant and felt that the study is necessary to determine if Asheville is eligible and has a chance to receive some funding.

Mr. Harrison Shannon, President of the Harrison Shannon Group, explained the type of analysis he will provide and what type of information the final report will contain. He then responded to various questions from Council regarding the Hope VI Program and the type of services he will provide for the $18,000.

Vice-Mayor Mumpower was concerned that the future is not clear regarding Hope VI funding and wondered if Asheville really has a realistic chance of taping into the limited pool of money. He felt it would be more appropriate for a focus group discussion with City staff and reserve the City's limited money for another time when funding is more clear.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CLOSED SESSION

At 7:24 p.m., Councilwoman Bellamy moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Morris Communications, Inc. d/b/a Fairway Outdoor Communications; Lamar OCI - South Corp.; and the City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:08 p.m., Vice-Mayor Mumpower moved go come out of closed session. This motion was made by Councilwoman Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:08 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 14, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Davis led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the invocation.

ADDITIONS TO THE AGENDA

Mayor Worley added the following three items to the Agenda: (1) Recognition of the delegation from San Cristobal, New Mexico; (2) Resolution authorizing the Mayor to execute a Municipal Agreement with the North Carolina Department of Transportation to provide local funding for noise wall enhancements for the I-40 widening project; and (3) Resolution authorizing execution of a joinder to deed of trust for redevelopment financing for part of Pack Place.

I. PROCLAMATIONS:

A. ASHEVILLE SISTER CITY

Mayor Worley recognized the delegation from Asheville's Sister City San Cristobal de las Casas, Mexico, who read a letter of appreciation from their Mayor to the City of Asheville.

B. RESOLUTION NO. 04-251 – RESOLUTION OF APPRECIATION TO RETIRING EMPLOYEE WILLIAM L. SCHAEFER JR.

Mayor Worley read the resolution of appreciation to retiring Finance Director William L. Schaefer Jr. On behalf of the City Council, Mayor Worley thanked Mr. Schaefer for his eleven years of service he has devoted to the citizens of Asheville.

Resolution No. 04-251 was adopted by acclamation.

RESOLUTION BOOK NO. 28 – PAGE 433

C. FOR OUR KIDS PROGRAM

Participants from the For Our Kids Program thanked Vice-Mayor Mumpower, Councilwoman Bellamy and the entire Council for their hospitality and support for their after school program and other sub-programs.

II. CONSENT AGENDA:

Vice-Mayor Mumpower asked that Consent Agenda Item "I" be removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 23, 2004, AND THE WORKSESSION HELD ON DECEMBER 7, 2004

B. RESOLUTION NO. 04-252 - RESOLUTION ADOPTING THE 2005 SCHEDULED CITY COUNCIL MEETINGS

RESOLUTION BOOK NO. 28 – PAGE 434

C. RESOLUTION NO. 04-253 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF EXCESS RIGHT-OF-WAY ON STRATFORD ROAD FOR A RIGHT-OF-WAY EASEMENT ON STRATFORD ROAD

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

The City and Verdi Group LLC (Verdi) have negotiated an exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

The excess right-of-way property is along the east side of Stratford Road comprising 0.008 ± acre generally across the road from and between its intersections with Parkside Avenue and Pinewood Avenue.

The property owned by Verdi (PIN 9730.12-96-3375) is a 0.969 acre parcel zoned RS-4 Residential Single-Family Medium Density District located on Stratford Road contiguous with the right-of-way. As it is the parcel will only support three (3) houses. With the additional land from the excess right-of-way, the Verdi property will support development of four (4) houses. The right-of-way easement to be exchanged for the excess right-of-way will cover 0.131 acre and will provide a logical and consistent right-of-way boundary along the east side of Stratford Road extending ten (10) feet into the Verdi property for the full length of the street frontage.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It will provide a more logical and consistent right-of-way boundary along Stratford Road.
- It will enable maximum infill development consistent with the Strategic Operating Plan.
- The 10-foot easement makes a future sidewalk more constructible.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff and the Traffic Engineer recommends adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

RESOLUTION BOOK NO. 28 – PAGE 435

D. RESOLUTION NO. 04-254 - RESOLUTION ACCEPTING THE NEW STREET NAME "JAN DRIVE

Summary: The consideration of a resolution accepting the new proposed street name "Jan Drive."

Southern Pride of WNC, owner of lots on Jan Drive off of Bellevue Road, has petitioned the City of Asheville to accept the street name " Jan Drive."
The new street will begin at Bellevue Road and end at the cul-de-sac on Jan Drive.

City staff recommends adoption of the resolution accepting the new proposed street name "Jan Drive."

RESOLUTION BOOK NO. 28 – PAGE 436

E. RESOLUTION NO. 04-255 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A BICYCLE PLANNING GRANT FROM THE N.C. DEPT. OF TRANSPORTATION

Summary: The consideration of a resolution authorizing the City Manager to submit a proposal requesting $24,000 in planning funds for the purpose of developing a $40,000 comprehensive bicycle plan and to commit local match for Fiscal Year 2006 as needed.

This project supports the Asheville 1998 Greenway Master Plan and 2003 Update, the 2025 City Development Plan, and the 2004 Transportation Demand Management Program Work Plan. It also implements several tasks in City Council's Strategic Operations Plan in the areas of:

- Planning, Goal #2, Obj. A, Tasks 1 and 2 – to incorporate multi-modal uses of transportation options and to leverage outside funding to achieve multiple transportation goals where possible.
- Planning, Goal #2, Obj B, Tasks 1 and 2 – to determine opportunities for managing traffic demand and to explore public-private partnerships with major employers and education providers to increase the effectiveness of the transportation system.
- Sense of Place, Heritage & Arts, Goal #3, Obj. B, Task #1 – to construct infrastructure including bicycle facilities to accommodate growth downtown.
- Natural and Built Environment, Goal # 2, Obj. A, Tasks 1-4 – to implement the Wilma Dykeman Riverway Plan and the Completion of several Greenways. (Note that the Reed Creek Greenway, the Hominy Creek Greenway, and the Azalea Park Connector Greenway are all funded through the NCDOT Bicycle Program and that their staff is encouraging a bicycle plan proposal from the City.)
- Natural and Built Environment, Goal #2, Obj. B, Task 1 – to work with the State to fund greenway projects via the Transportation Improvement Plan.

This proposal is supported by the Blue Ridge Bike Club and the Asheville Bicycle and Pedestrian Task Force, a volunteer group of citizens whose mission is "to educate the public about bicycle and pedestrian transportation, to advocate for the development and maintenance of safe, convenient and inter-connected facilities, and to promote the benefits of walking and bicycling for individual and community health." The Task Force has assisted in the development of the proposal and is committed to assisting in the planning process.

The positives of this project are that it will:

- Better position the City to continue to pursue funding from the NCDOT Division of Bicycle and Pedestrian Transportation and through the Transportation Improvement Plan and Long Range Transportation Plan processes;

- Provide $24,000 or sixty percent of the total cost toward a $40,000 planning process and enable the City to bring in a bicycle planning specialist;
- Provide a process and opportunity to directly involve the Council, public and interested stakeholders in the development of goals, objectives, and tasks related to improving bicycling in Asheville; and
- Collate, clarify and direct information regarding local bicycle issues and initiatives into one document and series of maps that support the 2025 Plan, Greenways Master Plan, and Strategic Operations Plan.

The negatives of this project are that it will:

- Require time from City staff to manage the contracting process and supervise the consultant; and
- Require a local match of $16,000 beginning July 1, 2005. The Blue Ridge Bike Club has pledged support of $1,000 toward this local match requirement, but the remaining $15,000 will need to be committed for Fiscal Year 2006.

Staff recommends that City Council adopt the resolution authorizing the submittal of a proposal and the commitment of matching funds in the next fiscal year.

RESOLUTION BOOK NO. 28 – PAGE 437

F. MOTION ADOPTING THE FISCAL YEAR 2005-06 BUDGET SCHEDULE

Summary: The consideration of a motion approving the Fiscal Year 2005/2006 budget schedule.

The proposed Fiscal Year 2005/2006 budget schedule identifies key dates for completion of all phases of the budget process leading to adoption. Several administrative steps in the budget process are already underway due to the need to get an early starting as a result of the pending retirement of the City Manager.

Key phases of the budget process, which involve City Council, include the City Council Annual Retreat, presentation of the proposed budget to City Council, a public hearing and formal adoption. This year's schedule includes five scheduled budget worksessions, allowing City Council sufficient time for effective budget deliberations. Adoption of the Fiscal Year 2005/2006 budget is scheduled for June 28, 2005.

City staff recommends City Council to adopt the Fiscal Year 2005/2006 budget schedule.

G. RESOLUTION NO. 04-256 - RESOLUTION AUTHORIZING THE SALE OF CITY-OWNED PROPERTY ON VIRGINIA AND BROTHERTON AVENUES TO NEIGHBORHOOD HOUSING SERVICES FOR A MIXED-INCOME HOUSING DEVELOPMENT

Summary: This is the consideration a resolution approving the sale of City-owned property on Virginia and Brotherton Avenues to Neighborhood Housing Services (NHS) for a mixed-income housing development.

The City purchased a 7-acre site at the corner of Virginia and Brotherton Avenues from the Housing Authority in 2000 and contracted with a private developer to develop 32 units of mixed income condominium-type housing on the site, using Community Development Block

Grant (CDBG) funds for the site improvements and private financing for the housing construction. The developer completed the site improvements but then withdrew in late 2003, having been unable to get construction financing for the housing development on terms he found acceptable.

In July 2004, staff issued a request for proposals for a new developer. Two responsive proposals were received and reviewed by a panel of outside experts and staff, appointed by the City Manager. This panel has recommended the proposal submitted by Neighborhood Housing Services of Asheville (NHS) in partnership with The Verdi Group. NHS proposes to purchase the improved site for $454,701 ($1,001 over appraised value) and construct 44 units of housing. The proposal combines the design and construction experience of the Verdi Group with NHS's experience in marketing to income-qualified buyers and its ability to obtain construction financing on favorable terms from its national affiliate: Neighborhood Housing Services of America.

The development is consistent with the City's Strategic Operating Plan (Housing Opportunities Goal #4) because it increases the supply of affordable housing through relatively dense infill on a vacant parcel and also provides mixed-income housing

The draft resolution authorizes the Mayor to enter into a contract for sale with NHS. NHS will then do its due diligence on the site and prepare construction plans. Council will have the opportunity of reviewing the plans in detail early next year, since NHS's proposal to increase the number of units requires modification of the Conditional Use Permit approved in 2003. The sale will not close until any required zoning process is completed.

The sale will be governed by the terms of N. C. Gen. Stat. 160A-279 (private sale of property to entities carrying out a public purpose). This does not require a public hearing or upset bid process.

Advantages:

- Authorizing the sale enables the development of the property to move forward.
- A strong partnership has been formed by NHS to acquire the necessary financing, and design, construct, and market mixed-income housing on the site.
- Council will have final approval of the project when design is complete and before the sale closes.
- The proposal offers 24 units of affordable housing and 20 units of market rate housing with the benefits of good design, energy efficiency, and preservation of open space on the site.

Disadvantage:

- The NHS/Verdi group's plan will require a modification of the Conditional Use Permit, and is therefore not ready to move into construction immediately

Staff recommends approval of the resolution authorizing the Mayor to enter into a contract for sale with NHS.

RESOLUTION BOOK NO. 28 – PAGE 438

H. RESOLUTION NO. 04-257 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 11, 2005, TO VACATE AND CLOSE THE ENTIRE DWELLING AT 1086 HENDERSONVILLE ROAD

Summary: The consideration of a resolution setting a public hearing on January 11, 2005, for the adoption of an ordinance to vacate and close the remaining dwelling units located in the dwelling at 1086 Hendersonville Road.

The dwelling at 1086 Hendersonville Road is a wooden structure containing nine separate dwelling units. After unsuccessfully attempting to work with the property owners to bring the dwelling into compliance with the Housing Code since December of 1998, City staff's efforts to bring about compliance intensified during the summer of 2004. In August of 2004, the property owners entered into a Memorandum of Understanding but failed to honor their commitment to bring the dwelling units into compliance with the Housing Code. As a final effort to obtain compliance, City staff asked City Council to adopt an ordinance ordering certain of the dwelling units to be vacated and closed, which Council adopted. Despite the ordinance directing the property owners to vacate and close certain of the dwelling units, the property owners continue to offer said dwelling units as well as the remaining dwelling units for rent.

A second hearing was held on October 15, 2004, whereby Elizabeth Tate, one of the property owners, made it clear that she had no intentions of voluntarily vacating and closing the dwelling. A Findings of Fact and Order was entered ordering the property owners to vacate and close the entire dwelling or otherwise bring the dwelling into compliance with the Housing Code by November 15, 2004. To date, the dwelling has not been brought into compliance with the Housing Code and neither has a housing certificate been issued.

After trying every possible approach to obtain the property owners' compliance with the Housing Code, such has failed. Meantime, the property owners continue to rent and receive rent for each of the unfit dwelling units, which is a violation of the City's Housing Code.

Staff recommends City Council adopt a resolution setting a public hearing on January 11, 2005, to consider an ordinance ordering the entire dwelling located at 1086 Hendersonville Road vacated and closed until brought into compliance with the City's Housing Code.

RESOLUTION BOOK NO. 28 – PAGE 439

I. RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT FOR THE REMOVAL OF CERTAIN SIGNS

This item was removed from the Consent Agenda for individual discussion.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Dunn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

RESOLUTION NO. 04-258 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT FOR THE REMOVAL OF CERTAIN SIGNS

City Attorney Oast said that this is the consideration of an agreement for the removal of billboards.

For the last several years, the City has been involved in disputes with some of the businesses that own and operate billboards within the City. The disputes have centered primarily on whether certain billboards comply with the City's 1990 Sign Ordinance. These disputes have included numerous enforcement proceedings before the Board of Adjustment and Superior Court, and at least two appeals to the North Carolina Court of Appeals. Some of these cases are still pending before the Board of Adjustment. These matters were in addition to other litigation over the 1997 Ordinance that went to the Supreme Court.

192

In connection with resolving these issues, we have been discussing with the sign companies the possibility of a "cap and replace" ordinance, that would essentially cap the total number of billboards in the City, but allow them to be relocated or replaced within certain zones, subject to certain limitations. While this has been done in other jurisdictions, the legal authority to enter into such agreements in North Carolina was unclear.

This past summer, the N. C. General Assembly adopted N.C.G.S. 160A-199, which essentially took away a city's ability to amortize billboards over time by requiring payment of the fair market value of any sign whose removal was required. Even this method can result in delayed removal because the sign can remain in place while value is determined, and until the value determined is paid, which can take up to three years. Included in this law, however, were provisions authorizing a city and a billboard company to enter into removal and relocation agreements – essentially "cap and replace" by agreement.

In September, the Council adopted an ordinance providing for such agreements pursuant to the new law. Against this legal and factual background, the first such agreement has been proposed in an effort to resolve some outstanding enforcement issues. The sign companies involved are Fairway and Lamar, which own and operate most of the billboards in town.

The essential features of the proposed agreement are that the billboard companies will immediately remove 10 billboards, some of them in prominent "gateway" locations, and some of them having multiple faces, at their expense. The locations of these billboards are as follows: (1) Charlotte Street south of College Street; (2) Biltmore and Hilliard; (3) McDowell Street northbound exiting tunnel; (4) Patton Avenue and Coxe on a building; (5) Haywood Road and State Street; (6) Haywood Road and Virginia Avenue; (7) Haywood Road and Michigan Avenue; (8) 339 Lyman Street; (9) Riverside Drive at Amboy Road; and (10) Biltmore Village (8 faces). In consideration for their removal of these signs, the City agrees that, if an ordinance requiring amortization of billboards is adopted within the 10 year term of the agreement, the City will pay for the removed signs on a straight-line depreciation basis. The value assigned to these signs for depreciation purposes is computed based on annual income for the sign, which is one of the methods specified by the new law for determining value.

In addition to the 10 signs listed above, which will not be replaced, the agreement provides for the immediate removal of the sign at the entrance to Haw Creek, but that sign can be replaced pursuant to the ordinance adopted in September.

Pursuant to the agreement, Fairway will convey to the City the property on which the South Charlotte Street billboard is located. Also, the billboard companies agree to remove signs within the Urban Riverfront Plan area properties within those areas are developed in accordance with the Plan.

Considerations:

- Cities' ability to require removal of billboards is now severely limited, and what ability they do have has financial consequences, and possibly significant time delays.
- This is an offer – essentially free – by the sign companies to do something that we may not be able to require them to do without significant cost and delay.
- This will terminate contentious and lengthy administrative and judicial proceedings, and should limit future actions.
- All other billboards are still subject to the registration requirements of the new ordinance.

- There will be a net decrease in the number of billboards in Asheville
- This sets a good precedent for future removals.

If Council approves of the agreement, adoption of a resolution authorizing the Mayor to enter into it on behalf of the City is recommended.

City Attorney Oast responded to various questions from Council regarding other outdoor advertising companies that are not part of this agreement and clarified the certain zones and certain limitations when/if the signs are replaced.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-258. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 441

III. PUBLIC HEARINGS:

A. PUBLIC HEARINGS TO CONSIDER THE ANNEXATION OF THE RIDGEFIELD BUSINESS PARK AREA, THE ASCOT POINT VILLAGE AREA, THE LONG SHOALS ROAD AREA AND THE AIRPORT ROAD AREA

Planning & Development Director Scott Shuford said that due to recent requests for voluntary annexation of two parcels and the possibility of adding additional properties to the annexation areas, staff recommends that Council cancel the scheduled public hearings and adopt the resolutions rescinding the original Resolutions of Intent to annex these four areas. Staff will re-initiate the process in the near future, enabling the effective date of annexation to remain the same as previously proposed for three of the four annexation areas.

Proposed effective date of annexations – June 30, 2005 (Ridgefield Business Park)
December 31, 2005 (Ascot Point Village, Long Shoals Road, Airport Road)

City staff recommends City Council cancel the scheduled public hearings and adopt the resolutions rescinding the original Resolutions of Intent to annex these four areas.

B. PUBLIC HEARING TO CONSIDER THE REZONING OF THREE LOTS LOCATED ON NEW LEICESTER HIGHWAY FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT (WITH A MANUFACTURED HOUSING OVERLAY AND A MANUFACTURED HOUSING COMMUNITY OVERLAY) AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 3188 - ORDINANCE REZONING THREE LOTS LOCATED ON NEW LEICESTER HIGHWAY FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT (WITH A MANUFACTURED HOUSING OVERLAY AND A MANUFACTURED HOUSING COMMUNITY OVERLAY) AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 5:30 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone three lots on New Leicester Highway from RM-8 Residential Multi-Family Low Density District

(with a Manufactured Housing Overlay and a Manufactured Housing Community Overlay) and RS-8 Residential Single-Family High Density District to Community Business II District. This public hearing was advertised on November 12 and 19, 2004.

The subject property is located within the City limits on New Leicester Highway, just south of its intersection with Eliada Home Road. Surrounding zoning is varied. Zoning on the west side of New Leicester Highway is CBII. The eastern side, where the subject property is located, is a mix of residential (RM-6 and RS-8) and commercial (HB) zoning. The Eliada Home property immediately to the west of the subject property is zoned Institutional.

Land uses in the area are likewise varied. Along New Leicester Highway the predominant land use in this area is commercial although there are single family homes located in the CBII District directly across New Leicester Highway from the subject property. Institutional uses (Eliada Home and Erwin Hills Baptist Church) lie to the south and east of the subject property. Recent developments in the area have predominately been of a commercial nature.

The subject property includes two vacant wooded parcels. The largest property contains a manufactured home community consisting of approximately 30 units.

The CBII District is designed to provide areas for medium to high density business and service uses serving multiple residential neighborhoods along minor and major thoroughfare streets. This district allows for residential uses, however, manufactured homes are not allowed.

Pros:

- CBII, while providing commercial opportunities, limits the size and impacts of such commercial development on the surrounding area.
- New Leicester Highway is a major thoroughfare more conducive to commercial or office development than residential development.
- Rezoning is in keeping with the character and recent developments in the area.

Cons:

- Loss of the manufactured housing overlay on the largest parcel in this rezoning with potential loss of the manufactured housing community (and affordable housing) that will become nonconforming. These losses are reduced by the impact the widening of New Leicester Highway has already had on this community.
- Allows for the potential continued commercial strip development of New Leicester Highway.

Staff recommended approval of the rezoning request to the Planning and Zoning Commission. The commission considered the matter at its meeting on November 3, 2004, and unanimously (5-0) recommended approval.

Mayor Worley closed the public hearing at 5:34 p.m.

Councilwoman Bellamy expressed concern that the mobile home park can't expand and that special care and ample time be given to the tenants if they need to find suitable housing.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3188. This motion was seconded by Councilman Davis and carried unanimously.

C. **PUBLIC HEARING TO CONSIDER REZONING THREE LOTS AT 2 GRANDVIEW PLACE FROM HIGHWAY BUSINESS DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT**

ORDINANCE NO. 3189 - ORDINANCE TO REZONE THREE LOTS AT 2 GRANDVIEW PLACE FROM HIGHWAY BUSINESS DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 5:36 p.m.

Urban Planner Shannon Tuch said that this is the consideration of an ordinance to rezone three lots at 2 Grandview Place from Highway Business District and RS-8 Residential Single-Family High Density District to Community Business I District. This public hearing was advertised on November 12 and 19, 2004.

The subject properties are located within the City limits in the Oteen area, covering both corners of the junction between Grandview Place and Tunnel Road. The three separate parcels currently include a split-zoned (RS-8 Residential Single-Family High Density District/Highway Business) lot located on the southwestern corner of the T-intersection while across Grandview Place, on the opposite corner, is the commercially zoned Highway Business (HB) lot fronting Tunnel Road with a RS-8 Residential Single-Family High Density District (RS-8) zoned parcel directly behind.

The applicant (Nicholas Papanastasiou) has requested a rezoning from Highway Business/RS-8 Residential Single-Family High Density District to Community Business I District to allow for (1) the redevelopment and/or expansion of an existing non-residential use for a community based business, and (2) to render a non-conforming ancillary parking area to be conforming.

- The Community Business-I zoning district is established to provide areas for medium density business and service uses which may serve as a workplace for residents and should be sensitive to a significant pedestrian population. These business areas should be located primarily on streets that serve multiple residential neighborhoods.

- The RS-8 zoning district is designed to establish and promote a suitable and high density single-family district where public infrastructure is sufficient to support such development.

- The Highway Business district is established to address the needs of commercial development along major thoroughfares where automobile use is prevalent and a wide range of commercial uses is permitted. Due to the dominance of the automobile, a primary objective within this district is to preserve the traffic capacity of the thoroughfare.

The subject properties total approximately .95 acres and currently support one restaurant and its ancillary parking area in addition to the old American Legion Hall building and the vacant single family home behind it. Rezoning the lots would allow for the redevelopment and/or expansion of community oriented commercial, office, or residential uses consistent with the CB-I development standards. A community oriented business in this location would primarily serve the Oteen neighborhood but could potentially extend to other neighborhoods such as, Parkway Forest, Beverly Hills, Haw Creek as well as any future development around the Veterans Administration Hospital.

196

Pros

- Corrects a non-conforming use.
- Allows for the expansion or redevelopment of a community-based business that is more pedestrian oriented.
- Removes the existing split-zoning.

Cons

- Access to the rear of the split-zoned lot would be off of a residential road (Grandview Place).
- Without a Conditional Use Permit (CUP) there is no way to ensure the preservation of the existing structure(s).

At their November 3, 2004, meeting, the Planning and Zoning Commission reviewed the rezoning proposal and made a positive recommendation that the project be forwarded to the Asheville City Council. City staff concurs with the Planning and Zoning Commission and recommends approval of the zoning change (3 lots) from RS-8 and HB to CB-I.

Mayor Worley closed the public hearing at 5:42 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3189. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 418

D. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED A 59 TAMPA AVENUE FOR A PROPOSED DUPLEX IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3190 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 59 TAMPA AVENUE FOR A PROPOSED DUPLEX IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:43 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of the issuance of a conditional use permit for property located 59 Tampa Avenue for a proposed duplex in an RS-8 Residential Single-Family High Density District.

The Asheville City Development Plan 2025 (ACDP 2025) discusses typical reasons why properties within the City limits remain vacant or underdeveloped. Of the problems listed, a very applicable challenge to this project is the high development costs involved for a relatively small return. The ACDP 2025 proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant property. One way to accomplish this goal is to apply existing zoning tools to encourage compatible, higher density residential infill development. Currently, the Unified Development Ordinance has several tools that can be exercised to allow duplexes in single family residential districts. The most appropriate tool in this case allows duplexes as "Conditional Uses" in the RS-8 zoning district and can be considered with respect to the conditions outlined in the Unified Development Ordinance and other conditions associated with the Conditional Use Permit. Staff's review of this project indicates that the proposed development does meet the technical standards described in Sec. 7-16-2(d)(5).

The applicant is requesting a Conditional Use Permit for a .54 acre lot to allow the new construction of a 2,480 s.f. duplex in a RS-8 (Residential Single Family, High Density) zoning district in the Lucerne Park neighborhood in west Asheville (Attachment to City Exhibit 3 – Location Map). The lot is an existing flag lot created in 2001 when subdivision standards allowed more than one flag lot to be created side by side off of an existing right-of-way. The duplex would occupy the last of the three lot subdivision where the other two lots are currently occupied by single family homes. The second lot, directly adjacent on the south side, is also included in this application because it was a more practical location for the required turn-a-round due to topography. Because of changes in the subdivision standards, the two subject lots are currently non-conforming by access. As a condition of final approval, the applicant would have to complete a lot recombination that would eliminate the flag lots and provide a right-of-way with a private drive to access the lots. All three structures would share the common driveway but provide parking separately.

The subject property is currently zoned RS-8 and is surrounded on all sides by other RS-8 zoned properties supporting single family and other non-residential uses including vacant properties, a church, recreation fields, and rail road right-of-way (Attachment to City Exhibit 3 – Aerial Map). The proposed structure will be oriented to capitalize on the open space view out towards existing ball fields and wooded area, with parking located to the rear of the units (Attachments to City Exhibit 3 – Revised Site Plan; Site Photos).

Currently, there are several tools for allowing duplexes in a single family zoning district. The particular circumstances of any proposal help determine the most appropriate tool to be applied. In respect to the unique conditions of this site, a Conditional Use Permit application was determined to be the most practical and flexible tool to be utilized. As part of the conditional use permit requirements, the project must meet several conditions for duplexes found in section 7-16-2(d)(5) of the Unified Development Ordinance:

b. Duplexes must be located a minimum of 300 feet from all other multifamily uses (excluding dwellings with accessory apartments) on the same street in the single family district.
The property is located over 300 feet from all other multifamily uses.

198

c. Minimum lot area shall be 125 percent of that required for a single family residential unit in the respective district
The existing lot is .54 acres, well above the minimum .14 acres required for a duplex in an RS-8 district.

d. Parking shall be located in the rear and screened with vegetation from adjacent single family uses.
Two 3-bedroom units will require a minimum of 4 parking spaces (maximum of 6) located in the rear where existing vegetation and topography will screen the parking from the properties fronting Ivanhoe Avenue, while additional vegetation will be planted to screen the proposed parking area from the newer adjacent single family home.

e. The structure shall have a single front entrance and other entrances as required (Attachment to City Exhibit 3 – Building Elevations).
The proposed duplex has a single front entrance with a secondary entrance at the rear.

f. Requirements of the N.C. State Building Code shall be met.
The proposed duplex will be new construction and will be built to meet building code requirements.

The Technical Review Committee (TRC) reviewed this project at their November 15, 2004, meeting where it was unanimously agreed that the project be forwarded to the City Council with a recommendation of approval with conditions. Many of the TRC conditions have been met in a revised site plan and, if approved, will have to be reviewed again for final approval. Review by the Planning and Zoning Commission is not required for this use.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   Site preparation for the earlier 3 lot subdivision created a clear, buildable terrace for the proposed duplex. The applicant is proposing to place the structure in a way to minimize any additional site disturbance and preserve the existing vegetation remaining on site.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The subject properties were created from a remnant parcel that is tucked back behind the older homes of the Lucerne Park neighborhood. All three lots are located down below the backs of the homes fronting Ivanhoe Avenue where only the first lot containing a single family home is visible from the dead-end of Tampa Avenue. The other two lots are separated from the rest of the neighborhood, not only by access but also by topography and existing vegetation, serving to buffer the proposed development from the older neighborhood. In addition, the proposed duplex will be in character with the new construction located on the adjacent lot and is not expected to negatively impact the property values of the adjacent single family home or the older homes in the neighborhood.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

As discussed in standard #3, the proposed duplex is separated somewhat from the majority of the Lucerne Park neighborhood. Nevertheless, the coverage of the 1240 square foot footprint is comparable to most homes in the neighborhood; while the two story bulk is in scale with many of the older homes in addition to the single family home directly adjacent to it. Density is also fairly typical of the larger neighborhood due to the size of the lot; and lastly, the character of the new construction will be in harmony with the character of the other two homes sharing the private drive.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The Asheville City Development Plan 2025 (ACDP 2025) discusses typical reasons why properties within the City limits remain vacant or underdeveloped. Of the problems listed, a very applicable challenge to this project is the high development costs involved for a relatively small return. The ACDP 2025 proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant property. One way to accomplish this goal is to apply existing zoning tools to encourage compatible, higher density residential infill development. Currently, the Unified Development Ordinance has several tools that can be exercised to allow duplexes in single family residential districts. The most appropriate tool in this case allows duplexes as "Conditional Uses" in the RS-8 zoning district and can be considered with respect to the conditions outlined in the Unified Development Ordinance and other conditions associated with the Conditional Use Permit. Staff's review of this project indicates that the proposed development does meet the technical standards described in Sec. 7-16-2(d)(5).

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed development is located near major thoroughfares and transportation facilities with the Route 1 bus line running down Patton Ave. and Haywood Rd. Preliminary review by utility providers has not revealed any problems with serving the development and, as a condition of approval, emergency access to the property will be improved.

200

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The amount of traffic generated by a duplex is nominally greater than that generated by a single family home. The proposed development will accommodate off-street parking and is not expected to cause undue traffic congestion or hazards.

Pros

- Promotes infill development
- Provides additional housing in an established residential neighborhood
- Corrects a non-conformity

Cons

- Strict architectural compatibility with older neighborhood is not required

Staff concurs with the Technical Review recommendation of approval with the conditions outlined in the TRC report.

After rebuttal, Mayor Worley closed the public hearing at 5:52 p.m.

In order for the duplex to build in as much as possible, Councilwoman Bellamy asked to add two conditions: (1) that a porch be constructed over the rear entrance to reflect the character of the adjacent single-family home; and (2) that the developer add shutters to the windows where practical.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3190, granting a conditional use permit for property located at 59 Tampa Avenue for a proposed duplex in an RS-8 Residential Single-Family High Density District, subject to (1) the conditions outlined by the Technical Review Committee; (2) that a porch be constructed over the rear entrance to reflect the character of the adjacent single-family home; and (3) that shutters be installed to the windows where appropriate. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 426

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ELIMINATE LEVEL III REVIEW OF INDUSTRIAL USES

ORDINANCE NO. 3191 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ELIMINATE LEVEL III REVIEW OF INDUSTRIAL USES

Mayor Worley opened the public hearing at 5:56 p.m.

Planning & Development Director Scott Shuford said that this is the consideration to amend the Unified Development Ordinance to eliminate Level III review of industrial uses. This public hearing was advertised on November 12 and 19, 2004.

This code amendment deletes the requirement for industrial developments to receive Level III review, thereby allowing them to be approved without public hearing by the Planning and Zoning Commission and City Council. The intent is to expedite the review and permitting of industrial developments consistent with Goal 2/Economic Development of the Strategic Operating

Plan which states: Reform the permitting process to make it more conducive to do business in Asheville.

Large projects would still be heard by the Technical Review Committee (TRC); all existing buffering, landscaping and other site design requirements would apply to the projects. In addition, the change would apply only to properties already zoned for industrial uses; any needed zoning changes (for example, a change from Highway Business to Industrial) would still require Planning and Zoning Commission and City Council consideration.

Pros:

- Provides a tool to make Asheville more competitive in economic development
- Streamlines the development review process consistent with general Council direction

Con:

- Removes opportunities for the public to be heard on site design issues (although these projects will still receive TRC review)

On November 3, 2004, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Using a map, Mr. Shuford showed the amount of residential areas around industrial properties.

Mayor Worley closed the public hearing at 5:59 p.m.

Mr. Shuford responded to Councilwoman Jones about how the City finds out about various violations and what steps are taken to correct the violations.

Councilman Newman questioned what would happen if the proposed development triggered a lot of traffic. Mr. Shuford said that the standards do not change. If a Traffic Impact Analysis (TIA) is required, the developer will have to perform that TIA, turn it in and it will be subject to review by City staff. He noted that City staff cannot require more than what our codes require, however, regarding a TIA, if there are alternative ways of accomplishing the traffic mitigation that is required under the TIA, City staff does have the ability to select those alternatives. If the development did not meet City standards, City staff would be forced to deny the project. However, there is an appeal mechanism to the Planning & Zoning Commission and then ultimately to City Council. In addition, if the project is a desirable prospect and they can't meet the standards from an infrastructure standpoint, there would be the potential for an economic development incentive package and that would go through City Council for consideration.

Upon inquiry of Councilwoman Jones, Mr. Shuford said that there are avenues for individuals to give input/concerns to City staff. For example, a neighbor might call and state that after looking at the site plan a dumpster will be too close to their home. City staff can then bring that concern to the attention of the developer and suggest they look for an alternate location for that dumpster.

Upon inquiry of Councilman Davis, Mr. Shuford said that he was only aware of only one Level III review of this type in the past couple of years. Chances are City Council will be aware of any development of this type from an economic development incentive package.

Plan which states: Reform the permitting process to make it more conducive to do business in Asheville.

Large projects would still be heard by the Technical Review Committee (TRC); all existing buffering, landscaping and other site design requirements would apply to the projects. In addition, the change would apply only to properties already zoned for industrial uses; any needed zoning changes (for example, a change from Highway Business to Industrial) would still require Planning and Zoning Commission and City Council consideration.

For example, a neighbor might call and state that after looking at the site plan a dumpster will be too close to their home. City staff can then bring that concern to the attention of the developer and suggest they look for an alternate location for that dumpster.

Upon inquiry of Councilman Davis, Mr. Shuford said that he was only aware of only one Level III review of this type in the past couple of years. Chances are City Council will be aware of any development of this type from an economic development incentive package.

In response to Vice-Mayor Mumpower, Mr. Shuford said that roughly two months is saved by eliminating the Planning & Zoning Commission and City Council review of these types of projects.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3191. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 426

F. PUBLIC HEARING TO CONSIDER AN ORDINANCE ESTABLISHING A STORMWATER SERVICES ENTERPRISE FUND AS A MECHANISM FOR FUNDING A COMPREHENSIVE STORMWATER PROGRAM

ORDINANCE NO. 3192 - ORDINANCE ESTABLISHING A STORMWATER SERVICES ENTERPRISE FUND AS A MECHANISM FOR FUNDING A COMPREHENSIVE STORMWATER PROGRAM

Mayor Worley opened the public hearing at 6:20 p.m.

City Engineer Cathy Ball said that this is the consideration of an ordinance to establish a Stormwater Services Utility and Enterprise Fund as a mechanism for funding a comprehensive stormwater program for the City of Asheville. The public hearing was advertised on December 3 and 10, 2004.

Ms. Ball said that the methodology of the enterprise fund would be based on the amount of impervious surface that a parcel has. Staff is not asking that City Council adopt a budget at this time or a fee structure in association with this program. That will be done as part of the Fiscal Year 2006 budget process. She also pointed out that of the six communities in North Carolina that were a part of the EPA Phase I Program, all six of these communities have established an enterprise fund as a mechanism for obtaining revenue to pay for the program, in addition to three major cities in North Carolina that were part of the Phase II regulations. In the event that the enterprise fund is not approved, City staff will need to come back to City Council as part of the budget process with approximately $1.3-1.5 Million request to pay for an unfunded mandate from the Environmental Protection Agency.

In November 2003 City Council authorized City staff to complete a study, to include establishment of a stakeholders group, to determine if a Stormwater Enterprise Fund is a feasible method for funding stormwater quantity and quality needs of the City.

The City must comply with Phase II of the Federal Clean Water Act, known as the Environmental Protection Agency's National Pollution Discharge Elimination System (NPDES) Permitting and Stormwater. In March 2003, City Council approved a plan to comply with the "Six Minimum Measures" of the regulations which are: (1) Public Education and Outreach; (2) Public Participation and Involvement in Implementing the Plan; (3) Detection and Elimination of Illicit Discharges; (4) Construction site Run-off Control; (5) Post-Construction Run-off Control, and (6) Pollution Prevention and Good Housekeeping by the Municipality.

The stakeholders group known as the Stormwater Advisory Committee (SAC) has served as an advisor to the City Manager since June 2004. McGill Associates has provided engineering expertise and served as a facilitator to the SAC.

Pros:
- A dedicated funding source to address stormwater needs.
- Equitable fees based upon impervious service.
- Bigger users to pay the majority of the cost of the program.

Cons:
- A new fee to the community.
- Staff time to educate the public.

This recommendation meets the City's Strategic Goal in the focus area of Natural and Built Environment, Goal #1 - A high quality of air and water – Enhance and preserve air and water quality through comprehensive efforts. Objective D - Improve water quality by complying with EPQA Federal NPDES – Phase II Stormwater Rules. Task #2 - Adopt and implement a stormwater fee.

Again, the fees and expenditures for the program will be established during the budget process. A public meeting will be held as part of the budget process to obtain input at that time.

City staff recommends City Council adopt an ordinance establishing a Stormwater Services Utility Enterprise Fund as a mechanism for funding a comprehensive stormwater program for the City of Asheville.

Mr. Joel Storrow, McGill Associates President, explained the federal and state mandate: (1) under EPA's Phase II Rules, Asheville must develop, implement and enforce a stormwater management program; (2) the program must reduce the discharge of pollutants to the "maximum extent practicable" to protect water quality; (3) the program must address 6 minimum control measures: (a) public education and outreach; (b) public participation/involvement; (c) illicit discharge detection and elimination; (d) construction site runoff control; (e) post-construction runoff control; and (f) pollution prevention/good housekeeping; (4) Asheville must select "Best Management Practices" (BMP) and measurable goals for each minimum measure; and (5) This program must be approved by the State.

He explained that the Stormwater Advisory Committee (SAC) was established to advise the City Manager on matters related to the Phase II stormwater requirements. The SAC comprised of 19 local citizens serving as a broad cross section of stakeholders. The established objective of the SAC is to: "Assist the City in implementation of a compliant stormwater program that serves the best interests of the community."

He said that key elements of the proposed stormwater program consist of the Engineering Department being responsible for (1) public education about stormwater; (2) program administration and planning; and (3) regulation of stormwater releases. The Public Works Department would be responsible for (1) system operation and maintenance; and (2) rehabilitation of infrastructure.

Regarding allocation of future program costs, (1) the annual stormwater program costs would increase to $2.5 Million from the current $800,000 budget; ((2) the projected costs are considered minimum for (1) compliance with the federal and state mandate; (2) public education; (3) capital planning; (4) maintenance of the current system; and (5) development of new infrastructure and major repairs to existing facilities. The SAC recommends establishing an Enterprise Fund to pay for the Stormwater Program.

Their decision is not whether there will be a stormwater program, but what will the scope of the program be and how to pay for it. There are two options for funding the program: The General Fund and an Enterprise Fund.

Regarding the Enterprise Fund, the fundamental concept is that the properties that contribute pay in proportion to their contribution. This is accomplished by calculating the magnitude of impervious surface for each contributor. This system recognizes the contribution of contributors such as UNC-Asheville, hospitals, state government, federal institutions and others that pay no property taxes. This eases the burden on residences and businesses. There is a direct relationship between stormwater contributions and payments.

Mr. Storrow reviewed with Council the SAC's recommendations: (1) They recommend that the existing stormwater program be expanded to meet the regulatory mandate to protect and preserve water quality and educate the public; (2) They recommend that the stormwater program be expanded to provide capital necessary to operate and maintain the system and provide for future needs; (3) They recommend funding the stormwater program with a newly created self-sustaining Enterprise Fund; (4) They suggest tiering residential billing categories to promote affordability; and (5) They recommend developing a credited system that encourages users to improve water quality.

Ms. Ball explained the difference between SAC's recommended $2.5 Million budget to staff's $1.3 Million budget. She explained that staff developed a chart for a five-year program of the costs to implement the Phase II regulations, resulting in the $1.3 Million budget. She said the City must address the six minimum measures (a) public education and outreach; (b) public participation/involvement; (c) illicit discharge detection and elimination; (d) construction site runoff control; (e) post-construction runoff control; and (f) pollution prevention/good housekeeping. One of the most expensive measures is the illicit discharge detection and elimination. We must have a system set up to find any illegal connections to the storm drain system. We have to have a mapping system set up that will enable us to find out if we have an illegal connection and who is contributing that illegal discharge. We have to have a system set up with ordinances and fines to get people to alter their systems and their plumbing so that they go into the correct places. That requires staff, maintaining a mapping system, and having an ordinance in place fining people who do not comply. The proposed ordinance that we have in place meets all the requirements of Phase II. The post-construction runoff control, which is probably the heaviest on development, but it requires a whole new development review on our part. All development that disturbs any land size of an acre or greater has to put in measures that reduce water quality damages into the streams or off of their property. She showed a 5-year chart showing that the majority of funding comes in the third measure of illicit discharge detection and elimination. What staff had hoped to do was to be able to bring forth a fee during the review that wouldn't have to be changed every year. This is a bare minimum program that in the fifth year is about $1.3 Million. The $1.3 Million is what we have to do to comply with this mandate.

When staff presented the $1.3 Million budget to the SAC, there were members who felt strongly that the City needed to have a stronger program, to address the needs that the City has, than just the minimum amount of the $1.3 Million. At the last SAC meeting, there was a unanimous decision by the SAC, to recommend putting in an addition $300,000 into the educational component of this Program.

Again, staff is asking for Council to approve an ordinance that would allow for an enterprise fund to be established, fees to be charged based on the amount of impervious surface of a piece of property; and to also allow for a crediting mechanism, a tiering program for single-family residential units, and an appeal process.

Mr. Fred English was concerned that City Council is allowing large developments and the City taxpayers will have to pay for their stormwater runoff. Councilman Newman explained that everyone will pay based on the amount of impervious surface that a parcel has, including non-profits that don't pay any property taxes.

Mr. Bill Fishburne felt that if we put this user fee on non-profits and churches, the City may be forcing small churches out of business.

Mayor Worley closed the public hearing at 6:35 p.m.

Upon inquiry of Councilman Dunn, Ms. Ball said that the majority of sidewalks are located within the City's right-of-way and the property owners will not be responsible for paying for the sidewalks impervious surface.

Even though at this stage Council is not discussing a fee structure, Vice-Mayor Mumpower asked what the guesstimate would be for an average residence in Asheville. Ms. Ball said that with a $2.5 Million annual budget, a residential fee is approximated to be $2.50 per month. She noted that if Council wishes to a lesser annual budget, then staff is willing to move forward to prepare a budget that reflects what Council wants.

Vice-Mayor Mumpower said that a personal concern is that we should step in unchartered waters slowly and accelerate as we get a sense of the depth of what we are getting into. Everyone will have to step up to the plate because the federal government said we must do this. We will be adding another fee to people who have a lot of other bills to contend with. He felt it makes more sense to go slowly and then after people have had a chance to get a sense of what this is all about and the impact on their lives and their budgets, then to increase a bit if the community will is there and it's the appropriate thing to do He hoped that staff starts at the minimum and then possibly we can work our way up as the community sees best.

Throughout the discussion, Ms. Ball responded to various questions and comments from Council, some being, but are not limited to: is it anticipated that the regulations will become stricter after the 5-year permit expires; what does the SAC want to educate the public about and how; how do the current stormwater problems impact the street network structure; and what kind of charges will the developer incur to renew their credit applications.

Councilman Newman was looking forward to being presented with different options and what we will get at different levels for different amounts. He was also interested in learning more about the ideas envisioned by SAC of the educational component. He noted that if the development community is the key group we are trying to reach, then perhaps we can do a more targeted education program designed to just reach that group.

Upon inquiry of Councilman Newman, Ms. Ball said that regarding the educational component, we are working with the Land-of-Sky Regional Council, as well as NC State Extension Agency, to try to develop a regional program that just doesn't reach Asheville, but reaches the region as a whole.

In response to Councilman Davis about the credit component, Ms. Ball said that companies/properties can apply for a stormwater utility fee credit for actions that go above and beyond the minimum requirements. The credit must be renewed every year to make sure their system is being maintained. Mayor Worley suggested a sentence in the "credit" section in the ordinance be amended to read "Credits expire at the end of one year from the date of award and may be renewed by the submittal of a renewal application."

Vice-Mayor Mumpower asked if there are any other incentives for the properties to either comply or go beyond the minimum requirements. Using a chart, Ms. Ball responded that some cities have elected to go higher than the 50% credit of the stormwater utility fee, however, she felt that to go any higher would put the burden of paying the fee back on the residential customers. She explained how she felt that 50% is reasonable and attainable. After a brief discussion, Ms.

206

Ball was not opposed to Council raising the credit to 60% for those properties who go beyond the minimum requirements.

Mayor Worley felt that this utility will allow us to collect a fee from anyone who generates stormwater runoff and lessens the impact on our property taxpayers. In terms of what kind of a fee we ultimately come up with, he would support the minimum fee as we work our way into this program.

Councilman Newman felt it was fair for everyone who creates impervious surfaces to contribute to the solution for cleaning up our water. He felt that SAC's recommendations will make a positive influence on water quality in Asheville.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3192, with the following sentence amendments to Section (e) (2): "Credits expire at the end of one year from the date of award and may be renewed by the submittal of a renewal application. In no case shall credits exceed sixty percent (60%) of the stormwater utility fee." This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 427

At 7:22 p.m., Mayor Worley announced a short break.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ANNEXATIONS:

RESOLUTION NO. 04-259 - RESOLUTION RESCINDING THE RESOLUTION OF INTENT TO ANNEX THE RIDGEFIELD BUSINESS PARK AREA, AND CANCELING THE ANNEXATION PUBLIC HEARING FOR SAID AREA

RESOLUTION NO. 04-260 - RESOLUTION RESCINDING THE RESOLUTION OF INTENT TO ANNEX THE ASCOT POINT VILLAGE AREA, AND CANCELING THE ANNEXATION PUBLIC HEARING FOR SAID AREA

RESOLUTION NO. 04-261 - RESOLUTION RESCINDING THE RESOLUTION OF INTENT TO ANNEX THE LONG SHOALS ROAD AREA, AND CANCELING THE ANNEXATION PUBLIC HEARING FOR SAID AREA

RESOLUTION NO. 04-262 - RESOLUTION RESCINDING THE RESOLUTION OF INTENT TO ANNEX THE AIRPORT ROAD AREA, AND CANCELING THE ANNEXATION PUBLIC HEARING FOR SAID AREA

Planning & Development Director Scott Shuford said that due to recent requests for voluntary annexation of two parcels and the possibility of adding additional properties to the annexation areas, staff recommends that Council cancel the scheduled public hearings and adopt the resolutions rescinding the original Resolutions of Intent to annex these four areas. Staff will re-initiate the process in the near future, enabling the effective date of annexation to remain the same as previously proposed for three of the four annexation areas.

Proposed effective date of annexations – June 30, 2005 (Ridgefield Business Park)
December 31, 2005 (Ascot Point Village, Long Shoals Road, Airport Road)

City staff recommends City Council cancel the scheduled public hearings and adopt the resolutions rescinding the original Resolutions of Intent to annex these four areas.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-259. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 443

Councilwoman Bellamy moved for the adoption of Resolution No. 04-260. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 444

Councilwoman Jones moved for the adoption of Resolution No. 04-261. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 445

Councilwoman Bellamy moved for the adoption of Resolution No. 04-262. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 446

B. HAYWOOD STREET PARKING GARAGE IN THE BATTERY PARK AREA

RESOLUTION NO. 04-263 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE CONTRACT WITH CARL WALKER FOR DESIGN OF THE HAYWOOD STREET PARKING GARAGE IN THE BATTERY PARK AREA

RESOLUTION NO. 04-264 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HANSCOMB, FAITHFUL AND GOULD FOR PROJECT MANAGEMENT SERVICES FOR THE HAYWOOD STREET PARKING GARAGE IN THE BATTERY PARK AREA

ORDINANCE NO. 3193 - BUDGET AMENDMENT FOR THE HAYWOOD STREET PARKING GARAGE IN THE BATTERY PARK AREA

City Engineer Cathy Ball said that this is the consideration of (1) a resolution authorizing the City Manager to amend the contract with Carl Walker, Inc., to include an additional $187,000 for the revisions to the design/development drawings and the construction documents for the Haywood Street Parking Garage; (2) a resolution authorizing the City Manager to sign a contract with Hanscomb, Faithful and Gould, in the amount not to exceed $300,000, for project management services for the Haywood Street Parking Garage; and (3) a budget amendment in the amount of $9,000,000 (from $11.9 Million to $20.8 Million) for the Haywood Street Parking Garage.

Contract Amendment for Design and Development Plans:

In 2000, the City of Asheville went through a formal process to select Carl Walker, Inc. to design the Haywood Street Parking Garage in the Battery Park area. The original contract was for a parking structure on the existing surface lot of the BellSouth lot. The original cost of the project was $510,000. Since that time several changes have been make in the scope of the work. These changes include:

- The location of the site has moved, causing the design cost of the project to increase because of the geometry of the site; and,
- The Engineering fees of the Consultant have gone up annually since 2000;
- The Consultant was requested to complete design/development drawings for the private development component of the project.

All of the additional costs for the contract amendment will be recovered with bond proceeds. This amendment brings the total cost of the project to $901,113.00. This change was approved by Council in February 2003.

The increase in costs associated with this amendment includes the following:

- Eliminating the lowest level of the parking garage and designing an additional level of parking to increase the height of the deck in order to retain approximately the same number of parking spaces in the deck. This change will reduce the cost of the construction of the parking garage significantly. (Approximately $1.5 Million)
- Redesign the roundabout on Haywood Street to reduce the need for BellSouth to relocate their service lines. This change will result in a cost reduction of $500,000 due to the elimination of the need to relocate BellSouth Utilities in this location.

This request would bring the total contract cost for the design of the project to $1,088,113, which is approximately 9% of the total construction costs. Typical design costs for a project of this nature is 6 to 10% of the total construction costs.

Money for this increase is in the requested budget amendment included as an item on this agenda.

Considerations:

- The design costs would increase by $187,000.
- The overall construction cost would decrease by $1,700,000.
- The number of parking spaces would remain at approximately 650.

Contract for Project Management:

In 2003, staff requested proposals from qualified firms to perform project management services for the development of construction documents, costs estimates and construction oversite for the Haywood Street Parking Garage in the Battery Park area. Staff reviewed the proposals and determined that Hanscomb, Faithful and Gould was the most qualified firm.

The role for project management as an independent service is a key element to reducing overall cost while receiving a good quality structure. Hanscomb, Faithful and Gould would work directly for the City of Asheville and represent the best interest of the City. We currently have them on retainer on an hourly basis. They have already played a crucial role in reducing the costs of the project.

All of the additional costs for the contract amendment will be recovered with bond proceeds. Money for this increase is in the requested budget amendment included as an item on this agenda.

Considerations:

a. The project costs would increase by $300,000.
b. This cost could be offset by the savings recommend but the project manager because of their expertise.

Budget Amendment:

In the Capital Improvement Budget for Fiscal Year 1999-2000 $11.9 Million was appropriated for the construction of a parking garage in the Battery Park area. Since that time there have been several changes in the scope of work of the project. During the course of this project, staff has met with Council Members several times to inform them of some of the significant changes in the project. These changes are outlined below:

#	Description	Increase	Decrease	Total (M)
1.	Location of parking garage changed from Bell-South Lot to behind the Battery Park Apartments -- This increase was in construction costs due to the change in shape of the structure (rectangle to L-Shape) (2000)	$500,000		$12.3
2.	Number of parking spaces increased from 400 spaces to 650 spaces. The Citizen-Times originally agreed to participate in the garage. This increase is offset somewhat by the private-development component of the project. (2002)	$3,000,000		$15.3
3.	Building the site below ground due to height restrictions imposed by Battery Park Apartments. (See Item 6) (2003)	$1,500,000		$16.8
4.	Increase in Bell-South Utility costs to relocate major trunk lines. (See Item 6) (2003)	$500,000		$17.3
5.	Increase in design costs to include private development component of the project. (2003)	$391,113		$17.7
6.	Increase in design costs to reduce the cost of constructing the parking garage underground and revising the roundabout. (Decrease in construction costs.) (2004)	$187,000	$2,000,000	$15.9
7.	Contract with Project Manager (2004)	$350,000		$16.3
8.	Increase in construction costs since 1999	$2,600,000		$18.9
9.	Huge increase in the cost of steel. (2004)	$1,800,000		$20.8

Some of this cost can be offset by the development of the private development component of the project. This money cannot be specified until the City enters into an agreement for the private development component of the project. Therefore, the City must pay these costs upfront.

Staff recommends that the number of parking spaces remain at 650 to allow for some growth in monthly parking spaces, an increase in hourly parking spaces and the opportunity to provide parking for the private development adjacent to the parking garage.

Considerations:

- The project costs would increase by $9,000,000 some of which can be offset by the development of the private development component of the project.
- Eliminating parking spaces from the garage will not proportionally reduce the cost of the garage.

These actions will meet City Council's Strategic Plan in the focus area of "Sense of Place, Heritage and Arts. Goal #3: Downtown Development with improved gateways/corridors - Support and advocate for initiatives to encourage new downtown development including gateway/corridor improvements. Objective 2. Enhance and encourage new downtown development by establishing funding strategies to partner with or make downtown more attractive to private developers. Task: (1) Construct infrastructure including parking, shuttle/trolley service, sidewalks, streetscapes, and bicycle facilities to accommodate growth downtown.

City staff requests that City Council authorize the City Manager to amend the contract with Carl Walker, Inc. to include an additional $187,000 for the design of the Haywood Street Parking Garage in the Battery Park area; and, to sign a contract with Hanscomb, Faithful and Gould, in the amount not to exceed $300,000, for project management services for the Haywood Street Parking Garage. City staff also requests City Council approve a budget amendment in the amount of $9,000,000 for the Haywood Street Parking Garage.

Using a spreadsheet, Finance Director Bill Schaefer reviewed with Council the funding strategy on how the new parking deck would be funded. He assumed the amount to be financed will be $16.3 Million ($20 Million project total less $3.7 Million already paid for). He also assumed that half the amount will be tax exempt (at 5% for 20 years) and the other half taxable (at 8% for 20 years). He included projected revenues from the new deck beginning in the second year at $250,000 (slightly more than only half what the Civic Center deck produces today) and has increased the revenue in years three and beyond to $350,000 per year. In summary, there will be a deficit of $79,500 in the first year; a surplus of $170,500 in the second year (after revenues from the deck kick in) that will be needed to reduce the deficit in the third year; and a surplus of $360,093 beginning in year four and continuing annually through year 20. An additional source of revenue for Council's consideration in making up the slight deficits in years one and three would be an increase of $10.00 per month for all three existing decks. That would bring in an additional $78,000 per year, which would almost exactly match the anticipated deficits.

Vice-Mayor Mumpower noted that the spreadsheet used by Mr. Schaefer showed a total project budget of $20 Million, not $20.8 Million (resulting in the interest on the $800,000 being roughly $52,000 a year). Mr. Schaefer apologized for the error and still felt that the $800,000 would not be a problem at all because it would be made up over 20 years. He also explained a different formula to where the $800,000 would not be a problem.

Upon inquiry of Councilman Newman, Mr. Schaefer explained that the parking enterprise fund generates about $920,000 a year profit (from on-street parking, citations, fines, decks and surface lots), after all personnel costs, maintenance costs, debt service, depreciation, etc., is taken out. As soon as the other decks get paid off, in year four and beyond, that money becomes available for debt service or whatever Council chooses to us it for. Looking at operations similar to what we have today, the system will generate more than it needs to sustain its operations, and still be good stewards of the properties we are responsible for.

All of the additional costs for the contract amendment will be recovered with bond proceeds. Money for this increase is in the requested budget amendment included as an item on this agenda.

Considerations:

a. The project costs would increase by $300,000.
b. This cost could be offset by the savings recommend but the project manager because of their expertise.

Budget Amendment:

In the Capital Improvement Budget for Fiscal Year 1999-2000 $11.9 Million was appropriated for the construction of a parking garage in the Battery Park area. Since that time there have been several changes in the scope of work of the project. During the course of this project, staff has met with Council Members several times to inform them of some of the significant changes in the project. These changes are outlined below:

#	Description	Increase	Decrease	Total (M)
1.	Location of parking garage changed from Bell-South Lot to behind the Battery Park Apartments – This increase was in construction costs due to the change in shape of the structure (rectangle to L-Shape) (2000)	$500,000		$12.3
2.	Number of parking spaces increased from 400 spaces to 650 spaces. The Citizen-Times originally agreed to participate in the garage. This increase is offset somewhat by the private-development component of the project. (2002)	$3,000,000		$15.3
3.	Building the site below ground due to height restrictions imposed by Battery Park Apartments. (See Item 6) (2003)	$1,500,000		$16.8
4.	Increase in Bell-South Utility costs to relocate major trunk lines. (See Item 6) (2003)	$500,000		$17.3
5.	Increase in design costs to include private development component of the project. (2003)	$391,113		$17.7
6.	Increase in design costs to reduce the cost of constructing the parking garage underground and revising the roundabout. (Decrease in construction costs.) (2004)	$187,000	$2,000,000	$15.9
7.	Contract with Project Manager (2004)	$350,000		$16.3
8.	Increase in construction costs since 1999	$2,600,000		$18.9
9.	Huge increase in the cost of steel. (2004)	$1,800,000		**$20.8**

Some of this cost can be offset by the development of the private development component of the project. This money cannot be specified until the City enters into an agreement for the private development component of the project. Therefore, the City must pay these costs upfront.

Staff recommends that the number of parking spaces remain at 650 to allow for some growth in monthly parking spaces, an increase in hourly parking spaces and the opportunity to provide parking for the private development adjacent to the parking garage.

Considerations:

- The project costs would increase by $9,000,000 some of which can be offset by the development of the private development component of the project.
- Eliminating parking spaces from the garage will not proportionally reduce the cost of the garage.

These actions will meet City Council's Strategic Plan in the focus area of "Sense of Place, Heritage and Arts. Goal #3: Downtown Development with improved gateways/corridors - Support and advocate for initiatives to encourage new downtown development including gateway/corridor improvements. Objective 2. Enhance and encourage new downtown development by establishing funding strategies to partner with or make downtown more attractive to private developers. Task: (1) Construct infrastructure including parking, shuttle/trolley service, sidewalks, streetscapes, and bicycle facilities to accommodate growth downtown.

City staff requests that City Council authorize the City Manager to amend the contract with Carl Walker, Inc. to include an additional $187,000 for the design of the Haywood Street Parking Garage in the Battery Park area; and, to sign a contract with Hanscomb, Faithful and Gould, in the amount not to exceed $300,000, for project management services for the Haywood Street Parking Garage. City staff also requests City Council approve a budget amendment in the amount of $9,000,000 for the Haywood Street Parking Garage.

Using a spreadsheet, Finance Director Bill Schaefer reviewed with Council the funding strategy on how the new parking deck would be funded. He assumed the amount to be financed will be $16.3 Million ($20 Million project total less $3.7 Million already paid for). He also assumed that half the amount will be tax exempt (at 5% for 20 years) and the other half taxable (at 8% for 20 years). He included projected revenues from the new deck beginning in the second year at $250,000 (slightly more than only half what the Civic Center deck produces today) and has increased the revenue in years three and beyond to $350,000 per year. In summary, there will be a deficit of $79,500 in the first year; a surplus of $170,500 in the second year (after revenues from the deck kick in) that will be needed to reduce the deficit in the third year; and a surplus of $360,093 beginning in year four and continuing annually through year 20. An additional source of revenue for Council's consideration in making up the slight deficits in years one and three would be an increase of $10.00 per month for all three existing decks. That would bring in an additional $78,000 per year, which would almost exactly match the anticipated deficits.

Vice-Mayor Mumpower noted that the spreadsheet used by Mr. Schaefer showed a total project budget of $20 Million, not $20.8 Million (resulting in the interest on the $800,000 being roughly $52,000 a year). Mr. Schaefer apologized for the error and still felt that the $800,000 would not be a problem at all because it would be made up over 20 years. He also explained a different formula to where the $800,000 would not be a problem.

Upon inquiry of Councilman Newman, Mr. Schaefer explained that the parking enterprise fund generates about $920,000 a year profit (from on-street parking, citations, fines, decks and surface lots), after all personnel costs, maintenance costs, debt service, depreciation, etc., is taken out. As soon as the other decks get paid off, in year four and beyond, that money becomes available for debt service or whatever Council chooses to us it for. Looking at operations similar to what we have today, the system will generate more than it needs to sustain its operations, and still be good stewards of the properties we are responsible for.

Councilman Newman understands that the existing policy of the City of Asheville is to put all of the money from street parking and parking tickets into construction of additional parking garages. However, he questioned the wisdom of continuing that policy indefinitely into the future. He felt that Council should revisit the policy for the parking enterprise fund and use some percentage of the excess revenue (which would require a General Fund subsidy until year four), for other purposes, e.g., streets, sidewalks, greenways, additional police officers or community transit.

Vice-Mayor felt that the figures Mr. Schaefer presented puts the burden of paying for the parking garage on the customers and businesses downtown, unlike in the past where the average taxpayer had to subsidize the parking garages.

Mr. Schaefer noted that he didn't even include in his spreadsheet figures the sale of the outparcels, which may be as much as $4-5 Million.

Upon inquiry of Councilwoman Jones, Ms. Ball said that out of the already expended $3.7 Million, approximately $2.5 Million was for land. The rest was for design costs, real estate fees, miscellaneous fees, etc.

The following individuals spoke in support of the construction of the Haywood Street Parking Deck for various reasons, some being, but are not limited to: parking is crucial to the Grove Arcade merchants and all the merchants in that area; there is no more monthly parking available in the existing three parking decks and there is a 300+ waiting list; an agreement that the Grove Arcade entered into with the City in 1997 says that if the parking study recommends that construction of a deck in this area is needed that the City will agree to undertake the construction of this facility; financially the City will be able to construct the deck; any area in the City has redevelopment costs and that should be remembered when talking about the cost per parking space; the inflation factor will help pay for the parking deck; Asheville has a good bond rating; need to act now and not let interest rates continue to rise; merchants in the Grove Arcade are counting on the additional traffic resulting from the parking garage; Grove Arcade merchants employ 150-200 employees which need parking; survey of Grove Arcade merchants shows that their need is 351 parking spaces, however, they encourage the garage contain 650 parking spaces for the future growth; special events at the Civic Center will require additional parking; one reason why Progress Energy invested in the Grove Arcade in 1999 was based on the City's commitment to build a parking deck; building the 650 parking space garage will let downtown Asheville grow; need to educate local people that there is parking available; tourists do not want to have to park at metered spaces because they constantly worry about getting a parking ticket and therefore do not browse downtown Asheville and spend dollars; location of deck is good because it is right off of I-240; additional signage is necessary for existing parking garages; in addition to parking deck there is a need for alternative means of transportation – loop bus system around the City, especially where the clubs are located; significant events will be happening in Asheville that will support the additional parking garage, one being the new Chamber of Commerce Building; this land resource needs to be utilized for it's best use for the next 100 years; and the parking deck will be regional resource:

Mr. W. Louis Bissette, Jr., former Mayor of Asheville, Chairman of the Grove Arcade Public Market Foundation
Mr. Russell Martin, former Mayor of Asheville, Vice-Chairman of the Grove Arcade Public Market Foundation
Mr. C. Jerome Jones, incoming Chairman of the Grove Arcade Public Market Foundation
Ms. Ruth Summers, Executive Director of the Grove Arcade Public Market Foundation
Ms. Nancy Thompson, representing Progress Energy, Board Member of the Grove Arcade Public Market Foundation
Mr. George Morosani, Board Member of the Grove Arcade Public Market Foundation

Owner of Anthony's Caribbean Café in the Grove Arcade, Board Member of the Grove Arcade Public Market Foundation, President of the Grove Arcade Merchant's Association, Bele Chere Board Member
Mr. Chuck Riley, immediate past Chairman of the Grove Arcade Public Market Foundation
Ms. Donna Eagle, merchant at the Grove Arcade (Warren Wilson store)
Ms. Claudia Nix, representing Liberty Bicycles, facilitator for the Bike Pedestrian Task Force, former member of the Asheville Transit Commission
Owner of Kamm's Frozen Custard in the Grove Arcade
Ms. Laura Copeland, incoming Board Member of the Grove Arcade Public Market Foundation, staff member of the Asheville Area Chamber of Commerce
Mr. Ron Ainspan, Board Member of the Grove Arcade Public Market Foundation
Mr. Michael Ford, merchant at the Grove Arcade
Mr. Chuck Tessier

The following individuals spoke in opposition of the City constructing the Haywood Street Parking Deck for various reasons, some being, but are not limited to: parking is only one tool for transportation and funds should be spent for other transportation modes that support students and low-income families; money should be used to improve Asheville as a whole creatively; $20.8 Million is too big of an investment; public transit system should be improved; if a new deck is built, improved transit services will fall through the cracks; existing bus service should have a higher frequency and later hours; there has been no public oversight of this parking garage project; need for a Parking Commission; parking is needed, however, not at such a large $21 Million facility; if the large deck is built, and it will take up less space for building businesses and housing:

Mr. Yuri Koslen
Ms. Karen Austin, member of the Western North Carolina Alliance, member of the Asheville Transit Commission
Mr. Andrew Goldberg, member of the Asheville Transit Commission
Mr. Bryan Freeborn, member of the Asheville Transit Commission, (not speaking on behalf of the Commission)

Ms. Sarah Uminski, Executive Director of the Affordable Housing Coalition, urged Council to require the inclusion of an affordable housing component in any residential development at the Haywood Street/Battery Park area.

Discussion surrounded as Ms. Ball and Mr. Schaefer responded to various questions, many financial, from Council, some being, but are not limited to: why is only half of the amount going to be tax exempt; when was the last time any General Fund money went into the parking enterprise fund; is it true to say that one parking deck lays the groundwork financially for another parking deck to be built without using General Fund monies; if we defaulted on the loan, would the worse case scenario be that we lose the parking facility itself; how many existing private parking decks are there in downtown Asheville and can they expand; what is the currently monthly parking rates in the existing three parking garages; has the St. Lawrence Basilica church reviewed the façade of the parking deck; what is the cost of a parking space in the new deck; is the cost of the façade included in the cost per space; will there be any financial partnership with the downtown businesses or property owners; what percentage of days in the last couple of years have the existing parking garages been full; approximately how long will it take for the new parking deck to be full; if we require a developer to incorporate an affordable housing aspect on the outparcel, should we require it in our own developments; are the St. Lawrence Basilica church or the Battery Park Apartments concerned with the scale of the project; what are some cost reduction items, e.g., removing one story of the parking garage; what would be the cost of the project if one story of the parking were removed or a retail component in the garage were constructed on the Haywood Street side; what is the estimate of locals vs. tourists using the

existing parking garages; and do we know the percentage of residents who commute downtown to work.

Councilman Newman supported a parking facility on this site; however, he expressed concerns regarding the total cost, the scale and how it will affect the area around it, especially since when the parking study was performed, one of the things it anticipated was the renovation of the Civic Center (which has not happened yet).

Councilman Newman asked about the development agreement that the City has with the Grove Park Inn on Site B (next to the City Hall Building) for a 200 space parking garage. If that development goes forward, then in the near future the City will be looking at the need to also finance those additional parking spaces, as part of that development. Ms. Ball said that it's her understanding that the City owns the land for Site B and in exchange for the land, the City expects to get 200 parking spaces. There has been an appraisal of the land and it equals the amount of parking spaces the City will need. City Attorney Oast noted that the details have not been worked out yet.

Councilman Newman requested additional information about the role the Grove Arcade Public Market Foundation (GAPMF) is to pay regarding financing the parking garage on this site. City Attorney Oast said that the agreement states: "If the City determines within five years from the date of the agreement to undertake construction of a parking facility within the area shown on the map attached" (which includes the area we are talking about), " GAPMF will pay 50% of any operating deficit of said facility, including debt service on any bond issue; provided, that GAPMF's obligation to pay said 50% shall be limited to the fraction of such costs that is derived by dividing 300 by the total number of spaces in the new parking facility." It is not a binding obligation for the City to build the deck, but a promise by the Grove Arcade Public Market Foundation to assist us financially if we do build the deck. Mr. Schaefer noted that there is no obligation to help at all with the financing of the building of the deck – it's only if there is a very significant deficit in the operation of the deck and he doesn't anticipate that. The Grove Arcade will not be pitching in for construction and he would not expect ever to see them pitching in for operation either.

Councilman Newman felt the City should revisit the different policies regarding the parking fund enterprise. Not long ago we were concerned about getting people to park in the garages instead of on the street and we started the first hour free parking in the decks. That has been a real success. Now that our decks are starting to fill up, we haven't modified our policies that were put in place to address the under-utilization problem. Transit Services Director Bruce Black said that if we construct the parking garage we may need to leave the one hour free parking in place for a period of time. He said that the fee structure has to be based against the metered times. When the metered times becomes less expensive than our deck time, then you start getting the opposite flow and there is no incentive to park in the decks.

Mr. Black responded to various questions surrounding Councilman Newman's statement that most of our buses are underutilized at the time. Councilman Newman felt that we need to create incentives so that more people use transit as a commuter tool.

Planning & Development Director Scott Shuford responded to Councilman Newman when he expressed concern that the Haywood Street side of the parking garage will create dead space.

Councilman Newman expressed concern that the present design of the project and the site constraints doesn't leave a lot of property in the outparcels for an affordable housing portion. Mr. Shuford replied that if Council goes with a different scale element and perhaps a taller structure, we might have the opportunity for some mixed income housing in the project.

Upon inquiry of Vice-Mayor Mumpower, the City acquired the outparcels primarily to (1) maintain an infrastructure to move vehicles around – relocating Page Avenue; and (2) the need for a staging and storage area.

In response to Vice-Mayor Mumpower regarding the outparcels, Ms. Ball said that if we put a Request for Proposals out and we include the elements that Council feels are very important we will have people who will want to respond to that. In a lot of cities, the city may donate the land, discount the land, or do different things in order to get the type development they want. The value of the outparcels as appraised, because it will be site-ready plus adjacent parking, makes it extremely valuable. She estimated the land would be about $1.5-2 Million and the rest of the $4-5 Million would be in parking spaces.

In response to Vice-Mayor Mumpower, City Attorney Oast said that there has been no violation of the Open Meetings Law regarding the City's purchase of the land.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and ordinance and they would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-263. This motion was seconded by Councilman Davis.

Councilman Dunn felt that if we want economic development and want people to live, work and shop downtown, then we need parking. Other areas, for example the Asheville Mall, have ample parking and the downtown should have adequate parking as well. He felt other modes of transit are important, but cars are our main source of transportation.

Councilman Davis felt that the City has too much committed to not build a parking garage and Mr. Schaefer has provided the figures to show that it can happen.

Councilman Newman again realized the need for an additional parking facility in this area and the need to more forward. However, he asked Council take a little more time to get this project the way that the community would like to see it. He felt we can get more good out of the project than we have with the current design. He suggested asking staff to sit down with the engineers for a short, reasonable period of time and look at the current design to see if there are some ways to modify the engineering plans already developed, in a way that will reduce the price tag of the total project and hopefully to include some additional opportunities for private sector development, including some moderately priced residential development. He felt we should also not continue our policy of investing 100% of our parking fund enterprise dollars into building more parking garages. That does not reflect the priorities of our community. In addition, he asked staff to work in the coming months to bring Council some ideas on how to make transit more an effective tool for people who want to work downtown. Our current fee structure needs to be modified so that people who use the facility should pay a little more to build the facility.

Vice-Mayor Mumpower said that parking is an economic engine that creates other revenue that can be filtered out to other transportation improvements. He does have concerns on the cost and size of the garage; however, he feels the City should uphold its commitment in the agreement it signed with the Grove Arcade Public Market Foundation.

Councilwoman Jones would support the two contracts, but was concerned about the $9 Million budget amendment increase. She is hopeful that staff will express Council's concerns to Carl Walker and to Hanscomb, Faithful and Gould, especially in terms of affordable housing. She feels the parking garage is the other part of the Grove Arcade's future. She was glad that the numbers work, however $9 Million is a lot to finance. She felt we could have a smaller parking lot by reducing one level and make it more reasonable to finance. She felt it was important to note

that the City has already made an investment in the Grove Arcade. We have invested $2.5 Million in the public market and $200,000 for streets and sidewalks. We want to continue being supportive of the Grove Arcade and other people involved in tourism need to come to the table as well.

Councilwoman Bellamy felt there are some policies Council needs to discuss on the issues of transit and where we want to go, including affordable housing on city property. We do need to look at these issues holistically. We need to be making policy decisions from a long-term standpoint. If we had the entire budget before us, we could see how it would impact us in the future.

Upon inquiry of Councilwoman Bellamy, Ms. Ball said that she is looking to Council to tell her what they want to see happen with the project. She said that she is open to go back and talk with the design engineers about west side and the north side. She did think the project needed to more forward, but if there is a change as a result of the discussions, then City staff would like to come back to Council.

Mayor Worley said that Council has been given updates over time and the costs will continue to escalate. He noted that in year 4, there will be a $360,000 in surplus of funds that are available for other uses, which can be used for transit, if we choose. He would love to see a circulator system downtown.

The motion made by Councilman Dunn and seconded by Councilman Newman to approve Resolution No. 04-263 carried on a 6-1 vote, with Councilman Newman voting "no."

RESOLUTION BOOK NO. 28 – PAGE 447

Councilman Dunn moved for the adoption of Resolution No. 04-264. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Newman voting "no."

RESOLUTION BOOK NO. 28 – PAGE 448

Councilman Dunn moved for the adoption of Ordinance No. 3193. This motion was seconded by Councilwoman Bellamy.

Councilwoman Bellamy asked that staff continue talking with the design engineering firm to find cost-cutting methods that can be implemented.

City Manager Westbrook said that those discussions will take place. He said that if Council wants four floors instead of five, staff will need to know that now. However, if five floors is decided on and Council wants it built in the most cost effective manner, we will continue to seek, right up to the date that we start construction. The contract with Hanscomb, Faithful and Gould will be looking for those additional savings. We will only borrow what we need when we have a firm number.

Councilman Newman said that if we approve the money to build this design, he didn't think that we are sending a clear signal to staff or the engineers that we really want to take a hard look at this design and see if there are some ways to change the design (not just to find cost savings in building this design) to adjust the scale of the parking proposed and get more residential development. He felt we should hold off on the budget amendment for some reasonable time and let those conversations happen.

Vice-Mayor Mumpower didn't believe this is an ideal setting for affordable housing. It will address other needs, however, the project is surrounded by other affordable housing.

Councilman Davis felt the affordable housing component conversation might be more appropriate when we come into the outparcel discussion.

Councilwoman Jones felt that if we don't allow staff to consider the scale issues, she would not be able to support the budget amendment.

The motion made by Councilman Dunn and seconded by Councilwoman Bellamy to approve Ordinance No. 3193 (with staff being directed to continue talking with the design engineering firm to find cost-cutting methods that can be implemented -- not including the scale of the project) carried on a 5-2 vote, with Councilwoman Jones and Councilman Newman voting "no."

ORDINANCE BOON NO. 21 - PAGE 433

C. RESOLUTION NO. 04-265 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH THE HARRISON SHANNON GROUP FOR THE HOPE VI FEASIBILITY STUDY AND A MOTION TO ALLOCATE $18,000 OF THE HOUSING INFRASTRUCTURE FUNDS FOR THAT STUDY

Mayor Worley said that Councilwoman Bellamy and himself heard a presentation at the Housing Authority to ask the City for $18,000 plus expenses for a feasibility study to see if Asheville is eligible to obtain a Hope VI grant to do some redevelopment in conjunction with the Housing Authority in public housing projects.

Vice-Mayor Mumpower applauded the effort, however, he felt that the Hope VI monies are very limited and will likely go lower and didn't feel that to spend $18,000 at this time was good.

Councilman Newman felt that even though federal resources are being reduced, there are a lot of opportunities for private sector redevelopment. Even if there are not Hope VI federal funds, there may very well be good opportunities to cultivate more economically integrated neighborhoods through local, public and private partnerships for redevelopment in those areas and it's important to explore those possibilities.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-265. This motion was seconded by Councilwoman Bellamy and carried on a 6-1 vote with Vice-Mayor Mumpower voting "no".

RESOLUTION BOOK NO. 28 – PAGE 449

VI. OTHER BUSINESS:

RESOLUTION NO. 04-266 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO PROVIDE LOCAL FUNDING FOR NOISE WALL ENHANCEMENTS FOR THE I-40 WIDENING PROJECT

Planning & Development Director Scott Shuford said that this is the consideration of a resolution authorizing the Mayor to execute an agreement with the N.C. Dept. of Transportation (NCDOT) to provide local funding for noise wall enhancements for the I-40 widening project.

At the request of City Council and the Metropolitan Planning Organization (MPO), the NCDOT allowed the establishment of an I-26 Connector Aesthetics Advisory Committee (AAC) to develop ideas about improving the appearance of the I-26 Connector. The AAC has been meeting regularly and was recently offered the opportunity by NCDOT to offer suggestions for aesthetics considerations for a roughly one mile long section of I-40 that is scheduled to be widened to six lanes over the next two to three years.

This section of I-40 runs from just west of Exit 44 to just west of the I-40/I-26 intersection and will be constructed under a fast-track, design-build contract. Since the project is to be constructed within the existing right-of-way, there are limited options to provide landscaping and median treatments. The AAC recognized these limitations and concentrated its discussion in two areas: The new overpass at Exit 44 and the noise wall that will be constructed along the south side of the highway. Because of its scale, the noise wall offers the greatest opportunity for aesthetic impact -- it will run for over 4,000 feet, two-thirds of which will be quite close to the southern edge of pavement. There will be some segments of the wall that will be setback; these areas will receive landscape treatments.

The AAC researched what other communities were doing with noise wall aesthetics and found numerous examples from Western states. These ranged from elaborate examples of individualized public art to simpler treatments involving the use of concrete form liners that imprint a pattern on noise wall panels. Because of concerns about costs and the fact that NCDOT needed quick decisions on this project due to its timeline and the design-build contract, the AAC focused on form liners. The use of this technique enables replication of patterns and has the potential to be re-used for the I-26 project as well.

The AAC researched this concept extensively and has developed a proposal that is very cost-effective while having strong aesthetic impact. Typically, about one percent of an interstate highway project's budget is reserved for landscaping and other aesthetic treatments; in this case, the project is estimated to cost roughly $30 million, leaving around $300,000 available for aesthetics. The noise wall treatment proposed by the AAC will cost approximately $100,000 and have the potential to be carried over to the I-26 project. Given Council's Strategic Operating Plan goals for improving City gateway appearance, this seems to be an outstanding project.

We learned on Friday, December 10, that despite the efforts of Division Engineer Jay Swain to have a portion of the $300,000 be applied to the noise wall, NCDOT has a standing policy of requiring local funding for any noise wall enhancements. This news means that the City must act quickly to agree to execute a Municipal Agreement with the NCDOT committing to fund the noise wall improvements if they are to be accommodated in the project.

The AAC and City staff feel the attention to detail offered by this project will reflect well on the City of Asheville and open the door for greater community acceptance of highway projects. Interstate projects in particular are necessarily invasive and aesthetic enhancements can help heal the physical scars the projects cause to the local landscape. In a tourist and "sense of place" economy like ours, such treatments are especially important. This is why the Chamber of Commerce executive board recently passed a resolution supporting the work of the AAC and requesting that NCDOT fund the noise wall improvements.

Executing the Municipal Agreement will commit the City to providing the funds, but the NCDOT will not require payment until the project is complete. This will allow time for the City to seek grants (such as from federal TEA funds or from the Tourism Development Authority enhancement grants) and other funding sources for the enhancements. While there is a high likelihood of full or at least partial grant funding for these improvements, the City will be ultimately obligated to fund the enhancements.

Pros:

- Cost-effective, high-impact aesthetic enhancement
- Able to be re-used on the I-26 project
- Supports work of AAC
- Supported by Chamber of Commerce
- High likelihood of grant funding for all or part of the project

Con:

- Potential $100,000 price tag

City staff recommends City Council authorize the Mayor to execute a Municipal Agreement with NCDOT to provide local funding for noise wall enhancements for the I-40 widening project.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

After a short discussion, Councilwoman Jones moved for the adoption of Resolution No. 04-266. This motion was seconded by Councilman Dunn and carried on a 4-3 vote, with Councilwoman Bellamy, Councilman Davis and Councilman Newman voting "no."

RESOLUTION BOOK NO. 28 – PAGE 450

RESOLUTION NO. 04-267 – RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE JOINDER TO DEED OF TRUST FOR REDEVELOPMENT REFINANCING FOR PART OF PACK PLACE

City Attorney Oast said that this is the consideration of a resolution authorizing execution of a joinder to deed of trust for redevelopment financing for part of Pack Place.

Last week, as you may have heard, PLB Investments, LLC sold its interest in the Pack Place development to Pack Square Investors, LLC, and two individuals from Charleston, SC. The assets transferred consisted of an ownership interest in the parking facility and associated retail spaces on Biltmore Avenue and Eagle Street, together with the leasehold interest in the underlying land. This does not involve the Pack Place Arts, Education and Science Center. This development comes out of the City's redevelopment efforts in this area in the 1980's, and the City is the owner of the land on which these improvements are built. The City leased the land to the developer pursuant to a 1987 Ground Lease for a term of 99 years. In addition to nominal rent, the developer/Lessee agreed to make the improvements (parking deck and retail/office space) that currently occupy the land.

The 1987 Ground Lease includes a provision for the City, as Lessor, to join in any instruments required for the Lessee to obtain mortgage financing for the development. The Lessee must make certain certifications as to the sufficiency of the loan amount and the qualifications of the lender, and any joinder is subject to the condition that the City, as Lessor, is not personally liable. The City joined in such documents in connection with the initial financing in 1987.

As a result of the transaction last week, the new owners of the improvements also became the new Lessees under the 1987 Ground Lease. They wish to refinance the debt on the improvements and have requested the City, as Lessor under the 1987 Ground Lease, to join in the deed of trust that will secure the loan. The 1987 Ground Lease contains essentially the same provisions for refinancing as it does for initial financing, and the Lessees have, or will, provide the required certifications. Upon Lessees' providing these certifications, the City may approve the

joinder, or make a written objection within 10 days. In the absence of an affirmative approval or written objection, the approval is deemed given.

Last week, we received a document, "Joinder to Deed of Trust," which would be the City's joinder for the refinancing as contemplated by the Ground Lease. The document we received requires some revision to meet the intent of the 1987 Ground Lease, in my opinion, but I do not think that making these revisions will present a problem for the Lender or the Lessee. Accordingly, I believe that the "Joinder to Deed of Trust" or a similar document can be executed on behalf of the City once the revisions are made.

Adoption of the resolution, which authorizes the Mayor to execute the "Joinder to Deed of Trust," subject to approval of the City Attorney, is recommended.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

After a brief discussion, Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-267. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 451

BOARD AND COMMISSION ANNOUNCEMENTS

Vice-Mayor Mumpower announced the various upcoming board and commission vacancies. He encouraged interested people to contact City Clerk Burleson.

SCOTTY RHODARMER

Councilman Dunn announced the retirement of WWNC Radio Announcer Scotty Rhodarmer who will be retiring after 50 years of service.

INTERLACE PROGRAM - TRANSITION HOUSING PROGRAM FOR WOMEN AND CHILDREN

Councilwoman Jones said that Interlace, a program of the Affordable Housing Coalition, is a transitional housing program for women and children who are homeless due to domestic violence. This year Interlace has organized another successful Shop for Change event in the downtown area. Over 90 downtown retail businesses and restaurants participated in the 8th annual event. Carolers from WomanSong and Enka Middle School sang on downtown streets throughout the day. There are dozens of businesses that consistently contribute to this event each year to help raise funds and awareness. EnviroDepot, on Haywood Road, is always particularly enthusiastic about helping out with the important cause. Ms. Alissa Gill and Ms. Susan Diehn, Interlace volunteers, were essential to the team effort of putting together an event of this size. She thanked all of the participating businesses, shoppers and volunteers for helping to end abuse in our community.

CLAIMS

The following claims were received by the City of Asheville during the period of November 12 – December 2, 2004: BellSouth (Water), George Artom (Water), Jeffrey H. Hatmaker (Water), Rose Beck (Transit Services), Emma Jarvis (Sanitation), Demos Real Estate (Water), Alvin Smith (Police) and Firestone (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

220

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton, founder of Asheville Citizens for Quality Government, said that policies and standards, as well as plans and procedures are needed to assure the quality of education received by every student in the Asheville public school system. He asked Council to establish the policies, standards and requirements to achieve this vital objective.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 12:19 a.m.

Magdalen Burleson
CITY CLERK

Charles L. Worley
MAYOR

Tuesday – January 11, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy (left meeting at 7:58 p.m.); Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Newman led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

Councilman Davis, liaison to the WNC Regional Air Quality Agency, said that the Air Quality Agency has just awarded the City of Asheville (through the efforts of Mr. Larry Bopp, the City's Information Services Director) the 2004 Energy Star Million Monitor Drive Contributor Award. It was presented by the United States Environmental Protection Agency in recognition of activating the power management functions on computer, monitors across your entire organization to save energy, money, and the environment.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 14, 2004

B. RESOLUTION NO. 05-1 - RESOLUTION AUTHORIZING THE EXCHANGE OF EXCESS RIGHT-OF-WAY ON STRATFORD ROAD FOR A RIGHT-OF-WAY EASEMENT ON STRATFORD ROAD

Summary: The consideration of a resolution authorizing the Mayor to convey excess right of way on Stratford Road in exchange for a right of way easement over a portion of real property located on Stratford Road.

The City and Verdi Group LLC (Verdi) have negotiated an exchange of excess right-of-way for a right-of-way easement across real property located on Stratford Road.

The excess right-of-way property is along the east side of Stratford Road comprising 0.008 ± acre generally across the road from and between its intersections with Parkside Drive and Pinewood Avenue.

The property owned by Verdi (PIN No. 9730.12-96-3375) is a 0.969 acre parcel zoned RS-4 located on Stratford Road contiguous with the right-of-way. As it is, the parcel will only support three (3) houses. With the additional land from the excess right-of-way, the Verdi property will support development of four (4) houses. The right-of-way easement to be exchanged for the excess right-of-way will cover 0.131 acre and will provide a logical and consistent right-of-way boundary along the east side of Stratford Road extending ten (10) feet into the Verdi property for the full length of the street frontage.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- It will provide a more logical and consistent right-of-way boundary along Stratford Road.
- It will enable maximum infill development consistent with the Strategic Operating Plan.
- The 10-foot easement makes a future sidewalk more constructible.

Pursuant to N. C. G. S. 160A-271 a notice was duly published in the Asheville Citizen-Times on December 17, 2005.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. 160A-271.

Planning & Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing the Mayor to convey excess right of way on Stratford Road in exchange for a right of way easement over a portion of real property located on Stratford Road.

RESOLUTION BOOK NO. 28 – PAGE 452

C. RESOLUTION NO. 05-2 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH JOHN W. ABBOTT CONSTRUCTION CO. INC. TO CONSTRUCT SUBSTANTIAL SITE IMPROVEMENTS FOR THE SOCCER COMPLEX AT AZALEA PARK

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with John W. Abbott Construction Company, Inc. to construct substantial site improvements for the soccer complex in Azalea Park.

The City of Asheville Parks and Recreation Department is in the process of implementing the first phase of development of the Azalea Park Master Plan. This phase of significant public park improvements includes the realization of a soccer complex of artificial turf, concession/restroom facility, picnic shelters, a community built playground, parking areas, walkways and trails, a memorial garden and landscape. The construction under consideration by City Council via this staff report will address the concession/restroom facility, portions of the parking areas, extensive retaining walls, signage, plazas and walkways. The project was bid out according to City standards that include the Minority Business Plan.

This action complies with the City of Asheville Strategic Operating Plan greenway/open space goals under the Natural and Built Environment Focus Area, as the project provides the framework for additional greenway benefits.

Pros

- The construction of this portion of the project is an integral supporting aspect of the artificial turf fields that are already under construction.
- The park will provide greatly needed recreation facilities for recreation users, especially the soccer players in the area.
- The soccer complex will be a local and regional attraction that will foster economic development.

Cons

- The work is extensive and costly to implement this high quality park development.

- The facility will require increased staffing and materials to maintain it via the operating budget.

The Parks and Recreation Department staff recommends City Council authorize the City Manager to enter into a contract with John W. Abbott in the amount of $1,074,788 to construct substantial site improvements for the soccer complex in Azalea Park.

RESOLUTION BOOK NO. 28 – PAGE 453

D. ORDINANCE NO. 3194 - BUDGET AMENDMENT FOR THE AZALEA PARK CONSTRUCTION

Summary: The consideration of a budget amendment for Azalea Park, in the amount of $647,170, from a $472,170 contribution from the WNC Soccer Foundation, and $175,000 through an agreement with the Asheville-Buncombe Youth Soccer Association (ABYSA).

The City of Asheville is in partnership with both the WNC Soccer Foundation and ABYSA to raise funds for the construction of the John B. Lewis Soccer Complex at Azalea Park. These funds are the most recent payments to the City of Asheville via the fundraising campaign from the Soccer Foundation and ABYSA.

This complies with the City of Asheville Strategic Operating Plan, Council Focus Area: Natural and Built Environment, Goal 2: Increased greenway benefits equitably throughout Asheville – Continue to implement and develop greenways that enhance quality of life for Asheville. The Swannanoa River Greenway Corridor will pass through Azalea Park plus include an extensive trail system within the park linking to the greenway.

Pros

- Complies with City procedures to expend funds.
- Continues work on project to meet construction timeline.
- Complies with agreements with WNC Soccer Foundation and ABYSA.

Cons: None noted.

The Parks and Recreation Department recommends City Council approve the budget amendment in the amount of $647,170 to increase the budget for development of Azalea Park.

ORDINANCE BOOK NO. 28 – PAGE 435

E. ORDINANCE NO. 3195 - BUDGET AMENDMENT FOR THE PURCHASE OF A MINI-BUS FOR THE HARVEST HOUSE AND SENIOR OPPORTUNITY CENTER

Summary: The consideration of a budget amendment, in the amount of $23,653, for the purchase of a mini-bus for the Harvest House and Senior Opportunity Center.

The City has received an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding.

Funds will be used to purchase a 25-30-passenger mini-bus for Harvest House and Senior Opportunity Center. The vehicle will be used to support and enhance current and new senior programs at both centers, to expand the senior travel program, and to provide transportation for senior citizen special events.

This action complies with City of Asheville Strategic Operating Plan, City Council Vision: Livability: Where ideas and energy are devoted to creating a city where citizens and visitors experience essential services that are efficient, affordable and user friendly.

Pros:

- The mini-bus will enhance the Parks and Recreation Department's ability to provide essential services to senior citizens, which is not currently being fulfilled with the existing vans that support recreation services.
- Fulfill funding need to purchase a much-needed mini-bus for senior programs.
- Expand the senior travel program to offer more trips, reach more customers and increase revenues in the travel program.

Cons: None noted.

The Parks and Recreation Department recommends City Council approve the budget amendment in the amount of $23,653 to establish a budget to purchase the mini-bus.

ORDINANCE BOOK NO. 28 - PAGE 437

F. RESOLUTION NO. 05-3 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH CAROLINA CORNERSTONE CONSTRUCTION INC. FOR THE MALVERN HILLS POOL PUMP

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Carolina Cornerstone Construction, Inc. to construct a pool pump house for Malvern Hills Park.

The City of Asheville Parks and Recreation Department has been improving the facilities within Malvern Hills Park incrementally. The most recent improvement required for this facility is the construction of a new pool pump house. This facility will meet the mandatory guidelines established by North Carolina's Department of Environment and Natural Resources. The building will accommodate the new pump and necessary pool chemical storage. This pump house will reflect the character of the existing historic character of the existing Malvern Hills facility that contains changing rooms, concessions and a pavilion. The project was bid out according to city standards that include the Minority Business Plan.

This action coincides with the City of Asheville's Strategic Operating Plan water quality goal under the Natural and Built Environment Focus Area.

Pros

- The construction of this building will enable the pool to operate within state regulations.
- The pool clients will swim in a healthier environment with increased circulation of the pool water.
- The environment of the nearby stream will be improved by draining the pool water into the sanitary sewer.
- The pool will be easier to maintain for staff.

Cons

- The expense of constructing the pool pump house.

The Parks and Recreation Department staff recommends City Council authorize the City Manager to enter into a contract with Carolina Cornerstone Construction, Inc. in the amount of $71,500 to construct the pool pump house for Malvern Hills Park.

RESOLUTION BOOK NO. 28 – PAGE 454

G. ORDINANCE NO. 3196 - BUDGET AMENDMENT FOR THE PURCHASE OF A CRAWLER DOZER FOR THE PARKS AND RECREATION DEPARTMENT

Summary; The consideration of a budget amendment, in the amount of $85,000, to purchase a new Crawler Dozer for the Park Maintenance Division.

The Parks and Recreation Department has been developing numerous parks including the most recent, Azalea Park. A considerable amount of construction is being done by Park Maintenance staff with outdated equipment. One piece of equipment is a 1979 model Crawler Dozer. Recently, this piece of equipment caught fire and is inoperable. With the current construction of the Azalea Park, Carrier Park, greenway development and future construction at Richmond Hill, it is necessary for the Department to replace this piece of equipment. The Department is currently renting a Crawler Dozer at the cost of approximately $4,000 per week in order to keep the project on schedule. It is more cost efficient to purchase a replacement for this piece of equipment than it would be to continue renting one. The level of funding of the Park Maintenance Division cannot cover the estimated replacement cost of $85,000.

Pros

- The purchase of this piece of equipment will allow the Parks and Recreation Department to develop more projects in-house in a more cost efficient manner than having to rent or contract with an outside company.
- This piece of equipment will pay for itself by saving the weekly rental fee over the next few months in the Azalea Park development.
- By not purchasing this piece of equipment, the cost of park and greenway development will increase due to having to contract with an outside company for all project development or rent the necessary equipment on a weekly basis, which is very expensive.

Cons: None noted.

This purchase of equipment will assist in addressing one of the goals of City Council, that of greenway development. Greenway projects could be completed in a timely manner and multiple projects could be worked on simultaneously.

The Parks and Recreation Department recommends that funds in the amount of $85,000 be appropriated from the Fund Balance to be used to purchase a Crawler Dozer.

Parks & Recreation Director Irby Brinson responded to Vice-Mayor Mumpower's inquiry about the money being appropriated out of Fund Balance.

Councilman Dunn hoped that in the future staff could try to anticipate these big ticket items and they could be included in the regular budgeting process.

ORDINANCE BOOK NO. 21 – PAGE 439

H. RESOLUTION NO. 05-4 - RESOLUTION APPOINTING MARK COMBS TO THE BUNCOMBE SCHOOL CAPITAL FUND COMMISSION

Summary: The consideration of a resolution appointing a member to the Buncombe School Capital Fund Commission.

The County Manager asked that the City appoint a member of the Buncombe School Capital Fund Commission. The Commission consists of five members: one appointed by City Council; one appointed by the Asheville City Board of Education; one appointed by the Buncombe County Board of Education; one appointed by the Buncombe County Board of Commissioners; and one appointed by the other four appointees. Under General Statute 105-472, one-half of any State Sales and Use Tax revenue distributed to the County is paid to the Commission whose duty is to provide for the distribution of the revenue to support school capital projects. The County Manager said it would be helpful if the City could appoint someone who is familiar with capital budget programs, revenues and expenditures.

Should Council want to appoint a City staff member (the County felt a City staff member would be appropriate), City Manager Westbrook recommended Public Works Director Mark Combs as a City appointee. Mr. Combs is familiar with capital budgeting, expenditures and finance. He also has an appreciation for large building projects, the infrastructure required to support them, as well as the large lead time for design, construction and completion of such projects.

City Manager Westbrook recommends that City Council appoint Mark Combs as the City's representative to the Buncombe School Capital Fund Commission.

RESOLUTION BOOK NO. 28 – PAGE 455

I. RESOLUTION NO. 05-5 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 25, 2005, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO NAVIGATIONAL SCIENCES INCORPORATED

Summary: The consideration of a resolution setting a public hearing on January 25, 2005, to consider an economic development incentive grant to Navigational Sciences, Incorporated.

City Council has previously considered Navigational Sciences for an economic development incentive grant on March 18, 2003. The initial grant was for $25,000 payable in equal installments over three years. In December 2004, Navigational Sciences advised that a portion of the prior understanding would need to be changed. Based on new information, the current economic development incentive grant is based on the following: the project will entail a capital investment of $2 million and the creation of 12 new jobs with an average annual salary of $50,000. The prior commitment was for a $4 million investment.

Based on the new information with a capital investment of $2 million and the addition of 12 new jobs at an average annual salary of $50,000, staff feels the economic development incentive of $25,000 paid in three equal installments over a three year period promotes economic development within the City, supports small businesses in the downtown area, and adds additional employment of highway jobs to the local economy.

Strategic Plan:

- Grant supports expansion of local small business. Key Area – Economic Development Goal 1, Objective A.
- Navigational Sciences, Incorporated continues to invest in the downtown area.

Staff recommends City Council approve the resolution setting a public hearing on January 25, 2005, to consider an economic development incentive grant to Navigational Sciences, Incorporated.

RESOLUTION BOOK NO. 28 – PAGE 456

J. **RESOLUTION NO. 05-6 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH JONES & FRANK CORPORATION TO INSTALL A FAST-FILL COMPRESSED NATURAL GAS FUEL STATION AT THE CITY'S FUEL STATION**

Summary: The consideration of a resolution awarding the bid to construct a fast-fill compressed natural gas (CNG) fuel station at the City's fueling station and authorizing the City Manager to enter into an agreement with Jones & Frank Corporation, the lowest responsive bidder.

In November 2000, City Council authorized City staff to apply for a grant to construct a CNG station. In June 2003 the City received a second notice to award the City $400,000 to construct the facility. The City agreed to provide in-kind and matching funds totaling $55,000.

In March 2004 City Council authorized the City Manager to enter into an agreement with the N.C. Department of Environment and Natural Resources (NCDENR) for a mobile source emissions grant to construct a compressed natural gas (CNG) fueling station. Subsequently, staff sent out bids for the construction of the station and is prepared to award a bid to the lowest responsible bidder to begin construction.

The State of North Carolina is committed to constructing a series of rapid-fire compressed natural gas fueling station along the I-40 corridor. Asheville is the key link between Hickory, North Carolina, and Knoxville, Tennessee.

Staff sent out bids for the construction of the facility. The lowest responsible bidder, Jones & Frank Corporation of Charlotte, NC, has agreed to construct the facility for $434,491, excluding sales tax. This amount is within the budgeted $455,000 amount.

Pros:

- Construction of a CNG station will fulfill a contractual agreement with the NCDENR for construction of such a station
- A public-access CNG station will allow vehicles to travel along the I-40 corridor from coast to coast
- High-pressure fuel delivery systems will become ubiquitous as hydrogen and fuel cell technology evolve
- The City and its partners are taking a leadership role in promoting clean air initiatives

Cons:

- CNG vehicles cost approximately 20% more than conventional vehicles
- Staff must be trained to work on high-pressure fuel systems
- Public access (credit/debit card) system must be installed
- CNG as an alternative fuel may be eclipsed by emerging technology

This action meets City Council's Strategic Plan in the Focus Area: Natural and built environment, Goal #1: A high quality of air and water, Task #2, "Explore options to provide incentives to City residents to purchase AFV."

City staff recommends City Council awarding the bid to construct a fast-fill compressed natural gas (CNG) fuel station at the City's fueling station and authorizing the City Manager to enter into an agreement with Jones & Frank Corporation, the lowest responsive bidder.

Mayor Worley responded to questions raised by Mr. Fred English about the cost effectiveness of this program.

RESOLUTION BOOK NO. 28 – PAGE 457

K. RESOLUTION NO. 05-7 - RESOLUTION AMENDING THE TERMS OF THE MEMBERS OF THE URTV INC. BOARD OF DIRECTORS

RESOLUTION BOOK NO. 28 – PAGE 458

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE MOUNTAIN HOUSING OFFICE ADDITION LOCATED AT 64 CLINGMAN AVENUE FOR A PROPOSED EXPANSION OF THEIR OFFICE SPACE

ORDINANCE NO. 3197 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE MOUNTAIN HOUSING OFFICE ADDITION LOCATED AT 64 CLINGMAN AVENUE FOR A PROPOSED EXPANSION OF THEIR OFFICE SPACE

Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Dunn and carried unanimously.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:08 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of the issuance of a conditional use permit for the Mountain Housing office addition located at 64 Clingman Avenue for a proposed expansion of their office space.

Although the Asheville City Development Plan 2025 does not specifically address the need to provide office opportunities, it does describe a need to apply new zoning tools to increase both the supply of affordable housing and the compatibility of such housing with existing neighborhoods and community development patterns. The MHO office expansion is being sought in order to allow for the non-profit organization to expand their current range of services and programs. MHO has existed in harmony with the existing Merritt Park residents and larger WECAN neighborhood and it is their desire to continue this mutually beneficial co-existence. The ACDP 2025 also discusses the need to promote Smart Growth principles including mixed use developments, higher density residential and commercial infill development, traditional neighborhood development patterns, and downtown neighborhood revitalization through housing rehabilitation, all of which can be found in the Merritt Park project.

This property was conditionally rezoned in September of 2000 from RM-8 to CBD. There was an additional rezoning further down Clingman Avenue from RM-8 to RM-16 for the Prospect Terrace Project.

The applicant, Mountain Housing Opportunities (MHO), is requesting an amendment to the Conditional Use Permit associated with the Conditional Use Rezoning from RM-8 to CBD for the Merritt Park Condominium Project. The rezoning and site plan approval for the 3-story, 16-unit condominium project was approved by City Council in September of 2000. There was a subsequent amendment approved in June of 2001 to allow Mountain Housing Opportunities to occupy approximately 3,100 square feet of community space located on the first floor and turn it into an office condominium.

MHO is now requesting an additional amendment to allow the expansion of their office and operations to occupy one of the 16 existing remaining condominium units located on the second floor (Attachments to City Exhibit 3 – Aerial Map and Location Map). This will add approximately 1,100 s.f. of additional space for a total of 4,200 s.f. Former amendment approval did not allow for more than the 3,100 square feet of non-residential space on the first floor to be occupied as office. Because of the increase in square footage, occupation of the second floor, and change of use from residential to office, a new amendment was required. Similarly, any future changes of this nature would also have to return to City Council for consideration.

The current MHO offices are located on the first level of the Merritt Park Condominiums, just south of the intersection of Hilliard Avenue and Clingman Avenue. Surrounding land uses and zoning have not changed since the original application and include, single-family residential and vacant properties zoned RM-8 along with CB-I zoned property housing the current City of Asheville Maintenance Facility. Access and parking for the site will remain unchanged.

At their September 20, 2004, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the Conditional Use Permit request and made a positive recommendation that the project be forwarded to City Council stipulating only that a 'Change of Use' application will need to be filed with Building Permits and that architectural plans to convert the residential unit to office space will need to be submitted for review. In addition, Planning staff asked for the remaining Owner Affidavits, not included with the application, be provided. This request was made with the understanding that, as a requirement by the Merritt Park Condominium

Association, unanimous approval by all the current owners of any change of use or operation was needed. The last remaining three affidavits were provided prior to the completion of this report.

Also subsequent to TRC was an investigation into the details of the Community Development Block Grant (CDBG) and HOME funding for the original project as well as re-examination of the contract terms between MHO and the City of Asheville. Because the office addition would result in the loss of an affordable unit and change the ratio of affordable to market rate units, there was concern that contract terms would prohibit the office expansion. The Community Development Director, Dept. of Housing and Urban Development (HUD), and the City Attorney all reviewed the request and ultimately determined that, although there was concern over the loss of an affordable unit, it was generally felt that the benefits outweighed the concerns. Despite general support, the expansion cannot take place under current contract terms and an amendment to the funding agreement between the City of Asheville and MHO will be required before final approval. The appropriate proportion of the original HOME investment in Merritt Park plus additional funds realized through an equity-sharing arrangement will be re-used for another HOME-eligible activity.

This condition was not included in the TRC report because the contract issues came to light after the technical hearing. Staff felt it was necessary to gain confirmation from HUD and waiting for a response from HUD was the primary reason the project was delayed from moving forward to City Council.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety. A separate 'change of use' review will be required by Building Safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The request will not result in any changes to the site design.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   A change of use will not result in significant changes to the unit and will not generally alter the residential appearance. Operations will be restricted to daytime hours and are expected to be sensitive to the residential nature of the community and is not expected to adversely impact the value of adjacent properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

Scale, bulk, coverage, and density will not be altered as a result of the proposed office expansion. The current MHO offices have harmoniously existed as a member of the WECAN neighborhood and community and wishes to remain in their current location, maintaining their position within the community. Similarly, there is a desire on the residents' part to retain MHO at Merritt Park, which is exemplified through the Owners' Affidavits that were provided stating that the residents were in favor of the MHO office expansion and change of use.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   Although the Asheville City Development Plan 2025, does not specifically address the need to provide office opportunities, it does describe a need to apply new zoning tools to increase both the supply of affordable housing and the compatibility of such housing with existing neighborhoods and community development patterns. The MHO office expansion is being sought in order to allow for the non-profit organization to expand their current range of services and programs. MHO has existed in harmony with the existing Merritt Park residents and larger WECAN neighborhood and it is their desire to continue this mutually beneficial co-existence. The ACDP 2025 also discusses the need to promote Smart Growth principles including mixed use developments, higher density residential and commercial infill development, traditional neighborhood development patterns, and downtown neighborhood revitalization through housing rehabilitation, all of which can be found in the Merritt Park project.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   The project area is located within walking distance of downtown, near major road facilities, interstate connections and in close proximity to transportation facilities with the Route 9 and Route 1 bus lines running directly by the covered shelter in front of the Merritt Park condominiums every half hour. Preliminary review by other utility providers has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   With MHO employees parking off-site, the proposed expansion will not require any changes to the existing off-street parking. In addition, due to the loss of the residential unit, the traffic engineer has found the expansion to result in a very nominal increase in the number of trips generated from the site.

Pros

1. Allows for the expansion of affordable housing offices, staff, and programs.
2. Allows for the maintenance of a co-operative mixed-use development.
3. The original HOME investment plus a share in the increased equity will be recaptured and applied to the creation of additional affordable housing.

Cons

1. Results in the loss of a residential unit. *(The unit was originally an affordable unit, but the increase in its market value would have made it difficult to find another income-qualified buyer, and the seller was under no obligation to do so.)*

Staff recommends approval of the Conditional Use Permit amendment to allow the expansion of the existing 3200 square feet of MHO offices into an existing, 1100 square feet second story residential condominium.

Mr. Scot Dedman, Executive Director of MHO, briefed Council on the history of MHO stating that as they expand their work, they continue their commitment to the revitalization of the West End/Clingman Avenue neighborhood. He believed that their requested increase of approximately 1,100 square feet of available office space will provide them an additional 5 to 10 years, or more, of operating in the current location. When one of the condominiums came on the market last year, they decided that this was an opportunity to be able to expand their operations in the future without leaving the current office location. Their condominium documents require that they have unanimous approval and support from all 16 condo owners at Merritt Park and they do have this unanimous support. They informed the West End/Clingman Avenue Neighborhood Association of their interest in this change at their meetings several months ago and there has been no opposition. They will not expand the size of the building, nor change the exterior appearance of the building – it will keep its residential appearance. He thanked Council for their support of their growing work in Asheville and Buncombe County and for their affordable housing efforts throughout the community (Applicant Exhibit 1).

After rebuttal, Mayor Worley closed the public hearing at 5:17 p.m.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tuch said that appropriate proportion (approximately $37,000) of the original HOME investment in Merritt Park will be earmarked for another HOME eligible program, which details are still being worked out.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3197, granting a conditional use permit allowing Mountain Housing Opportunities to expend their existing offices located at 64 Clingman Avenue into an existing, 1100 square feet second story residential condominium subject to the condition that all TRC conditions are met. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 441

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 940 WEST CHAPEL ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED VARIETY OF COMMERCIAL USES

ORDINANCE NO. 3198 - ORDINANCE REZONING PROPERTY LOCATED AT 940 WEST CHAPEL ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3199 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 940 WEST CHAPEL ROAD FOR A PROPOSED VARIETY OF COMMERCIAL USES

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the

public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:18 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located at 940 West Chapel Road from RS-8 Residential Single-Family High Density District to Neighborhood Business District/Conditional Use, and a request to issue a conditional use permit for a proposed variety of commercial uses.

The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the Asheville City Council in 2000. These policies encourage compatible and sustainable commercial infill development in addition to promoting traditional neighborhood development patterns. The existing commercial building, originally built in 1948, once housed a small neighborhood grocery that served the residents of Shiloh. The former grocery was well positioned to take advantage of vehicular and pedestrian traffic and reflects the traditional neighborhood development pattern that new construction often strives to replicate. Rezoning of the vacant property would enable the old grocery to be adaptively re-used for a variety of neighborhood friendly businesses and provide opportunity for compatible infill development.

The subject properties are located in south Asheville on the corner of West Chapel Road and London Road in the Shiloh community (Attachments to City Exhibit 3 – Location Map and Aerial Map). Both parcels total .46 acres and are currently zoned RS-8 and are surrounded by other RS-8 zoned properties supporting single family uses. A 2,200 square foot commercial building once used as a neighborhood grocery store remains on the corner lot but has been vacated for approximately 6 years, requiring the site to be brought into full compliance per Sec. 7-11-2(b)1 for renovation and re-occupation. Access for the proposed neighborhood businesses is to be located off of London Road and W. Chapel Road through the use of existing drives. A minimum of 10 and a maximum of 14 spaces are required as well as a 20' Type 'B' landscape buffer (or equivalent), buffering from the street, street trees, and parking lot landscaping. In addition, sidewalk, where practical, will be required as a condition of the permit (Attachments to City Exhibit 3 – Site Plan, Photos).

At their December 1, 2004, meeting, the Planning and Zoning Commission reviewed the Conditional Use Rezoning and Master Plan proposal and made a positive recommendation that

the project be forwarded to the Asheville City Council, stipulating that the applicant meet all outstanding Technical Review Committee (TRC) conditions before final zoning approval. In addition, as part of staff's report, a condition that would prohibit the sale of alcohol was recommended and later removed at the request of the City Attorney. Mr Oast further explained that in the State of North Carolina, zoning cannot be used as a tool to prohibit the sale of alcohol and recommended that a private deed restriction be arranged between private property owners that would restrict the sale of alcohol. Concern over the logistics and effectiveness of such an arrangement, staff arranged a meeting with the Asheville Police Department (APD) in an effort to work out a more enforceable alternative. The APD, together with the applicant and City staff, worked out an option where, in the event that more than 30 calls per year involving violent behavior and/or drug or alcohol related offenses were made in reference to the subject property that the Conditional Use Permit allowing the commercial uses must return to City Council for re-examination. The applicant did not have any objection to the condition and the APD was pleased for the opportunity to work cooperatively to control problems currently existing on adjacent properties. The City Attorney did not have issue with the specifics of the alternative but still expressed concern over the difficulty of removing alcohol sales once (if ever) established.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed project will be adaptively re-using an existing building and former parking area and will require minimal site disturbance in order to update access, off-street parking, sidewalk, and required landscaping.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The commercial building predates more than half of the adjacent homes and has historically been occupied concurrent with the older homes without negative impact on their property values. In addition, there is a significant amount of research that supports the position that if buildings are permitted to stand vacant and dilapidated that they will contribute to the decline of the neighborhood, negatively affecting adjacent property values. Lastly, building code and the UDO will both require improvements that will result in a more accessible and valuable neighborhood addition.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The existing commercial building is not uncharacteristically out of scale for a traditional neighborhood business. Although the adjacent homes are modest in size, the existing building is similarly modest in bulk and coverage as a one-story, 2200 square foot building.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the Asheville City Council in 2000. These policies encourage compatible and sustainable commercial infill development in addition to promoting traditional neighborhood development patterns. The existing commercial building, originally built in 1948, once housed a small neighborhood grocery that served the residents of Shiloh. The former grocery was well positioned to take advantage of vehicular and pedestrian traffic and reflects the traditional neighborhood development pattern that new construction often strives to replicate. Rezoning of the vacant property would enable the old grocery to be adaptively re-used for a variety of neighborhood friendly businesses and provide opportunity for compatible infill development.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   The project area is located near major road facilities and interstate connections and is well located in respect to transportation facilities with the Route 6 bus line operating down Hendersonville Rd. and the Route 8 bus line running through the Shiloh neighborhood (with a stop located adjacent to the project area). In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. The proposed site plan indicates the utilization of existing entrances for access off of London and W. Chapel roads, in addition to showing adequate off-street parking and new sidewalk that will be constructed where pedestrian access is most needed. Lastly, the 4-way intersection and adjacent area is being examined for additional traffic improvements through City programs.

Pros

- Encourages the adaptive reuse of a vacant commercial building
- Provides an opportunity for infill development
- Promotes sustainable economic development
- Removes the negative impact of vacant property
- Provides convenient services to residents

Cons

- Loss of the potential for single family development (primarily on second lot where off-street parking is proposed)
- Cannot control the sale of alcohol through zoning

Staff recommends approval of the rezoning request from RS-8 to NB with approval of the associated Conditional Use Permit and detailed site plan.

Ms. Sherry Perry, owner of 827 Fairview Street, expressed concern over the drug and crack house located at 935 W. Chapel Road. She feels that if the property is rezoned, the commitment they have made to improve the neighborhood and surrounding community will be lost.

Ms. Jane Lyndon, property owner at 826 Fairview Street, also expressed concern over the drug activity at 935 W. Chapel Road. She felt that to rezone this property will allow another place for idle congregation.

Ms. Norma Baynes, member of the Shiloh Community Association, supported the rezoning request. She said the building has been vacant for a long time and this will be a good use in the neighborhood. She also hoped to find a way to eradicate the drug problems associated with 935 W. Chapel Road.

Mr. Derrick Martin, agent for 940 W. Chapel Road, assured Council that they have no association with the drug community or the house located at 935 W. Chapel Road. The building is currently an eyesore and the land is not maintained. He feels that their revitalizing of the area will be a benefit to the community because no one is there now. He felt that with the businesses there, there will be no loitering. He said he intents to have a carry-out only restaurant, a gift shop and a beauty parlor located in the building. He stressed that they have no plans in serving liquor out of any of the businesses in the building. Also, he has no problem in any of the conditions which staff has suggested.

After hearing no rebuttal, Mayor Worley closed the public hearing at 5:34 p.m.

Discussion occurred, initiated by Councilman Dunn, regarding the condition that in the event that more than 30 calls per year involving violent behavior and/or drug or alcohol related offenses were made in reference to the subject property that the Conditional Use Permit allowing the commercial uses must return to City Council for re-examination.

Councilman Dunn felt the City was imposing an unfair requirement on this owner. He felt that it is discriminatory to have this business meet that condition when the real problem is the lack of policing in the area.

Mr. Martin did not have a problem with the condition as long as the City can decipher that all 30 calls are not made by the same one or two people. He said that if it makes the neighborhood comfortable, he would have no problem with it.

Councilwoman Bellamy agreed that this was a discriminatory condition. The City seems to be associated this owner with the owners at 935 W. Chapel Road and that is not fair.

In response to Councilman Newman, City Attorney Oast explained what a re-examination of the conditional use permit would be.

Vice-Mayor Mumpower felt that our enforcement is so weak that we are punishing the owner when we should be rewarding them.

Councilman Newman moved to adopt Ordinance No. 3198 to approve the conditional use rezoning for property located at 940 West Chapel Road from RS-8 Residential Single-Family High Density District to Neighborhood Business District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 446

Councilman Dunn moved to adopt Ordinance No. 3199 to issue a conditional use permit for property located at 940 West Chapel Road for a proposed variety of commercial uses, subject to the following condition that all outstanding TRC conditions are met. This motion was seconded by Councilwoman Bellamy.

Upon inquiry of Councilwoman Jones, Ms. Baynes said that the Shiloh Neighborhood Association was concerned with the sale of alcohol, but the owner has assured them that there would be no alcohol sales in those businesses. They would have no problem in deleting the condition regarding 30 calls per year.

Discussion occurred, initiated by Councilman Davis, regarding the owner's ability to change uses in the building (City Exhibit 4).

Out of the discussion surfaced an amendment to the motion, which was agreed to by Councilman Dunn and Councilwoman Bellamy, to add a condition "that the uses permitted on this property be limited to those listed permitted uses under the Neighborhood Business zoning classification and that changes in uses may be approved provided they do not significantly increase the impact of any of the uses on the property."

The amended motion carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 448

C. PUBLIC HEARING TO CONSIDER REZONING 9 CURRY COURT FROM COMMUNITY BUSINESS II DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3200 - ORDINANCE TO REZONE 9 CURRY COURT FROM COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 6:00 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone 9 Curry Court from Community Business II District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on December 31, 2004, and January 7, 2005.

There has been a recent rezoning action in 2004 of a conditional use rezoning at 407 Liberty Road (NW corner of Liberty and Ridge Street intersection) from RM-8 to Office/Conditional Use Zoning for the purpose of locating an attorney's office on the property.

The subject property is located in the City of Asheville's extraterritorial jurisdiction, at the corner of Liberty Road and Ridge Street, just north of the intersection of Liberty Road with Smoky Park Highway. This rezoning was initiated by the Planning and Zoning Commission following the Commission's examination of a conditional use rezoning in the area in the summer of 2004. The property is owned by Larue W. Bolick and Mary A. Greene. The Commission felt, in its initial

review of the area, that Community Business II zoning extending so deeply up Liberty Road appeared to be an inappropriate incursion of such zoning into the neighborhood. The Commission's original rezoning proposal was more extensive but was scaled back by the Commission in December of 2004.

The zoning surrounding the site is varied. Zoning to the west is RM-8; to the south CBII; to the east RM-16; and to the north RM-8 and Office/Conditional Use Zoning. The Manufactured Home Overlay is found on most properties located to the north and west of the subject parcel.

Land use to the south, along Liberty Road and the Smoky Park Highway, is commercial. Except for the attorney's office immediately to the north, the remainder of the surrounding property is a mix of manufactured and stick-built single-family homes.

9 Curry Court presently contains a manufactured home community with four (4) units on site. The property is metered and numbered for five (5) homes.

The CBII District and RM-16 District both allow a residential density of sixteen (16) units per acre. Neither allow for manufactured home parks.

Sanitary sewer and water are not currently extended to these properties.

The property owners affected by this rezoning were sent personal letters regarding this matter in advance of the Planning and Zoning Commission.

Pros

1. The current CBII zoning intruding so deeply into the residential community off Liberty Road would allow a potentially incompatible commercial development to occur at an intersection that is residential in nature.
2. RM-16 zoning, which is also found to the east across Liberty Road from the subject properties, provides a nice transition between the commercial uses on the corner of Smoky Park and Liberty and the remainder of the area that is residential in character.
3. The orientation of this lot, both topographically and access-wise is toward the residential neighborhood and not to the commercial developments along Smoky Park Highway.

Cons

1. Surrounding area (except to the south) is predominantly single-family in nature.
2. Manufactured home park on the property will remain nonconforming with this rezoning.

Staff recommended approval of this rezoning request to the Planning and Zoning Commission. The Commission considered the matter in the context of a larger rezoning proposal at its meeting on December 1, 2004, and unanimously (6-0) recommended approval of the rezoning of this parcel.

Mr. Billy Woody, area property owner on Liberty Road, said that Liberty Road is already a highly travelled road and didn't want any more development on that property that would increase traffic.

Mayor Worley closed the public hearing at 6:06 p.m.

When Vice-Mayor Mumpower expressed concern of a City-initiated zoning with no input from the property owners, Ms. Cogburn said that she has sent one personal letter and two notifications to the property owners in Sylvia by first class mail and has received no response from them.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved to rezone 9 Curry Court from CBII to RM-16. This motion was seconded by Councilwoman Bellamy.

Discussion surrounded whether the property owners actually received notice and whether certified mail should be used to notify property owners when there is a City-initiated zoning. Mayor Worley researched the address and noted that the property owners have paid their 2004 property taxes and he felt sure that they received the letters.

Councilman Davis felt this action to downzone was arbitrary and would not support the motion.

After further discussion, Vice-Mayor Mumpower withdrew his motion to rezone from Community Business II District to RM-16 Residential Multi-Family High Density District

Councilman Dunn felt that the City is overstepping their authority when they rezone someone's property and would not support the rezoning request.

Planning & Development Director Scott Shuford said that this was the initial zoning when the area was taken into the extraterritorial jurisdiction area. He explained that the Planning & Zoning Commission reviewed a zoning change by a nearby property owner in that general area and after visiting the site they saw that the zoning of this property was out of character. That was their basis for requesting Planning staff to pursue this particular rezoning.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford said that we can accomplish a better notification procedure through written procedures when the Planning & Zoning Commission initiates a rezoning request.

Mr. Jerome Jones, Planning & Zoning Commission member, said that the Commission felt the property needed to be rezoned because it is oriented toward residential and it would be an ideal location for some infill multi-family housing.

Councilwoman Jones moved to rezone 9 Curry Court from Community Business II to RM-16 Residential Multi-Family High Density District.

Discussion then occurred whether RM-16 was the appropriate use of the property.

Councilman Newman felt that perhaps we have not exhausted the list of possible zoning districts that would be appropriate in this particular location.

Mr. Shuford suggested City Council might wish to continue this matter in order to give Planning staff the opportunity to try to reach the owners by a more forceful type of postal notice. Also, if Council is interested in a more intense zoning, then it would have to be reconsidered by the Planning & Zoning Commission again.

Councilwoman Jones withdrew her motion to rezone from Community Business II to RM-16 Residential Multi-Family High Density District. She pointed out that this seems like an appropriate way to rebuild the stock for multi-family since we do rezone residential multi-family to different classifications. She felt this would have been a good move for potential development of

affordable housing. A different zoning classification, however, may give the property owner a little more flexibility.

Councilman Newman would like for there to be more of a potential for mixed use activities on this site as a use by right, other than RM-16 allows. He also didn't wish to downzone the property to less than 16 units per acre. If there is a zoning classification that would allow 16 units per acre, but provide some protection for the area of incompatible development, then he would be supportive of that. Mr. Shuford responded that the Community Business I District would accommodate Councilman Newman's request,

Councilman Davis would support the Community Business I District because it is more compatible with what is already on that street and it allows the residential component to remain. Therefore, he moved to rezone 9 Curry Court from Community Business II District to Community Business I District. This motion was seconded by Councilman Newman.

Upon inquiry of Councilwoman Jones, Ms. Cogburn said that the difference between Community Business II District and Community Business I District is primarily the size of the structures allowed.

The motion made by Councilman Davis and seconded by Councilman Newman to rezone 9 Curry Court from Community Business II District to Community Business I District carried on a 4-3 vote, with Mayor Worley, Councilman Davis, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

City Attorney Oast said that due to the vote, this ordinance will be brought back at Council's next formal meeting for a second and final reading. Mayor Worley noted that there will be no additional public comment taken at that time.

ORDINANCE BOOK NO. 21 – PAGE 454

D. PUBLIC HEARING TO VACATE AND CLOSE THE ENTIRE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

ORDINANCE NO. 3201 - ORDINANCE DIRECTING THE DIRECTOR OF BUILDING SAFETY TO VACATE AND CLOSE THE ENTIRE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

Code Enforcement Officer Jeff Baker said that this is the consideration of an ordinance directing the Director of Building Safety to vacate and close the entire dwelling located at 1086 Hendersonville Road. This public hearing was advertised on December 31, 2004, and January 7, 2005.

Mayor Worley opened the public hearing at 6:42 p.m.

Mr. Baker said that the dwelling at 1086 Hendersonville Road is a wooden structure containing nine separate dwelling units. After unsuccessfully attempting to work with the property owners to bring the dwelling into compliance with the Housing Code since December of 1998, City staff's efforts to bring about compliance intensified during the summer of 2004. In August of 2004, the property owners entered into a Memorandum of Understanding but failed to honor their commitment to bring the dwelling units into compliance with the Housing Code. As a final effort to obtain compliance, City staff asked City Council to adopt an ordinance ordering certain of the

dwelling units to be vacated and closed, which Council adopted. Despite the ordinance directing the property owners to vacate and close certain of the dwelling units, the property owners continue to offer said dwelling units as well as the remaining dwelling units for rent.

A second hearing was held on October 15, 2004, whereby Elizabeth Tate, one of the property owners, made it clear that she had no intentions of voluntarily vacating and closing the dwelling. A Findings of Fact and Order was entered ordering the property owners to vacate and close the entire dwelling or otherwise bring the dwelling into compliance with the Housing Code by November 15, 2004. To date, the dwelling has not been brought into compliance with the Housing Code and neither has a housing certificate been issued.

After trying every possible approach to obtain the property owners' compliance with the Housing Code, such has failed. Meantime, the property owners continue to rent and receive rent for each of the unfit dwelling units, which is a violation of the City's Housing Code.

Staff recommends City Council adopt an ordinance ordering the entire dwelling located at 1086 Hendersonville Road vacated and closed until brought into compliance with the City's Housing Code.

In response to Mayor Worley, Mr. Baker said that the current owner has told him that she has sold the property many times over the past 1.5 years. He said that when a new owner comes into the office and shows him that they now own the property, the City will work with that person. The City would enter into a Memorandum of Understanding and give the new owner a certain amount of time to bring the units into compliance.

Upon inquiry of Vice-Mayor Mumpower, Mr. Baker said that the fines are the responsibility of the present owner.

In response to Councilman Dunn, Mr. Baker said that no City taxpayer money has been used to relocate the current tenants.

Mr. Fred English felt this property should have been vacated long ago.

Ms. Robin Merrell, on behalf of Pisgah Legal Services, said they have a strong interest in seeing the Minimum Housing Code enforced and support this action. In addition, they support the use of Community Development Block Grant funds to help relocate the current tenants.

Mr. Walter Plaue felt that City Council needs to proceed quickly to get these people out of living in these unhealthy and unsanitary conditions.

Mayor Worley closed the public hearing at 6:53 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3201. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 456

E. PUBLIC HEARING TO AMEND AND ADOPT THE RULES OF PROCEDURE FOR THE CIVIL SERVICE BOARD

RESOLUTION NO. 05-8 - RESOLUTION AMENDING AND ADOPTING RULES OF PROCEDURE FOR THE CIVIL SERVICE BOARD

Mayor Worley opened the public hearing at 6:52 p.m.

Human Resources Director Belinda Odom said that this is the consideration of a resolution amending and adopting the Rules of Procedure for the Civil Service Board to promote efficiency in the classified services. This public hearing was advertised on December 31, 2004, and January 7, 2005.

The Civil Service law has undergone various changes since it's inception in the early 1930's, the most recent of which occurred in 1999. Despite the many changes in the law, the Board's rules and regulations have not kept pace.

The proposed recommended Rules of Procedure provide current procedures to guide the Board in conducting meetings and hearings. This is a summary of former documents used to guide the Board.

The Conflict of Interest section specifically was a technical change to the document.

The Rules are intended to repeal all other previously adopted rules and regulations of the Board, which have not kept pace with the changes in the law.

The proposed rules were adopted by the Civil Service Board members after numerous meetings with City staff and the Board's attorney. Following distribution of the proposed rules to employees, no objection was raised to moving forward with the adoption of the rules by City Council.

Advantages:

- Assist the Board during meetings
- Specifies the duties and responsibilities of the Board
- Provides clear guidance to complainants and attorneys

Disadvantages: None known

The Human Resources Department's staff recommends that City Council adopt the amended Rules of Procedure.

Mayor Worley closed the public hearing at 6:53 p.m.

Upon inquiry of Vice-Mayor Mumpower, Ms. Odom explained the major changes in the conflict of interest section and also the section dealing with witnesses.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-8. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 459

At 6:59 p.m., Mayor Worley announced a short recess.

IV. UNFINISHED BUSINESS:

A. COLLEGE STREET ROADWAY IMPROVEMENTS

Traffic Engineer Anthony Butzek said that the original presentation on the College Street Gateway Boulevard Project was given to Council on April 20, 2004. Since that time they have had a public meeting in August of 2004. He said that construction is currently planned to begin almost immediately on this project.

He said that College Street, which once served as US 70, is a main east-west artery. When I-240 was constructed, it absorbed much of the traffic that was on College Street. Traffic counts taken in year 2004 were just over half of the traffic counts taken in 1954. There has been a significant decrease of traffic. The daily traffic on College Street is about 13,000 vehicles per day. It is our widest city-maintained street at about 76' wide. There is a resurfacing plan for the street.

He showed Council a proposed design outlining the specifics, which included: design speed is 20 miles per hour; two-lane median-divided; parallel parking on north, angle parking on south; striped bicycle lanes; safe pedestrian crossings; roundabout at Valley/Oak Streets; and all lanes maintained at College and Charlotte.

Mr. Butzek then explained a traffic comparison, which analyzed traffic, travel times and speed for the existing conditions in 2004, a 2-lane road with a roundabout in 2014 and a 2-lane road with no roundabout in 2014.

He explained the design allows for future expansion as follows: extends eastbound left-turn lane at Charlotte Street from 160 feet to 210 feet; allows future addition of 2nd eastbound left-turn lane at Charlotte Street; and effectively increases capacity of the corridor by 25% by easing constraint (College Street and Charlotte Street).

Some project amenities include: better traffic flow; increase street network capacity; speed limit compliance through design; improved pedestrian safety; and relief for Buncombe County Sheriff's Department acting as crossing guards. He then showed Council a traffic simulation of the area.

The design is consistent with the Pack Square Renaissance Plan, the Greenway Master Plan and the Asheville City 2025 Plan.

Ms. Carol King, Chair of the Pack Square Conservancy Board of Trustees, said that they support the project as it relates to the section of the improvements that are adjacent to their Park Renaissance Project. She stressed that timing is real important in that the diagonal parking spaces along the Park need to be in place before they start tearing up the ground, which is scheduled to be in July of 2005. She also explained that this project has been part of their design presentations, so it is an expectation of our donors that we are moving forward with the entire design, which includes College Street.

Ms. King responded to various questions from Council, some being, but are not limited to: how many parking spaces will be removed in the first phase; is the Pack Square Conservancy confident that their construction will begin in July of 2005; and how much money have they raised in their fundraising efforts.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that the total cost of the project is $185,000. Of that, $75,000 is for the resurfacing that would have occurred anyway, and approximately $10,000 is for markings that would have had to be spent anyway. The incremental

cost is about $100,000. He said that the timeline for construction is to begin in January and is expected to be completed in mid-summer.

Mr. Butzek then responded to various questions/comments from Council, some being, but are not limited to: has Buncombe County been a part of the discussions; has anyone living in close proximity to this project raised concerns and what measures will be taken to get people to drive 20 mph.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that roundabouts are generally considered very safe for pedestrians. One of the things a roundabout doesn't do well as far as pedestrians are concerned is that cars are yielding to pedestrians, as opposed to stopping as they would at a red light. Pedestrians are forced to look at traffic and observe that the cars are stopping before proceeding. Whereas, at a signal they naturally assume that cars are stopping because they have a red light. The positive of that is that it forces the pedestrian to be more involved in abiding their own safety. At a signalized intersection and a car runs the red light and hits the pedestrian, the pedestrian would be seriously injured and possibly killed because of the speed. At a roundabout, to his knowledge, there has never been a pedestrian fatality. The reason is that operating speeds in the roundabout are very low. He is confident that this roundabout will be a very safe and very efficient roundabout.

Vice-Mayor Mumpower considered this a bold experiment for the City that has the potential for a nice thing, but also has the potential to be something else. We are constricting lanes. He said that we have restricted traffic in other neighborhoods and personally he thinks we are doing a poor job of enforcing our traffic laws and deferring to passive traffic calming efforts that are marginally effective. Research tends to show that over time they don't work as effectively as we might hope they would. He is inclined to support this bold experiment because this offers an opportunity to make things better, however, he has apprehensions about the pattern of constraining and creating obstacles.

Mr. Butzek said that apprehension is natural anytime you have a significant change to the street network. There was certain apprehension on a number of other projects that were successful. While each project may not be perfect, each one is a large improvement. For example, the W.T. Weaver Boulevard is similar in that there was a roundabout involved. Roundabouts tend to generate a lot of controversy anytime they are proposed. The W.T. Weaver Boulevard roundabout has worked extremely well and to his knowledge there has been no reported crashes. It has improved the safety of that intersection. There are fairly standard measures here on College Street, in that we are keeping straight lines, other than the roundabout.

Councilman Newman said that College Street is an important street in the core of our City. He felt it is appropriate to invest money to make this happen because it is such an important part of the downtown community.

Mayor Worley felt the roundabout will allow traffic to flow smoothly and much more efficiently.

Councilman Dunn was concerned about the way staff presented this to Council and the way it was being pushed through. He felt $185,000 is a lot of money and we just got through approving a $20 Million parking deck, and maybe infrastructure costs with the Pack Square Conservancy Project. Regarding the one lane traffic in each direction, he expressed concern about traffic congestion when they are trying to parallel park or to back out of the angled parking spaces.

City Manager Westbrook responded to Councilman Dunn about why this money is not in the traffic calming budget,

Mr. Butzek explained there are costs of doing nothing: (1) continued use of Buncombe County Sheriff's Department as crossing guards; (2) $10,000 traffic signal upgrades; (3) $4-5,000 annual signal maintenance; and (4) the opportunity cost is tremendous.

Mr. Butzek then showed City Council a traffic signal simulation of the flow of traffic on College Street.

Councilman Dunn asked if we really needed parallel parking on College Street with the new parking decks. Mr. Butzek responded that we always have requests for new parking and this area is a high demand parking area, especially given the lack of parking decks near it now. Whether we can reduce some of that parking in the future once the parking decks are in place will certainly be an option. They will be adding approximately 12 new parking spaces on College Street.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that there will be about 25-30 angled parking spaces that will have to back out to enter the traffic pattern and there is some additional hazard associated with that.

Vice-Mayor Mumpower said it was hard to imagine backing out of an angled parking space into the current traffic on College Street. Mr. Butzek responded that there will also be a 6-foot wide bicycle lane and one benefit that provides is that the cars backing out will have that 6-foot buffer before they get into traffic.

Councilwoman Jones liked the plan in that it seems to really include a lot of different needs – a little more parking, helps with pedestrian safety, good looking project, and it will overall slow down traffic.

Mayor Worley said that no further action is required by City Council in that Council had given staff consensus to move forward in April of 2004.

At 7:58, Councilwoman Bellamy left the meeting.

V. NEW BUSINESS:

A. RESOLUTION NO. 05-9 - RESOLUTION APPROVING THE PLAN "LOOKING HOMEWARD: THE 10-YEAR PLAN TO END HOMELESSNESS IN ASHEVILLE AND BUNCOMBE COUNTY"

Mr. Jerome Jones, Chair of the Joint City/County Steering Committee, said that this is the consideration of a resolution approving the Plan "Looking Homeward: The 10-Year Plan to End Homelessness in Asheville and Buncombe County."

In May 2004 City Council and the Buncombe County Board of Commissioners appointed a joint advisory Task Force to prepare a 10-Year Plan to End Homelessness, with initial priority on the chronic homeless population.

The Task Force, made up of business, non-profit, and government leaders, met six times and, with assistance from City and County staff and from Pisgah Legal Services, has produced the a report: "Looking Homeward".

He reviewed the goals of the plan: (1) reduce the number of people who become homeless; (2) increase the number of homeless people placed into permanent housing; (3) decrease the length and disruption of homeless episodes; and (4) provide community based service and supports that prevent homelessness before it happens and diminish opportunities for homelessness to recur.

He said there are 2,000 a year homeless - 700 in a given night (300 of those are chronic homeless). He defined chronic homeless as "an unaccompanied adult with a disabling condition who is homeless a year or longer or has 4 episodes of homelessness in 3 years."

He reviewed the success of Housing First: (1) Pathways to Housing: New York – After 5 years, 88% of those who entered the program remained in permanent housing; (2) Beyond Shelter: Los Angeles – After 5 years, 80% working, only 2.3% had relapsed into substance abuse; (3) Minneapolis Chemical Dependency Program – After one year (a) 56.6% living independently remained sober; (b) 56.6% living in a halfway house remained sober; and (c) 90.0% living in supportive housing (Housing First) remained sober; (4) Philadelphia – Reduced number of chronic homeless from 850 in 1998 to 130 in 2004; and (5) Asheville Shelter Plus Care – 80% remained housed after 5 years.

The report's primary recommendations fall under the following headings:

1. **Leading the Way: Designation of a lead entity** – The Affordable Housing Coalition is recommended as the organization that will oversee implementation of the plan. However, the Task Force suggested City Council do a Request for Proposals (RFP) because there are any number of non-profit agencies in Asheville.

2. **Developing the Infrastructure: HMIS** – A Homeless Management Information System, or HMIS, will link all services, screen for program eligibility, and gather data needed to monitor progress of implementation.

3. **Closing the Front Door: Prevention** – Better coordination of financial assistance and discharge planning for people leaving public institutions.

4. **Opening the Back Door: Housing First** – Development and implementation of a community-wide Housing First program that will include permanent housing for all homeless.

5. **Keeping it Going: Housing Plus** – A new approach to providing services to ensure that homeless individuals and families placed in permanent housing can remain housed in the long-term.

Regarding current costs, Mr. Jones said the City of Asheville currently spends approximately $500,000 on services to prevent homeless and build supportive housing. Buncombe County spends approximately $425,000 per year in supporting the maintenance and development of affordable housing. Buncombe County Department of Social Services spends $935,500 per year in emergency cash assistance to prevent homelessness.

Regarding costs of the plan, Mr. Jones said, (1) Lead Entity: approximately $45,000 per year if lead entity is a non-profit; (2) HMIS: $20-25 in the first year; less in subsequent years; and (3) majority of service costs will be covered by Medicaid and other health sources; housing will need to be subsidized for the chronic homeless population at a rate of approximately $4,200 per year per person.

The next steps in this process would be for City Council and the Board of County Commissioners to adopt a joint resolution. In addition, the City and County staff need to work together to issue an RFP for the lead entity and prioritize steps to implementation of the Plan.

Ms. Leslee Kulba felt that the plan has a lot of good, however, she pointed out several concerns and felt that the cost was too much.

Mr. Tom Burkhart, Buncombe County resident, presented and familiarized City Council with information on an organization called The Healing Place. The Healing Place is a 501 (c) (3) non-profit organization, which is supported by gifts from individuals, corporations and foundations. The Wake County program is a rescue, recovery, and rehabilitation facility for homeless men with alcohol and drug addiction. He then responded to questions from Council about The Healing Place, some being, but are not limited to: what percentage of people who come to The Healing Place are either chronically or temporarily homeless; can the model of The Healing Place work in tandem with Asheville's 10-Year Plan; what is the operating budget in Wake County and in Louisville, Kentucky; and what amount is spent for medication.

Ms. Beth Maczka encouraged City Council to support and invest in this plan.

Ms. Christy Carter, representing the Hospitality House of Asheville, spoke that the plan is encouraging and the prevention piece is often overlooked. She encouraged Council to support the plan and, as a service provider she is willing to change the way they do things in order to see the plan come to fruition.

Upon inquiry of Councilman Davis, Mr. Jones said that there is no conflict with The Healing Place and this plan. He said that the Police Department sent two officers to review that plan in Wake County. He said that it is a separate issue whether City Council wants to spend the funds to set up that type of program, but certainly anything that helps the homeless population rid themselves of their addiction is a positive thing.

Ms. Robin Merrell, representing Pisgah Legal Services, said that this plan is a long-term solution and it could be 2-3 years before we really begin to see the effects of it. A social setting detox, or something akin to The Healing Place, could help us see results sooner but also help alleviate the problems that the Police Department is having with the homeless people inebriated downtown.

Councilman Newman noted that if we endorse the Housing First model, we are not in any way precluding specific concepts out there, like The Healing Place concept.

Mr. Jones said that there is an expectation that some service provides who deal with temporary care of the homeless may disappear. One of the things that impressed him about the Task Force was that there were people on the Task Force whose organizations are going to be out of business if this works and yet they were supportive of that.

Councilman Newman thanked the people who worked on the Task Force. He felt this plan holds a real promise for change. This will affect the lives of the people who are in homeless situations and better their lives.

Mr. Jones said that this action is scheduled to go before the Buncombe County Commissioners on Tuesday, January 18, 2005, for their consideration of adoption.

Councilman Dunn would not be able to support this plan because it has no funding source. He would prefer to move forward after more information is received. He was also supportive of a smaller plan.

Mayor Worley supported the plan because it adopts methods that have been proven across the nation that will best treat and support the homeless population and stands the best chance to get that population off of our streets. He thinks it is the fiscally responsible thing to do. This plan demonstrates what the hidden costs are of treating homeless. It's a paradigm shift for the agencies that are currently providing services to the homeless. The agencies will shift the way they use the funding they receive and use them in conjunction with the plan. Also, the resolution supports the plan and it does not contain a commitment for funding of any specific nature. He feels adoption of the plan opens the door to go out and start seeking revenue sources and to start talking with the current providers to shift the way that their revenues are utilized in conjunction with treating the homeless.

Councilwoman Jones said that we have a strong non-profit and private sector coming together and endorsing a plan. We have the base plan and when you go to funders, a little bit of government money goes a long way in that federal competition. If we are serious about helping the deserving poor, this makes a lot of sense.

Vice-Mayor Mumpower felt this is a good effort to address a real problem that affects us all. However, he does have concerns about the plan. He felt the plan is too complex and is reaching much further than prudent or realistic. With his background in social work, he understands there is a real tendency for good people who want to make a difference to reach for hope over realism. He felt you can't throw money and hope at this – it takes something more substantial. He's heard that this plan is different in that we are not going to require people be sober to get into our program. But the fact is that most of the people that deal with chronic substance abuse do it that way not because they want to but because they know that is the only way it works. The chronic abusers are controlled by their addiction. He felt that the research and statistics cited is somehow or another being idealized. It runs too contradictory to too large a body of information on chronic substance abusers. We have a long standing history in this country of coming up with statistics that justify a program and later determine that there was something missing. He has apprehensions that we might be doing that now. The argument is that we will be using current money to do this. But, when you look at the numbers of people that you will be able to realistically intervene with, we are not going to be able to do away with the money that we are spending right now. Realistically we will have to create new dollars on top of our old dollars. It is not realistic to say that we will achieve great savings from this. There is no way that housing is the key to the chronic homeless as they are so immersed in their addition. He doesn't think it is realistic that the City of Asheville should intervene at a social services level. We have a tremendous hard drug problem, which is a dramatic City charge, and we don't have the money to hire the officers to fight the hard drug problems. We have budgetary limitations. We have too many people in this City who struggle to make a living and he doesn't think we should degrade those people by stepping into programs that we cannot realistically achieve. He doesn't believe we are realistically addressing human nature with this program. He feels we are being hopeful and have good intentions, but he doesn't see the realism.

Councilman Davis said that he has worked in close proximity with the homeless and sees it firsthand. He feels that we have to do something because what we have done is not really working. He said this is a good plan, but he's not so certain that we can make it function for that chronic group. He felt the five-prong approach is good and he can see programs like The Healing Place dovetailing in. He has some problems with the ambiguity of funding. If we adopt the plan we will be expected to put some funds into the plan and he doesn't know where we will get the funds to make this happen. He doesn't want this plan to be used as a tool for people to say "you said you would do it and we expect funding for it". It makes sense to take one step at a time to go forward starting with an RFP. But he doesn't feel good about representing the people who are barely making ends meet to pledge millions of dollars of their tax money for a very small increment of people. We could maybe work with The Healing Place at a set amount and it might be overall successful than what we are doing here. He thinks the plan is too open-ended right

now. He respects what has been done and he would like to endorse this as a way to accomplish it, but by no means to open the pocketbook and say this is the way to go. There is a lot to be known about the plan, but it is a step.

Councilman Newman felt that the City has adopted other plans in the past and have not implemented them, so he felt that adoption of this plan would not be used to brow-beat us for funding. He felt the plan has concepts that are important. The Task Force has identified some things that are working and he felt the concepts are important enough that we want to say yes to the concepts. It is a vision. We are not at the point yet for the Task Force to bring us a first-year budget. Even if we agree to the concepts and the plan, that is not an indication of how it competes with all of the other important priorities that our community faces in terms of funding.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 05-9. This motion was seconded by Councilwoman and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no".

RESOLUTION BOOK NO. 28 – PAGE 469

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of December 3-16, 2004: Andy Piatek (Water), Regan Sheeley (Water), Phil Nesbitt (Streets), Robert Kuntz (Police), David L. Brown (Water) and Russell T. McCrary (Police).

The following claims were received by the City during the period of December 17-30, 2004: Robert E. Jones (Streets), Abdoulaye Tounkara (Streets), Teresa O'Connor (Police), Rita Dale Early (Streets), Dewanna Tucker (Sanitation), Linda M. Bryant (Sanitation), Lauren O'Leary (Sanitation) and George Whiteside (Sanitation).

The following claims were received by the City during the period of December 31, 2004 – January 7, 2005: Rebecca Ann Joyce (Water), Moses Simuel (Transit Services), Marika Von Viczay (Water), Rosemary Franklin (Water) and Robert Troy (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hamilton, representing Asheville Citizens for Quality Government, presented City Council with a statement which asked Council to consider the following priority objectives for 2005: (1) improving the quality of education received by every student in Asheville; (2) increasing the minimum wage through a just and living wage ordinance to $8.50 per hour, with annual incremental increases each year to $10.00 per hour in 2008; (3) improving the quality of public transportation for all citizens of Asheville.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:17 p.m.

Magdalen Bourleson
CITY CLERK

Claudia R. Worley
MAYOR

Tuesday – January 18, 2005 - 3:00 p.m.

Present: Vice-Mayor R. Carl Mumpower, Presiding; Councilwoman Terry M. Bellamy (excused from meeting at 5:50 p.m.); Councilman Jan B. Davis; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Charles R. Worley and Councilman Joseph C. Dunn

CONSENT AGENDA:

Grant Applications for Montford Complex and Aston Park

Summary: The consideration of two resolutions authorizing the Mayor to apply for a grant and enter into an agreement with the N.C. Dept. of Environment and Natural Resources to assist with the renovations of the Montford Complex and Aston Park.

Funds are available through the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the North Carolina Parks and Recreation Trust Fund (PARTF) to assist with the development of parks and greenways.

The renovation of Aston Park has been identified as a priority by the community at large and by the tennis community. For many years, the Dick Covington Foundation raised money to help build a new tennis center at the park. The City of Asheville now holds $260,000 from the Covington Foundation to help build the tennis center. In anticipation of the park transfer as part of the Water Agreement, Parks and Recreation wishes to pursue grant funds to renovate the park including construction of a new the tennis center, and renovation of the playground, trails and basketball court.

The Montford Complex is in the heart of the Montford neighborhood and the most heavily used park featuring the Montford Center and the surrounding park. The center and features in the park are in need of renovation and in some cases complete replacement in order to meet safety and handicap accessibility requirements. The Parks and Recreation Department wishes to pursue grant funds to renovate the park including improvements to the center, new amphitheater, playground, ball field lights, ropes course and basketball courts.

The Parks and Recreation Department is requesting $260,000 in grant funds for renovation of Aston Park, and $150,000 for renovation for the Montford Complex from the N.C. Parks and Recreation Trust Fund. Each grant application requires a dollar for dollar cash match. The cash match for renovation of Aston Park is available in the Parks and Recreation Department's existing Capital Improvement Project budget via the Dick Covington Foundation. The cash match for the Montford Complex renovation is in the proposed Parks and Recreation Department's Fiscal Year 2005-06 Capital Improvement Project budget.

The Reid Center renovation, a top Capital Improvement Project priority, is not being considered for the 2005 PARTF funding cycle, but will be a PARTF application in January 2006. The PARTF awards up to $500,000 requiring a dollar for dollar cash match. The Reid Center fundraising team wishes to apply for the full amount but at this time the cash match is not available. By 2006, the first year of fundraising will be complete and matching funds will be in place to apply for the full amount.

This action complies with City of Asheville Strategic Operating Plan, Council Focus Area: Natural and Built Environment, Goal 2: Increased greenway benefits equitably throughout

Asheville – Continue to implement and develop greenways that enhance quality of life for Asheville.

Pros:

- The trail in the Aston Park renovation will link densely populated neighborhoods near downtown Asheville to the Clingman Forest Greenway Corridor, which will connect to the French Broad River Greenway Corridor.
- Continue to make progress on the Parks and Recreation Department's strategic plan to renovate and improve Montford Complex.
- Respond to public demand to improve Aston Park.
- Be ready to manage Aston Park upon transfer from Buncombe County.
- Raise outside funds to support facility renovations and reduce reliability on City funds to support Capital Improvement Project cost.

Cons: None noted

The Parks and Recreation Department recommends the City of Asheville apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund for $260,000 for renovation of Aston Park, and for $150,000 for renovation of the Montford Complex.

Parks & Recreation Director Irby Brinson responded to several questions/comments from Councilwoman Bellamy, some being, but are not limited to: how did we chose which centers would be renovated with this grant; when is the Reid Center scheduled for renovation; how is the staff structuring in the Reid Center progressing; and what is the update with the church property.

Exchange of Property at Beaverdam Reservoir

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of an easement on real property located on Black Oak Drive for an easement on real property located on Pinecroft Road.

The City and Mr. & Mrs. Fulton H. Beville have negotiated an exchange of a driveway easement over the Beaverdam Reservoir property (PIN No. 9751.17-10-7654) on Black Oak Drive for a slope/fill easement across real property located on Pinecroft Road (PIN No. 9751.17-10-9594).

At the time that the Beaverdam Reservoir was built a substantial amount of fill was placed on the Beville's property thereby allowing a cost savings to the City and providing lateral support to the reservoir site maximizing the use of the property. The Beville's were not compensated for the use of their property, but instead understood that the use of the reservoir access road would be available to them to access a portion of their property not easily accessible from Pinecroft Road because of topography.

A formal arrangement has not been in place heretofore, but it is advisable to formalize the arrangement through an exchange of easements which will satisfy the City's need to keep the fill in place as well as the Beville's need to access their property.

The driveway easement would be 12' wide and about 350' long comprising an area of 4,200 square feet. Based on the tax value of the land per square foot (.92), at a 50% easement value, the driveway easement would have a value of $1,932. Water Resources staff estimates that the benefit to the City of having the fill in place would equal or exceed the value of the driveway easement.

The use of the driveway by the Bevilles will not impair the function nor security of the reservoir, but could improve security to the extent that the Bevilles would be able to observe the reservoir site.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will establish record title in the City of the right to have the fill area remain on the Beville's property.
- It will establish a clear description of the size and location of the driveway easement.
- It will formalize the arrangement thereby reducing the likelihood of future misunderstandings.

The negative aspects are:

- The driveway easement will limit the use of the reservoir property within the easement area.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff and Water Resources staff recommend adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of an easement on real property located on Black Oak Drive for an easement on real property located on Pinecroft Road.

New Street Name of "Owen Bells Lane"

Summary: The consideration of a resolution accepting the new proposed street name "Owens Bell Lane."

Mountain Housing Opportunities, Inc., owner of lots on Owens Bell Lane off of Clingman Avenue has petitioned the City of Asheville to accept the street name " Owens Bell Lane." The new street will begin at Clingman Avenue and end at Rector Street.

City staff recommends adoption of the resolution accepting the new street name of "Owens Bell Lane."

Governor's Crime Commission Grant for 800 MHz Radios

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Department of Crime Control and Public Safety for funds through the Governor's Crime Commission to assist with the purchase of 800 MHz VIPER-compliant radios for Asheville Fire Rescue and Asheville Police Departments.

Public safety agencies in WNC experienced a serious need for interoperability in their communications systems when mutual aid services were provided during the historic flooding of 2004. In response to this need, several public safety agencies from Asheville and Buncombe County are collaborating to establish an interoperable communication system, which will ensure a better communication link among all agencies. In addition to promoting efficient disaster response, an interoperable system will be an important component of terrorism prevention.

To support this system, Asheville Fire Rescue and Asheville Police Departments are partnering with other agencies (Buncombe County Rescue, Buncombe County Sheriff, Buncombe

County Emergency Services, Enka Fire, Haw Creek Fire, Reynolds Fire, Riceville Fire, Skyland Fire, Swannanoa Fire, and West Buncombe Fire) to apply for a $492,800 grant from the Governor's Crime Commission to purchase a total of 127 radios to be distributed among the participants. Asheville will assume lead responsibility in applying for the grant and purchasing all radios, including radios for our partner agencies. The grant requires a 25% match of the total cost ($492,800), or $123,200. The cost of the match will be shared by all participating agencies based on the number of radios each receives. The City's net cost is expected to be $61,300; it will come from the City's fund balance.

This action coincides with the City of Asheville's Strategic Operating Plan under the focus area of Partnerships To Improve Critical Services & Infrastructure, goal #3: Explore ways for the City and County to work together to share in regional infrastructure investment needs.

Pros

- This project will help develop in WNC the statewide voice interoperable network including 800 MHz radios, in collaboration with the Voice Interoperability Plan for Emergency Responders (VIPER) that has been established by the state of NC.
- The public safety agencies listed are committed to interoperability and have agreed to participate in the project and to match 25% of the cost of the radios.
- The project will improve public safety in Asheville and Buncombe County by enabling WNC emergency responders to communicate with each other and with others across the state.

Cons

- The cost of the match.

The Fire Rescue and Police Departments recommends the City of Asheville apply for and enter into an agreement for grant funds to assist with the purchase of the radios.

Vice-Mayor Mumpower asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

IMPLEMENTATION PLAN OF DEVELOPMENT TASK FORCE'S RECOMMENDATION

Vice-Mayor Mumpower said that Councilman Dunn has requested that this item be postponed until the February 15, 2005, worksession in his absence.

Upon inquiry of Councilwoman Bellamy, Mr. Summey said that the blue items are recommendations that will require additional input and decisions by City Council. Those recommendations will also require additional citizen and industry input to finalize any changes to the ordinances or the processes. The items in green and white are items that City staff has already implemented.

Councilman Newman felt that the recommendations, in particular the ones regarding land use policies in the community, need to have a broader public input prior to City Council input and recommendation.

Vice-Mayor Mumpower felt it would be useful to have a representative from the Task Force at the worksession for a resource.

Building Safety Director Terry Summey thought it was appropriate to review the recommendations with City Council first for guidance in case City Council is not interested in pursuing a recommendation or may wish to change a recommendation. He said that the recommendations requiring Council consideration will include other public input sessions, e.g., (1)

any Unified Development Ordinance amendments will require a public hearing before the Planning & Zoning Commission and a public hearing before City Council; and (2) any amendment to the Standard Specifications and Details Manual is reviewed by a citizens group, prior to it being considered by City Council.

Discussion then followed on the process to be followed either prior to the worksession or after the worksession regarding public comment.

Council expressed their concern that they are reaching into areas that they didn't originally intend for the Task Force to reach into (land use planning vs. operational issues) and it has created complications on how to proceed. Therefore, it was the consensus of City Council to (1) instruct City staff to hold a public input session on the entire recommendations prior to the worksession; (2) invite members of the Task Force to the worksession as a resource; and (3) instruct the City Manager to report back to Council, after meeting with Mayor Worley, about how to proceed.

Councilwoman Bellamy moved to continue this item to the February 15, 2005, worksession. This motion was seconded by Councilwoman Jones and carried unanimously.

STAFF PRESENTATION ON UPDATE OF CAMPUS CREST

City Attorney Oast said that there has been a lot of observations about what is going on the Campus Crest site. The purpose of Planning & Development Director Scott Shuford's report is to assimilate those comments and respond to those in a structured fashion to Council. He pointed out that vested rights, under this conditional use permit have attached, and any action that Council takes that could lead to a reduction, modification or revocation of them could only occur following notice and opportunity to be heard by the developer. Depending on the nature of the action, it might require a quasi-judicial hearing.

Mr. Shuford said that this is a report to City Council addressing the buffer issue along Montford Avenue regarding the Campus Crest development.

After approval of the conditional use permit for the Campus Crest development in the Montford neighborhood, construction of the project began under a grading permit. As part of this construction, grading occurred near the Montford Avenue frontage of the project.

This area of the site was specifically covered under a condition of the conditional use permit that reads: *A landscape buffer containing the equivalent landscape material as a Type-A buffer should be provided along the Montford Avenue frontage; in addition, on-site tree retention shall be in accordance with the master plan provided by the developer.*

Concern has been expressed that the grading is inconsistent with either (or both) the permit condition or the statement made by the developer early in the conditional use permit hearing that indicated that an 80-foot strip of undisturbed vegetation would be retained.

Staff relies on the wording of the conditional use permit to ascertain compliance with the permit, not statements made in public hearings. The developer has disseminated the attached press release that describes site conditions that warranted tree removal in excess of his comments at the Council meeting. How Council might choose to address this is a separate issue.

Much of the discussion to date centers on whether the "buffer" requirement has been met. A Type A buffer is 15 feet in width and, along a frontage the length of the subject property, would contain 34 evergreen trees, 12 large-maturing deciduous trees, 12 small-maturing deciduous trees and 46 shrubs (75% which must be evergreen species). Staff will require the

installation of these plants prior to the issuance of a certificate of occupancy for any building on the site. These plantings are in addition to the 27 evergreen trees that have already been planted at developer initiative based on Tree Commission comments from the Technical Review Committee meeting that followed Council action.

The site plan in City Council's packet at time of conditional use permit consideration illustrates that existing vegetation would be retained in an area comprising roughly one-half of the property's Montford Avenue frontage. This vegetation is not specifically dimensioned but is shown as varying in depth, becoming much deeper near the Klondyke Homes side of the property as it transitions into the setback area on that side of the site. Current site conditions are similar to this plan from the Klondyke Homes side to roughly halfway to the end of the vegetation; from that point, the vegetation becomes more narrow but has been supplemented by the additional tree plantings. Retaining walls have been removed from the plan, allowing building roof heights to be lower than originally proposed from Montford Avenue, lessening the potential for visual impact from that viewing angle. Staff feels that if the intent of the condition was to ensure a thorough screening of the site from this area of Montford Avenue, once the buffer plants are installed and mature, the condition will be satisfied.

Councilman Newman said that after reviewing the Council meeting tape where the conditional use permit was issued, the developer seemed to be so explicit in terms of his discussion of the buffer that would be on Montford Avenue. Mr. Harnett, who was representing the developers, said that "I'm not sure you will ever get a true site line on the property from Montford because we are going to be keeping the existing 80-foot tree buffer along Montford." When Mr. Sneed, attorney representing the developers, asked Mr. Harnett "from the houses across the street on Montford will you be able to see this property at all?" Mr. Harnett showed a photograph of a view from the westernmost home across the street from the property line. When Mr. Sneed asked "Does your plan envision cutting any of those trees?" Mr. Harnett replied "no sir." Mr. Harnett showed other photographs and repeated that their plan did not envision cutting any of the 80-foot existing forest buffer. There were also other illustrations at the Council meeting that appeared to represent a pretty large buffer all along Montford Avenue.

Mr. Shuford agreed that the statements made by the developer was confusing. He said City staff can only follow what the conditional use permit states in trying to enforce the requirements.

Councilman Newman said that the conditional use permit states "A ... Type-A buffer ... along Montford Avenue frontage; in addition, on-site retention shall be in accordance with the master plan provided by the developer." In reviewing the tape of the Council meeting, one of the exhibits submitted showed an extensive buffer all along Montford Avenue. That, in conjunction with the developer's statement very clearly that their plan calls for an 80-foot existing forest buffer, creates the strong impression that the site plan included the 80-foot buffer.

Councilman Newman suggested City Council give direction to City staff to talk to the developers and ask them if they would be willing to sit down with people in the neighborhood and talk about what might be a reasonable way to move forward. Obviously we won't be able to fully replace the mature forest buffer that was clear-cut or the aesthetic values, economic values or environmental values of that mature forest buffer, but there might be some ways to mitigate some of the other impacts of the project. He felt that it would make sense for the neighborhood to designate a couple of representatives to represent their concerns to the developer.

Mr. Shuford felt that the developer would be receptive to a voluntary meeting with the neighborhood and his development team to talk about possible mitigating actions that can be taken. We certainly would want to schedule that to occur fairly quickly to preserve other options for City Council.

Councilwoman Jones wanted to feel more confident that our conditions are enforceable and that the people that are given the trust of this Council to do something are not making too much of a subjective call. Mr. Shuford said that staff will be bringing some code amendments to Council to streamline enforcement and make it more effective.

There was discussion, initiated by Councilman Davis, about the site adjacent to the property being used for fill dirt. Mr. Shuford said that there is a provision in our Code that requires developments that are within a certain distance of each other, that are basically done by the same people, that occur within a 3-year timeframe have to be treated as a simultaneous development. If we had a building that was going onto that site, then we would have grounds to pursue that as a violation. Unfortunately it was just a fill site and had we known about it ahead of time, we would have asked that it be part of the application, but we didn't find out about it until after the work had started.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford said that we can (1) toughen up our section that deals with the consecutive development of property in close proximity; and (2) look at landscape standards and see that in the cases where we do have this type of mature vegetation, that we can look at the possibility of requiring some retention of a wider area.

Regarding the conditional use permit condition regarding landscaping, Mr. Shuford said that the 4-5 hour public hearing mostly surrounded traffic, parking and site access. As a result of all that, and in part of the developer's earlier discussion about existing vegetation, he didn't think he did as good a job as he could have in making sure that everyone understood what was likely to happen in that area. That is an area he will improve on and do a better job of that in the future. In addition, we have some computer imaging capabilities which we will, over time, be able to superimpose a building on a site. If an area is sensitive, we may also request the developer to provide that information to Council in order to give as accurate picture as possible.

City Attorney Oast said that there is a difference between expectations and requirements. What Council is struggling with is that the conditional use permit requirements are somewhat less than what Council was led to expect would occur in the development of this project. He said there has been no determinable violation but we are going to look into the issue of the expectations that Council had to see if there is anything that can be done to address what has occurred. One of the things that could be clarified in the discussion between the staff, the neighborhood and developer is not so much what is there now, but what will be there when the project is finished.

Mr. Shuford suggested that his next step be to immediately discuss with the developer the possibility of holding a neighborhood meeting to see if they can find some way to mitigate the issue to match the expectations with what is actually happening. He will get with Councilman Newman to help him get people from the neighborhood who would want to attend, unless Council thinks it should be anyone who wants to attend. He personally thinks it may be more effective to limit it to a smaller number. Then, after the meeting he will report back to Council with the results. Then Council can decide whether they are satisfied with that or if they want to pursue other options – but some of those are time limited and we would want to hold this meeting as quickly as possible so as to not preclude Council being able to be flexible in taking whatever action Council wants to take.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that we can only enforce the conditional use permit, not what was said at the public hearing.

Councilman Newman felt there is a good case to be made that the developer is in violation right now of the conditional use permit based on the evidence they submitted to City Council under oath at the quasi-judicial meeting.

City Attorney Oast said that our staff has investigated the complaints received by them to date and determined there has been no violation. City Council can appeal that determination to the Board of Adjustment. If Council is going to do that, that is a decision that needs to be made by Council acting as a body and should probably be done with the opportunity for the developer to be heard. Mr. Shuford noted that the appeal to the Board of Adjustment is one of the options that has a time limitation on it. Basically, 30 days from today (when Council has been formally notified that staff doesn't think there is a violation) is Council's window to take that action, which is why we think it would be appropriate to very quickly get the developer in and have that neighborhood meeting.

It was the consensus of City Council to have staff immediately talk to the developers and ask them if they would be willing to sit down with representatives from the neighborhood and talk about what might be a reasonable restitution for this project to move forward. After said meeting, Mr. Shuford will report back to Council.

It was Councilman Newman's hope that the developer and neighborhood can reach a reasonable compromise. If not, he did want this to come back to Council and will welcome the opportunity for the developers to talk to us about what happened here and for them to explain themselves. Then Council can consider appealing this decision to the Board of Adjustment or taking other courses of action that may be available to them.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on January 25, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Notice of Violation Procedures

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of changing the notice of violation procedures to allow notification and citation of property owners for tenant noncompliance.

Article XVIII of the City of Asheville's UDO sets forth procedures for enforcing the provisions set forth in the ordinance. The section (Sec. 7-18-3) dealing with procedures for notice of violation and the issuance of citations currently provides that notifications go to the person in violation and only if that person cannot be ascertained shall the notification be sent to the owner of the property on which the violation is occurring. The ordinance makes no provision for notifying and holding a property owner responsible when their tenant is non-compliant with the city's ordinances. In practice, there have been a number of instances where a tenant has failed to comply and notification of the property owner has brought quick results. The City Attorney's office, in working with the enforcement staff of the Planning and Development Department, has suggested that a provision be added to the ordinance that clearly allows for this additional measure to gain ordinance compliance.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment

Pros-

- The amendment provides a mechanism for improving the effectiveness of gaining compliance with the ordinance.

Cons-

- The amendment may create conflicts between property owners and tenants.

The Asheville Planning and Zoning Commission recommended approval of this code amendment on January 5, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Ms. Cogburn responded to questions from Councilwoman Bellamy about whether the property owner or tenant would be liable for fines.

Proposed Group Home Changes

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of correcting and clarifying zoning districts that allow group homes as a use of right, subject to special requirements.

This proposed ordinance amendment is intended to correct an error made in the UDO that lists "Group homes" as uses by right, subject to special requirements in the RM-6 and RM-8 districts. Presently, the standards for these two districts lists "Group homes" as both uses by right, subject to special requirements and conditional uses. As presented and discussed during a UDO amendment adopted by City Council in August, 2003, the intent was for group homes to be conditional uses in the RM-6 and RM-8 districts. The proposed amendment would eliminate the words "Group homes" from the listing under uses by right, subject to special requirements.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment would correct the UDO to comply with City Council's intentions when adopting UDO requirements for group homes in August, 2003.
- This amendment would clarify the UDO for anyone seeking to know where group homes are allowed.

Cons –

- None

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the UDO for the purpose of correcting and clarifying zoning districts that allow group homes as a use of right, subject to special requirements.

Development Projects Scheduling Changes

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance to expedite the development approval process by allowing development projects to be scheduled for review by the Planning & Zoning Commission prior to consideration by the Technical Review Committee (TRC).

This proposed ordinance amendment is intended to expedite the development approval process by allowing projects to be scheduled for review by the Planning & Zoning Commission prior to consideration by the TRC. Presently, this section states that a project cannot be scheduled for a Planning & Zoning Commission meeting until after review and approval by the

TRC, which can place unnecessary restraints on time-sensitive projects. To help expedite the development review process in certain circumstances, staff is requesting this amendment to allow greater flexibility in scheduling applications for Planning & Zoning Commission review.

This amendment does not propose to change the number of required meetings, nor does it propose to change the order of the process. So, it does not limit opportunities for public review or comment in any way.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

This amendment would be one step toward meeting the goal of improving the plan review process outlined in City Council's adopted Strategic Operating Plan.

Pros –

- This amendment would help to expedite the review of development projects in certain situations.
- This amendment is consistent with the City Council's adopted Strategic Operating Plan.

Con –

- This amendment may be viewed by certain people as an attempt to "fast track" projects and limit public review.

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the UDO to expedite the development approval process by allowing development projects to be scheduled for review by the Planning & Zoning Commission prior to consideration by the Technical Review Committee.

Reducing Window Sizes and Buffer Changes in the Neighborhood Corridor District

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of reducing the amount of windows required on the front and side facades of buildings in the Neighborhood Corridor District and to allow alternative forms of landscape buffering to better accommodate development in the Neighborhood Corridor District.

The Neighborhood Corridor District (NCD) was adopted by City Council in November of 2002 for the purpose of accommodating medium-density, mixed-use development in appropriate areas throughout the City of Asheville. Since this District was created, staff has been looking for opportunities to evaluate if the design and development standards are effective and reasonable. Evaluation of several recently proposed projects leads staff to believe that the current standards for landscaped buffers, building setbacks for taller buildings, and the amount of windows (60%) required on first floor facades are overly restrictive.

After reviewing these requirements, staff is recommending that a landscaped buffer ten feet (10') wide with the provision of a fence eight feet (8') in height be allowed as an alternative to landscaped buffer requirements in the NCD. Alternative landscaping solutions could also be approved by the Planning Director to provide appropriate buffers in unusual situations. In addition, staff is recommending the elimination of a forty-foot (40') setback requirement for buildings of four stories. The intent of these proposed amendments are to allow greater flexibility during site development.

Staff is also proposing new standards of 45% window coverage for front facades and 40% windows for side street facades. The intent of this standard is to have buildings constructed with more traditional, first floor storefront windows. The proposed amendment offers more flexibility for developers while still meeting this intent.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- These amendments would offer greater flexibility and encourage future development within the NCD district.
- The buffer amendment would allow staff to find creative solutions for providing appropriate buffers against adjacent residential properties.

Cons –

- It is hoped that these amendments will promote multi-story, mixed-use development along key corridors. Certain people perceive this type of development to be incompatible with adjacent residential areas.
- Certain people may also prefer a firm standard to the allowance of flexible options for landscaped buffers.

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the Unified Development Ordinance for the purpose of reducing the amount of windows required on the front and side facades of buildings in the Neighborhood Corridor District and to allow alternative forms of landscape buffering to better accommodate development in the Neighborhood Corridor District.

Rounding Up Figures when Calculating Multi-Family Residential Densities

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of calculating maximum residential density requirements for multi-family residential development by rounding up.

This proposed ordinance amendment is intended to change the manner in which maximum residential densities are calculated in the UDO. In situations where the number of dwelling units allowed on a property is a fractional number, the proposed amendment states that all fractions of one-half or greater will be rounded up to the nearest number. For example, a property on which 8.4 units could be constructed would be limited to eight (8) units, but a property on which 8.5 units could be constructed would net nine (9) units, as the ".5" or higher is rounded up. This amendment would only apply to multi-family residential development of five (5) units or greater, not to duplexes, triplexes, and quadraplexes. To encourage mixed-use development along key corridors, the amendment is also proposed to apply to any level of multi-family residential use in the Neighborhood Corridor (NCD) and Urban Residential (UR) districts.

This amendment is consistent with the City of Asheville's adopted definition of "Smart Growth" as it would encourage higher density, infill development. This amendment is also consistent with policies recommended by the Affordable Housing Task Force as it would allow for a minor increase in housing density under certain circumstances.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment is consistent with the City's adopted "Smart Growth" policies.
- This amendment is consistent with recommendations of the Affordable Housing Task Force.
- This amendment could encourage infill housing by allowing a minor increase in housing density under certain circumstances.

Con –

- Certain people may be opposed to this allowance for additional residential density.

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the Unified Development Ordinance (UDO) for the purpose of calculating maximum residential density requirements for multi-family residential development by rounding up.

Addition of Wedding Chapels as a Specific Use and Establish Parking Standards for this Type of Use

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of establishing development standards for commercial wedding chapels.

Planning & Development staff has received several inquiries regarding the establishment of wedding chapels in the City of Asheville. It has been difficult to review these requests, because commercial wedding chapels are not presently listed as specific uses in the UDO. Staff has studied the potential impact of these uses and researched standards for wedding chapels in other communities in developing this proposal.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment would set clear, firm standards for commercial wedding chapels in the UDO for anyone seeking to establish this type of use.
- The proposed standards treat wedding chapels in a fair manner – allowing them in office or commercial districts while limiting their encroachment into residentially zoned areas.

Cons –

- Certain people may not agree with the standards proposed for wedding chapels.

The Planning and Zoning Commission recommended approval of these code amendments on January 5, 2005, by a unanimous vote of 7-0.

Increase the Maximum Length of Cul-De-Sac Streets

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of allowing longer cul-de-sac streets within manufactured home parks.

While reviewing the potential development of a manufactured home park in the extraterritorial jurisdiction area, a concern arose about the maximum length of 300 feet for cul-de-sac streets in a manufactured home park. Within typical residential subdivisions, a maximum

length of 1,000 feet for cul-de-sac streets is established based on N.C. Fire Code standards. Although streets within manufactured home parks are typically privately owned, they must be constructed to a similar standard as residential subdivision streets. After conferring with Engineering and Fire Department representatives and noting no issues, staff decided that it would be appropriate to consider similar cul-de-sac street lengths within manufactured home parks.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment would set consistent cul-de-sac street length standards in the UDO for a variety of residential uses.
- The proposed standards would allow for additional development to take place in certain situations.

Cons –

- The proposed amendment would potentially encourage a more linear pattern of development with fewer connections between streets.

The Planning and Zoning Commission recommended approval of this code amendment on January 6, 2005, by a unanimous vote of 7-0.

City staff recommends approval of the amendment to the UDO for the purpose of allowing longer cul-de-sac streets within manufactured home parks.

Vice-Mayor Mumpower asked that the record show that City Council received this information and instructed the City Manager to place these public hearings on the next formal City Council agenda.

ASTON PARK

Mr. Irby Brinson, Director of Parks & Recreation, said that this report is to provide information to City Council in regard to the transfer of Aston Park from Buncombe County to the City of Asheville.

On November 16, 2004, Buncombe County Commissioners unanimously approved the transfer of Aston Park back to the City of Asheville. During this discussion, the Commissioners stated that the park would be submitted to the City "as is" and contingent upon the City accepting the current employee at the facility (which current employee resigned on January 15, 2005) and not charging a non-City resident fee until the Water Agreement has been resolved. On December 13, 2004, the City Manager addressed this issue with the County Manager and expressed concern over the removal of the playground equipment by the County several months prior to this. The estimated cost of this playground equipment is $80,000. In addition, the City Manager expressed concern about the non-City resident fee issue and the fact that this additional fee would help the City off-set costs incurred for operation.

The Parks and Recreation Department has been working on a Park and Recreation Trust Fund grant for Aston Park that would be used in conjunction with the Dick and Irene Covington Foundation funds. These funds would be used for improvements to the Aston Park facility including the construction of a new tennis center as well as the installation of a new playground. One of the key issues in regard to this grant involves the City having the title to the property. The title would be necessary in order for the grant process to proceed, which is due on January 31, 2005. Staff, however, does feel that the City should be compensated for the cost of the playground and that staff be able to set differential fees for City residents beginning in July of 2005.

Pros:

- The transfer of the facility will allow the City to apply for a Parks and Recreation Trust Fund grant that will make improvements to Aston Park without any City financial contribution.
- The transfer of the facility will occur prior to the tennis season for 2005.
- Transferring this facility prior to other County facilities will set the standard for how the overall transition occurs.

Cons:

- The replacement of the playground equipment will become an obligation of the City if the County fails to pay for replacement or reinstallation.
- Transferring this facility prior to other County facilities will set the standard for how the overall transition occurs.

This transfer relates to the City of Asheville Strategic Plan regarding steps necessary to resolve the Water Agreement.

The Parks and Recreation Department recommends the transfer of Aston Park to the City of Asheville effective February 1, 2005, if Buncombe County agrees to pay for the operating costs for the Park through June 30, 2005. The City would then be willing to forgive the cost or reinstallation of the playground equipment and implementation of differential rates for non-City residents until July 1, 2005.

Discussion occurred around the playground equipment and the injustice to the area residents (who are also County residents) of not replacing the equipment, especially since the equipment has been in storage for approximately a year.

Mr. Brinson said that if Council proceeds with the transfer, a budget amendment will be necessary, in the amount of $63,548 for expenditures and $25,000 for anticipated revenue, for the operating costs for five months.

Mr. Brinson responded to questions from Councilwoman Jones about the sidewalk on the South French Broad side of Aston Park.

It was the consensus of Council to have Mayor Worley write a formal letter to Chairman Ramsey asking that the playground equipment be reinstalled in Aston Park, and if not, asking them to outline some of their reasoning why the equipment will not be replaced.

Budget Amendment for Club House at Aston Park from Covington Foundation Funds

Mr. Irby Brinson, Director of Parks & Recreation, said that this is the consideration of a budget amendment, in the amount of $262,576.05, from the Irene and Dick Covington Foundation for the construction of a club house at Aston Park.

Several years ago, the Irene and Dick Covington Foundation was established in order to preserve the memorabilia from Dick Covington's life and tennis career and to construct a new club house at Aston Park. This Foundation was a dream of the Covington's, and at Dick Covington's death his entire estate was placed in this Foundation. Since Aston Park was operated by the County, in 2002 the Foundation approved the transfer of these funds to Buncombe County to construct this facility. Delays occurred in this construction to the point where the Covington Foundation requested from both the City and the County that this process be expedited by transferring the funds back to the City of Asheville. Now that the County has approved the transfer of Aston Park back to the City of Asheville, this process can continue and

be completed. The total amount that was originally sent to the County totaled $278,709.56. There were expenditures for architectural services that came out of this account.

Pros:

- The facility will be built prior to the 2006 City of Asheville Open Tennis Tournament in July.
- The City will have complete control over construction.

Cons:

- The Covington Foundation has been very frustrated in the delay of this construction and will be monitoring progress.
- Actual costs for construction will be higher than available funds.

The Parks and Recreation Department recommends City Council approve a budget amendment, in the amount of $262,576.05, to appropriate funds into the Capital Fund in order to enter into a contract for the construction of a new club house at Aston Park.

Vice-Mayor Mumpower asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

At 5:20 p.m., Vice-Mayor Mumpower announced a short break.

UPDATE ON YOUTH PROPOSAL

Mr. Butch Kisiah, Recreation Division Supervisor, said that this is the consideration of a resolution authorizing the City Manager to enter into an agreement with the Mountain Area Workforce Development Board for the 2005 Summer Youth Development Program.

The Parks and Recreation Department contacted the Mountain Area Workforce Development Board (MAWDB) on the campus of A-B Technical College to determine the feasibility of organizing and administering a summer youth employment program for 2005. The MAWDB has actively administered and delivered career development services, remedial education, job skills training and subsidized employment opportunities for Asheville's economically disadvantaged youth for more than 30 years.

Highlights of the proposal:

- Employment of 55 disadvantaged youth from the City of Asheville.
- Summer employment period of June 8, 2005 – July 29, 2005 (8 weeks)
- Youth Employees between the ages of 14 and 17 years old.
- Specific application process and selection procedures mutually agreed upon by the City and MAWDB.
- Education and training components aimed at assisting youth to move forward in school and toward a successful productive life.
- MAWDB will develop, organize, administer supervise and evaluate the program through an agreement with the city including recruitment of youth, development of worksite agreements, orientation and training of worksite supervisors and employees, monitoring and counseling of youth employees and program accounting and oversight.
- The City of Asheville will provide payroll services and worker's compensation insurance.

This action is in keeping with the City Council Strategic Plan's economic development goal #4 of providing vocational training opportunities for teenage youth and the plan's critical

services and infrastructure goal #4 of reducing drug related crime activities through holistic approaches targeting at-risk and economically disadvantaged youth. The Parks and Recreation Department recommends entering into an agreement with the MAWDB for the delivery of a youth development program that combine the opportunities for summer employment with meaningful training and education in the areas of job success skills, career planning, life skills, personal financial management and development of teamwork and interpersonal relations on the job.

Pros:

- History of proven professional administration of youth employment programs in Asheville by MAWDB for over 30 years.
- Cooperative agency approach to providing youth development activities.
- Ability to integrate the City's youth employment program with the efforts of the MAWDB career development programs.
- Existing connections to public and private agencies through the MAWFDB "workforce board partners program" which allows for better recruitment of disadvantaged youth and potential worksites.
- Allows for program over site by City staff without the extensive time commitment necessary to actually administer a program of this magnitude.

Cons:

- More students may apply than are funds available.

The Parks and Recreation Department recommends that City Council accept the proposal and authorize the City Manager to enter into an agreement with the Mountain Area Workforce Development Board for the 2005 summer youth development program.

Mr. Kisiah responded to various questions/comments from Council, some being, but are not limited to: why is preferential hiring treatment being given to youth who have previously volunteered as a Counselor in Training; what age do you have to be when you are hired for a position; what good will a background check on juveniles; some youth may not be able to document their involvement in the community, church or school because they have to help with smaller children after school; will computers be made available for the written essay portion of the application; will work site recruitment be a part of the contract; will the program be expanded to private employers; we should be more stringent about the participation in the program, other than the screening process; what is the breakdown in terms of working/education; how will the productivity of the youth be ensured; and how will discipline be administered.

Councilwoman Jones felt that in terms of retention of these employees, we should have some type of bonus at the end of the program as an incentive to complete the entire 8 weeks.

Councilwoman Bellamy suggested some information be placed on our Government Channel, like how to dress for an interview, etc.

It was the consensus of City Council to (put it as an optional) not disqualify a youth who is not able to provide a letter documenting their involvement in a community, church or school activity of no less than six hours in duration and signed by the leader of the activity.

Vice-Mayor Mumpower asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

At 5:50 p.m., Councilwoman Jones moved to excuse Councilwoman Bellamy from the meeting. This motion was seconded by Councilman Davis and carried unanimously.

PROFESSIONAL WATERSHED MANAGEMENT SERVICES

Interim Water Resources Director David Hanks said that this is the consideration of a resolution entering into a contract with Woolpert, Inc., to prepare the second phase of the Watershed Management Plan for North Fork and Bee Tree Watersheds.

City Council approved a watershed management plan in July, 2004 and a Request for Proposal (RFP) for the second phase of the plan in September, 2004. The RFP was distributed to 36 watershed and forestry management consultant firms. Four proposals were submitted and deemed qualified to do such work.

Each proposal received was reviewed for content, scope of services provided, professional certifications and background of principals in charge and project management, and cost of services offered.

The proposals received were detailed and followed the scope of the RFP. Each of the four submittals reflected in-depth professional knowledge of watershed and forestry management practices. Furthermore, due to the size of the watershed, respondents estimated it will require approximately five years to inspect, section, survey and prepare a comprehensive management plan for the entire watershed.

Annually, the Tree Commission has offered to conduct a technical review of each phase of the Watershed Master Plan and advise City staff and the City Manager, who will in turn present a final report to City Council for approval as part of the annual budget process.

Following is a list of proposals amortized over a five-year period:

	Average Annual Cost	5-Year Cost
• Woolpert, Inc.:	$56,908	$284,540
• Greenleaf Forest Management:	$51,400	$257,000
• Mattern & Craig:	$90,168 (estimated)	$450,840 (estimated)
• Equinox Environmental Consultation & Design:	$77,910	$389,549

Pros of the submitted proposals – Each proposal demonstrates professional watershed and forestry management knowledge by the company and the principals involved. Three of the proposals, Woolpert, Inc., Mattern & Craig, and Equinox Environmental Consultation and Design, Inc. were very detailed and listed a team strategy of watershed management. The fourth proposal, Greenleaf Forest Management, is a local forester who also demonstrated professional knowledge in his proposal. The submittals accurately address the scope of the RFP as requested.

While Woolpert was not the low bid, this partnership has the experience and professional credentials to prepare a master watershed management plan, per contract. The low bid is a local forester who does not have the assets and professional staff that is required to complete the watershed management plan that Woolpert, LLP demonstrated in their proposal.

Cons of the submitted proposals – Management of the watershed has become a controversial issue, which has taken away from the importance of establishing a methodology for insuring the continued use of the City-owned property to collect and filter water.

City staff recommends City Council approve the second phase of Watershed Management Plan as detailed in the Request for Proposals and award a contract to Woolpert, Inc.

Councilman Davis clarified that this second phase was to inspect, survey and prepare a management plan for the entire watershed in increments of five years. Mr. Hanks said that the RFP covered 18 separate items, with the most important item was to make sure that the water quality was maintained. Some of the other items covered were to ensure that everything that is done through this management plan is in compliance with the N.C. Conservation Trust easement that is currently on the watershed and also with the viewshed of the Blue Ridge Parkway.

In response to Councilman Davis, Mr. Hanks said that Woolpert would not be responsible for the actual action that would take place. They would put together a management plan, which would be reviewed on several levels and then brought back to Council for formal action as to what would be done. If it is something as simple as just moving a log, we would do that anyway as part of our normal operations. But anything that does require further action or monetary expense would be brought back to Council as part of the annual budget process for review and action to be taken either before or against.

Vice-Mayor Mumpower asked if we are required to award a contract having issued an RFP. Mr. Hanks said that as part of the RFP, there may or may not be a contract awarded.

Vice-Mayor Mumpower was concerned about the complexities, costs and length of time involved. He would like to see the City drop back some and reconsider this matter. We are talking about a planning process of five years at an annual cost of $56,000 - just for planning and no direct service. He suggested we step back and ask our Water Resources Department staff to look into the possibility of maintaining our access roads, removing the invasive species, and having a plan for catastrophic events. He wondered if we can take the information in hand and develop a plan. And, if we can, do we have the resources, or can we get the resources, to do that on some kind of cost effective basis.

Mr. Hanks said that currently we do not have the resources to do that with our current staff. Basically we have one person assigned to our watershed and it is not a full-time job for that person. We do not have the assets to maintain the watershed, other than the very minimum, which we do around the water plants. Back in July, the three proposals before Council were to move forward with a plan, do nothing as we have been doing for the past 10-15 years, or proceed on a more limited basis by adding staff.

City Manager Westbrook said that he would not want to go into the watershed with just staff and chainsaws, without a plan of some sort because the watershed is sensitive and we could make errors. If Council wants to have a less comprehensive plan, we can certainly come back with something else. This proposal, however, would satisfy all our needs for a long period of time.

Vice-Mayor Mumpower said that back in 1992 a plan was provided to Council. He wondered if we can take that plan, our own expertise and any additional information acquired since then, and have staff develop some kind of comprehensive plan that is workable.

Councilman Davis felt the watershed management plan prepared by Mr. Hicks in July of 2004 was a good plan. He too felt the current proposal was a lot of planning money.

City Manager Westbrook said that we can pull all that information together but he would prefer to have an independent third party review it to make sure it is reasonable. Whatever Council decides, he strongly felt that we need some independent oversight on it or some

independent quality control on it. Vice-Mayor Mumpower suggested the third party be Mr. Edward Hicks, a forester that the City has used in the past.

City Manager Westbrook asked for guidance from Council if they want a different proposal. He said they may be able to negotiate with the existing firm or with other firms for a different proposal.

Vice-Mayor Mumpower said that Councilwoman Bellamy and Councilman Dunn shared with him that they are both in favor of asking staff to come back with a modified plan that is at a different scale, along the lines of what we discussed – that is, handled in-house, emphasizes activity over planning (recognizing we need planning), and keeping things more simple.

Councilman Newman was astounded about how well our watershed property withstood the two hurricanes that came through Asheville in September of 2004. He felt this may be a process without a rationale. If our goal is clean water then the natural processes do a very good job maintaining clean water.

When Councilman Newman asked about a management plan prepared in the early 1990's, Mr. Hanks said that he was not aware of that plan. Then, when a copy was given to him he showed his staff and they were not aware of it either.

Councilman Newman said that the plan prepared in the early 1990's have some good ideas about how we maintain the road network with pretty specific recommendations, e.g., how many people are needed to mow the watershed and how long it would take them. He wondered if we should hire one more person part-time, which would be cheaper than the kind of course of action we are looking at now.

In response to Councilman Newman about repairing the bridges, Mr. Hanks said that we received $20,000 from FEMA. We did have another engineering firm come in and look at the watershed and bridges and they gave us an overall cost estimate to do all the bridges, to the point of where they would not wash out again, of $500,000. Since we would not be able to get that kind of money, we started looking at what we could do internally. We then asked the firm what else we could do, so we have started putting culverts in instead of rebuilding bridges in some of the areas. We are trying to mitigate the cost factors and get the accessibility back up and into the watershed.

Councilman Newman supported dramatically scaling back what is presented to Council. He said the role of whether or not we will be timber harvesting on the watershed was a legitimate question, and he felt that was reasonable to talk about. He feels at this time it is pretty clear that Council is not that interested in doing anything very aggressive in terms of logging the watershed. He felt we need to focus on taking care of exotic species, maintaining the road and fixing the bridges.

Vice-Mayor Mumpower appreciated staff raising the concerns on the watershed. His concern was not with the need for management, it's the extent to which we might be pursuing management.

Councilwoman Jones supported scaling back the plan and didn't want it to be construed that she would not support Mr. Hicks as being the third-party.

In response to Councilwoman Jones, Mr. Hanks said that Mr. Hicks' contract was $8,500.

Vice-Mayor Mumpower felt that if we used Mr. Hicks as a resource, and we can get him on a cost effective basis, he would certainly advocate for him just from that prospective.

Councilman Newman was disappointed in the first phase of the plan, not only because of some of the specific management recommendations, but just the fact that Mr. Hicks' first plan recommended things that were in violation of the conservation easement. He felt that Mr. Hicks' failure to do some research created more confusion than illumination for Council.

It was the consensus of Council to instruct City staff to create a scaled back management plan recommendation to Council.

Upon inquiry of Vice-Mayor Mumpower, City Manager Westbrook said that staff will have to look and see how much work we have to do and then advise Council on whether we can get it in the budget or come back a little bit later afterwards.

QUARTERLY REPORT ON THE STRATEGIC PLAN

Assistant City Manager Jeff Richardson said that this multi-year plan document outlines seven (7) key focus areas that City Council has identified as critical to the overall long-term positive growth and vibrancy of the Asheville community. Within those seven key focus areas, 45 goals and 94 operational tasks are identified. Timeframes were identified for each of the tasks. This report outlines staff progress in the second 90 days after adoption of this plan for those tasks with timeframes conducive to this fiscal year.

Pros: City Council will continue to receive quarterly updates to insure city staff is progressing as directed by City Council.

Cons: None noted.

No formal action is required. City Council may provide direction as necessary for tasks as appropriate.

There was a brief discussion, initiated by Councilwoman Jones, about allocating a percentage of Community Development Block Grant funding to small business development. At this point she felt we may advocate for that task to be deleted when the Strategic Operating Plan is revisited.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to reappoint Tom Muncy (Regular), Beverly Robinson (Regular) and David Brown (Alternate) to the Board of Adjustment:

It was the consensus of City Council to interview the following individuals for a vacancy on the Civic Center Commission: Linda Fowler, W.E. Lack, Brian Turner and Jean Ann Taylor.

It was the consensus of City Council to reappoint Leslie Hennessee and Dan Comer (if he is interested in reappointment) to the Asheville-Buncombe Community Relations Council:

It was the consensus of City Council to reappoint Christiana Tugman and Jim McCulley to the Asheville-Buncombe Fair Housing Commission:

It was the consensus of City Council to reappoint Paula Robbins and Scott Jackson to the Greenway Commission:

It was the consensus of City Council to interview W. Louis Bissette Jr. for a vacancy on the Metropolitan Sewerage District Board.

It was the consensus of City Council to reappoint W.F. Michie Jr. and interview the following individuals for vacancies on the Transit Commission: Kim MacQueen, Yuri Koslen, Thomas Hilgendorf, Robert Mair and Neal Jackson.

It was the consensus of City Council to interview the following individuals for vacancies on the Tree Commission: Robert Oast, Parker Andes, Richard Koerber and Jay Marino.

SCHOOL BOARD

City Council narrowed down the questions to ask candidates for vacancies on the Asheville School Board. It was also the consensus of City Council to have all candidates live in the Asheville School District.

ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 6:55 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 25, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Terry M. Bellamy

PLEDGE OF ALLEGIANCE

Councilwoman Jones led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 11, 2005, AND THE WORKSESSION HELD ON JANUARY 18, 2005

B. RESOLUTION NO. 05-10 - RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO ASSIST WITH THE RENOVATION OF THE MONTFORD COMPLEX

Summary: The consideration of two resolutions authorizing the Mayor to apply for a grant and enter into an agreement with the N.C. Dept. of Environment and Natural Resources to assist with the renovations of the Montford Complex and Aston Park.

Funds are available through the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the North Carolina Parks and Recreation Trust Fund (PARTF) to assist with the development of parks and greenways.

The renovation of Aston Park has been identified as a priority by the community at large and by the tennis community. For many years, the Dick Covington Foundation raised money to help build a new tennis center at the park. The City of Asheville now holds $260,000 from the Covington Foundation to help build the tennis center. In anticipation of the park transfer as part of the Water Agreement, Parks and Recreation wishes to pursue grant funds to renovate the park including construction of a new the tennis center, and renovation of the playground, trails and basketball court.

The Montford Complex is in the heart of the Montford neighborhood and the most heavily used park featuring the Montford Center and the surrounding park. The center and features in the park are in need of renovation and in some cases complete replacement in order to meet safety and handicap accessibility requirements. The Parks and Recreation Department wishes to pursue grant funds to renovate the park including improvements to the center, new amphitheater, playground, ball field lights, ropes course and basketball courts.

The Parks and Recreation Department is requesting $260,000 in grant funds for renovation of Aston Park, and $150,000 for renovation for the Montford Complex from the N.C.

Parks and Recreation Trust Fund. Each grant application requires a dollar for dollar cash match. The cash match for renovation of Aston Park is available in the Parks and Recreation Department's existing Capital Improvement Project budget via the Dick Covington Foundation. The cash match for the Montford Complex renovation is in the proposed Parks and Recreation Department's Fiscal Year 2005-06 Capital Improvement Project budget.

The Reid Center renovation, a top Capital Improvement Project priority, is not being considered for the 2005 PARTF funding cycle, but will be a PARTF application in January 2006. The PARTF awards up to $500,000 requiring a dollar for dollar cash match. The Reid Center fundraising team wishes to apply for the full amount but at this time the cash match is not available. By 2006, the first year of fundraising will be complete and matching funds will be in place to apply for the full amount.

This action complies with City of Asheville Strategic Operating Plan, Council Focus Area: Natural and Built Environment, Goal 2: Increased greenway benefits equitably throughout Asheville – Continue to implement and develop greenways that enhance quality of life for Asheville.

Pros:

- The trail in the Aston Park renovation will link densely populated neighborhoods near downtown Asheville to the Clingman Forest Greenway Corridor, which will connect to the French Broad River Greenway Corridor.
- Continue to make progress on the Parks and Recreation Department's strategic plan to renovate and improve Montford Complex.
- Respond to public demand to improve Aston Park.
- Be ready to manage Aston Park upon transfer from Buncombe County.
- Raise outside funds to support facility renovations and reduce reliability on City funds to support Capital Improvement Project cost.

Cons: None noted

The Parks and Recreation Department recommends the City of Asheville apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund for $260,000 for renovation of Aston Park, and for $150,000 for renovation of the Montford Complex.

RESOLUTION BOOK NO. 28 – PAGE 470

C. RESOLUTION NO. 05-11 - RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO ASSIST WITH THE RENOVATION OF ASTON PARK

Summary: See Consent Agenda Item "B" above.

RESOLUTION BOOK NO. 28 – PAGE 471

D. RESOLUTION NO. 05-12 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE EXCHANGE OF AN EASEMENT ON REAL PROPERTY LOCATED ON BLACK OAK DRIVE FOR AN EASEMENT ON REAL PROPERTY LOCATED ON PINECROFT ROAD

Summary: The consideration of a resolution authorizing the City Clerk to publish a notice regarding the exchange of an easement on real property located on Black Oak Drive for an easement on real property located on Pinecroft Road.

The City and Mr. & Mrs. Fulton H. Beville have negotiated an exchange of a driveway easement over the Beaverdam Reservoir property (PIN No. 9751.17-10-7654) on Black Oak Drive for a slope/fill easement across real property located on Pinecroft Road (PIN No. 9751.17-10-9594).

At the time that the Beaverdam Reservoir was built a substantial amount of fill was placed on the Beville's property thereby allowing a cost savings to the City and providing lateral support to the reservoir site maximizing the use of the property. The Beville's were not compensated for the use of their property, but instead understood that the use of the reservoir access road would be available to them to access a portion of their property not easily accessible from Pinecroft Road because of topography.

A formal arrangement has not been in place heretofore, but it is advisable to formalize the arrangement through an exchange of easements which will satisfy the City's need to keep the fill in place as well as the Beville's need to access their property.

The driveway easement would be 12' wide and about 350' long comprising an area of 4,200 square feet. Based on the tax value of the land per square foot (.92), at a 50% easement value, the driveway easement would have a value of $1,932. Water Resources staff estimates that the benefit to the City of having the fill in place would equal or exceed the value of the driveway easement.

The use of the driveway by the Bevilles will not impair the function nor security of the reservoir, but could improve security to the extent that the Bevilles would be able to observe the reservoir site.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will establish record title in the City of the right to have the fill area remain on the Beville's property.
- It will establish a clear description of the size and location of the driveway easement.
- It will formalize the arrangement thereby reducing the likelihood of future misunderstandings.

The negative aspects are:

- The driveway easement will limit the use of the reservoir property within the easement area.

Approval of the resolution will initiate the exchange of the properties through the process provided in N. C. G. S. 160A-271.

Planning & Development staff and Water Resources staff recommend adoption of the resolution authorizing the City Clerk to publish a notice regarding the exchange of an easement on real property located on Black Oak Drive for an easement on real property located on Pinecroft Road.

E. RESOLUTION NO. 05-13 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR A GRANT TO ASSIST WITH THE PURCHASE AND INSTALLATION OF VIPER-COMPLIANT RADIOS

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Department of Crime Control and Public Safety for funds through the Governor's Crime Commission to assist with the purchase of 800 MHz VIPER-compliant radios for Asheville Fire Rescue and Asheville Police Departments.

Public safety agencies in WNC experienced a serious need for interoperability in their communications systems when mutual aid services were provided during the historic flooding of 2004. In response to this need, several public safety agencies from Asheville and Buncombe County are collaborating to establish an interoperable communication system, which will ensure a better communication link among all agencies. In addition to promoting efficient disaster response, an interoperable system will be an important component of terrorism prevention.

To support this system, Asheville Fire Rescue and Asheville Police Departments are partnering with other agencies (Buncombe County Rescue, Buncombe County Sheriff, Buncombe County Emergency Services, Enka Fire, Haw Creek Fire, Reynolds Fire, Riceville Fire, Skyland Fire, Swannanoa Fire, and West Buncombe Fire) to apply for a $492,800 grant from the Governor's Crime Commission to purchase a total of 127 radios to be distributed among the participants. Asheville will assume lead responsibility in applying for the grant and purchasing all radios, including radios for our partner agencies. The grant requires a 25% match of the total cost ($492,800), or $123,200. The cost of the match will be shared by all participating agencies based on the number of radios each receives. The City's net cost is expected to be $61,300; it will come from the City's fund balance.

This action coincides with the City of Asheville's Strategic Operating Plan under the focus area of Partnerships To Improve Critical Services & Infrastructure, goal #3: Explore ways for the City and County to work together to share in regional infrastructure investment needs.

Pros

- This project will help develop in WNC the statewide voice interoperable network including 800 MHz radios, in collaboration with the Voice Interoperability Plan for Emergency Responders (VIPER) that has been established by the state of NC.
- The public safety agencies listed are committed to interoperability and have agreed to participate in the project and to match 25% of the cost of the radios.
- The project will improve public safety in Asheville and Buncombe County by enabling WNC emergency responders to communicate with each other and with others across the state.

Cons

- The cost of the match.

The Fire Rescue and Police Departments recommends the City of Asheville apply for and enter into an agreement for grant funds to assist with the purchase of the radios.

RESOLUTION BOOK NO. 28 – PAGE 473

F. RESOLUTION NO. 05-14 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOUNTAIN WORKFORCE DEVELOPMENT BOARD FOR THE 2005 SUMMER YOUTH DEVELOPMENT PROGRAM

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Mountain Area Workforce Development Board for the 2005 Summer Youth Development Program.

The Parks and Recreation Department contacted the Mountain Area Workforce Development Board (MAWDB) on the campus of A-B Technical College to determine the feasibility of organizing and administering a summer youth employment program for 2005. The MAWDB has actively administered and delivered career development services, remedial education, job skills training and subsidized employment opportunities for Asheville's economically disadvantaged youth for more than 30 years.

Highlights of the proposal:

- Employment of 55 disadvantaged youth from the City of Asheville.
- Summer employment period of June 8, 2005 – July 29, 2005 (8 weeks)
- Youth Employees between the ages of 14 and 17 years old.
- Specific application process and selection procedures mutually agreed upon by the City and MAWDB.
- Education and training components aimed at assisting youth to move forward in school and toward a successful productive life.
- MAWDB will develop, organize, administer supervise and evaluate the program through an agreement with the city including recruitment of youth, development of worksite agreements, orientation and training of worksite supervisors and employees, monitoring and counseling of youth employees and program accounting and oversight.
- The City of Asheville will provide payroll services and worker's compensation insurance.

This action is in keeping with the City Council Strategic Plan's economic development goal #4 of providing vocational training opportunities for teenage youth and the plan's critical services and infrastructure goal #4 of reducing drug related crime activities through holistic approaches targeting at-risk and economically disadvantaged youth. The Parks and Recreation Department recommends entering into an agreement with the MAWDB for the delivery of a youth development program that combine the opportunities for summer employment with meaningful training and education in the areas of job success skills, career planning, life skills, personal financial management and development of teamwork and interpersonal relations on the job.

Pros:

- History of proven professional administration of youth employment programs in Asheville by MAWDB for over 30 years.
- Cooperative agency approach to providing youth development activities.
- Ability to integrate the City's youth employment program with the efforts of the MAWDB career development programs.
- Existing connections to public and private agencies through the MAWFDB "workforce board partners program" which allows for better recruitment of disadvantaged youth and potential worksites.
- Allows for program oversight by City staff without the extensive time commitment necessary to actually administer a program of this magnitude.

Cons:

- More students may apply than are funds available.

The Parks and Recreation Department recommends that City Council accept the proposal and authorize the City Manager to enter into an agreement with the Mountain Area Workforce Development Board for the 2005 summer youth development program.

RESOLUTION BOOK NO. 28 – PAGE 474

G. RESOLUTION NO. 05-15 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Summary: The terms of Tom Muncy (Regular), Beverly Robinson (Regular) and David Brown (Alternate) on the Board of Adjustment expired January 21, 2006.

At the City Council's worksession on January 18, 2005, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Tom Muncy, as a Regular member; Beverly Robinson, as a Regular member; and David Brown, as an Alternate member, to the Board of Adjustment to serve a three year term respectively, terms to expire January 21, 2008, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 475

H. RESOLUTION NO. 05-16 - RESOLUTION APPOINTING MEMBERS TO THE FAIR HOUSING COMMISSION

Summary: The terms of Christiana Tugman and Jim McCulley, as members on the Asheville-Buncombe Fair Housing Commission, expired on December 31, 2004.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Tugman and Mr. McCulley to each serve an additional three year term respectively, terms to expire December 31, 2007, or until their successors have been appointed.

I. RESOLUTION NO. 05-17 - RESOLUTION APPOINTING A MEMBER TO THE GREENWAY COMMISSION

Summary: The terms of Paula Robbins and Scott Jackson, as members on the Greenway Commission, expired on December 31, 2004.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Robbins and Mr. Jackson to each serve an additional three year term respectively, terms to expire December 31, 2007, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 477

J. RESOLUTION NO. 05-18 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "OWENS BELL LANE"

Summary: The consideration of a resolution accepting the new proposed street name "Owens Bell Lane."

Mountain Housing Opportunities, Inc., owner of lots on Owens Bell Lane off of Clingman Avenue has petitioned the City of Asheville to accept the street name " Owens Bell Lane." The new street will begin at Clingman Avenue and end at Rector Street.

City staff recommends adoption of the resolution accepting the new street name of "Owens Bell Lane."

278

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO REZONE 8.8 ACRES LOCATED ON BRITT DRIVE FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RIVER DISTRICT

Mayor Worley said that, at the request of City staff, this public hearing will be re-noticed and scheduled for City Council consideration on February 8, 2005.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF TWO LOTS ON EDWIN PLACE FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE; AND APPROVAL OF THE MASTER PLAN FOR PROPOSED BUILDINGS FOR DAYCARE AND NON-CHURCH RELATED COMMUNITY ACTIVITIES

ORDINANCE NO. 3202 - ORDINANCE REZONING TWO LOTS ON EDWIN PLACE FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3203 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE MASTER PLAN FOR PROPERTY ON EDWIN PLACE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:06 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located on Edwin Place from RM-6 Residential Multi-Family Low Density District to Institutional District/Conditional Use, and a request to issue a conditional use permit for a Master Plan for proposed building(s) for daycare and non-church related activities.

In July of 2004 there was a conditional use rezoning request at 200 Charlotte Street. The rezoning request was to rezone a portion of a lot from RM-16 to CB-1 in order to accommodate a parking lot expansion for an existing office use (Attachment to City Exhibit 3 – Location Map). Additionally, approximately 4 years ago there was a conditional use permit request for an ancillary parking area on the southwest corner of Edwin Place and Charlotte Street that was denied at City Council (Attachment to City Exhibit 3 – Aerial Map).

The applicant, Unitarian Universalist Church, is seeking a Conditional Use Rezoning of both lots from RM-6 Residential Multi-Family Medium Density District to Institutional District to allow for the operation of a private daycare and other non-church related community uses.

The subject properties are located in north Asheville in the nationally registered historic Grove Park neighborhood. Both lots total 1.51 acres and are currently zoned RM-6. The larger of the two properties, the primary church property, is a through-lot with frontage on Edwin Street and Bond Street and is further bounded on a third side by Charlotte Street to the east. The smaller lot has frontage and access off of Edwin Place only. Directly across Charlotte Street is another church use while the rest of the adjacent properties all support residential uses ranging from low-density single-family homes to the high density historic Manor Inn apartments. Zoning ranges from RS-4 along the southern edge of the property and northeast corner, with Historic Conditional Use to the east, and RM-6 to the west and north.

The master plan shows two existing structures with the largest structure housing the Church sanctuary, offices, daycare, and other meeting rooms (Attachment to City Exhibit 3 – Concept Plan). The master plan delineates a future office expansion for the larger structure with area dedicated for additional parking as needed. The second smaller structure, "Jefferson House", is a former single family home that is currently used as additional meeting space for the church and community. Also shown on the site plan are the existing off-street parking, playground, street trees, street buffering, and other existing vegetation. A type 'B' landscape buffer is required but may be adjusted through alternative compliance. Off-street parking is limited with the balance of parking needs historically being met with on-street parking (permitted per Sec. 7-17-7(b)). A limited number of additional trees and shrubs are shown to meet landscaping compliance (Attachment to City Exhibit 3 – Site Photos).

The primary purpose of this application is to legalize a recently revived private child care center (Attachment to City Exhibit 3 – Concept Plan). Formerly, the church housed a half-day private child care center not understanding that the center was non-conforming and that a lapse in use would not allow the re-establishment of a new private day care. Although child care centers can be permitted as an accessory use to a church, the daycare must be operated by the church and the workers must be employees of the church. In addition, the majority of the children enrolled should be children of members of the congregation. Since this center is a private cooperative program operated by one full-time employee and parent volunteers, and because enrollment is open to the larger community, a rezoning would be required to a designation that allows "child care centers" which are not currently permitted in the RM-6 zoning district.

280

Current enrollment is 13 children but staggered attendance results in no more than 11 children requiring supervision at any given time. Children attend the center between the hours of 9 a.m. and 12:45 p.m., Monday through Friday. In addition to approval for their current child care center; the church is also seeking approval for the ability to expand their enrollment to 20 children for regular full day care. In the event that a full-day program is pursued, additional site plan and building requirements may have to be met and a change of use application pursued.

In addition to the child care center, the church would also like to open their facilities to the community for other non-church related functions including, but not limited to, music and other performances as well as meeting space for small groups. Church use and non-church related activities, including the day care, will not overlap in operation and off-street parking along with other infrastructure needs appear to be adequately met.

At their January 5, 2005, meeting, the Asheville Planning and Zoning Commission met to review the project and made a motion to approve the rezoning and Conditional Use Permit request with the conditions that (1) All outstanding TRC conditions are met; and (2) Any future outdoor lighting be equipped with a 90 degree cutoff feature and be directed away from residences.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety including the NC Child Care Division for Daycare Licensing.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed project will be occupying an existing building and only a nominal amount of site disturbance is expected in order to comply with minimum landscaping requirements.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The proposed daycare use will be housed within the existing church building with the exception of the outdoor play area. The outdoor play area is located internally to the church property and is separated from adjacent uses by vegetation, parking, single family structures, and road right-of-way and is located no closer than 150' from the nearest single family home (140' to the nearest multi-family structure). The current use experiences no more than 11 children outside, for approximately 45 minutes a day. The expanded enrollment and hours would typically result in the same number of children on the playground at one time but would occur with more frequency. The past daycare use was not reported to have a negative impact on the value of adjacent properties where homes in the neighborhood have experienced an impressive appreciation. Similarly,

current and expanded day care and community use is not expected to have a negative impact on the value of adjacent properties.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The proposed use will not alter the current facilities and will remain in harmony with the neighborhood within which it is located.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   Although the Asheville City Development Plan 2025 does not specifically address support for churches or other non-profit business/organizations, there is discussion regarding public institutions (i.e. schools) as important neighborhood and community centers. It is recognized that new construction or additions/expansions of these neighborhood centers should be supported where good community access can be gained and neighborhood compatibility ensured. Additionally, the small area plan for the Charlotte Street Corridor includes both subject parcels and calls for a mix of uses south of Edwin Place and the continuation of the existing residential and institutional uses north of Edwin Place. It also calls for the identification of business and other uses which serve the needs of the adjacent neighborhoods to help create an economically vibrant and pedestrian environment. The Unitarian Universalist Church is strategically located to be an extremely walkable and valuable community gathering place and service provider.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   The project area is located on the Charlotte Street within 1 mile of downtown and interstate connections. It is also well located in respect to transportation facilities with the Route 5 bus line operating up and down Charlotte St. In addition, sidewalk also surrounds the project area with extensive connections to existing neighborhoods and downtown. Lastly, technical review from other departments has not revealed any problems for serving the proposed use.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The proposed use(s) will not overlap in hours of operation with regular church services and all parking and loading needs can be met with existing off-street parking. The proposal also calls for the elimination of one existing driveway cut on Edwin Street, reducing hazards associated with backward movements into traffic.

Pros

- Provides a valuable service to the church and neighborhood
- Provides valuable meeting space to the church and neighborhood
- Assures the preservation of the architectural integrity of the Jefferson House, reducing the potential for further encroachment into the residential neighborhood
- Results in minor site improvements including the reduction of driveway cuts

Cons

- Results in a slightly higher use and impact

Staff concurs with the Planning and Zoning Commission's recommendation of approval of the rezoning request from RM-6 to INST and approval of the associated Conditional Use Permit and conceptual master plan.

Ms. Christine Magnarella Ray, representing the Unitarian Universalist Church, urged City Council to support the conditional use permit and explained their outreach to the neighborhood (Applicant Exhibit 1).

Ms. Alicia Sessoms spoke about the integrity of the pre-school and urged City Council to support the conditional use permit.

After hearing no rebuttal, Mayor Worley closed the public hearing at 5:19 p.m.

Vice-Mayor Mumpower moved to approve the conditional use rezoning for property located on Edwin Place from RM-6 Residential Multi-Family Low Density District to Institutional District/Conditional Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 458

Vice-Mayor Mumpower moved to adopt Ordinance No. 3203 to issue a conditional use permit adopting the proposed master plan and uses for the Unitarian Universalist Church located on Edwin Place, subject to the following conditions: (1) all outstanding Technical Review Committee conditions are met; (2) enrollment is restricted to not more than 20 children; and (3) any future outdoor lighting be equipped with a 90 degree cutoff feature and be directed away from residences. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 460

C. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO NAVIGATIONAL SCIENCES INC.

RESOLUTION NO. 05-19 - RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO NAVIGATIONAL SCIENCES INC.

Mayor Worley opened the public hearing at 5:23 p.m.

City Manager Jim Westbrook said that this is the consideration of a resolution granting an economic development incentive grant to Navigational Sciences, Incorporated (NavSci). This public hearing was advertised on January 14 and 21, 2005.

City Council has previously considered Navigational Sciences for an economic development incentive grant on March 18, 2003. The initial grant was for $25,000 payable in equal installments over three years. In December 2004, Navigational Sciences advised that a portion of the prior understanding would need to be changed. Based on new information, the current economic development incentive grant is based on the following: the project will entail a capital investment of $2 million and the creation of 12 new jobs with an average annual salary of $50,000. The prior commitment was for a $4 million investment.

Based on the new information with a capital investment of $2 million and the addition of 12 new jobs at an average annual salary of $50,000, staff feels the economic development

incentive of $25,000 paid in three equal installments over a three year period promotes economic development within the City, supports small businesses in the downtown area, and adds additional employment of highway jobs to the local economy.

Buncombe County has approved a grant under similar conditions as the City.

NavSci is a company that has developed a marine transportation control system. It's a global asset tracking and management system delivering a direct commercial value with direct applications for homeland security.

Strategic Plan:

- Grant supports expansion of local small business. Key Area – Economic Development Goal 1, Objective A.
- Navigational Sciences, Incorporated continues to invest in the downtown area.

Staff recommends City Council approve the resolution granting an economic development incentive grant to Navigational Sciences, Incorporated.

Mr. Ray Denny, Vice-President of Economic Development at the Chamber of Commerce, spoke in support of this economic development incentive grant.

Mr. Dale Carroll, President of AdvantageWest, said that he would appreciate City Council's consideration of joining Buncombe County and AdvantageWest in providing financial grant support regarding this technical operations center for western North Carolina. NavSci's plans for the future not only has implications for trade and commerce in this world, but there are also some very favorable homeland defense implications surrounding this technology. Mr. Carroll also thanked Congressman Taylor for his help with the pieces of infrastructure necessary for a high tech company.

Dr. Eric Dobson, CEO and founder and NavSci, said that in general they are constructing a network operations center. It will be the revenue center of a business tracking shipping containers as they move globally. The technology itself has a number of other market opportunities in areas that can move and they expect to commercialize those here in western North Carolina. He said that they will be outsourcing the manufacture, which is potentially another opportunity for western North Carolina. He said the idea started from a mandate from the Dept. of Energy to develop a means of operating robots wirelessly in plutonium recovery facilities. Very early in the discussion they realized the implications of this technology was such that you can put a container in a hold of a ship and still communication effectively with wireless technologies.

Upon inquiry of Councilman Dunn, Dr. Dobson said they ran a small business innovative research grant program through the Dept. of Homeland Security last year and received a grant. They expect to compete again this year for further work.

Upon inquiry of Councilman Newman, Dr. Dobson said they are relocating here from Charleston, South Carolina. He said they chose Asheville because they needed a place of low occurrence of natural hazards and a substantial commitment to broadband internet.

When Vice-Mayor Mumpower asked if they are anticipating hiring the 12 new employees from the Asheville area, Dr. Dobson said that they will be searching in the Asheville community but also there will be a national search for some of the employees, all which will have benefits. They have already found a number of very qualified candidates locally.

In response to Councilman Davis, Dr. Dodson said they plan to establish a much more significance presence in Asheville around March, with the expectation of relocating four people from the Charleston location by June.

In response to Mayor Worley, Dr. Dodson explained that while they are pledging 12 new jobs for this community now there is a tremendous potential for growth.

Upon inquiry of Councilman Newman, Dr. Dodson explained the different entities that are directly investing to help in the relocation.

Vice-Mayor Mumpower was glad that NavSci is relocating here and said that if there is a vote against this proposal, it is not a reflection on the good thing that they are bringing to Asheville. Personally, he has some philosophical issues about incentives because we do have limited dollars. We started out with a $4 Million capital investment and now it's $2 Million.

In response to Vice-Mayor Mumpower, Dr, Dodson said that part of the reduction from $4 Million to $2 Million was the fact that the computer hardware to accomplish these tasks is getting so much cheaper on a constant basis.

Mr. Fred English said Asheville needed more companies to bring jobs to the area but felt that the Chamber of Commerce should be doing more in that direction.

Mayor Worley closed the public hearing at 5:40 p.m.

Councilman Dunn felt that Asheville needs to start encouraging these types of businesses in Asheville, especially ones that might outsource work. He was, however, concerned that there are a lot of other companies that locate in Asheville that don't receive any incentive grants.

Councilman Newman shared some of Vice-Mayor Mumpower's philosophical concerns, but will support this incentive grant. Part of his concern is how a lot of businesses create jobs (sometimes one at a time) and don't' get any incentives from the City. He felt it would be good to review our economic development policy and develop ideas on how we can spread these benefits more equitably in the community.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Councilman Dunn moved for the adoption of Resolution No. 05-19. This motion was seconded by Councilman Davis and carried on a 5-1 vote with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 28 – PAGE 479

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING NOTICE OF VIOLATION PROCEDURES

ORDINANCE NO. 3204 - ORDINANCE CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING NOTICE OF VIOLATION PROCEDURES

Mayor Worley opened the public hearing at 5:47 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of changing the notice of violation procedures to allow notification and citation of property owners for tenant noncompliance. This public hearing was advertised on January 14 and 21, 2005.

Article XVIII of the City of Asheville's UDO sets forth procedures for enforcing the provisions set forth in the ordinance. The section (Sec. 7-18-3) dealing with procedures for notice of violation and the issuance of citations currently provides that notifications go to the person in violation and only if that person cannot be ascertained shall the notification be sent to the owner of the property on which the violation is occurring. The ordinance makes no provision for notifying and holding a property owner responsible when their tenant is non-compliant with the city's ordinances. In practice, there have been a number of instances where a tenant has failed to comply and notification of the property owner has brought quick results. The City Attorney's office, in working with the enforcement staff of the Planning and Development Department, has suggested that a provision be added to the ordinance that clearly allows for this additional measure to gain ordinance compliance.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment provides a mechanism for improving the effectiveness of gaining compliance with the ordinance.

Cons-

- The amendment may create conflicts between property owners and tenants.

The Asheville Planning and Zoning Commission recommended approval of this code amendment on January 5, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Mayor Worley closed the public hearing at 5:48 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Ms. Cogburn responded to various questions/comments from Council, some being, but are not limited to: what are the types of violations; what happens if the violation re-occurs; is there a provision in the ordinance to enable an extension; and how frequently does non-compliance occur.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that a property owner is not fined if they can establish they lack the ability to comply with the ordinance.

Councilman Davis moved for the adoption of Ordinance No. 3204. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 466

E. PUBLIC HEARING RELATIVE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CORRECT AND CLARIFY ZONING DISTRICTS THAT ALLOW GROUP HOMES AS A USE OF RIGHT, SUBJECT TO SPECIAL REQUIREMENTS

ORDINANCE NO. 3205 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO CORRECT AND CLARIFY ZONING DISTRICTS THAT ALLOW GROUP HOMES AS A USE OF RIGHT, SUBJECT TO SPECIAL REQUIREMENTS

Mayor Worley opened the public hearing at 5:57 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of correcting and clarifying zoning districts that allow group homes as a use of right, subject to special requirements. This public hearing was advertised on January 14 and 21, 2005.

This proposed ordinance amendment is intended to correct an error made in the UDO that lists "Group homes" as uses by right, subject to special requirements in the RM-6 and RM-8 districts. Presently, the standards for these two districts lists "Group homes" as both uses by right, subject to special requirements and conditional uses. As presented and discussed during a UDO amendment adopted by City Council in August, 2003, the intent was for group homes to be conditional uses in the RM-6 and RM-8 districts. The proposed amendment would eliminate the words "Group homes" from the listing under uses by right, subject to special requirements.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment would correct the UDO to comply with City Council's intentions when adopting UDO requirements for group homes in August, 2003.
- This amendment would clarify the UDO for anyone seeking to know where group homes are allowed.

Cons –

- None

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the UDO for the purpose of correcting and clarifying zoning districts that allow group homes as a use of right, subject to special requirements.

Mayor Worley closed the public hearing at 5:58 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3205. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 461

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO EXPEDITE THE DEVELOPMENT APPROVAL PROCESS BY ALLOWING DEVELOPMENT PROJECTS TO BE SCHEDULED FOR REVIEW BY THE PLANNING & ZONING COMMISSION PRIOR TO CONSIDERATION BY THE TECHNICAL REVIEW COMMITTEE

ORDINANCE NO. 3206 - ORDINANCE TO AMEND TO THE UNIFIED DEVELOPMENT ORDINANCE TO EXPEDITE THE DEVELOPMENT APPROVAL PROCESS BY ALLOWING DEVELOPMENT PROJECTS TO BE SCHEDULED FOR REVIEW BY THE PLANNING & ZONING COMMISSION PRIOR TO CONSIDERATION BY THE TECHNICAL REVIEW COMMITTEE

Mayor Worley opened the public hearing at 6:00 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance to expedite the development approval process by allowing development projects to be scheduled for review by the Planning & Zoning Commission prior to consideration by the Technical Review Committee (TRC). This public hearing was advertised on January 14 and 21, 2005.

This proposed ordinance amendment is intended to expedite the development approval process by allowing projects to be scheduled for review by the Planning & Zoning Commission prior to consideration by the TRC. Presently, this section states that a project cannot be scheduled for a Planning & Zoning Commission meeting until after review and approval by the TRC, which can place unnecessary restraints on time-sensitive projects. To help expedite the development review process in certain circumstances, staff is requesting this amendment to allow greater flexibility in scheduling applications for Planning & Zoning Commission review.

This amendment does not propose to change the number of required meetings, nor does it propose to change the order of the process. So, it does not limit opportunities for public review or comment in any way.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

This amendment would be one step toward meeting the goal of improving the plan review process outlined in City Council's adopted Strategic Operating Plan.

Pros –

- This amendment would help to expedite the review of development projects in certain situations.
- This amendment is consistent with the City Council's adopted Strategic Operating Plan.

Con –

- This amendment may be viewed by certain people as an attempt to "fast track" projects and limit public review.

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the UDO to expedite the development approval process by allowing development projects to be scheduled for review by the Planning & Zoning Commission prior to consideration by the Technical Review Committee.

Mayor Worley closed the public hearing at 6:01 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3206. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 469

G. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REDUCE THE AMOUNT OF WINDOWS REQUIRED ON THE FRONT AND SIDE FACADES OF BUILDINGS IN THE NEIGHBORHOOD BUSINESS DISTRICT AND TO ALLOW ALTERNATIVE FORMS OF LANDSCAPE BUFFERING TO BETTER ACCOMMODATE DEVELOPMENT IN THE NEIGHBORHOOD CORRIDOR DISTRICT

ORDINANCE NO. 3207 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO REDUCE THE AMOUNT OF WINDOWS REQUIRED ON THE FRONT AND SIDE FACADES OF BUILDINGS IN THE NEIGHBORHOOD BUSINESS DISTRICT AND TO ALLOW ALTERNATIVE FORMS OF LANDSCAPE BUFFERING TO BETTER ACCOMMODATE DEVELOPMENT IN THE NEIGHBORHOOD CORRIDOR DISTRICT

Mayor Worley opened the public hearing at 6:03 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purpose of reducing the amount of windows required on the front and side facades of buildings in the Neighborhood Corridor District and to allow alternative forms of landscape buffering to better accommodate development in the Neighborhood Corridor District. This public hearing was advertised on January 14 and 21, 2005.

The Neighborhood Corridor District (NCD) was adopted by City Council in November of 2002 for the purpose of accommodating medium-density, mixed-use development in appropriate areas throughout the City of Asheville. Since this District was created, staff has been looking for opportunities to evaluate if the design and development standards are effective and reasonable. Evaluation of several recently proposed projects leads staff to believe that the current standards for landscaped buffers, building setbacks for taller buildings, and the amount of windows (60%) required on first floor facades are overly restrictive.

After reviewing these requirements, staff is recommending that a landscaped buffer ten feet (10') wide with the provision of a fence eight feet (8') in height be allowed as an alternative to landscaped buffer requirements in the NCD. Alternative landscaping solutions could also be approved by the Planning Director to provide appropriate buffers in unusual situations. In addition, staff is recommending the elimination of a forty-foot (40') setback requirement for buildings of four stories. The intent of these proposed amendments are to allow greater flexibility during site development.

Staff is also proposing new standards of 45% window coverage for front facades and 40% windows for side street facades. The intent of this standard is to have buildings constructed with more traditional, first floor storefront windows. The proposed amendment offers more flexibility for developers while still meeting this intent.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- These amendments would offer greater flexibility and encourage future development within the NCD district.
- The buffer amendment would allow staff to find creative solutions for providing appropriate buffers against adjacent residential properties.

Cons –

- It is hoped that these amendments will promote multi-story, mixed-use development along key corridors. Certain people perceive this type of development to be incompatible with adjacent residential areas.
- Certain people may also prefer a firm standard to the allowance of flexible options for landscaped buffers.

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the Unified Development Ordinance for the purpose of reducing the amount of windows required on the front and side facades of buildings in the Neighborhood Corridor District and to allow alternative forms of landscape buffering to better accommodate development in the Neighborhood Corridor District.

Mayor Worley closed the public hearing at 6:07 p.m.

Discussion occurred, initiated by Councilman Newman, regarding the initial group who had significant input into the standards in the Neighborhood Corridor District not being given an opportunity to review this proposed ordinance and getting feedback from them.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3207. This motion was seconded by Councilwoman Jones.

Councilman Newman was not convinced that sending a letter to the President of the Coalition of Asheville Neighborhoods for input was the same thing as notifying the group of people who had significant input into the original District standards. He felt that some of the changes are not substantial, but the elimination of the 40-foot setback requirement for buildings of four stories is a substantive change and should have review by the group.

Upon inquiry of Vice-Mayor Mumpower about a possible conflict of interest, City Attorney Oast said that he did not feel Vice-Mayor Mumpower had a conflict of interest. The proposed ordinance is a general application throughout the Neighborhood Corridor District, not specifically regarding Vice-Mayor Mumpower's property.

Councilwoman Jones felt that even though running proposed ordinances by CIBO, CAN and CREIA was a good idea, sometimes there may be other groups that could lend their expertise. From a courtesy standpoint, she felt it would have been good to invite comments from the group, especially since they volunteered their time to help develop the initial standards. She hoped that staff would think outside of the traditional box in the future

Councilman Davis felt that when you send a revision back to a group formed 2 years ago, it might be hard to get the same people to review it. You may get new people who want to be involved and make various other changes to the District. He was encouraged that we are encouraging development with these ordinance revisions.

The motion made by Councilman Davis and seconded by Councilwoman Jones carried on a 5-1 vote, with Councilman Newman voting "no."

ORDINANCE BOOK NO. 21 – PAGE 470

H. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF CALCULATING MAXIMUM RESIDENTIAL DENSITY REQUIREMENTS FOR MULTI-FAMILY RESIDENTIAL DEVELOPMENT BY ROUNDING UP

ORDINANCE NO. 3208 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF CALCULATING MAXIMUM RESIDENTIAL DENSITY REQUIREMENTS FOR MULTI-FAMILY RESIDENTIAL DEVELOPMENT BY ROUNDING UP

Mayor Worley opened the public hearing at 6:26 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) for the purpose of calculating maximum residential density requirements for multi-family residential development by rounding up. This public hearing was advertised on January 14 and 21, 2005.

This proposed ordinance amendment is intended to change the manner in which maximum residential densities are calculated in the UDO. In situations where the number of dwelling units allowed on a property is a fractional number, the proposed amendment states that all fractions of one-half or greater will be rounded up to the nearest number. For example, a property on which 8.4 units could be constructed would be limited to eight (8) units, but a property on which 8.5 units could be constructed would net nine (9) units, as the ".5" or higher is rounded up. This amendment would only apply to multi-family residential development of five (5) units or greater, not to duplexes, triplexes, and quadraplexes. To encourage mixed-use development along key corridors, the amendment is also proposed to apply to any level of multi-family residential use in the Neighborhood Corridor (NCD) and Urban Residential (UR) districts.

This amendment is consistent with the City of Asheville's adopted definition of "Smart Growth" as it would encourage higher density, infill development. This amendment is also consistent with policies recommended by the Affordable Housing Task Force as it would allow for a minor increase in housing density under certain circumstances.

This proposed amendment has been forwarded to the Coalition of Asheville Neighborhoods, CIBO, and CREIA.

Pros –

- This amendment is consistent with the City's adopted "Smart Growth" policies.
- This amendment is consistent with recommendations of the Affordable Housing Task Force.
- This amendment could encourage infill housing by allowing a minor increase in housing density under certain circumstances.

Con –

- Certain people may be opposed to this allowance for additional residential density.

The Planning and Zoning Commission recommended approval of these code amendments on December 1, 2004, by a unanimous vote of 6-0.

Staff recommends approval of the amendment to the UDO for the purpose of calculating maximum residential density requirements for multi-family residential development by rounding up.

Mayor Worley closed the public hearing at 6:28 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Heard said that Ms. Barber Melton, with CAN, expressed some concern of the cumulative effects of incremental increases in density.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3208. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 472

I. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD WEDDING CHAPELS AS A SPECIFIC USE AND ESTABLISH PARKING STANDARDS FOR THIS TYPE USE

ORDINANCE NO. 3209 - ORDINANCE CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD WEDDING CHAPELS AS A SPECIFIC USE AND ESTABLISH PARKING STANDARDS FOR THIS TYPE USE

Mayor Worley opened the public hearing at 6:33 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) for the purpose of establishing development standards for commercial wedding chapels. This public hearing was advertised on January 14 and 21, 2005.

Planning & Development staff has received several inquiries regarding the establishment of wedding chapels in the City of Asheville. It has been difficult to review these requests, because commercial wedding chapels are not presently listed as specific uses in the UDO. Staff has studied the potential impact of these uses and researched standards for wedding chapels in other communities in developing this proposal.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment would set clear, firm standards for commercial wedding chapels in the UDO for anyone seeking to establish this type of use.
- The proposed standards treat wedding chapels in a fair manner – allowing them in office or commercial districts while limiting their encroachment into residentially zoned areas.

Cons –

- Certain people may not agree with the standards proposed for wedding chapels.

292

The Planning and Zoning Commission recommended approval of these code amendments on January 5, 2005, by a unanimous vote of 7-0.

Mayor Worley closed the public hearing at 6:35 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3209. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 474

J. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO INCREASE THE MAXIMUM LENGTH OF CUL-DE-SAC STREETS

ORDINANCE NO. 3210 - ORDINANCE CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO INCREASE THE MAXIMUM LENGTH OF CUL-DE-SAC STREETS

Mayor Worley opened the public hearing at 6:36 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) for the purpose of allowing longer cul-de-sac streets within manufactured home parks. This public hearing was advertised on January 14 and 21, 2005.

While reviewing the potential development of a manufactured home park in the extraterritorial jurisdiction area, a concern arose about the maximum length of 300 feet for cul-de-sac streets in a manufactured home park. Within typical residential subdivisions, a maximum length of 1,000 feet for cul-de-sac streets is established based on N.C. Fire Code standards. Although streets within manufactured home parks are typically privately owned, they must be constructed to a similar standard as residential subdivision streets. After conferring with Engineering and Fire Department representatives and noting no issues, staff decided that it would be appropriate to consider similar cul-de-sac street lengths within manufactured home parks.

This proposed amendment has been forwarded to CAN, CIBO, and CREIA.

Pros –

- This amendment would set consistent cul-de-sac street length standards in the UDO for a variety of residential uses.
- The proposed standards would allow for additional development to take place in certain situations.

Cons –

- The proposed amendment would potentially encourage a more linear pattern of development with fewer connections between streets.

The Planning and Zoning Commission recommended approval of this code amendment on January 6, 2005, by a unanimous vote of 7-0.

City staff recommends approval of the amendment to the UDO for the purpose of allowing longer cul-de-sac streets within manufactured home parks.

Mayor Worley closed the public hearing at 6:38 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3210. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 476

IV. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3200, AN ORDINANCE TO REZONE 9 CURRY COURT FROM COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS I DISTRICT

Urban Planner Julia Cogburn said that a certified letter, return receipt requested, was sent to the property owners and the return receipt was received by the Planning Department. In the letter she specifically asked for them to contact her if they had any concerns or questions regarding the proposed rezoning. She has not heard anything from the property owners.

Upon inquiry of Vice-Mayor Mumpower, Ms. Cogburn explained why the Planning & Zoning Commission initiated the rezoning.

Councilman Dunn expressed concern with the City zoning someone else's property.

Councilman Davis felt that the City has other important issues to deal with than to zone someone's property not in the City limits.

Councilman Newman felt that in the first or second quarter of this year Council needs to focus on some of the big issues. One is that if we are going to extend regulatory land use policies to the extraterritorial jurisdiction, it is our choice to do it and to make sure they make sense. If we don't want to have land use policies out there, we need to decide that.

When Mayor Worley called for a vote on the second and final reading of Ordinance No. 3200, it carried on a 5-1 vote, with Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 454

V. NEW BUSINESS:

A. RESOLUTION NO. 05-20 - RESOLUTION AUTHORIZING ACCEPTANCE OF TRANSFER OF ASTON PARK TO THE CITY OF ASHEVILLE EFFECTIVE FEBRUARY 1, 2005

Parks & Recreation Director Irby Brinson said that on November 16, 2004, Buncombe County Commissioners unanimously approved the transfer of Aston Park back to the City of Asheville. During this discussion, the Commissioners stated that the park would be submitted to the City "as is" and contingent upon the City accepting the current employee at the facility (which employee has since resigned) and not charging a non-City resident fee until the Water Agreement has been resolved. On December 13, 2004, the City Manager addressed this issue with the County Manager and expressed concern over the removal of the playground equipment by the County several months prior to this. The estimated cost of this playground equipment is

$80,000. In addition, the City Manager expressed concern about the non-City resident fee issue and the fact that this additional fee would help the City off-set costs incurred for operation.

The Parks and Recreation Department has been working on a Park and Recreation Trust Fund grant for Aston Park that would be used in conjunction with the Dick and Irene Covington Foundation funds. These funds would be used for improvements to the Aston Park facility including the construction of a new tennis center as well as the installation of a new playground. One of the key issues in regard to this grant involves the City having the title to the property. The title would be necessary in order for the grant process to proceed, which is due on January 31, 2005. Staff, however, does feel that the City should be compensated for the cost of the playground and that staff be able to set differential fees for City residents beginning in July of 2005.

Pros:

- The transfer of the facility will allow the City to apply for a Parks and Recreation Trust Fund grant that will make improvements to Aston Park without any City financial contribution.
- The transfer of the facility will occur prior to the tennis season for 2005.
- Transferring this facility prior to other County facilities will set the standard for how the overall transition occurs.

Cons:

- The replacement of the playground equipment will become an obligation of the City if the County fails to pay for replacement or reinstallation.
- Transferring this facility prior to other County facilities will set the standard for how the overall transition occurs.

This transfer relates to the City of Asheville Strategic Plan regarding steps necessary to resolve the Water Agreement.

The Parks and Recreation Department recommends the transfer of Aston Park to the City of Asheville effective February 1, 2005, if Buncombe County agrees to pay for the operating costs for the Park through June 30, 2005. The City would then be willing to forgive the cost or reinstallation of the playground equipment and implementation of differential rates for non-City residents until July 1, 2005.

Mayor Worley said that he has talked to some of the Buncombe County Commissioners and they don't meet again until after February 1, 2004, however, there has been an indication that they have heard City Council's concerns and will work with us to resolve those concerns. As a result of that, he felt that some of the wording in the proposed resolution will need to be amended.

City Attorney Oast suggested the following amendment to Paragraph 1: "The City be, and is hereby, authorized to accept the transfer of Aston Park from Buncombe County to the City; subject to satisfactory resolution of issues identified by Buncombe County in its action authorizing the conveyance; the form of this conveyance shall be subject to approval by the City Attorney." Paragraph 2 in the proposed resolution would be deleted in its entirety.

Mr. Fred English supported the City taking over Aston Park but was concerned about who would have to pay for damages and the security of the Park.

Mr. Gene Hamilton supported the City taking over Aston Park. He felt the clay tennis courts are the best in the southeast.

In response to Vice-Mayor Mumpower about operating costs, Mr. Brinson said that a budget amendment will be brought back to Council which represents an expenditure of $63,548, which will be offset by $25,000 anticipated in revenue for the five-month operation. The result is a cost of $38,598 to the City for this five-month operation. For a full year, he believed the net cost would be approximately $86,000.

Vice-Mayor Mumpower was grateful to Buncombe County for working with Asheville to transfer this facility, which is in the middle of the City. It makes good sense for the City to manage it. He was sure that the City intends to have this nice facility a safe place. Mr. Brinson said that it is the City's intent to convert the Park into a very active location for positive alternatives.

Councilman Newman asked if we anticipate Buncombe County transferring any additional recreation properties in advance of the termination of the Water Agreement. City Manager Westbrook said that the County has notified us that on June 30 they would transfer Nature Center back to the City. That was under a separate inter-local agreement that was not renewed by the County – not a part of the Water Agreement.

Councilman Newman said that there are several different recreational properties that are wrapped up in the Water Agreement. Out of all of them, Aston Park is the strongest argument that it should be operated by the City of Asheville, since it is in the heart of downtown and primarily used by Asheville residents. However, some of the other recreational properties serve a much more regional audience. While he supports the Aston Park transfer, he hoped that we can talk about the others and where those would best be administered in the future.

Upon inquiry of Councilman Dunn, City Manager Westbrook said that the Municipal Golf Course and McCormick Field are part of the Water Agreement.

City Attorney Oast said that he did have a discussion relative to McCormick Field coming back to the City before July 1, but he didn't know that any action has been taken on that.

Upon inquiry of Councilman Newman, City Attorney Oast said that other recreational properties Buncombe County wishes to transfer to the City prior to the termination of the Water Agreement would require the City to affirmatively say we want it back, unless the entire Water Agreement is terminated in which case they automatically revert.

Mr. Brinson noted that this transfer is tied to a grant request as well. The grant does require us to have a clear deed to the property by January 31, 2005. He was hopeful that we will be able to have a clear deed by that time, however, if not, then we would not be able to apply for the funds through the Park and Recreation Trust Fund.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-20. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 480

G. ORDINANCE NO. 3211 - BUDGET AMENDMENT FROM THE IRENE AND DICK COVINGTON FOUNDATION FOR THE CONSTRUCTION OF A CLUB HOUSE AT ASTON PARK

Parks & Recreation Director Irby Brinson said that this is the consideration of a budget amendment, in the amount of $262,576.05, from the Irene and Dick Covington Foundation for the construction of a club house at Aston Park.

Several years ago, the Irene and Dick Covington Foundation was established in order to preserve the memorabilia from Dick Covington's life and tennis career and to construct a new club house at Aston Park. This Foundation was a dream of the Covington's, and at Dick Covington's death his entire estate was placed in this Foundation. Since Aston Park was operated by the County, in 2002 the Foundation approved the transfer of these funds to Buncombe County to construct this facility. Delays occurred in this construction to the point where the Covington Foundation requested from both the City and the County that this process be expedited by transferring the funds back to the City of Asheville. Now that the County has approved the transfer of Aston Park back to the City of Asheville, this process can continue and be completed. The total amount that was originally sent to the County totaled $278,709.56. There were expenditures for architectural services that came out of this account.

Pros:

- The facility will be built prior to the 2006 City of Asheville Open Tennis Tournament in July.
- The City will have complete control over construction.

Cons:

- The Covington Foundation has been very frustrated in the delay of this construction and will be monitoring progress.
- Actual costs for construction will be higher than available funds.

The Parks and Recreation Department recommends City Council approve a budget amendment, in the amount of $262,576.05, to appropriate funds into the Capital Fund in order to enter into a contract for the construction of a new club house at Aston Park.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

When Councilman Dunn asked if this amount would cover the total cost of the clubhouse, Mr. Brinson responded that the grant we are working on with the Park and Recreation Trust Fund will cover the additional costs. If we are not able to apply for that grant, then we will look at other sources.

Upon inquiry of Councilman Davis regarding the Trust Fund grant, Mr. Brinson said that if we don't have a clear title by January 31, 2005, we will have to wait until 2006 to reapply. Again, we will be looking at other sources for funding.

In response to Councilman Davis, City Attorney Oast said that the City has been doing the legal work necessary to get clear title, which involves title searches and preparation of the deed. He felt fairly certain that those issues will be resolved in time to facilitate the transfer, however, it's the resolution of the other issues that may interfere with that.

Mayor Worley said that the Buncombe County Commissioners are aware of the need to have clear title by the end of January in order to apply for the grant.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3211. This motion was seconded by Councilwoman Jones and carried unanimously.

C. **RESOLUTION NO. 05-21 - RESOLUTION APPOINTING THE CHAIR TO THE ALCOHOLIC BEVERAGE CONTROL BOARD**

Vice-Mayor Mumpower said that City Council appoints the Chair to the Alcoholic Beverage Control Board. Current members on the Board include: Chair Debora Holmes Young, Tom Bell, Barbara Field, Ken Kaplan and Duane Jarnecke.

Tom Bell received 1 vote and Duane Jarnecke received 5 votes. Therefore, Duane Jarnecke was appointed as Chairman to the Alcoholic Beverage Control Board to serve until his term expires on November 13, 2005, or until City Council appoints his replacement.

RESOLUTION BOOK NO. 28 – PAGE 481

VI. OTHER BUSINESS:

Councilman Dunn, member of the Asheville Regional Airport Authority, reported on the increased air traffic capacity in Asheville. He also explained why the Airport Authority would like City Council to consider adding a Henderson County person as an ex-officio non-voting member on the Authority. Mayor Worley said that the Boards and Commissions Committee will review this request and bring a recommendation to the full Council. In addition, City Attorney Oast said that the Airport Authority is made up in an Inter-local Agreement. He will review that agreement and if Council wishes, bring an amendment forward to make that change.

Vice-Mayor Mumpower announced various board and commission vacancies for the month of February.

Councilwoman Jones announced that the 3rd annual Cut-the-Risk "cut-a-thon" was held on January 17, 2005, and was a great success. She thanked the 80 stylists who donated their time at 18 Asheville salons and spas and served over 200 customers in the benefit that raised nearly $10,000 for the Women At Risk Program.

The following claims were received by the City of Asheville during the period of January 8-20, 2005: James E. McKinney (Transit Services), John W. Cole (Transit Services), Susan Hise (Police), John Morgan (Transit Services), Dean Metcalf (Transit Services), Kevin Jenkins (Transit Services) and James McElreath (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English commented on the 10-Year Plan to End Homelessness in Asheville and his version of said plan.

Mr. Bob Smith, Executive Director of the Asheville-Buncombe Community Relations Council, briefed Council on their past year's activities and thanked City Council for their support.

Mr. Gene Hamilton, representing Asheville Citizens for Quality Government, said that in this 21st century it is virtually impossible to operate successfully without a Comprehensive Quality Plan. The International Standards Organization 9000 Series provides ample guidance for the development of such a plan. Since the City is already doing quality management, he suggested City Council perform an audit to determine the degree of quality achievement in all City departments.

At 7:27 p.m., Councilman Newman moved to go into closed session in order to consider the qualifications, competence, performance, character, or fitness of an individual public officer or

employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act - The statutory authorization is contained in G.S. 143-318.11(a)(2); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Carolina Power & Light Company; and the City of Asheville - The statutory authorization is contained in G.S. 143-318.11(a)(3). The motion was seconded by Councilman Dunn and carried unanimously.

At 9:15 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Newman and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:15 p.m.

Magdalen Bradley
CITY CLERK

Charles R. Worley
MAYOR

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Terry M. Bellamy

PLEDGE OF ALLEGIANCE

The Army ROTC Color Guard from Owen High School led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. UNITED WAY

Mr. David Bailey, representing the United Way, thanked the City of Asheville for the outstanding United Way campaign. City employees exceeded their goal by an increase of 16.4%. Mayor Worley also thanked the City of Asheville's Campaign co-coordinators Kelley Webb and David Cole.

B. PROCLAMATION PROCLAIMING FEBRUARY 2005 AS "BLACK HISTORY MONTH"

Mayor Worley read the proclamation proclaiming February 2005 as "Black History Month" in the City of Asheville.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 25, 2005

B. RESOLUTION NO. 05-22 - RESOLUTION AUTHORIZING THE EXCHANGE OF AN EASEMENT ON REAL PROPERTY LOCATED ON BLACK OAK DRIVE FOR AN EASEMENT ON REAL PROPERTY LOCATED ON PINECROFT ROAD

Summary: The consideration of a resolution authorizing the Mayor to convey an easement on real property located on Black Oak Drive in exchange for an easement on real property located on Pinecroft Road.

The City and Mr. & Mrs. Fulton H. Beville have negotiated an exchange of a driveway easement over the Beaverdam Reservoir property (PIN No. 9751.17-10-7654) on Black Oak Drive for a slope/fill easement across real property located on Pinecroft Road (PIN No. 9751.17-10-9594).

At the time that the Beaverdam Reservoir was built a substantial amount of fill was placed on the Beville's property thereby allowing a cost savings to the City and providing lateral

support to the reservoir site maximizing the use of the property. The Beville's were not compensated for the use of their property, but instead understood that the use of the reservoir access road would be available to them to access a portion of their property not easily accessible from Pinecroft Road because of topography.

A formal arrangement has not been in place heretofore, but it is advisable to formalize the arrangement through an exchange of easements which will satisfy the City's need to keep the fill in place as well as the Beville's need to access their property.

The driveway easement would be 12' wide and about 350' long comprising an area of 4,200 square feet. Based on the tax value of the land per square foot (.92), at a 50% easement value, the driveway easement would have a value of $1,932. Water Resources staff estimates that the benefit to the City of having the fill in place would equal or exceed the value of the driveway easement.

The use of the driveway by the Bevilles will not impair the function nor security of the reservoir, but could improve security to the extent that the Bevilles would be able to observe the reservoir site.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will establish record title in the City of the right to have the fill area remain on the Beville's property.
- It will establish a clear description of the size and location of the driveway easement.
- It will formalize the arrangement thereby reducing the likelihood of future misunderstandings.

The negative aspects are:

- The driveway easement will limit the use of the reservoir property within the easement area.

On January 25, 2005, City Council approved Resolution No. 05-12 directing the City Clerk to publish a notice regarding the proposed exchange. Pursuant to N.C.G.S. sec. 160A-271 the notice was published in the Asheville Citizen-Times on Friday, January 28, 2005.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. sec. 160A-271.

Planning & Development staff and Water Resources staff recommend adoption of the resolution.

RESOLUTION BOOK NO. 29 – PAGE 1

C. RESOLUTION NO. 05-23 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "CRAFTSMAN CIRCLE" LOCATED OFF ROLLING TERRACE

Summary: The consideration of a resolution accepting the new proposed street name "Craftsman Circle."

Chunns View LLC, owner of lots on Craftsman Circle, off of Rolling Terrace, has petitioned the City of Asheville to accept the street name " Craftsman Circle." The new street will begin at Rolling Terrace in a complete circle and end at Rolling Terrace.

City staff recommends adoption of the resolution accepting the new proposed street name "Craftsman Circle."

RESOLUTION BOOK NO. 29 – PAGE 2

D. RESOLUTION NO. 05-24 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF "VILLAS COURT" OFF CEDAR HILL ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Villas Court."

Villas at Cedar Hill, LLC, owner of lots on Villas Court off of Cedar Hill Road and Pisgah View Road, has petitioned the City of Asheville to accept the street name " Villas Court." The new street will begin at Cedar Hill Road and end at Pisgah View Road.

City staff recommends adoption of the resolution accepting the new proposed street name "Villas Court."

RESOLUTION BOOK NO. 29 – PAGE 3

E. RESOLUTION NO. 05-25 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAMES OF "VERONA DRIVE," "SPRINGMILL DRIVE," AND "TIVOLI DRIVE" LOCATED IN WOODLAND DRIVE SUBDIVISION

Summary: The consideration of a resolution accepting the new proposed street names "Verona Drive," "Springmill Drive," and "Tivoli Drive."

Michael Pierce of MK Properties of Fairview, Inc., owner of lots in Woodland Drive Subdivision, has petitioned the City of Asheville to accept the street names of "Verona Drive," "Springmill Drive," and "Tivoli Drive." The new streets will begin near the intersection of Woodland Drive and Spring Drive and end near the intersection of Woodland Drive and Shadowlawn Drive.

City staff recommends adoption of the resolution accepting the new proposed street names "Verona Drive," "Springmill Drive," and "Tivoli Drive."

RESOLUTION BOOK NO. 29 – PAGE 4

F. RESOLUTION NO. 05-26 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR THE PURCHASE OF SPEED ENFORCEMENT EQUIPMENT AND TRAVEL/TRAINING MONEY FOR THE ASHEVILLE POLICE DEPARTMENT'S REGIONAL COUNTY COORDINATOR

Summary: The consideration of the resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program (GHSP) for the purchase of speed enforcement equipment and travel/training money for the Asheville Police Department's Regional County Coordinator, and the associated budget amendment, in the amount of $10,000.

The City of Asheville has been awarded a grant from the GHSP in the amount of $10,000 with no local match required. The purpose of the grant program is to fund highway safety projects, allowed under the grant program, designed to reduce traffic speed, traffic accidents and

improve highway safety. We have chosen to purchase five Custom Pro 1000 RADAR Units at $1,000 each with a total of $5,100. The other grant monies would be spent on in-state and out-of-state travel expenses, totaling $4,900. The desired equipment, to be installed in Patrol Division vehicles, is for the purpose of speed reduction through rigorous enforcement, thus reducing minor and major accident statistics. The travel monies will allow out department's Regional Liaison Officer to keep in contact with the other eight

Pros:

- Equipment will improve the quality of evidence obtained by police officers during their daily interaction with the public particularly in the area of traffic enforcement.
- Will contribute to the reduction of crime by improving the effectiveness of traffic enforcement which is related to the discovery and solvability of a variety of other criminal activities.
- Equipment will increase public safety by ensuring that officers are conducting themselves in the proper manner and within the legal requirements of state law.
- Officer safety will be increased by documenting encounters between the police and contacts in the public.

Cons:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment including servicing and replacement when needed.

This action complies with City Council's Strategic Operating Plan: Goal #2 A multi-modal and congestion management transportation program - In conjunction with major employers and traffic generators, develop and implement a comprehensive multi-modal transportation and congestion management program that works for Asheville. Objective B. Mitigate overall impacts of congestion through effective local partnerships.

This is accomplished by identifying areas of the City that are particularly prone to traffic accidents due to speed and other aggressive driving tactics. Through the efforts of the Asheville Police Department and the use of the equipment purchased through the GHSP Grant, this will alleviate minor traffic accidents and reduce traffic congestion.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program (GHSP) for the purchase of speed enforcement equipment and travel/training money for the Asheville Police Department's Regional County Coordinator; and (2) the associated budget amendment, in the amount of $10,000.

RESOLUTION BOOK NO. 29 – PAGE 5

G. ORDINANCE NO. 3212 - BUDGET AMENDMENT TO ALLOCATE FUNDS FROM N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM GRANT

Summary: See Consent Agenda Item "F" above.

ORDINANCE BOOK NO. 22 – PAGE 1

H. ORDINANCE NO. 3213 - BUDGET AMENDMENT FOR ASTON PARK TENNIS CENTER TRANSFER

Summary: The consideration of a budget amendment, in the amount of $63,548 for expenditures and $25,000 for anticipated revenue, to proceed with the transfer of the Aston Park Tennis Center to the City of Asheville.

On November 16, 2004, Buncombe County Commissioners voted to authorize the County Manager to proceed with the transfer of the Aston Park Tennis Center to the City of Asheville. On January 25, 2005, City Council adopted Resolution No. 05-20 authorizing acceptance of the transfer effective February 1, 2005. The Parks and Recreation Department is recommending a budget amendment, which represents an expenditure of $63,548, which will be offset by $25,000 anticipated in revenue (from membership fees, daily court fees and concessions) for the five-month period. The result is a cost of $38,548 to the City for this five-month operation.

The Parks and Recreation Department recommends City Council approve a budget amendment for $63,548 for expenditures and $25,000 for anticipated revenue

ORDINANCE BOOK NO. 22 – PAGE 3

I. **RESOLUTION NO. 05-27 - RESOLUTION AUTHORIZING EXECUTION OF AN EASEMENT TO THE METROPOLITAN SEWERAGE DISTRICT FOR A SEWER LINE REPLACEMENT ACROSS CITY-OWNED PROPERTY**

Summary: The consideration of a resolution granting a sewer line easement to MSD.

MSD is currently rehabilitating its sewer lines within the Smith Mill Creek corridor along Patton Avenue. This work consists of repairing broken lines and enlarging existing lines. The line crosses the City's property occupied by the Army Reserve Training Center on Louisiana Avenue, on the north end of the property, which is also the south side of the creek.

As proposed, part of the line will be relocated across the creek so that in the end, less of it will be on the City's property than currently. It will be enlarged from its current 16 inch diameter to a 20 inch size. This is an old line, and although it will essentially be repaired/enlarged in place, there is currently no easement for it, probably because it was installed back when the City operated the system, and this is City property.

The requested easement consists of a permanent easement approximately 20-25 feet in width, and a temporary construction easement that is a little wider, at approximately 35-40 feet in width.

The easement will not interfere with the current use of the property by the Army Reserve. The Reserve has been contacted, and has consented to and signed the easement.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 29 – PAGE 6

J. **RESOLUTION NO. 05-28 - RESOLUTION APPOINTING JAMES L. WESTBROOK JR. AS INTERIM CITY MANAGER EFFECTIVE FEBRUARY 28, 2005**

Summary: The consideration of a resolution appointing retiring City Manager Jim Westbrook as Interim City Manager, and a resolution authorizing the City to enter into a contract with Mr. Westbrook for interim management services.

Current City Manager Jim Westbrook is retiring effective March 1, 2005. Council has not selected his replacement, but is in the process of doing so. However, there will be a continuity gap between Mr. Westbrook's retirement date, and the date when the new manager starts.

North Carolina law, N.C.G.S. 160A-150, provides that when the manager's position is vacant, "the council shall designate a qualified person" to perform the duties of the manager until the position is filled. At Council's request, Mr. Westbrook has consented to continue as manager in an interim capacity until the new manager is on the job. He has agreed to do this at his current compensation (salary plus certain expenses).

One resolution appoints Mr. Westbrook as Interim City Manager, effective February 28, 2005, at 5:00 p.m., until the new city manager is on the job.

Another resolution authorizes the Mayor to sign a contract with Mr. Westbrook setting out the terms and conditions of his employment as Interim City Manager.

The appointment and the contract are both terminable at the will of Council, as the law requires; however, the contract contains some provisions for notice of any premature termination. The contract also contemplates that Mr. Westbrook may be retained in a consulting capacity even after the new manager is on the job, but any such service would be pursuant to a separate agreement.

If Council approves of the appointment of Mr. Westbrook as interim city manager, adoption of the resolutions is recommended.

RESOLUTION BOOK NO. 29 – PAGE 7

K. RESOLUTION NO. 05-29 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A CONTRACT WITH JAMES L. WESTBROOK JR. TO SERVE AS INTERIM CITY MANAGER

Summary: See Consent Agenda Item "J" above.

RESOLUTION BOOK NO. 29- PAGE 8

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO REZONE 8.8 ACRES LOCATED ON BRITT DRIVE FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RIVER DISTRICT

Mayor Worley opened the public hearing at 5:12 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to rezone 8.8 acres located on Britt Drive from RS-4 Residential Single-Family Medium Density District and RM-16 Residential Multi-Family High Density District to River District. This public hearing was advertised on January 28 and February 4, 2005.

The Asheville City Development Plan 2025, the Wilma Dykeman Riverway Master Plan and the Economic Development Strategic Plan all call for redevelopment efforts along Asheville's riverfront areas that will maximize its full potential as a quality of life amenity as well as the assignment of appropriate zoning along portions of the riverfront that will permit higher density development and mixed use opportunities.

The future Land Use and Transportation plan of the *Asheville 2025 Plan* identifies redevelopment of the riverway in the core areas as an Urban/Neighborhood Corridor (connects neighborhoods with each other, with employment centers, with institutional uses and with major thoroughfares) and the remainder of the parkway being designed as a Gateway Boulevard (adjacent development in the form of residential subdivisions, apartment complexes, office parks or concentrated commercial development).

The subject site was denied approval of a Level III, Conditional Use project for an affordable housing development in March 2004.

The subject site is located off of Swannanoa River Road and Britt Drive and consists of approximately 8.8 acres. The lot is currently vacant and split zoned RM-16 and RS-4. The zoning line between the two districts runs directly behind the 14-foot strip of land that abuts White Pine Drive and the remainder of the site.

Surrounding land uses and zoning include: multi-family (2 units) uses to the north and single-family residential uses to the east zoned RS-4; commercial uses to the south zoned River; and a mix of residential and commercial uses zoned RS-8, RM-16 and River to the west of the site.

The subject site has road frontage along Swannanoa River Road and also Britt Drive. The property may also have the ability to access White Pine Drive via the narrow strip of land along the east side of the property. The topography on the lot is fairly steep along the north and east sides of the property. The land begins to gradually level out throughout the center of the property and along the west and south sides of the site. Abutting residential uses along the north and east sides of the property, for the most part, sit at a much higher elevation than the subject site. Abutting commercial uses to the west and south of the property sit at or just slightly below the same elevation as the more level areas of the site.

The applicant is requesting a rezoning of the lot in order to maximize its development potential in allowing the wider range of uses that would be permitted in the River District.

- The purpose, intent and goals of the River District is to promote economic revitalization throughout the river valleys by allowing a mixture of river oriented land uses (residential, recreational, office/institutional, commercial, manufacturing, industrial, open space and agricultural) to be developed responsibly by ensuring that new development is compatible with and enhances the riverway's unique river resources.

- The purpose and intent of the RM-16 district is to permit a full range of high density multi-family housing types along with limited institutional, public and commercial uses to be located near employment centers, shopping facilities, and other urban infrastructure capable of handling the demand generated by high density residential development.

A recent effort to develop the property with apartments was denied by City Council due to public safety concerns for residents due to the location of a private dam in the area. Allowing a wider range of uses, especially nonresidential uses, may serve to address this concern, although it should be noted that the River District does allow residential development as well as nonresidential development.

On January 5, 2005, the Planning and Zoning Commission made a positive recommendation (6-1) to approve the rezoning of the property, as requested.

Pro's

- Rezoning the lot to River District will allow the applicant an opportunity to select from a range of uses when developing the site that may be more compatible with the existing development along Swannanoa River Road, and also with the redevelopment efforts along the riverway.
- The existing topography on the site provides, somewhat of, a natural separation from abutting residential uses on the north and east sides of the property, making the land more suitable for a wider range of uses.
- Any development of the site will require review by the River District Design Committee.
- Any development of the site must comply with all City regulations including UDO requirements, NC State Building Code, and FEMA requirements.

Con's

- Portions of the site are within a flood hazard area. However, any development of the site would be required to comply with all FEMA regulations prior to the issuance of any building permits.
- The potential for an access connection from the lot to White Pine Drive may be of concern to abutting residential property owners.

The proposed rezoning to River District would be consistent with the zoning of abutting properties to the south of the site along Swannanoa River Road, and also with the established zoning along the north and south sides of the riverway. Staff feels that rezoning the lot to River District will have little effect on the residential uses to the north and east of the site due to the existing topography and differences in elevation. Any development of the site would have to comply with the development and design standards required in the Unified Development Ordinance, including the landscaping and buffering of incompatible uses.

Based on the above, staff recommends approval of the rezoning to River District as requested by the applicant.

Mr. Thomas Wolfe, agent for the owner, Batt and Associates, Inc., said that the current density is RM-16 which would provide for approximately 150 units and the conditional use permit brought before Council last year was for 100 units, which permit was denied by City Council. From that denial, he understands that Council feels this property is not conducive to high density residential development (which is what it is currently zoned). Therefore, the owner desires to develop it sensitively and responsibly, but they needed some parameters they can work within.

Councilman Newman asked what might be developed on the property if it were rezoned to River District. Mr. Wolfe said that there have been several options, however, after spending approximately $40,000 last year on the plan denied by Council, they are hesitant to move forward with any plans.

City Attorney Oast reminded Council that if the property is rezoned, it is available for any use in that zoning classification. Council should not rely on any representation about specific uses on the property.

Mr. Mike Wiseman, resident at 7 East Shore Drive in Kenilworth Forest, said that his neighborhood is not trying to obstruct the process of development, however, they have a specific concern about the rezoning in light of the potential for residential development. They would like to help Mr. Wolfe develop the land responsibly. He briefly reflected on City Council's wisdom last year to deny the multi-unit project by showing various photographs of the area during recent

floodings. In fact, the Swannanoa River has flooded 5 times in the last 9 years. Another concern is that any residential development that has fewer than 20 units is only subject to River District Design Committee review with no City Council approval and no public hearing. He urged City Council to put the citizens of Asheville's safety first and don't allow for residential development on that property.

Ms. Addison Martin, secretary of the Kenilworth Forest Community Club, said they are concerned about the habitual flooding of the Swannanoa River and the safety of any potential resident. She also showed photographs of recent floodings, in particular of how the River directly impacts the access to Mr. Wolfe's property and why they request that no residential buildings be allowed on that property.

Mr. William Mansfield, resident at 215 White Pine Drive, also showed Council photographs of recent floodings in the area proposed for rezoning. He stressed out how difficult it would be for any emergency vehicles to reach the residential property during flooding. They are not opposed to development of the property, however, they do not feel any form of residential, single-family or multi-family homes, should be allowed on that property. This is a plea to prevent potential loss of life and/or homes when flooding happens again with no access for emergency response. He suggested the property be developed with light commercial or light industrial. If the property is rezoned to River District, he requested the owner put in writing that they will not develop any residential dwellings on the property. Or, he requested City Council to remand this matter back to the Planning & Zoning Commission for their review of light industrial or commercial use.

City Attorney Oast said that City Council cannot condition its vote on the application for rezoning to do or not to do any particular kind of development.

Ms. Claire Payne, resident at 291 White Pine Drive, said that an historian has said that this property was used as a dumping ground for asbestos from the construction materials removed from the Kenilworth Inn. She said that during the previous hearing last year the City Engineer said that the City would not put a road within the 100-year floodplain. She questioned if the City's position has changed. During the hearing last year Mr. Wolfe said that he did not plan to develop or use that narrow strip of land that connects Mr. Wolfe's property to White Pine Drive. Mr. Wolfe had offered to deed the land to adjacent neighbors on White Pine Drive. She asked that condition be offered again to the Kenilworth Forest Community Club. If Mr. Wolfe rejects that request, then she requested the City make sure that strip of land remains zoned RS-4.

City Attorney Oast said that it would be possible for Council to zone this property to some classification other than River District, provided it was less intense zoning than the River District, which may or may not prohibit residential development. As far as the access onto White Pine Drive, there is a provision in our Zoning Code that would not allow the strip that connects to White Pine Drive to be used to access the property – it would be allowing access to a nonresidential use through a residential area and our Zoning Code prohibits that.

Mr. Rick Holm, resident at 414 Beaucatcher Road, urged City Council to not zone the property when they can't put restrictions on the developer. He used his neighborhood as an example, citing the location of the new Cheeseburger from Paradise restaurant is where the originally proposed development was a medical/dental cluster of buildings.

Ms. Kathy Sheldon, resident at 159 White Pine Drive, spoke against any residential development on the property due to the anticipated flooding in the area.

Mr. Harold Payne, resident at 299 White Pine Drive, said that his property abuts the narrow strip of land from White Pine Drive to the subject property. Regardless of what is

developed on that property, he asked Council to do what they can to keep that strip of land from becoming a thoroughfare.

At 5:40 p.m., Mayor Worley closed the public hearing.

Upon inquiry of Vice-Mayor Mumpower, Ms. Hamel said if Council makes no changes to the zoning, the owner is limited to residential, with very limited institutional, public and commercial uses. With the current zoning, she said that he could build 20 or fewer units with only staff level review. Twenty to fifty units would go before the Technical Review Committee for review. Under the current zoning, the owner can build up to 150 units, but that would trigger the conditional use permit process. Again, she said that even if the property were rezoned to River District the same density (16 units per acre) is permitted in the River District.

In response to Vice-Mayor Mumpower, Planning & Development Director Scott Shuford said that during the first flood, portions of Swannanoa River Road were closed for approximately 72 hours due to debris, mud and roadway damage. During the second flood, Swannanoa River Road was closed for approximately 24-28 hours.

Vice-Mayor Mumpower questioned safety concerns. Ms. Hamel said that at the last hearing some access concerns with the 100-year floodway were raised. After review with our City Engineer Cathy Ball, she believed that the access issue was in regard to the application being reviewed by the U.S. Dept. of Housing and Urban Development (HUD) for affordable housing. HUD was who actually limited the access onto Swannanoa River Road. Ms. Ball clarified today that the Flood Code requires that they would have to provide a dry access route only if it is not adjacent to a public road. Because Swannanoa River Road is a public road, they would still allow access, regardless of whether it was below the flood elevation or not.

Mr. Shuford said that the safety issue is hard to determine until we have some certainty what is being proposed for the property. Residential is a possibility under the River District and almost a certainty under the current RM-16 zoning. About the only zoning district that would not have a significant residential component might be industrial, which does allow accessory units, like a caretaker's residence. He didn't know how acceptable that district would be to the applicant, however.

Mr. Shuford said there is an awful lot of property in the River District that is either in the floodway or floodplain. It is possible to develop that property and to develop it safely. This particular property is not going to have an access connection to White Pine Drive, simply because we have a provision in our Code that does not allow nonresidential uses to connect through to a residential area. In addition, that strip of land won't be a primary access to White Pine Drive because of the width of the access area. It's possible that it could be some sort of an emergency access to the site, but we would have to review that and we don't have any plans to accommodate that. This is an area that will be basically isolated in a flood event and the developer will have to understand that as well as the people involved. If it is used for residential, then some provisions will need to be made to get the people out in the event of a flood which would threaten their access to their homes.

When Vice-Mayor Mumpower asked if the Fire Department was concerned at the last hearing about the number of units, Ms. Hamel said that they were okay with the number of units proposed. She didn't know if the Fire Department's opinion has changed since the floods.

Vice-Mayor Mumpower asked if, as a matter of policy, if it is not Planning's recommendation to Council that we take land off the table because access might be impaired by floodplains. Mr. Shuford said that was correct and that we would have to take a lot of property off the table if that would be the case, including significant portions of Biltmore Village.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford explained what happened at the Cheeseburger in Paradise location. He didn't think there was any zoning change by City Council on that site, but would have to check the file to verify that.

Councilman Dunn recalled that the dam had not had a major inspection in a long time and he recalled the City Engineer saying that if the dam broke it would be catastrophic. He might be able to support a commercial zoning district, but would not support this zoning change in that we will risk human life. Mr. Shuford responded that he didn't know what the inspection process is for that, but it is an annual inspection process for these types of privately owned dams. He said that Kenilworth Lake is not a public lake and the dam is not a public dam. It is privately owned and there are inspections that are required by the State to maintain it. The only sure way to ensure safety downstream of the dam would be to remove the dam and drain the lake. There is no guarantee that even if that were a new dam that it would not fail at some point in time.

Councilman Newman moved to deny rezoning 8.8 acres on Britt Drive from RS-4 Residential Single-Family Medium Density District and RM-16 Residential Multi-Family High Density District to River District. This motion was seconded by Councilman Dunn.

Councilman Newman said that he doesn't support rezoning of the property at this time. The dam is not the reason for his lack of support because at the hearing last year he was persuaded by the developer's attorney who made the case that if the dam is genuinely considered a safety risk, the neighborhood has a responsibility to dismantle the dam - there are already people who work below the dam. There are dams all across Western North Carolina and people live and work below dams and it's the State's responsibility to make sure that dam is safe. He does not support this rezoning because it is a very difficult site to develop. The topography is very difficult and on the previous project he voted against it citing more issues on the scale and character criteria of the conditional use permit. The fact that Council did not support the previous development proposal, which was consistent with the RM-16 zoning, does not logically follow to him that Council would then turn around and give the property owner greater flexibility. He doesn't want to make this property impossible for the developer to develop, but at the same time he was not sure he wants to give greater flexibility in terms of what can be allowed as a use by right on that site. The developer can already develop up to 50 units with the current zoning. A smaller development with a smaller footprint may make sense on that site. But if it's going to be a larger, more intense development, he feels it would have to be tied up into some careful conditional use aspects that Council would need to consider. He also noted that in staff's analysis of compatibility, they show the only high degree of compatible is on the south side which is up against commercial and industrial uses. He would be open to the idea that there may be some nonresidential uses that might be more compatible.

In response to Vice-Mayor Mumpower, Ms. Hamel said that the developer did consult with City staff prior to bringing forth the application to River District. Ms. Hamel said that given what happened with the project last year when Council didn't think the site was safe for residential, staff looked at the existing zoning pattern along Swannanoa River Road (and we did take topography into account - the residential area sits 20-30 feet above), River District was what was most compatible with the established zoning along the riverway.

When Councilman Newman asked if there has been any progress made about using Britt Drive as a key access, City Attorney Oast said the opponents to the project, through their attorney, raised issues regarding the availability of Britt Drive as an access point. Those issues have not been resolved but they would have to be resolved before any site specific development plan could be approved that used Britt Drive.

Mr. Shuford said that Council may only be comfortable with a zoning change that was associated with a particular development plan. However, because of the expenditure made by the applicant last year may make them reluctant to pursue that route.

Mayor Worley felt it was hypocritical to say, last year, that we are not going to approve any residential development on this property, and then turn around and say we are not going to change the zoning to anything other than residential. The other part is that even though Council may feel more comfortable with a development specific project though a conditional use process, the developer spent $40,000 last year and they may be reluctant to spend a lot of money to go through another conditional use process, with the possibility of losing that money as well.

Upon inquiry of Vice-Mayor Mumpower, Ms. Hamel said that there are portions of the property along Ross Creek that are within the 100-year floodplain. It's more likely that it would include Swannanoa River Road due to its close proximity to the river. The development proposed last year did not have any buildings in the floodplain - it was the access.

Vice-Mayor Mumpower said there is a difference between convenience and safety concerns. We just can't reach down and take property off the map because there are convenience concerns. He thinks Council may be micromanaging because we're saying our expertise exceeds that of the authorities in this matter, which would be the Fire Department and the people who evaluate the dam. If these people have an unsafe dam, they are responsible for it – not the people below the dam. The safety concerns are concerns, but that should paralyze this person's ability to do something with their property, especially in a City that needs property to develop. It is private property and he has some difficulty with us artificially impairing people's ability to use their property. He thinks controlled growth makes sense, but we have to do it thoughtfully and carefully. He feels the motion on the floor forces residential use, which doesn't make any sense. To allow the property owner a little more limited flexibility for them to make a meaningful use of this property makes more sense.

Councilman Davis recalled that last year the project was denied because the density was not compatible, among other issues. He would like to see that property be developed and would like to see some good uses in there – maybe some different uses than allowed in the River District. Without being able to add conditions, he is not comfortable with rezoning the area to River District given the types of uses allowed in that District and the density it can be developed. He would not be supportive of rezoning this property to River District.

Mr. Wolfe asked City Council to postpone action for 2-4 weeks in order to give him an opportunity to consult with Planning staff about a different district which may more be acceptable to Council, given Council's discussion.

Councilman Newman didn't have any problem with continuing to explore ideas. He wants to be supportive of finding a way to improve the property consistent with the concerns from Council.

Mr. Wolfe said that the leaning of the property owner is certainly towards commercial development. He asked Council to continue this matter in order for him to go back to his clients to see if they can narrow the scope of their development possibilities. He will then consult with Planning staff and see if they can amend the application.

Councilman Dunn wanted the owner to be able to use his property, however, City Council has already conducted two public hearings on this property and personally he preferred to make a decision now.

Upon inquiry of Councilman Newman, City Attorney Oast said that the only thing City Council could do, other than vote the River District zoning request up or down, is to rezone this to a less intensive zoning classification or to rezone part of the property to River District. He senses there is a possibility that a site specific development plan may be coming to Council, and he doesn't know if Council can change the procedure in mid-stream. If this proposal is denied, there is a one-year delay in coming back with the same rezoning proposal, but there would be nothing to prevent him from coming back within a year with a different rezoning proposal.

Vice-Mayor Mumpower made a substitute motion to continue this matter until March 8, 2005. This motion was seconded by Councilwoman Jones.

Mr. Shuford said that it sounds like Council will be reluctant to go forward with something other than a specific plan for the property, and that would be a conditional use zoning, which will require a re-start on the entire process. One alternative for consideration is to have Council refer this back to the Planning & Zoning Commission – which basically starts the process again. He didn't think they could find a satisfactory single zoning district that is going to address the issues Council has raised. It will have to be a site plan issue. If referred back to the Planning & Zoning Commission, they may take it up at their April meeting and then back to Council sometime after that.

Mr. Wolfe said that he is asking for the continuance to give him an opportunity to meet with his client to see if another zoning district might be acceptable. He said that there are certain requirements in the UDO for a conditional use permit application and he doesn't believe his client is willing to go through those motions again with full blown drawings.

Mr. Shuford said that they can explore some opportunities to split zone the property that might address some of the issues raised. However, if another zoning district is recommended, we are opening up that wider range of uses.

At this time, Councilwoman Jones withdrew her second on the substitute motion to continue because she said she would be interested in a site plan.

Vice-Mayor Mumpower's substitute motion to continue this matter until March 8, 2005, failed, due to a lack of a second.

The original motion made by Councilman Newman and seconded by Councilman Dunn to deny rezoning 8.8 acres on Britt Drive from RS-4 Residential Single-Family Medium Density District and RM-16 Residential Multi-Family High Density District to River District carried on a 4-2 vote, with Mayor Worley and Vice-Mayor Mumpower voting "no."

Councilman Newman said that he hopes that the property owner does not interpret Council's vote as saying there is nothing they can do to get Council's approval. In fact, the instincts where they wanted to go with this in terms of giving some commercial possibilities is good, and that is probably some of the kinds of things that could work well there. Council does have to consider the most intense possible use that can be allowed under that zoning district, and there were a few things in the River District classification that if fully built out would be a little too much for that site.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 05-30 - RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Vice-Mayor Mumpower said that Denise Goodson has resigned as a member of the Civic Center Commission, thus leaving an unexpired term until June 30, 2005.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to arrange interviews for Jean Ann Taylor, Brian Turner, Linda Fowler and W.E. Lack.

After Council members spoke in support of the candidates interviewed and the difficult decision to appoint one member, Jean Ann Taylor received no votes, Brian Turner received 2 votes, Linda Fowler received 2 votes, and W.E. Lack received 2 votes. Because of the three-way tie, it was necessary to vote again. Brian Turner received 3 votes, Linda Fowler received 2 votes, and W.E. Lack received 1 vote. Therefore, Brian Turner was appointed to fill the unexpired term of Ms. Goodson, term to expire June 30, 2005, and then to serve a full three year term, term to expire June 30, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 9

B. RESOLUTION NO. 05-31 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD OF DIRECTORS

Vice-Mayor Mumpower said that the term of Brady Blackburn, as a member on the Metropolitan Sewerage District Board (MSD), expired on January 19, 2005.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to arrange an interview with W. Louis Bissette Jr.

City Council spoke about the outstanding work Mr. Blackburn contributed to the MSD Board, however, he has served two full consecutive terms. Therefore, City Council unanimously appointed W. Louis Bissette Jr., as a member of the Metropolitan Sewerage District Board of Directors to serve a three year term, term to expire January 19, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 10

C. RESOLUTION NO. 05-32 - RESOLUTION APPOINTING MEMBERS TO THE TRANSIT COMMISSION

Vice-Mayor Mumpower said that the terms of Stacy Anderson, Ruth Chaet and W.F. Michie Jr., as members on the Transit Commission, expired on December 31, 2004.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. W.F. Michie Jr., to serve a three year term, term to expire December 31, 2007, or until his successor has been appointed.

Also at the City Council worksession on January 18, 2005, City Council instructed the City Clerk to arrange interviews for J. Neal Jackson, Robert W. Mair, Yuri Koslen, Thomas Hilgendorf and Kim A. MacQueen. Mr. Hilgendorf withdrew his name from consideration.

After Council members spoke in support of the candidates interviewed, J. Neal Jackson received 6 votes, Robert W. Mair received 4 votes, Yuri Koslen received no votes, and Kim A. MacQueen received 2 votes. Therefore, J. Neal Jackson and Robert W. Mair were appointed to each serve a three year term respectively, terms to expire December 31, 2007, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 11

D. RESOLUTION NO. 05-33 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Mumpower said that the terms of Margaret Tinkler and Ginger Mahler, as members on the Asheville Tree Commission, expired on December 31, 2004.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to arrange interviews for Robert W. Oast, Jay Marino, Richard Koerber and Parker Andes.

After Council members spoke in support of the candidates interviewed, Robert W. Oast received 4 votes, Jay Marino received 2 votes, Richard Koerber received no votes, and Parker Andes received 6 votes. Therefore, Robert W. Oast and Parker Andes, were appointed to each serve a three year term respectively, terms to expire December 31, 2007, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 12

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of January 21-February 3, 2005: Miriam Hoch (Streets), M'Press Cards (Streets), Patti Cassida (Streets), Kimberly J. McKinney (Sanitation), Paul McIntosh (Parks & Recreation), Lizzetta Slack (Streets), BellSouth (Water) and Gene Lummus (Police.) These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mike Fryar voiced concern over the College Street roadway improvements and how the City spends more money in downtown than in other areas of the City.

Mr. Walter Plaue voiced concern over the College Street roadway improvements and urged City Council to contact our legislators to help fund flood recovery efforts in Western North Carolina.

Mr. Gene Hamilton, founder of Asheville Citizens for Quality Government, urged City Council to perform an audit, as specified under the International Standards Organization 9000 Series, to determine the degree of quality achievement in all City departments. He felt the audit would be beneficial in the new City Manager search.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:44 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 15, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Terry M. Bellamy

ADDITION TO AGENDA

At the request of Councilman Newman, an update regarding Campus Crest was added to the end of the worksession agenda. Staff was instructed to invite the developer and stakeholders to this meeting.

CONSENT AGENDA:

Parks & Recreation Co-Sponsored Events

Summary: The consideration of approving a list of co-sponsored events for 2005.

Several years ago, the Parks and Recreation Department developed a matrix to assist in determining the minimum requirements for an event to be considered for co-sponsorship. This matrix includes specific points given for such areas as economic development, out of town spending, whether the event is designed for raising funds for local charities, or whether the event increases cultural awareness and understanding. A total of 37 events were approved last year resulting in a cost of approximately $75,000. This year the number has been reduced to 31 and the cost to the city is approximately $65,000 in in-kind support.

Pros:
- Generates in excess of $10 million dollars for the local economy
- Provides additional quality cultural programming and diversity
- Allows fundraising opportunities for charities
- Expands and enhances special events and festivals to the City

Cons:
- The city's financial contribution is $65,000
- Events contribute to decline on infrastructure and equipment provided to the organizers.

The Department requests City Council's approval of this list that will provide authorization for in-kind support by the City.

City staff recommends City Council approval of the list for co-sponsored events in 2005.

Provisions for Malt Beverages and/or Unfortified Wine at Various Events

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at various events.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- Earth Day 2005, scheduled for April 16, is a celebration committed to raising awareness of the environment and what every person can do to help maintain and improve our world.

- The Mountain Sports Festival, scheduled for April 29-May 1, is an event to draw attention to the vast opportunity for Asheville as a destination for adventure sports.

- The WOXL 96.5 Birthday Bash, scheduled for May 7 in City-County Plaza, will celebrate the three-year birthday of the radio station with food vendors and bands.

- The Larkin event is a wedding scheduled for May 15 on Wall St.

- The A.I.R. Taste of Asheville, scheduled May 21-22, is an event to promote the many independently-owned restaurants in the Asheville area.

- The "Atlantis Party", as part of the Green Ball, produced by the Asheville Area Arts Council is annual event that serves as a fundraiser. This event is scheduled for June 25.

- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area.

- For many years, the Bele Chere Board, in cooperation with the Asheville Parks and Recreation Department, has produced Bele Chere to bring both citizens and visitors to the Downtown area. This year the request is being made for July 29-30.

- The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 26-28.

- The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 23-25.

- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville Parks and Recreation to bring both citizens and visitors to the downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities.*

- The Asheville Grizzlies are a semi-professional sports team that seek to serve alcohol at their home games throughout the summer at Memorial Stadium.

Pros:
- Allows fundraising opportunities for charities
- Generates economic impact for the community
- Provides additional quality cultural programming and diversity

Cons: None noted.

City staff recommends City Council approve the resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at various events.

Street Acceptance of Distant View Drive

Summary: The consideration of a resolution to accept Distant View Drive in South Asheville as a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Distant View Drive is a developer-constructed street that has an average paved width of 20 feet and a length of 0.48 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Distant View Drive will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pros:

- The City will receive Powell Bill funds from the N.C. Dept. of Transportation to maintain the roadway.
- Homes will be constructed on this roadway increasing the tax base in the City of Asheville.

Cons:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Distant View Drive in South Asheville as a City maintained street.

Minority Business Commission Appointments

Summary: The consideration of a resolution confirming the appointment of members to the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The composition of the Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Ms. Karen Ballard, owner of Productive Consulting Resources, has been named by the Minority Business Commission to replace Ms. Claudia Thomas, owner of CAT Network Systems, whose term expired August 2004, as a minority business owner representative. Ms. Ballard's term will run through August 2006.

Ms. Althea Gonzalez has been named by Asheville-Buncombe Community Relations Council (ABCRC) to represent them on the Minority Business Commission. Ms. Gonzalez has been nominated to replace Clara Jeter who resigned. Ms. Gonzalez's term will run through August 2006.

Ms. Althea Goode has been named by Eagle/Market Streets Development Corporation (EMSDC) to represent them on the Minority Business Commission. Ms. Goode has been nominated to replace Thomas Kling who is deceased. Ms. Goode's term will run through August 2007.

Mr. David Price has been named by the Associated General Contractors of America to represent them on the Minority Business Commission. Mr. Price has been nominated to replace

Wendell Howard whose term expired August 2004. Mr. Price's term will run through August 2007.

The following MB Commission members whose term expired August 2004 have requested reappointment:

Ms. Connie Mitchell	American Institute of Architects **(August 2007)**
Ms. Carol Hensley	Asheville Area Chamber of Commerce **(August 2007)**
Mr. Marvin Vierra	Asheville Business Development Center **(August 2006)**
Ms. Latrella Higgins	Council of Independent Business Owners **(August 2007)**
Ms. Valerie Dennis	Minority Business Owner (Anaya Gallery) - **(August 2007)**
Ms. Carmella Watkins	NAACP **(August 2006)**
Ms. Lisa Siechter	National Association of Women in Construction **(August 2007)**

City staff recommends City Council adopt a resolution confirming the appointments to the Minority Business Commission.

Housing Trust Fund Loans

Summary: The consideration of a resolution allocating $370,000 in Housing Trust Fund loans for affordable housing development.

This is the fifth annual allocation of funds from the City's Housing Trust Fund (HTF). The 2005 budget included an appropriation of $600,000 for the HTF and $340,000 has accrued in loan repayments, making a total of $940,000 available for lending. The application process was opened on November 1, 2004, and four applications were received by the January 7th deadline, three of which were viable applications.

The applications were evaluated by a panel of outside experts and then reviewed by the Housing and Community Development Committee. The HCD Committee has recommended funding the following three projects:

Neighborhood Housing Services – 12 units, scattered sites	$240,000 (2 years at 2%)
Neighborhood Housing Services – 18 units, Brotherton Ave.	$ 50,000 (2 years at 2%)
Paul Saylor – 2 units, 7 Oakview Road	$ 80,000 (3 years at 2%)
Total (32 units)	$370,000

Attachments provide a summary of all applications submitted.

It is recommended that the unallocated funds in the amount of $570,000 be made available on a first come first served basis to qualified projects until exhausted, subject to all HTF criteria, staff review, and Housing and Community Development Committee recommendation.

Advantages:

- Assists the development of 32 units of affordable housing
- 90% of units are for homeownership (last year's projects were 100% rental)
- Remaining funds will be available to developers who were not ready to apply during the short initial application period.

Disadvantages: None

Staff recommends adoption of the Housing Trust Fund loans listed above and the first come first served availability of the remaining unallocated HTF funds.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

City Attorney advised Council that he will be seeking Council's authorization for an encroachment agreement with Progress Energy regarding re-routing some power lines for the new jail. He said that he will place that item on the next formal meeting Consent Agenda.

STOP THE SIGNS PRESENTATION

Mr. Ashton Walters, representing the Stop the Signs Committee, said that the Stop the Signs Committee is a group of citizens who have organized to promote (1) consistent sign code enforcement; safety; improved aesthetics; and equitable treatment of businesses. They have identified a significant problem with illegal, temporary signs and displays that negatively impact our community.

Mr. Walters said that in March 2004 they wrote to the City of Asheville about the proliferation of illegal signs along our roadways. Then, they began meeting with the Planning & Development staff and the City Attorney to jointly study the problem. Since then, they have watched the continued invasion of our public rights-of-way, roadways and utility poles by many hundreds of illegal signs. Major nuisances include "litter on a stick," vendor advertising, notices nailed to poles, temporary banners, and merchandise displays. City sign enforcement staff have called on merchants to stop, but many citizens and businesses simply choose to continue this illegal form of advertising, in disregard of City sign ordinances and regulations.

They have also met with the N.C. Dept. of Transportation (NC DOT), Progress Energy, Quality Forward and Buncombe County sign enforcement. They have the support of the Coalition of Asheville Neighborhoods (CAN. These groups have provided letters backing their efforts.

In coordination with City staff, they have continuously reported violations, asking that illegal signs be removed. However, sign enforcement staff simply cannot keep up given the limited hours they can spend on sign removal. On days staff are not free to be on the roads, new signs appear again. The current enforcement process is not working. There are approximately 20,000 illegal signs per year in the Asheville area.

Ms. Renate Rikkers said that illegal signs are one of the most visible affronts to City management. Their continuing proliferation presents an unresolved enforcement issue for the City. Asheville is a major tourist destination and a leader in attracting new residents. Civic pride should be a high priority for City management and would add to the positive efforts of Quality Forward, the "Keep North Carolina Green and Clean" program, and the N.C. roadside beautification program that we all appreciate.

Illegal sign proliferation constitutes a variety of safety hazards by (1) signs block visibility at intersections; (2) nails in utility poles are a hazard to linemen; and (3) signs distract drivers. Illegal signs reflect poorly on our community as (1) Asheville is known for its scenic beauty; (2) these signs make our city look cheap and trashy; and (3) improving our gateways is a major goal of City Council's Strategic Operating Plan. Also, illegal signs are unfair to law-abiding businesses because they must compete against this illegal form of cheap and abundant advertising.

Their concerns are: safety on our roadways and for utility linemen; using NC DOT and City rights-of-way for private advertising; not allowing illegal advertisers to take unfair advantage of complying businesses; protecting our neighborhood images and property values; presenting Asheville as a clean and attractive community to visitors and citizens alike; and reducing the environmental impact these signs have on roadways and landfills.

Enhanced enforcement requires (1) prioritizing resources to address the problem; (2) new regulations; and (3) public education.

The City staff currently devotes 15-20 hours per week to sign code enforcement. Enforcement efforts include mailings, site visits and citations. Current resources are inadequate to deal with out-of-town violators, new businesses and repeat violators. Current regulations are heavily constrained by due process issues, making timely enforcement difficult. City staff is developing regulations to expedite and provide more effective penalties for repeat violators. Stop the Signs is providing suggestions for improvement. City staff needs to take significant action, including mass mailings to businesses, site visits, letters and other measures. With Council's direction, staff will inform the public more aggressively through a media campaign.

Stop the Signs' goal is to eliminate all illegal signs. Legal temporary signs need to be more clearly defined and regulated.

The Stop the Signs Committee requests City Council (1) to be aware of the problem and support strong enforcement; (2) consider code amendments being prepared and submitted by City staff; (3) prioritize resources to address the problem; (4) support more aggressive efforts to inform public about sign code enforcement requirements, objectives and penalties for violations; and (5) explore new ways to approach the issue.

City Attorney Oast said that he is researching ways to make it less difficult for staff to remove signs. A lot of concern is from a safety standpoint in the rights-of-way and with the obstruction of vision. It may be a matter of making the enforcement less burdensome than it is.

Upon inquiry of Councilman Dunn regarding new businesses, Planning & Development Director Scott Shuford said that our Code already has an allowance for temporary signs in order for new businesses to get that initial publicity.

In response to Councilman Dunn about yard sale signs, lost dog signs, etc., Mr. Shuford said that we have a provision in our Code that allows a neighborhood identification sign. That would be the best place for neighborhoods to place those types of signs and to also keep the nice appearance of a community. He said that he will work to inform the public of this solution for these type signs.

Regarding election signs, there are also specific provisions in our Code that allow for them.

Vice-Mayor Mumpower commended the Stop the Signs Committee for their measured, helpful fashion in working with City staff to approach this problem. He wondered if a task force, made up of businesses and neighborhoods, could craft an ordinance and then the City strongly enforce that ordinance. He felt the businesses and neighborhoods might find creative ways to get the signs removed.

Mayor Worley saw less of a need for a task force and major re-writes of our existing ordinance. Our ordinance is being violated and enforcement is the key issue. The City Attorney has noted that he is working on amending our existing ordinance. We need to find an effective way to discourage the people who are putting the signs up and be effective with City resources.

City Manager Westbrook said that we have employees in the Planning & Development Department and the Public Works Department working on sign code enforcement.

Upon inquiry of Vice-Mayor Mumpower, Mr. Jerry Reece, Code Enforcement Officer, said that the City collected approximately $3,000 from sign code enforcement violations last year.

Mr. Shuford explained that when illegal signs go up, the City must notify the owner of the violation and then give them 30 days to cure the problem before a penalty can be assessed. What City Attorney Oast is researching is treating the illegal signs to be nuisances, which gives the City a different range of enforcement options – including a ticket for each sign. City Attorney Oast noted that the downside is that a nuisance violation would not apply in the extraterritorial jurisdiction.

When Mr Shuford noted that some businesses cited find it cheaper to pay our fines than pay for regular advertising, Councilman Newman said that he would support moving to a higher penalty to discourage that type of behavior.

Councilman Davis felt the majority of illegal signs are from commercial vendors. He felt we should be paying particular attention to the repeat offenders and those who are abusing the system.

All of Council agreed that illegal signs are a problem that continue to grow. It was the consensus of City Council to instruct City staff to include information about what constitutes illegal signs on our Government Channel; research whether the public is allowed to remove signs in the City's rights-of-ways or on utility poles; distribute information to sign shops, coffee shops, etc. about what is and what is not allowed; research amendments to our existing ordinance to make is less difficult for staff to remove signs; and research amendments to our existing ordinance for illegal signs being treated as nuisances.

On behalf of City Council, Mayor Worley thanked the Stop the Signs Committee for their support and hard work on this very important issue.

UPDATE TO ABC OPERATIONS

Mr. Curtis Canty, General Manager/Supervisor of the ABC Board, updated City Council on the operations of the ABC Board. He presented Council with a copy of the financial statements for the first six months of their 2004-2005 fiscal year for the period ending December 31, 2004. As the results indicate, the organization has responded very well to the challenges of new growth and new changes that have been implemented in the last six months.

Mr. Canty said that since joining the Asheville ABC Board in August, 2004, he has spent a great deal of time studying the organization, building relationships as he works with his managers and employees and consulting with the Board to bring about needed change. In addition, he has had the opportunity to speak with City Council to share the huge potential and some challenges that face this organization. Early on, he shared with his Board of Directors two key things that needed to be done to position this organization to move forward.

1) **Organize in a way** that better leverages the skills of our people and positions the organization to overcome obstacles that may hold us back from future growth. In early 2004 the consulting firm of Deloitte conducted a review of the Asheville ABC operations. Their review included a detailed analysis of the retail, mixed beverage and warehouse functions and included an extensive review of the administrative processes. He spent time working with the Deloitte consultants and the Board regarding that study. He also engaged many of the employees in group and one-on-one conversations to obtain feedback and share the potential and challenges that face the organization. To that end he has implemented several changes in our management team that will be key to helping us achieve the level of performance we desire.

2) **Utilize the technology** and other innovations that exist in our industry to make us more efficient. We have entered into new relationships with local providers of customer and

financial services technology to begin to maximize our efficiencies and leverage the talents of our employees to enhance the customer shopping experience. While we are just in the beginning stages of these changes early indications are we are moving in the right direction.

Also, we have addressed the financial and operational issues raised in the management letters from the 2003 and 2004 public audit by the firm of Crawley, Lee & Company P.A. We have also taken advantage of several opportunities to strengthen internal controls throughout the organization.

Financial highlights of our first six months are listed below:

- Sales for the six months ending December 2004 are up 6.5% over the same period 2003. Inventory levels have been reduced 8% while total sales were increased in the same period as we begin to focus our inventory more towards customer buying preferences.
- July-December 2004 net income (NI) (Excluding the "non recurring" expense of the Biltmore flood) grew 25.6% over the same period 2003. (NI including the Biltmore expense was down 9.7% for the same period.)
- Four of the eight retail outlets posted record NI for the six months ending December 2004.
- July-December 2004 investment income is up 45% over the same period last year.
- Working capital (Current assets less current liabilities) increased 13% over the same period last year.

In addition, the Asheville ABC Board has seen many other achievements and improvements in business practices and accountability. The recent expansion of the Board from three to five members allows for a greater cross-section of ideas and insight that will be helpful to me as the organization moves forward.

He believes the Asheville ABC Board has the potential to be one of the best in the state. He is committed to seeing that potential become reality, and my team and looks forward to the challenges that lie ahead.

Discussion surrounded Mr. Canty responding to various questions/comments from Council, some being, but are not limited to: is the ABC Board retaining too money in their cash reserve; has there been discussion about turning over law enforcement to the City of Asheville; was there a net loss of income in the Biltmore store from the flooding; and how did the ABC Board reduce their employee insurance by 50%.

Upon inquiry of Councilman Dunn, Mr. Canty said that the ABC Board is always open for information that would help them guide their grant process and to fine-tune it towards the needs of Asheville. He explained their grants are for education or rehabilitation. He invited the City of Asheville and the Housing Authority to submit applications through their grant program.

On behalf of City Council, Mayor Worley thanked Mr. Canty for his hard work with the ABC Board and hoped he would report back to Council on a periodic basis.

IMPLEMENTATION PLAN OF DEVELOPMENT TASK FORCE'S RECOMMENDATION

Building Safety Director Terry Summey said that this is a report from City staff regarding the improvement recommendations from the Implementation Plan for "2004 Development Review Task Force Recommendations."

As part of the Fiscal Year 2004-05 budget approval process, members of City Council requested that a Task Force be created to evaluate the current development processes. Approximately 50 citizens were invited to participate, with as many as 35 citizens attending various meetings. The Task Force consisting of Architects, Engineers, Designers, Surveyors, Business Owners, Managers and Commercial/Residential Contractors and Developers, developed several recommendations for streamlining the development process. The recommendations consisted of 10 primary focus areas along with a total of 32 ideas of implementation. The recommendations were presented to Council at its October 19, 2004, worksession.

Council asked that a response be brought back to Council pertaining to the Task Force's recommendations. A staff report attaching Staff's Response was presented at the Council's January 18, 2005, worksession. After some discussion, Council continued the matter to its February 15, 2005, worksession due to the absence of Mayor Worley and Councilmember Dunn. In the interim, Council suggested that additional public comment may need to be solicited. City staff held open public forums on February 1 and 3, 2005, at the Public Works Facility. He provided staff's response along with a summary of comments from approximately 50 citizens. Mr. Summey said that the responses can be summarized by saying that developers, the Chamber of Commerce, Council of Independent Business Owners, Task Force members and CREIA support the recommendations. Most concerns were raised by The Coalition of Asheville Neighborhoods, which do not support items 1 and 10 of the recommendations.

Mr. Summey reviewed with Council the multiple goals of Council's Strategic Operating Plan and how the recommendations from the Task Force addresses the areas. He then presented Council with the Task Force's 10 focus areas with 32 items (color-coded for different actions), public comments and staff responses. He noted that some items will require Council action, some items staff has already implemented and other items are currently in the process of being implemented.

Considerations in implementing the recommendations:

- Greater reliance on staff expertise, and facilitation on development projects
- More business friendly approach to development
- More timely review and approval of projects
- Better communication and coordination with industry

Mr. Summey explained that the following items are recommendations that will require action by City Council in the form of public hearings, ordinance amendments and further changes to the process. He asked for Council direction on the following recommendations:

1 - A We advocate that major changes be made to the UDO

- **Limit City Council Reviews**
- **Only those processes that are statutorily required should go to Council (rezonings)**
- **Eliminate Level III Conditional Use Permits from Council approval**

All non-Conditional Use projects that meet the UDO and Engineering Specifications should be approved at staff level. Let staff do their job.

Mr. Summey and Planning & Development Director Scott Shuford responding to various questions/comments from Council, some being, but are not limited to: how many Level III

projects come before Council in a year; and how much of a delay is there when City Council is involved.

Councilman Newman said that he hears a lot that people want to see more environmentally sustainable development, more green building, and more projects that integrate market rate in affordable housing projects – opposed to all big luxury condos. That is a good way to reconcile the need for affordable housing in a way that works for neighborhoods. He encouraged the Planning staff to continue thinking about ways that we can reward the kinds of projects that produce the type of community development that he thinks there is a lot of support for in Asheville.

Mr. Shuford understood Council that if the development is the type of development that we are trying to encourage then the review process should be streamlined as much as possible. He said that he would explore some ideas and report back in approximately 30 days.

After discussion, it was the consensus of City Council to keep City Council involved in all Level III conditional use permits.

1-B Eliminate the formal TRC reviews since they add delays to the process; recommend informal TRC reviews at least twice a month.

Mr. Summey and Planning & Development Director Scott Shuford responding to various questions/comments from Council, some being, but are not limited to: does the public provide technical input or is the input aimed toward design or opposition; how often does the public provide technical information for a meaningful impact; what type of candid conversations might be held with developers if we had an informal TRC review; and are we giving more work to staff if there are two meetings a month.

Councilwoman Jones said that this makes sense, but felt we have a bigger perception problem if we eliminate the formal TRC review. She felt we should do some trust building with the community first in the next year and then revisit this issue. She felt that to eliminate public comment at the TRC level, we are also missing an opportunity for the public to learn.

Vice-Mayor Mumpower felt there is a difference between including the public and indulging the public. If we are including the public in purely technical matters and creating an illusion that this is a public forum, that is not helpful. We need to say this is a technical piece of the puzzle and include the public in the early stages and then at the decision-making stage.

Mayor Worley asked if there would still be a way for the public to deliver technical information about a project. Mr. Shuford said that right now we don't notice or provide any indication to the public that a Level I project might be coming their way. With the TRC projects (Level II), we do put up a sign on the property and we do notice the adjacent property owners within the appropriate range. In an informal process, we could make plans available, provide staff if people have questions, and that sort of thing. In addition, we could ask the public to submit their technical information in writing so that there is still a mechanism for the technical public comment.

Vice-Mayor Mumpower spoke in support of the compromise where the public has access to the information and they provide their comments in writing.

Mr. Shuford understood that Council wants staff to continue to try to alert people to the fact that there is a project coming to their area. In some cases though, those projects will have a public hearing associated with it and in other cases there will be a staff review with an opportunity to comment on the technical aspects.

After discussion, the majority of Council gave direction to City staff to start the process of a UDO amendment to eliminate the formal TRC reviews and revise the TRC process to hold bi-monthly meetings. In addition to moving forward with a UDO amendment, Council reminded Mr. Shuford that communication is a two way street and in order for someone to comment on the technical aspects they have to be able to understand exactly what is being proposed as well.

Vice-Mayor Mumpower asked staff to building some feedback at an appropriate time.

1-C Recommend maximum approval times of:

- **Level I – one week**
- **Level II – three weeks**
- **Level III – five weeks**

Mr. Summey responded to Vice-Mayor Dunn about what the turn-around time is in other cities and how does Asheville compare to those.

Upon inquiry of Mayor Worley, Mr. Summey said that five weeks on a Level III project is not realistic, given the project has to go through TRC, the Planning & Zoning Commission and City Council.

Mr. Tim Turner, WNC Glass Surveyors and member on the Task Force, said the timeframes are when they would like to get all of the responses back from the initial submittal, not necessarily the approval.

Mayor Worley felt that "approval" time is the wrong word – it should be "response" time.

Upon inquiry of Councilwoman Jones about the Council direction in this matter, Mr. Summey said Council might monitor complaints heard regarding the turnaround time and let him know. He felt that turnaround times will be reduced with the hiring of four new positions.

Vice-Mayor Mumpower asked if staff can begin to keep records so we can definitively say we are meeting those timelines, including when the plans come in incomplete, etc. Discussion then occurred about the response timelines by City staff. City Manager Westbrook said that we don't have control over how well the plans are done when they initially come in, or how long it takes us to go through it, or how many red-lines there are and therefore how many times it has to be re-submitted to make sure they are correct. In addition, there are also a number of other bodies the plan goes through, e.g., Planning & Zoning Commission, Downtown Commission, River District Design Review Committee, Tree Commission, etc. All of that takes time as well as the time before City Council. Mr. Summey can define what that those timelines mean and specify that those are goals, because we don't have all the variables. It's unfair to hold the City responsible when we don't have that control. All said, City Manager Westbrook said that staff will come up with some way to provide the data in an understandable form so it doesn't give either the City or the developer the wrong impression from reading it, because the results may be behind the data in specific instances.

Councilman Davis felt we might call these "goals" and not "maximums" and that eight weeks on a Level III project would be more realistic.

Vice-Mayor Mumpower was interested in our ability to track what we are doing. If we can't track it, we can't determine inefficiencies. And, we can't improve if we don't know where we might be breaking down.

1-E The time requirement to upgrade to current code a nonconforming structure that becomes vacant should be extended to 12 month

Mr. Shuford said he felt the real issue is that there are some properties along the river that were not occupied for a long period of time and then came in and didn't want to have to meet the floodplain requirements. However, that is a FEMA issue. He would provide City Council with more information on the number cases that we've had, but there are very few non-floodplain issues with regard to this particular situation.

After a brief discussion, it was the consensus of City Council to not make any changes regarding this recommendation.

2-B The turnaround times for Permit and Plan Review approvals need to be reduced as previously recommended, even if additional staff is required

This issue was discussed in Item 1-C above.

5-A We recommend creation of an industry review committee be involved in changes to the "Asheville Standard Specifications and Details Manual" (updates proposed to come to Council in November).

Since updates are proposed to come back to City Council in November and since City Engineer Cathy Ball is coordinating a group of citizens to review the changes, City Council gave no direction on this issue.

5-B Code interpretations and review shall be consistent between plan reviewers and inspectors as well as among inspectors.

Discussion surrounded this recommendation. Mr. Summey said they have instituted monthly code consistency meetings with plan reviewers, inspectors and industry to discuss any code consistency issues. In addition, inspectors will be sent to training programs.

Councilman Dunn wondered if the same inspector can follow the same development as much as possible, even though there is subjectivity at times. Mr. Summey said that they are constantly putting on seminars and programs for our own staff, as well as industry, so that we all try to be consistent in what we are going.

Vice-Mayor Mumpower suggested a one-page complaint form. Mr. Summey said that they have started tracking complaints just to help with the consistency meetings, noting that his staff operates on a same day basis dealing with complaints. He said that they would try to track the issues leaving the actual complainant out of the picture.

At 5:26 p.m., Mayor Worley called a short recess.

5-E Provide incentives (less fees and charges) for installation of fire sprinklers (the State Code provides tradeoff for sprinklers; the Water Authority's fees and policies discourage installing sprinkler systems).

Since this issue deals with Water Authority policy, City Council will not give staff direction on this issue until after July 1, 2005.

9-B Consider other enhancements that are business friendly and provide time savings to industry

Mr. Summey responded to various questions/comments from Council, some being, but are not limited to: can the Public Works Building be expanded; do other cities in North Carolina have a "one-stop" center; and is there ample parking in the Public Works Building lot.

Mr. Tim Turner, member on the Task Force, felt the Task Force wanted to bring the all the plans and just drop them off and let the City circulate them to the appropriate departments.

During discussion about the "one-stop" vs. "one-drop" center, Mr. Summey explained the pros and cons of each approach and what is being done currently.

It was the consensus of Council to allow staff to continue with the one-stop center and continue to analyze the efficiencies.

10-A To encourage development, the City, not the developer, should pay for public infrastructure (sidewalks, hydrants, etc.)

Mr. Summey and City Engineer Cathy Ball responded to various questions/comments from Council, some being, but are not limited to: what are the types of infrastructure developers want the City to pay for; what is the difference between asphalt and concrete sidewalks; what is the amount per foot of sidewalk; does the developer have the option of a "fee in lieu of"; and how much is the budget for sidewalks.

Mr. Tim Turner, member of the Task Force, said that the Task Force was concerned about the requirement for sidewalks, especially when they would not connect to any others.

City Manager Westbrook said it was a philosophical issue of whether City Council wants the development to pay for itself or for the taxpayers to pay for that improvement.

Mayor Worley was not concerned with the sidewalk requirement, but felt the ordinance should be tweaked. He used an example of two different property owners building the same type of development but one owns more property than the other. Our current ordinance says that all of that property that you own has to have a sidewalk on it. That can result in some inequities He'd rather see the sidewalk requirement relate to the project itself and the land used by the project. He noted that "applicable project area" is not defined in our ordinance. We need to make sure we apply the burden equitably.

Discussion occurred regarding the need for sidewalks in our community and who should pay for them.

Vice-Mayor Mumpower felt there is a point of fairness in that we don't require developers to provide police or fire services. He was not sure we are trying to encourage development.

Ms. Ball explained to Council the history of sidewalks in Asheville and how sidewalks are a viable mode of transportation.

Councilman Newman felt Asheville needed more sidewalks but this approach will take us a long time before we get to where we need to be.

After all ten items requiring Council direction were discussed, Vice-Mayor Mumpower questioned the new permit application form being on legal sized paper. Mr. Summey said that staff is trying to get all the information from different departments on one application form. Presently we have one form, double sided for residential. Commercial is on a legal form. He felt that as long as the industry knows they need legal size paper, he didn't think it would be a problem. He said that as they pilot the new form, they will find out if they are working well.

Mr. Summey thanked City Council for their direction and said that staff intends to update Council quarterly with implementation updates.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on February 22, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Addition of Urban Place District

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the addition of Urban Place District.

This code amendment is intended to implement several infill development, community compatibility, and economic development goals and strategies of the Asheville City Development Plan 2025 through the creation of a new zoning district that allows for and provides incentives for mixed use development. Asheville has a number of areas where mixed use development has been proposed as part of neighborhood plans or other planning initiatives. Additionally, this is one of several actions being proposed by staff to simultaneously implement portions of the Urban Riverfront Master Plan and address redevelopment of flooded areas.

The new zoning district would be somewhat similar to the Neighborhood Corridor District (NCD), although it would differ in being oriented more toward node development than to linear development along a corridor. It allows a wider range of uses and has less stringent design standards than those in the NCD

The amendment has been routed to CAN, CREIA, and CIBO for review and comment. There was no public comment at the Planning and Zoning Commission meeting.

Pros –

- Several goals and strategies of the 2025 Plan and Urban Riverfront Master Plan will be implemented.
- A wider range of land uses would be available to property owners.

Con – None noted.

The Planning and Zoning Commission recommended approval of this code amendment on February 2, 2005, by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mr. Shuford noted that the City Attorney will be refining the purpose statement.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that this district could apply to properties by the river.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda.

ASHEVILLE PEDESTRIAN PLAN UPDATE

Transportation Planner Elizabeth Teague said that this is the consideration of a resolution adopting the Asheville Pedestrian Plan Update.

The purpose of this plan is to keep the City Pedestrian Thorcughfare Plan current and useful to the City and the public. This update is written to provide City staff and elected officials with timely, technical information to make decisions on where to invest limited resources and how to improve policies and procedures that improve pedestrian safety and infrastructure.

The Plan was developed in coordination with the Asheville Bicycle and Pedestrian Task Force, City staff from the Engineering, Public Works, Planning, and Parks and Recreation Departments, and public comments and requests on sidewalk and pedestrian safety needs collected over the past year.

This project is Task # 3 of Goal #3 under the Natural and Built Environment areas of the City's Strategic Plan to increase street and sidewalk connections.

The positives of the Pedestrian Plan update are that it:

- Updates the "Needed Linkages Map" that regulate where sidewalk construction is required and the *fee-in-lieu* option may not be used (note: it does not amend the sidewalk regulation itself, but does provide recommendations on how to improve those regulations to include greenways, transit amenities and other pedestrian and ADA related improvements).
- Better positions the City to continue to pursue funding from the NCDOT Division of Bicycle and Pedestrian Transportation and through the Transportation Improvement Plan and Long Range Transportation Plan processes;
- Establishes a working sidewalk and pedestrian safety request list, identified priorities list, and criteria for future prioritization and project selection processes.
- Provides recommendations for changes to policies and procedures that will facilitate implementation of sidewalk and greenway construction, internal procedure and budgeting and grants management.

The negatives of this project are that it will:

- Require time from City staff and the Planning and Zoning Commission to implement the recommendations of the Plan.

Ms. Teague explained that the mission of the Plan is that Asheville will develop and maintain a pedestrian network that includes sidewalks, pedestrian crossings and greenways that: (1) offer convenience, safety and connectivity to citizens and visitors; (2) encourage and reward the choice to walk and use transit; (3) improve access for those with disabilities; and (4) add to the quality of life and unique character of the City of Asheville.

An inventory of pedestrian project needs include (1) sidewalk and greenway projects on the Transportation Improvement Plan and Priority Needs List; (2) citizen requests; and (3) priorities based on criteria: (a) transit routes; (b) proximity to schools, parks, commercial centers; (c) zoning; (d) strategic corridors; and (e) feasibility (right-of-way, engineering, cost).

The following is estimated sidewalk need construction costs: 108 miles of needed linkages - $15 Million; poor or non-compliant sidewalks - $2 Million; removal of obstacles - $9.5 Million; and ADA ramps - $.5 Million. The estimated construction total is $27 Million. 25-50% right-of-way and engineering is $6-13.5 Million. The range of need is $33-40.5 Million and it does not include on-going maintenance.

Ms. Teague explained some considerations and recommendations are (1) Greenways Master Plan; (2) staffing/coordination; (3) right-of-way acquisition and engineering; (4) continue coordination with the Metropolitan Planning Organization; (5) update regulations and fees; and (6) annual budget process and new funding sources.

Staff recommends that City Council adopt the Asheville Pedestrian Plan Update.

Ms. Teague and City Engineer Cathy Ball responded to various questions/comments from Council, some being, but are not limited to: how much was the referendum on streets and sidewalks back in the late 1980's; how much did the City spend on sidewalks this year; and how long was the portion of Patton Avenue sidewalk on hold by the N.C. Dept. of Transportation.

Discussion surrounded how much the City currently allocates for sidewalks and whether we need to start allocating money for a meaningful show of sidewalks or for a dedicated funding source for a long-term commitment.

Ms. Ball said that she will come back to City Council during the budget process with some recommendations on Council's alternative funding options and how we can address our needs.

At 7:21 p.m., Mayor Worley announced a short recess.

A brief discussion was held about the physical size of the Plan and whether the plan was giving the public false hope on what the City can realistically accomplish.

City Manager Westbrook said that the Plan serves a number of different groups and if Council wishes, staff could distill it down to a more understandable document

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

TRAFFIC CALMING

Mayor Worley said that at the request of City Council this item was placed on the agenda and he asked staff to prepare the following information.

COMPLETED PROJECTS:

- South French Broad (phase 1 of 2), Florida/Dorchester, Caribou, Wyoming, Gracelyn/Ottari – 3.3 miles, $97,000
- Murdock/Ridgelawn/Wellington (in progress) – 1.5 miles, $82,000

PROJECTS UNDER DESIGN:

- Kenilworth Road – 1.3 miles, est. $80,000
- Redwood Forest (from Riverbend) – 0.96 miles, $65,000 max private funds
- Shiloh (from Appeldoorn) – 2.3 miles, $84,000 max
- Biltmore Park (HOA project) – 2.7 miles, est. $65,000 private funds

PLANNED PROJECTS:

- Grove Park neighborhood (from GPI) – 3.4 miles, est. $200,000 private funds

LIKELY FUTURE CITY PROJECTS:

- Governors View/Arco (from Riverbend UV) – 1.3 miles, $25,000 max private funds
- South French Broad (phase 2 of 2) – 0.5 miles
- Cedar Street and Wood Avenue – 0.7 miles

330

COSTS AND NEEDS: The engineer's estimate for the most recent project was about $77,000 per mile of traffic calming. The most recent bid for same was about $114,500 per mile. We believe the engineer's estimate is reasonable, and that the contractor's bids were excessive due to lack of local competition, particularly in the asphalt industry.

At this time, we have not prioritized future projects beyond Kenilworth Road. We have requests for traffic calming on about 300 street segments in the City, totaling about 100 miles of streets. The streets which appear to be most impacted by existing traffic, based on measured traffic volumes and measured speeding are:

- Cedar Street and Wood Avenue, 0.74 miles
- South French Broad Avenue (Phifer to Livingston), 0.47 miles
- Kimberly Avenue and Edwin Place, 1.65 miles
- Montford Avenue, 0.89 miles
- Edgewood Road (north), 0.36 miles
- School Road East, 0.52 miles
- Chestnut Street, 1.12 miles
- Bear Creek Road, 0.73 miles
- London Road, 0.70 miles
- Burton Street, 0.56 miles
- Hanover Street, 0.50 miles
- State Street, 1.00 miles
- Forest Hill Drive (Wyoming to Biltmore), 0.23 miles
- Westwood Place, 0.70 miles
- Shelbourne Road, 0.67 miles

These total to 10.84 miles. In addition, there are many more residential streets on which traffic volumes are relatively low, but speeding is particularly prevalent, including Cisco Road, Michigan Avenue, and Riverview Drive.

Pros of traffic calming:

- Speeding is reduced
- Need for enforcement is reduced
- Quality of life is improved for residents of streets
- Can include aesthetic enhancements to support community

Cons:

- Costs for installation
- Costs of maintenance
- Some opposition to measures (typically a minority of residents)

Regarding City Council's Strategic Operating Plan, traffic calming supports an efficient transportation system by managing traffic demand in neighborhoods.

Councilman Dunn felt that traffic calming measures were too expensive and wondered how we can continue to afford traffic calming where there are limited dollars available. He felt we should stop the traffic calming program and look for other options to deal with speeders in a cost effective manner and not impact emergency services.

Mayor Worley felt that traffic calming measures are the only way to deal with cut-through traffic. He felt that traffic calming is cheaper than police enforcement. He spoke in support of the use of the technology available, which is speeding cameras and red-light cameras. He proposed that we adopt as a legislative goal to put cameras on streets in neighborhoods that need help with

speeders. The use of cameras would benefit the neighborhoods at little or no cost to the City. The technology is there – we should use it.

Throughout the discussion, City Traffic Engineer Anthony Butzek responded to various questions/comments from Council.

Asheville Police Department Captain Ted Lambert responded to various questions/ concerns from Vice-Mayor Mumpower, some being, but are not limited to: what is the City's effort on traffic enforcement over the past five years; how much energy are we putting into the enforcement of traffic laws; are we putting the same energy and manpower into traffic enforcement today as we did 10 years ago; what is the time difference when emergency vehicles travel over speed bumps; and what is the comparable data showing the number of tickets issued (accidents, fatalities) over the past 5-10 years, factoring in the increases in traffic that we have in Asheville and other variables. Questions Capt. Lambert was unable to respond to, he said that he would provide what information was available.

Vice-Mayor Mumpower would be surprised to learn that Asheville is enthusiastic about traffic enforcement today as it was ten years ago. He felt that in recent years we have defaulted on traffic law enforcement in the City. He was not comfortable with the use of traffic cameras from a philosophical and constitutional standpoint. He would have a problem in going to traffic cameras until we have a good hold on traffic enforcement. He would advocate backing off of traffic calming as it relates to speeding and would lay aside his philosophical difference about the use of cameras when we clearly define traffic enforcement in the City and we can demonstrate such. Again, he has concerns that we are not prioritizing traffic enforcement at the level that we should for a city this size with the traffic volume we have.

Councilwoman Jones felt that traffic calming, around parks especially, makes a positive difference. She would be willing to listen to ways to save money and still keep the public safe.

Councilman David felt we should be more judicial in where we place traffic calming.

Councilman Newman supported traffic calming and felt we should review what is working well and what is not. He was supportive of investing our traffic calming funds into key pedestrian points, not whole thoroughfares. He would also be open to consider traffic cameras.

Mr. Butzek said that if Council does decide to make changes to the current Traffic Calming Program, there are a number of projects in the works and they will need direction as soon as possible.

It was the consensus of Council to instruct City staff to provide City Council with details on traffic cameras and how they work in other locations; how much we have spent on public safety over the past four years; and information requested earlier from Vice-Mayor Mumpower from the Police Department.

City Manager Westbrook said that depending on how much time is necessary to accumulate the information requested by Council, staff will try to bring back this information to council at their next worksession.

2006 CONGRESSIONAL PRIORITIES

City Manager Westbrook said that this is the consideration of a motion adopting the 2006 congressional priorities.

City Council and key staff recently met with Ball Janik staff to discuss our congressional priorities for the upcoming year. Based on those discussions with Council Members and key staff, Ball Janik performed an analysis which compared our preliminary request against upcoming and existing federal priorities and goals.

As you know, we were extremely successful this year with our requests to congress. Two projects that received Fiscal Year 2005 funds were the 800 MHz digital platform communications upgrade and the Wilma Dykeman Riverway Project. These received a total of $2.6 million. On behalf of staff and City Council, much appreciation is expressed to Congressman Taylor, Senator Dole and Senator Edwards for their efforts.

The following is a list of projects that were identified last year and not funded, or identified as new this year in the meetings.

1. Pack Square. The Conservancy has requested $4 million for the Renaissance project. It is recommend that the City support the Conservancy's funding request and assist the effort on Capitol Hill. Since the Conservancy will be taking the lead on the project, any funds obtained will flow to it. Nonetheless, all funds obtained will benefit the City.

2. City Bus Replacement. Although $300,000 was obtained for a bus in Fiscal Year 2005, this is likely a viable transit funding request for Fiscal Year 2006.

3. Wal-Mart/Shopping Mall Pedestrian Circulator Bus. The amount is undetermined. It is recommended that the City pursue this in the future, this idea probably has not been fleshed out enough to provide the necessary detail (cost, route, ridership, impact on traffic, etc.) to request funding. It is recommended waiting until this idea has been further developed.

4. I-40 Aesthetic Noise Wall. An amount of $107,000 is sought to upgrade a 2/3 mile noise wall located in the redesigned portion of I-40. The funding would upgrade the wall from one color to something more aesthetically pleasing (i.e., a mountain design). The state will not pay for the aesthetic upgrade.

5. Park and Ride Facilities. Again, while this may be something the City may want to pursue in the future, there is little detail available regarding where, outside the urban core, such facilities would be sited, the number of sites, projected use and increased bus ridership due to such facilities, and, most importantly, the cost. Park and ride lots are common transit funding projects, so the City may want to develop the information necessary for a future request.

6. Veterans' Memorial at Memorial Stadium. The fact that $800,000 has already been raised for this project will set well with federal appropriators. Privately, Rep. Taylor has indicated support for the Memorial. Strategically, the City may want to request $750,000, but should realize that, even if successful, the amount may be reduced by appropriators.

7. Water System Upgrades. The Fiscal Year 2005 request for $600,000 was unsuccessful due to reduced EPA funds across the board. The situation in Fiscal Year 2006 will be similarly tight, if not more so.

8. Azalea Park. It is unlikely that a funding request at this time would be successful, as park money is scarce and is targeted to existing parks that need upkeep rather than developing new parks. However, for the past two years, the Parks and Recreation Department has submitted grant proposals for Land and Water Conservation Fund (LWCF) money, which were turned down. Should the City submit a proposal this year,

Ball Janik could generate support for it from our delegation to increase its chances of success.

9. Thomas Wolfe Cabin. An amount of $300,000 is needed to stabilize and refurbish the Thomas Wolfe Cabin located within the Azalea Park. This project is recommended because of an excellent funding source – America's Treasures in the Interior Appropriations bill.

10. Methamphetamine Enforcement and Clean-Up. This Department of Justice program funds over $52 million in methamphetamine projects, much of it earmarked to specific state and local governmental entities. These funds help combat methamphetamine production and distribution, along with clean-up and disposal of hazardous materials. Ball Janik recommends that the Asheville Police Department work with the State Bureau of Investigation to develop a methamphetamine project for interested Western North Carolina law enforcement agencies. The project could entail methamphetamine education, training, equipment, or increased personnel for enforcement or clean-up. Rep. Taylor is very interested in enhancing methamphetamine response in Western North Carolina and would support a strong multi-jurisdictional project. Depending on the scope of the project and the entities involved, this request could be as high as $1 million or as low as $300,000.

11. Western North Carolina Emergency Training Center. Requested amount is $5 million. This project is envisioned to be a joint effort of the City (the Police and Fire Departments) and the local community college, A-B Tech. Feasibility discussions between the City and the college have been initiated, but concept development has not sufficiently progressed to the point where the issue is ready for a funding request this year.

Authorizing Committee Issues – Transportation

A major piece of legislation unfinished in the last Congress is the Transportation Equity Act for the 21st Century (TEA-21) reauthorization. Ball Janik worked on the bill to include language that would permanently or at least temporarily exempt Asheville from the "over 200,000 population" urbanized area (UZA) threshold that jeopardizes the City's use of federal dollars for transit operations. Language included in the temporary extension bill provided Asheville Transit with 100% flexibility on the use of transit operating funds through September 2005, our lobbyist will continue to pursue a permanent fix.

Since the 108th Congress adjourned without finishing the TEA reauthorization, the entire legislative process starts over again. That means the City has the opportunity to request a funding project through this major bill that it did not participate in last year. Ball Janik suggests that this account be explored for funding Pack Square. Should that coincide with the goals of our Congressional delegation, it would be a good source of money that does not compete with any of the City's "appropriations" requests. It could be in the range of $2-4 million.

Based on the recommendations from Ball Janik, staff recommends City Council adopt the following congressional priorities for 2006:

Appropriations bills:

1. Methamphetamine interdiction: $300,000-$1 million – Commerce, Justice, State bill

2. Thomas Wolfe Cabin: $300,000 – Interior bill

3. Veteran's Memorial: $750,000 – VA/HUD bill, EDI Account

4. Bus replacement: $300,000 – Transportation bill

Authorizing legislation:

1. Pack Square: $2-4 million – potentially the TEA-21 Reauthorization bill (with the City supporting the request of the Conservancy)

2. UZA/transit funding issue – TEA-21 Reauthorization bill

During discussion, each Council member voiced their opinion on the recommended congressional priorities as follows:

Mayor Worley supported the all recommendations from Ball Janik.

Vice-Mayor Mumpower supported the methamphetamine interdiction bill and the bus replacement bill.

Councilwoman Jones supported the methamphetamine interdiction bill and the bus replacement bill. In addition, she supported the authorizing legislation.

Councilman Newman supported all the recommendations from Ball Janik. He also supported the Park and Ride Facilities bill for a future request.

Councilman Dunn supported the methamphetamine interdiction bill and the bus replacement bill. He also supported the Park and Ride Facilities bill, especially in areas of big box developments where mass transportation would help.

Councilman Davis supported all the recommendations from Ball Janik, except to reduce the Veteran's Memorial amount to $250,000.

Discussion then occurred that if the City is reducing the amount of requests we are asking Ball Janik to lobby on our behalf, then perhaps we should reduce their contract amount. He did feel the City needed lobbyists working our behalf regarding the census issue and the problem that presents to transit funding.

Mayor Worley felt it would be appropriate to postpone taking action on this matter until all seven members of Council are present.

N.C. LEGISLATIVE AGENDA FOR 2005

City Attorney Oast said that in the past, the presentation on legislative issues has been made at Council's annual retreat. Due to the somewhat different schedule and format for this year's Council retreat, this presentation has been scheduled for a worksession.

Last year's legislative session was a short session, and major substantive changes in the law are not usually undertaken. There is also limited ability to pursue local legislation.

In terms of general legislation, probably the item of most importance to local governments actually grew out of 2003 legislation. This was the passage of Amendment 1 in the November 2004 election. This enables local governments to participate in "project development financing," an economic development tool similar to the tax increment financing as used in other states to

assist in the provision of public improvements in redevelopment areas, and to spur economic growth. We have been gathering information on this, and may soon see it used in Asheville.

Another piece of general legislation of interest to us was the law that permitted cities and sign owners to enter into agreements for the removal, relocation and replacement of billboards. Asheville's City Council entered into such an agreement last Fall, and it may have been the first use of such an agreement in North Carolina.

A third item of interest was the passage of the Phase II Stormwater Management legislation. As Council knows, we are currently in the process of developing regulations under this authority.

There were other items of interest to municipalities generally, including the extension of the "hold harmless" protection for State budget distributions to local governments through 2012. My office can supply you with more information on any of these items.

Our local legislative requests were limited. We sought and obtained an act clarifying that members of the Civil Service Board serve two year terms; this had been inadvertently omitted from the 1999 legislation that amended the Civil Service Act. We sought and obtained an act expanding the membership of our local ABC Board from three to five; Council has now made the additional appointments to the ABC Board.

The 2005 legislative session seems certain to involve issues of substantial interest to municipalities. We have already seen the introduction of proposed legislation affecting annexation. There has also been proposed legislation affecting the available uses of the fines collected from "red light camera" traffic enforcement. The City of Asheville currently is not authorized to use camera enforcement for traffic violations, but has considered it in the past. As other legislation of interest is introduced or discussed, we will track it and bring it to Council's attention. Also, Mayor Worley is involved in the leadership of the N.C. League of Municipalities, and may learn of potential legislation that could affect us.

As to requests for local legislation for Asheville this year, we are not aware of any changes that need to be made to our Charter or other local laws at this time. As a long range project, however, Council may wish to consider a comprehensive revision of the Charter, which has some obsolete provisions in it and is redundant with State law in many respects.

Legislative requests from the 2003 session that were requested but not introduced included authorization to use camera enforcement of red light violations, authorization for a prepared food and drink tax, authorization to adopt campaign contribution limits for City Council elections, and a reduction in term length for the Housing Authority members. Council may wish to reconsider some or all of these items. However, Council was not unanimous in making these requests in 2003, and our delegation has indicated that a lack of unanimity in Council's request will cause them to have some hesitation with respect to introducing the legislation.

Other subjects for possible legislative authorization are found in the Asheville City Development Plan 2025:

- authorization to allow transfer of development rights
- authorization for design review of certain development projects
- authorization for "inclusionary zoning."

These are essentially authorizations to adopt zoning regulations to employ or implement concepts with respect to which there is no authority in the general zoning enabling legislation, or with respect to which the enabling legislation is not clear. Other cities are doing these things on a

limited basis pursuant to their own local acts, and we have been following their progress. Also, some planning and land use initiatives were included with a State-directed report on smart growth that has been referred for further study. Some proposals for general legislation may come from that study.

There may be other matters that Council is interested in that require special legislative authorization. At your direction, we will be glad to investigate these matters as well, and draft proposed legislation, as appropriate.

The deadline for submission of local bills in the N.C. Senate is March 2. The House has not established its deadline yet, but it is not likely to be much later, if at all. This is a fairly short time frame, and seems more abbreviated than in previous years. In view of this short time period and the fact that Council may wish to discuss potential legislation more fully, Council may wish to consider requesting the introduction of one or more "blank" bills, with some indication to our legislators of the nature of the legislation that may be requested.

Direct staff as to legislation that Council wishes to be submitted to our delegation for introduction, or as to the introduction of any "blank" bills.

Councilwoman Jones asked for legislation that would allow people to be exempt from a certain percentage of property taxes if they are in a certain level of income (which she suggested be $25,000). She understands that has larger implications than just Asheville, but that would help a lot of people. City Attorney Oast said that he would meet with her on this request but he did not think it could be local legislation.

It was the consensus of City Council to instruct the City Attorney to introduce 3-4 "blank" bills and City Council will fill in the nature of the legislation at a later date.

RESOLUTION NO. 05-34 – RESOLUTION OF CONCERN REGARDING FLOOD RELIEF FUNDING FOR THE CITY OF ASHEVILLE AND WESTERN NORTH CAROLINA

Vice-Mayor Mumpower read the resolution as follows: In September of 2004, Asheville and Western North Carolina experienced two primary catastrophic weather events that resulted in major and extensive damage to life and property. The associated impact on our citizens has resulted in significant economic hardship for individuals, families, businesses, and communities through our region. The critical and appreciated support provided by FEMA, governmental agencies, private insurance, and other helping resources has not been sufficient to reasonably compensate for the catastrophic impact of these storm events. The collective harm has been of a nature so extensive as to preclude our capacity to absorb without long-term harmful impact on the quality of life, economic viability, and infrastructure supporting our communities and people. The State of North Carolina has a stated responsibility for supporting its citizens, including those of the Western North Carolina region. The State of North Carolina has identified the needs of this region and pledged substantial financial resources to assist in realistic recovery from these recent catastrophic events. Apprehensions have arisen concerning the timely and equitable distribution of funds to those areas of the State most graphically impacted by these storms. It is known to the City of Asheville that it is the sincere wish of the State to give fair and due response to the needs of the citizens of Asheville and Western North Carolina. City Council respectfully submits a formal request that the State make all necessary efforts to address the post-event realities of our region through timely and appropriate distribution of the funds and support fairly due to the people and communities of Western North Carolina.

Councilman Newman moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-34. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 12

BOARDS/COMMISSIONS

City Attorney Oast said that he received a letter from the attorney for the Airport Authority stating that the Airport Authority intends to appoint someone from Henderson County as an ex-officio non-voting member to the Regional Airport Authority, if there are no concerns from the City or County Attorneys. Council supported this action by the Airport Authority.

It was the consensus of City Council to instruct the City Clerk to arrange interviews for Barbara Marlowe and Jose Ruiz for a vacancy on the Community Relations Council.

It was the consensus of City Council to instruct the City Clerk to arrange interviews for James Hood, Lewis Isaac and David Bonyun for a vacancy on the Educational Access Channel Commission.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Barry Pate Jr. to fill the unexpired term of Mr. Flaum on the Public Art Board.

ASHEVILLE SCHOOL BOARD

It was the consensus of City Council to instruct the City Clerk to arrange interviews for Elizabeth Hubbell, Leslee Kulba, Keith Thomson, Alfred Whitesides Jr., Jim Taylor and Gene Bell for vacancies on the Asheville School Board.

CAMPUS CREST UPDATE

At the request of Councilman Brownie, Planning & Development Director Scott Shuford updated City Council on the meeting with the Campus Crest developer and neighborhood representatives. The meeting went very well. A number of different issues were talked about that were of a concern to the neighborhood and they settled on the idea that pedestrian safety enhancements on Montford Avenue would probably be the most fruitful direction that we should proceed. The developer is evaluating their cost factors for looking at the types of features and will be back in touch with us in the very near future. He was fairly confident that there will be an agreement between both sides on this issue.

Councilman Newman felt the mediation process was moving forward, but just didn't want the opportunity to run out for Council to revisit the issue if the mediation process turns out to be unsuccessful.

City Attorney Oast said that although the appeal deadline on this current decision runs later this week, there will be several intermittent approvals that are required of this project, many of which will involve on-site inspections and that kind of thing and some later permits that will need to be issued, like Certificates of Occupancy and permits of that nature that will provide an opportunity to monitor compliance.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:17 p.m.

Magdalen Boulleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – February 22, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Terry M. Bellamy

PLEDGE OF ALLEGIANCE

Mr. Timothy Dutcher, representing the Marine Junior ROTC Program at Asheville High School, led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

Mayor Worley recognized Troop 26 from Camp Stevens in Arden, N.C.

Ms. Rebeccah Falk, reporter with the Asheville Citizen-Times, introduced a journalist from Belarus who is visiting the United States.

II. CONSENT AGENDA:

Vice-Mayor Mumpower asked that Consent Agenda Item "G" be removed from the Consent Agenda for individual discussion.

Councilman Dunn asked that Consent Agenda Item "F" be removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 8, 2005, AND THE WORKSESSION HELD ON FEBRUARY 15, 2005

B. RESOLUTION NO. 05-35 - RESOLUTION APPROVING THE LIST OF CO-SPONSORED EVENTS FOR 2005

Summary: The consideration of approving a list of co-sponsored events for 2005.

Several years ago, the Parks and Recreation Department developed a matrix to assist in determining the minimum requirements for an event to be considered for co-sponsorship. This matrix includes specific points given for such areas as economic development, out of town spending, whether the event is designed for raising funds for local charities, or whether the event increases cultural awareness and understanding. A total of 37 events were approved last year resulting in a cost of approximately $75,000. This year the number has been reduced to 31 and the cost to the city is approximately $65,000.

Pros:

- Generates in excess of $10 million dollars for the local economy
- Provides additional quality cultural programming and diversity
- Allows fundraising opportunities for charities

- Expands and enhances special events and festivals to the City

Cons:

- The city's financial contribution is $65,000
- Events contribute to decline on infrastructure and equipment provided to the organizers.

The Department requests City Council's approval of this list that will provide authorization for in-kind support by the City.

City staff recommends City Council approval of the list for co-sponsored events in 2005.

RESOLUTION BOOK NO. 29 – PAGE 14

C. **RESOLUTION NO. 05-36 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE EARTH DAY EVENT**

RESOLUTION NO. 05-37 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL

RESOLUTION NO. 05-38 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE WOXL 96.5 BIRTHDAY BASH

RESOLUTION NO. 05-39 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LARKIN WEDDING EVENT

RESOLUTION NO. 05-40 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE INDEPENDENT RESTAURANTS' TASTE OF ASHEVILLE

RESOLUTION NO. 05-41- RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE "ATLANTIS PARTY" EVENT

RESOLUTION NO. 05-42 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 4TH OF JULY CELEBRATION AND FIREWORKS

RESOLUTION NO. 05-43 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BELE CHERE FESTIVAL

RESOLUTION NO. 05-44 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GOOMBAY FESTIVAL

RESOLUTION NO. 05-45 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GREEK FESTIVAL

RESOLUTION NO. 05-46 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION EVENTS

RESOLUTION NO. 05-47 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES HOME GAMES

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at various events.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- Earth Day 2005, scheduled for April 16, is a celebration committed to raising awareness of the environment and what every person can do to help maintain and improve our world.
- The Mountain Sports Festival, scheduled for April 29-May 1, is an event to draw attention to the vast opportunity for Asheville as a destination for adventure sports.
- The WOXL 96.5 Birthday Bash, scheduled for May 7 in City-County Plaza, will celebrate the three-year birthday of the radio station with food vendors and bands.
- The Larkin event is a wedding scheduled for May 15 on Wall St.
- The A.I.R. Taste of Asheville, scheduled May 21-22, is an event to promote the many independently-owned restaurants in the Asheville area.
- The "Atlantis Party", as part of the Green Ball, produced by the Asheville Area Arts Council is annual event that serves as a fundraiser. This event is scheduled for June 25.
- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area.
- For many years, the Bele Chere Board, in cooperation with the Asheville Parks and Recreation Department, has produced Bele Chere to bring both citizens and visitors to the Downtown area. This year the request is being made for July 29-30.
- The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 26-28.
- The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 23-25.
- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville Parks and Recreation to bring both citizens and visitors to the downtown area. These events include: *Moonlight Over Downtown* and four *Downtown After Five* activities.

- The Asheville Grizzlies are a semi-professional sports team that seeks to serve alcohol at their home games throughout the summer at Memorial Stadium.

Pros:
- Allows fundraising opportunities for charities
- Generates economic impact for the community
- Provides additional quality cultural programming and diversity

Cons: None noted.

City staff recommends City Council approve the resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at various events.

D. RESOLUTION NO. 05-48- RESOLUTION ACCEPTING DISTANT VIEW DRIVE IN SOUTH ASHEVILLE AS A CITY-MAINTAINED STREET

Summary: The consideration of a resolution to accept Distant View Drive in South Asheville as a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Distant View Drive is a developer-constructed street that has an average paved width of 20 feet and a length of 0.48 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Distant View Drive will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pros:
- The City will receive Powell Bill funds from the N.C. Dept. of Transportation to maintain the roadway.
- Homes will be constructed on this roadway increasing the tax base in the City of Asheville.

Cons:
- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Distant View Drive in South Asheville as a City maintained street.

RESOLUTION BOOK NO. 29 – PAGE 42

E. RESOLUTION NO. 05-49 - RESOLUTION CONFIRMING APPOINTMENTS TO THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of members to the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The composition of the Minority Business Commission consists of 11 members, 9 of whom are nominated by various groups and two of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Board of Commissioners.

Ms. Karen Ballard, owner of Productive Consulting Resources, has been named by the Minority Business Commission to replace Ms. Claudia Thomas, owner of CAT Network Systems, whose term expired August 2004, as a minority business owner representative. Ms. Ballard's term will run through August 2006.

Ms. Althea Gonzalez has been named by Asheville-Buncombe Community Relations Council (ABCRC) to represent them on the Minority Business Commission. Ms. Gonzalez has been nominated to replace Clara Jeter who resigned. Ms. Gonzalez's term will run through August 2006.

Ms. Althea Goode has been named by Eagle/Market Streets Development Corporation (EMSDC) to represent them on the Minority Business Commission. Ms. Goode has been nominated to replace Thomas Kling who is deceased. Ms. Goode's term will run through August 2007.

Mr. David Price has been named by the Associated General Contractors of America to represent them on the Minority Business Commission. Mr. Price has been nominated to replace Wendell Howard whose term expired August 2004. Mr. Price's term will run through August 2007.

The following MB Commission members whose term expired August 2004 have requested reappointment:

Ms. Connie Mitchell	American Institute of Architects (August 2007)
Ms. Carol Hensley	Asheville Area Chamber of Commerce (August 2007)
Mr. Marvin Vierra	Asheville Business Development Center (August 2006)
Ms. Latrella Higgins	Council of Independent Business Owners (August 2007)
Ms. Valerie Dennis	Minority Business Owner (Anaya Gallery) - (August 2007)
Ms. Carmella Watkins	NAACP (August 2006)
Ms. Lisa Slechter	National Association of Women in Construction (August 2007)

City staff recommends City Council adopt a resolution confirming the appointments to the Minority Business Commission.

RESOLUTION BOOK NO. 29 – PAGE 43

F. RESOLUTION APPROVING LOANS FROM THE CITY'S HOUSING TRUST FUND

This item was pulled off the Consent Agenda for individual discussion.

G. RESOLUTION ADOPTING THE ASHEVILLE PEDESTRIAN PLAN UPDATE

This item was pulled off the Consent Agenda for individual discussion.

H. RESOLUTION NO. 05-50 - RESOLUTION SETTING THE DATE FOR A PUBLIC HEARING ON MARCH 8, 2005, TO CONSIDER THE VOLUNTARY ANNEXATION OF THREE LOTS LOCATED AT THE CORNER OF BREVARD AND SARDIS ROADS

Summary: The consideration of a resolution setting the date for a public hearing on March 8, 2005, to consider the voluntary annexation of three lots located at the corner of Brevard and Sardis Road.

John and Vaso Barlas and Simi, LLC (of which Mr. Barlas is the sole member/owner/ manager) have petitioned the City for the annexation of three lots (totaling 1.26 acres) they own located at the corner of Brevard and Sardis roads. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

Pursuant to N. C. Gen. Stat. sec. 160A-31 such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

The next steps in this process are for City Council to fix the date for the public hearing on this matter. The petitioner has requested that the annexation be effective on the date of adoption of the ordinance, if City Council decides to proceed with this request.

City staff recommends City Council adopt the resolution setting the date of March 8, 2005, as the date for public hearing on the annexation petition.

RESOLUTION BOOK NO. 29 – PAGE 45

I. RESOLUTION NO. 05-51 - RESOLUTION IN SUPPORT OF THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM (CDBG) PROGRAM

Summary: The consideration of a resolution in support the Community Development Block Grant (CDBG) Program

The President's draft budget for federal fiscal year 2006 proposes the elimination of the CDBG program, along with 17 other smaller programs. The total Fiscal Year 2005 funding of these programs was $5.6 billion. A new program called "Strengthening America's Communities" is proposed for the Commerce Department, funded at only $3.71 billion. The program is described as "a source of funding for planning, infrastructure development, and business financing ... [for] communities most in need of assistance". Little is known about how this program might operate.

The City of Asheville has used the CDBG program since its start in 1974 to revitalize four blighted city neighborhoods, renovate many hundreds of units of housing, provide land and infrastructure for several hundred new homes, invest in downtown economic development, and support key social service programs. Aside from downtown economic revitalization, all funds have been used to benefit low income individuals and low-income neighborhoods.

The loss of CDBG funding would cause serious setbacks in the progress we are making to provide low-income people with decent housing opportunities and to address homelessness. It is unclear how much the City would benefit from the new program, which has only 66% of the funding for the programs it replaces and will apparently be targeted to areas of highest job loss.

Advantages:

- Authorizes the Mayor to express the City's concern to our Congressional representatives
- Adds the City's voice to that of the National League of Cities, US Conference of Mayors, National Community Development Association, and other organizations.

Disadvantages: None

Staff recommends approval of the resolution supporting the continuation of the CDBG program.

RESOLUTION BOOK NO. 29 – PAGE 48

J. RESOLUTION NO. 05-52 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

Summary: A vacancy exists on the Public Art Board until December 31, 2007.

At the City Council worksession on February 15, 2005, City Council instructed the City Clerk to prepare the proper paperwork to appoint Barry Pate as a member to the Public Art Board to serve the unexpired term of Mr. Jonathon Flaum, term to expire December 31, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 49

K. RESOLUTION NO. 05-53 - RESOLUTION AUTHORIZING THE CITY TO CONVEY AN EASEMENT FOR POWER LINE RELOCATION

Summary: The consideration of a resolution authorizing the City to consider an easement for power line relocation.

Shortly after the beginning of the year, Buncombe County began construction on the addition to the County jail on the property located on the east or rear side of City Hall, formerly a City parking lot. In connection with this construction, it is necessary to re-route the power transmission lines in the block of Marjorie Street that borders the property where construction is occurring. This re-routing will include two new poles along Marjorie Street, and transversing the northeast corner of the City's property at Marjorie and Valley Streets. Two poles and some length of the lines will be removed. The City's property will not be transversed over a buildable portion of the lot, and the easement will not interfere with any City plans for use of the lot. Although some consideration was given to requiring the lines to be buried, it is not being required at this time. There will, however, be a net reduction in the amount of overhead lines.

If Council approves of this conveyance, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 29 – PAGE 50

L. **RESOLUTION NO. 05-54 - RESOLUTION AMENDING THE 2005 CITY COUNCIL MEETING SCHEDULE TO DELETE THE MARCH 15, 2005, WORKSESSION AND RESCHEDULE THAT WORKSESSION UNTIL MARCH 16, 2005**

RESOLUTION BOOK NO. 29 – PAGE 52

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

RESOLUTION NO. 05-55 - RESOLUTION ADOPTING THE ASHEVILLE PEDESTRIAN PLAN UPDATE

Summary: The consideration of a resolution adopting the Asheville Pedestrian Plan Update.

The purpose of this plan is to keep the City Pedestrian Thoroughfare Plan current and useful to the City and the public. This update is written to provide City staff and elected officials with timely, technical information to make decisions on where to invest limited resources and how to improve policies and procedures that improve pedestrian safety and infrastructure.

The Plan was developed in coordination with the Asheville Bicycle and Pedestrian Task Force, City staff from the Engineering, Public Works, Planning, and Parks and Recreation Departments, and public comments and requests on sidewalk and pedestrian safety needs collected over the past year.

This project is Task # 3 of Goal #3 under the Natural and Built Environment areas of the City's Strategic Plan to increase street and sidewalk connections.

The positives of the Pedestrian Plan update are that it:

- Updates the "Needed Linkages Map" that regulate where sidewalk construction is required and the *fee-in-lieu* option may not be used (note: it does not amend the sidewalk regulation itself, but does provide recommendations on how to improve those regulations to include greenways, transit amenities and other pedestrian and ADA related improvements).
- Better positions the City to continue to pursue funding from the NCDOT Division of Bicycle and Pedestrian Transportation and through the Transportation Improvement Plan and Long Range Transportation Plan processes;
- Establishes a working sidewalk and pedestrian safety request list, identified priorities list, and criteria for future prioritization and project selection processes.
- Provides recommendations for changes to policies and procedures that will facilitate implementation of sidewalk and greenway construction, internal procedure and budgeting and grants management.

The negatives of this project are that it will:

- Require time from City staff and the Planning and Zoning Commission to implement the recommendations of the Plan.

Staff recommends that City Council adopt the Asheville Pedestrian Plan Update.

Vice-Mayor Mumpower felt that City staff has crafted a well-written document and they are pursuing the policies that City Council has asked them to pursue. He does, however, have a hard time with activities that involve illusions of action and this document represents one of those activities. He said we have identified $30 Million of sidewalk and related needs in the City and we budget $50,000 a year. Ultimately approximately $150,000 a year, including monies from developers and grants, goes towards sidewalks. He felt this is an unrealistic budget and didn't think we should invest staff time and energy into activities that represent illusions of action. He felt this document is just that. He felt that adoption of this Plan is a misguided policy approach.

Councilman Newman said this is a long-range Plan that identifies about $30 Million in pedestrian infrastructure needs in the City. He felt it was good to know what the needs are and this Plan tells us what a really high quality pedestrian infrastructure and sidewalk network would look like in the City if we make a sustained commitment to move in that direction. When the original Plan was adopted about five years ago, we didn't have the resources to make a lot of progress. He felt that rather than scaling back the Plan, he felt we should scale up the resource investment that we are making in our pedestrian environment.

Councilwoman Jones felt this Plan will also facilitate more physical activity for our community.

Vice-Mayor Mumpower said that we have a lot of cow trails in Asheville where it's obvious that people walk and need a sidewalk. He felt that rather than creating an elaborate infrastructure that we hope people use, we should take of the places that we already know people do use.

Councilman Davis felt this is a very good Plan but only dedicating $200,000 a year to this $30 Million Plan is not realistic. He understands that we do use the Plan to help obtain grants for parks, greenways, etc. and doesn't want to reject it at all. He would support it, but felt we have many plans that are not funded. He felt that in the future we need to be more realistic about were we are going with the Plan and make a conscious effort to do better with sidewalks and pedestrian efforts.

Mayor Worley said that one essential function of a City Council is to gather information and the other is to make decisions based on that information. If we didn't have this Plan we wouldn't be able to know what our needs are or the magnitude of our needs. This Plan sets some priorities and better positions us to pursue funding for grants. He would support adoption of the Plan and then during our budget process we can set the priorities among other competing needs.

Councilman Newman moved that we adopt the Asheville Pedestrian Plan Update and direct staff to begin exploration of dedicated funding source options to more meaningfully implement this Plan, especially the high priority aspects of the Plan. This motion was seconded by Councilwoman Jones.

Councilman Newman felt we should look at dedicated funding because, as with other transportation plans, the price tag is so large that if we implement a Plan like this on a year to year basis, we will never get some of the important priorities met. He felt we needed to ask staff to begin working with Council to identify different funding options.

After a discussion, Mayor Worley moved to amend the motion to only adopt the Asheville Pedestrian Plan Update. This motion was seconded by Councilman Davis. After further

discussion, said motion carried on a 4-2 vote, with Councilwoman Jones and Councilman Newman voting "no."

The original amended motion was then voted on and carried on a 4-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 52

RESOLUTION NO. 05-56 - RESOLUTION APPROVING LOANS FROM THE CITY'S HOUSING TRUST FUND

Summary: The consideration of a resolution allocating $370,000 in Housing Trust Fund loans for affordable housing development.

This is the fifth annual allocation of funds from the City's Housing Trust Fund (HTF). The 2005 budget included an appropriation of $600,000 for the HTF and $340,000 has accrued in loan repayments, making a total of $940,000 available for lending. The application process was opened on November 1, 2004, and four applications were received by the January 7th deadline, three of which were viable applications.

The applications were evaluated by a panel of outside experts and then reviewed by the Housing and Community Development Committee. The HCD Committee has recommended funding the following three projects:

Neighborhood Housing Services – 12 units, scattered sites	$240,000 (2 years at 2%)
Neighborhood Housing Services – 18 units, Brotherton Ave.	$ 50,000 (2 years at 2%)
Paul Saylor – 2 units, 7 Oakview Road	$ 80,000 (3 years at 2%)
Total (32 units)	$370,000

It is recommended that the unallocated funds in the amount of $570,000 be made available on a first come first served basis to qualified projects until exhausted, subject to all HTF criteria, staff review, and Housing and Community Development Committee recommendation.

Advantages:

- Assists the development of 32 units of affordable housing
- 90% of units are for homeownership (last year's projects were 100% rental)
- Remaining funds will be available to developers who were not ready to apply during the short initial application period.

Disadvantages: None

Staff recommends adoption of the Housing Trust Fund loans listed above and the first come first served availability of the remaining unallocated HTF funds.

Mr. Walter Plaue felt that the Housing Trust Fund program needs to be revisited. He felt that something must be wrong when we have a shortage of low income housing and we have a surplus of funds in the Housing Trust Fund Program.

Councilman Dunn was concerned about the unallocated funds being made available on a first come first served basis. He felt the Housing Trust Fund needed to be revisited to see why the private sector is not coming forward.

Councilman Newman supported approving the three loans and would support bringing the unallocated funds up at the next Housing & Community Development Committee meeting. He felt there may be ideas to make the process more effective and appeal more to the community. Councilwoman Jones concurred.

Mayor Worley suggested the resolution be amended to delete the following wording: "The unallocated HTF funds be made available on a first come first served basis subject to all HTF criteria, staff review, and recommendation by the Housing and Community Development Committee."

Field Services Coordinator Ed Vess said that the intent of City staff was not to run projects through on a first come first served basis without any consideration of criteria and certainly not without bringing it back to the Housing & Community Development Committee. They would all be subject to all Housing Trust Fund criteria, staff review and recommendation by the Housing & Community Development Committee. He said they are trying to make sure that we get the best projects and the first come first served was merely to say that the loans would no longer be funded on an annual basis but they would be available as far as the money would go. Again, this was not staff's intent to try to circumvent the Housing & Community Development Committee or any of the criteria established for a quality project.

Councilman Dunn moved to amend Resolution No. 05-56 to only approve the three loans outlined above; and that the Housing & Community Development Committee be authorized to look at our means by which we will continue to address the funding issue for applicants for the Housing Trust Fund and report back to the City Council. This motion was seconded by Councilwoman Jones.

Vice-Mayor Mumpower felt this would be an appropriate time to have a policy discussion on the Housing Trust Fund since it has been in existence for approximately five years. He felt it would be good for the Housing & Community Development to discuss the inequities of affordable housing and look for ways that we might more creatively and enthusiastically respond.

Councilwoman Jones said that the Housing & Community Development Committee works really hard, and she wasn't sure that they should make a lot of policy decisions based on one year of data. She felt they needed to look at the trends and gather more information.

The motion made by Councilman Dunn and seconded by Councilwoman Jones carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 53

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE BUNCOMBE COUNTY EMERGENCY MANAGEMENT FACILITY LOCATED ON 129 S. LEXINGTON AVENUE FOR A PROPOSED 911 CALL AND COMMUNICATION CENTER, AND EMERGENCY DISPATCH FACILITY

On October 7, 2004, a letter was received from Buncombe County Manager Wanda Greene requesting "that the hearing on the Conditional Use Permit application for the Union Transfer Building (tax lots PIN 9648.06-48-0774 and 0445), located on Hilliard Avenue, be delayed until the fourth Tuesday in February, 2005." On October 12, 2004, Vice-Mayor Mumpower moved to continue this public hearing until February 22, 2005. This motion was seconded by Councilwoman Bellamy and carried unanimously.

On February 8, 2005, Buncombe County Manager Wanda Greene notified the City that "after receiving your email that City Planning staff would not support putting the ambulances at Union Transfer, we put the building up for upset bid. We have accepted an offer on the building." Therefore, this conditional use permit is withdrawn and no public hearing is necessary.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF FOUR LOTS ON TUNNEL ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT / CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED MULTI-USE BUILDING

ORDINANCE NO. 3214 - ORDINANCE REZONING FOR FOUR LOTS ON TUNNEL ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT / CONDITIONAL USE

ORDINANCE NO. 3215 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR FOUR LOTS ON TUNNEL ROAD FOR A PROPOSED MULTI-USE BUILDING

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:56 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of a request to rezone four lots on Tunnel Road from RS-8 Residential Single-Family High Density District to Highway Business District/Conditional Use, and a request to issue a conditional use permit for a proposed multi-use building.

The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the Asheville City Council in 2000. The Commercial Area Redevelopment policies encourage projects such as this one that will add street trees and improve pedestrian access. The proposed project will also preserve open space beyond what is required, complying with another of the plan's goals.

As mentioned above, the proposed project would improve sidewalk connectivity and set aside open space. While it would take away a small area of land currently used for housing, it has the potential to provide services within a short distance of neighboring residential areas.

Recent zoning actions include: (1) Three parcels at the intersection of Tunnel Rd and Grandview Pl (1/3 mile east of this project) were rezoned from HB/RS8 to CBI (Approved December 2004); and (2) In May 2004, requests to have three parcels at 968 Tunnel Road, 966 Tunnel Road, and 441 Governor's View Road (1/3 mile west of this project) rezoned from RM-6 to CBI were denied by the Planning and Zoning Commission.

The subject properties are being considered for a retail and office development with associated parking, located on 1.75 acres on the south side of Tunnel Road (Attachment to City Exhibit 3 – Aerial Photo). The area on which the proposed project would be built consists of four parcels within the City of Asheville's corporate limits (Attachment to City Exhibit 3 – Location Map). Currently two of the four parcels are zoned HB, and two zoned partially HB, partially RS-8. The applicant seeks to rezone the split-zoned parcels to entirely HB. Office and retail use are permitted uses in the HB district. The project has a total building area of 22,549 square feet, placing it within the acceptable structure size standards and exempting it from open space requirements. Sidewalks are shown as required by Sec. 7-11-6 of the Unified Development Ordinance (UDO). The plan includes a Type "C" buffer where the property adjoins residential lots, which is the appropriate buffer between that use and the proposed use (Attachments to City Exhibit 3 – Concept Plan with Elevation Drawings).

At their January 19, 2005, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the conditional use rezoning and concept plan proposal and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission, stipulating the following project conditions summarized as follows. Please note that the plans accompanying this report have been revised since the TRC meeting to address a number of the conditions mentioned in the TRC staff report:

1. Nearby streams must be added to plans.
2. Alternative compliance (including extra plantings and open space) must be specified to address parking lot planting strip and other buffer compliance.
3. Topography needs to be included on or with plans.
4. The southern portion of the lot adjacent to Swannanoa River Road must be added to the project as open space.
5. The widths of driveway radii need to be redefined.

At their February 2, 2005, the Planning and Zoning Commission approved the application unanimously.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

352

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   Though some grading and site disturbance will be required, the proposed project's design will mostly preserve the existing topographic relationships. Provided the applicant employs proper erosion control measures and the proposed landscaping and mitigation, the nearby streams should not be adversely affected.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The proposed use would provide an upgrade from the existing commercial development along the southern side of Tunnel Road, providing a likely improvement in value for neighboring commercial property. The orientation of the project towards Tunnel Road, as well as its position at a different vertical level than the adjacent residential lots would minimize any effect it would have on those properties' values.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The existing Sonic restaurant to the west and retail complex to the northeast are uses of a similar scale, bulk, and coverage to the proposed development. The residential areas to the south and west are of a different character, but the topography mentioned above arguably puts the two uses in somewhat different plane. Required landscaped buffering will further separate the differing uses. The proposed project would mostly represent a modernization of commercial terrain with a perceptible, though less significant, expansion into the portion of parcel currently zoned residential.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The Asheville City Development Plan 2025 lists the "Smart Growth Land Use Policies" adopted by the Asheville City Council in 2000. The Commercial Area Redevelopment policies encourage projects such as this one that will add street trees and improve pedestrian access. The proposed project will also preserve open space beyond what is required, complying with another of the plan's goals. While it would take away a small area of land currently used for housing, it has the potential to provide services within a short distance of neighboring residential areas.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The project's location on Tunnel Road and near Swannanoa River Road ensures access to major transportation facilities and other services. Transit routes 13 and 28 serve the area. In addition, technical review from other departments has not revealed any problems for serving the development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. The proposed entrances and exits are similar to those currently in place.

Pros

- Upgrade of existing commercial area
- Furthering of Plan 2025 goals as mentioned above
- Potential to provide services convenient to neighboring residents

Cons

- Loss of one single family residential house lot.
- Commercial presence will be more visible to adjacent residential areas than is currently the case.

Staff concurs with the Planning and Zoning Commission's recommendation of approval of the rezoning request from RS-8 to HB with approval of the associated conditional use permit and conceptual site plan.

Mr. Carroll Hughes, architect and planner representing the owners. Mediterranean Property Management LLC, spoke in support of the project in that he feels it will be a visual and economic improvement to the area.

Mr. Fred English spoke in opposition to this project in that east Asheville has enough traffic and shops and they don't need anymore.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:09 p.m.

In response to Vice-Mayor Mumpower, Mr. Esselstyn said that one person who rents in the area was concerned about construction noise. He has received no other negative feedback.

Upon inquiry of Vice-Mayor Mumpower, using City Exhibit 4 (topographical map) Mr. Esselstyn explained how the topography of the area provides a buffer to the residential area on the south side.

In response to Councilman Newman, using City Exhibit 5 (earlier Concept Plan), Mr. Esselstyn reviewed with Council the parking spaces.

Upon inquiry of Councilman Davis, Planning & Development Director Scott Shuford reviewed with Council what is included in a Type "C" buffer (City Exhibit 6).

Vice-Mayor Mumpower moved to adopt Ordinance No. 3214 to approve the conditional use rezoning of four lots on Tunnel Road from RS-8 Residential Single-Family High Density District to Highway Business District/Conditional Use. This motion was seconded by Councilman Davis and carried unanimously.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3215 to issue a conditional use permit for four lots on Tunnel Road by adopting the proposed conceptual site plan and uses for the Nova Retail and Office Development, subject to the conditions that all outstanding TRC conditions are met. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 9

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR THE ADDITION OF THE URBAN PLACE DISTRICT

ORDINANCE NO. 3216 - ORDINANCE CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR THE ADDITION OF THE URBAN PLACE DISTRICT

Mayor Worley opened the public hearing at 6:20 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance for the addition of the Urban Place District. This public hearing was advertised on February 11 and 18, 2005.

This code amendment is intended to implement several infill development, community compatibility, and economic development goals and strategies of the Asheville City Development Plan 2025 through the creation of a new zoning district that allows for and provides incentives for mixed use development. Asheville has a number of areas where mixed use development has been proposed as part of neighborhood plans or other planning initiatives. Additionally, this is one of several actions being proposed by staff to simultaneously implement portions of the Urban Riverfront Master Plan and address redevelopment of flooded areas.

The new zoning district would be somewhat similar to the Neighborhood Corridor District (NCD), although it would differ in being oriented more toward node development than to linear development along a corridor. It allows a wider range of uses and has less stringent design standards than those in the NCD.

Mr. Shuford explained changes from the worksession, which include: a 5% cap on open space and how sidewalks can be counted, a revised purpose statement, and minimum width of 10 feet for sidewalks.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment. There was no public comment at the Planning and Zoning Commission meeting.

Pros –

- Several goals and strategies of the 2025 Plan and Urban Riverfront Master Plan will be implemented.
- A wider range of land uses would be available to property owners.

Con – None noted.

The Planning and Zoning Commission recommended approval of this code amendment on February 2, 2005, by a vote of 7-0. City staff recommends approval of the proposed code amendment as well.

Mr. George Keller, resident of downtown, suggested that the ordinance contain a list of non-permitted uses in the district, not permitted uses.

Mr. Shuford responded to Mr. Keller. He said that the Planning & Zoning Commission reviewed in detail the permitted uses. He said that we have a mixed of form-based ordinances and a standard zoning ordinance and in this care they followed the standard ordinance for the permitted uses.

Mayor Worley closed the public hearing at 6:34 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that in order to ensure that different groups receive the ordinances, which City staff e-mail out to them for review and comment, they could include some kind of confirmation that they did receive it.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3216 to include the amendments. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 15

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 05-57 - RESOLUTION APPOINTING MEMBERS TO THE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Mumpower said that the terms of Leslie Hennessee and Dan Comer, as members on the Asheville-Buncombe Community Relations Council, expired on December 31, 2004.

At the City Council worksession on January 18, 2005, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Hennessee to serve an additional three year term, term to expire December 31, 2007, or until her successor has been appointed.

Also at the City Council worksession on February 15, 2005, City Council instructed the City Clerk to arrange interviews for Barbara Marlowe and Jose Ruiz.

After Council members spoke in support of the candidates interviewed, Barbara Marlowe received no votes and Jose Ruiz received 7 votes. Therefore, Jose Ruiz was appointed as a member to the Community Relations Council to serve a three year term, term to expire December 31, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 54

B. RESOLUTION NO. 05-58 - RESOLUTION APPOINTING A MEMBER TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Vice-Mayor Mumpower said that a vacancy exists on the Educational Access Channel Commission until June 1, 2006.

At the City Council worksession on February 15, 2005, City Council instructed the City Clerk to arrange interviews for James Hood, Lewis Isaac and David Bonyun.

After Council members spoke in support of the candidates interviewed, James Hood received no votes, Lewis Isaac received no votes, and David Bonyun received 7 votes. Therefore, David Bonyun was appointed as a member to the Educational Access Channel Commission to serve the unexpired term of Mr. Nat Myers, term to expire June 1, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 55

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 11-17, 2005: Laura Oliver (Civic Center), O'Reilly Auto Parts (Sanitation), Carolyn Ware (Transit Services), Sherwin Pevaroff (Water), Michael Outar (Water), Jonathan Schrier (Water), Patsy Riddle (Police) and Martha Burgess (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hamilton, representing Asheville Citizens for Quality Government, said that there are some very serious deficiencies in education in American in general and in Asheville in particular. He urged City Council to improve the quality of public education.

Ms. Patsy Brison, attorney representing Mr. Fletcher Carter, presented City Council with a letter and pictures outlining their concern that a City-owned street (Stevens Street) was improperly closed. She explained that Mr. Carter previously had access to the rear of his property from Stevens Street. However, the pavement for Stevens Street has been ripped up by River Bend Business Properties and/or Horne Properties and there is no longer adequate access to the rear of Mr. Carter's property from Stevens Street. She asked that the City require Stevens Street to be reopened. In the alternative, they request that Horne Properties and River Bend Business Properties be required to follow the appropriate statutory procedure regarding the closing of Stevens Street and that, before City Council approves the closing of Stevens Street, adequate access to the rear of Mr. Fletcher's property be provided by Horne Properties Inc. and River Bend Business Properties. In addition, she requested that Council investigate whether or not Horne Properties has violated their conditional use permit. City Attorney Oast said that he is currently investigating this concern and will report back to Council as soon as possible.

Mr. Walter Plaue felt it was time the City reviewed the Housing Trust Fund policy to see why the private sector is not responding.

Mr. Fred English felt that east Asheville is being saturated with commercial developments and traffic.

Mr. Mike Fryer spoke about hiring outside attorneys to defend the City in annexation lawsuits.

Closed Session

At 7:02 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to

which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:45 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 8, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Terry M. Bellamy

PLEDGE OF ALLEGIANCE

Students from the Reynolds High School Army ROTC led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

ADDITION TO AGENDA

On behalf of the Housing & Community Development Committee, Councilman Dunn requested that a resolution regarding a Housing Trust Fund loan be added to the agenda under "New Business."

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 22, 2005**

B. **RESOLUTION NO. 05-59- RESOLUTION AMENDING THE 2005 SCHEDULED CITY COUNCIL MEETINGS TO DELETE THE 3:00 P.M., WEDNESDAY, MARCH 16, 2005, WORKSESSION AND RESCHEDULE THAT WORKSESSION TO THE NORMAL MEETING DATE AND TIME OF 3:00 P.M. ON TUESDAY, MARCH 15, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM IN CITY HALL**

RESOLUTION BOOK NO. 29 – PAGE 56

C. **RESOLUTION NO. 05-60 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES, THROUGH THE LAND, WATER AND CONSERVATION FUND, TO ASSIST WITH THE CONSTRUCTION OF PHASE II OF AZALEA PARK**

Summary: The consideration of a resolution to apply for and enter into an agreement with the North Carolina Department of Environment and Natural Resources, Division of Parks and Recreation for funds through the Land, Water and Conservation Fund to assist with the development of outdoor recreation facilities.

Azalea Park represents the City of Asheville's first phase of a major greenway and park system being developed along the Swannanoa River on Azalea Road. The first phase of the park is currently under construction and includes the John B. Lewis Soccer Complex, restroom and

concession, picnic shelters, playground, disc golf, greenway trails, and parking. If the grant application is successful, the grant funds will be used to support park elements such as picnic areas, shelters, disc golf, trails, river over looks and parking.

The Parks and Recreation Department is requesting $250,000 in grant funds from the Land, Water and Conservation Fund, which requires a dollar for dollar cash or in-kind match. The cash match is available in the Capital Improvement Budget, and the in-kind match is available in labor, equipment, and project management in the Parks and Recreation Department.

This action complies with the City of Asheville Strategic Operating Plan, Council Focus Area: Natural and Built Environment, Goal 2: Increased greenway benefits equitably throughout Asheville – Continue to implement and develop greenways that enhance quality of life for Asheville.

Pros:

- Continue to make progress on the Parks and Recreation Department's strategic plan to develop Azalea Park.
- Respond to public input for key features at Azalea Park.
- Raise outside funds to support park development and reduce reliability on City funds to support Capital Improvement Plan cost.

Cons: None noted.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds with the Land, Water and Conservation Fund to assist with the construction of Azalea Park Phase II.

RESOLUTION BOOK NO. 29 – PAGE 57

D. RESOLUTION NO. 05-61 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF JUSTICE, OFFICE OF COMMUNITY ORIENTED POLICING SERVICES, TO ASSIST WITH THE PURCHASE OF POLICE EQUIPMENT

Summary: The consideration of (1) a resolution authorizing the City Council to accept a 2005 COPS Law Enforcement Technology Program Grant; (2) a resolution authorizing the City Manager to enter into a contract with Motorola, Inc. to upgrade the City's 800 MHz radio system; and (3) a budget amendment, in the amount of $2,000,000, to appropriate the funds from the 2005 COPS Law Enforcement Technology Program Grant.

The City has applied for federal funding and has been awarded $2,000,000. The grant will be used for a radio system upgrade. The cost of this upgrade, which will significantly improve public safety features of the radio system, is $2,883,807. Buncombe County has agreed to pay for console upgrades at the Police Department, which, by contract, will be $337,025 of the above amount. The balance of the upgrade will be handled by radio infrastructure funds already in the current Capital Improvement Budget. This work will not begin until all funding has been received.

Pros:

- Provide seamless coverage and allow use of the emergency alert feature throughout the three tower area.
- Allow the North Carolina Highway Patrol and several other agencies to continue to use the City's system and to communicate with each other.

Cons: None noted.

These actions support the Council's Strategic Goal of Partnerships to Improve Critical Services/Infrastructure.

City staff recommends City Council adopt (1) a resolution authorizing the City Council to accept a 2005 COPS Law Enforcement Technology Program Grant; (2) a resolution authorizing the City Manager to enter into a contract with Motorola, Inc. to upgrade the City's 800 MHz radio system; and (3) a budget amendment, in the amount of $2,000,000, to appropriate the funds from the 2005 COPS Law Enforcement Technology Program Grant.

RESOLUTION BOOK NO. 29 – PAGE 58

E. RESOLUTION NO. 05-62 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MOTOROLA INC. FOR RADIO SYSTEM UPGRADE

Summary: See Consent Agenda Item "D" above.

RESOLUTION BOOK NO. 29 – PAGE 59

F. ORDINANCE NO. 3217 - BUDGET AMENDMENT TO APPROPRIATE FUNDS FROM THE 2005 COPS LAW ENFORCEMENT TECHNOLOGY PROGRAM GRANT

Summary: See Consent Agenda Item "D" above.

ORDINANCE BOOK NO. 22 – PAGE 21

G. RESOLUTION NO. 05-63 - RESOLUTION APPROVING A SUBORDINATION AGREEMENT FOR A LOAN TO THE ASHEVILLE AREA ARTS COUNCIL

Summary: The consideration of a resolution approving a subordination agreement for the Deed of Trust held by the City on property owned by the Asheville Area Arts Council.

The Asheville Area Arts Council (AAAC) purchased the property at 9 – 13 Biltmore Avenue from the City in June, 2002. As part of the purchase price, the AAAC executed a promissory note and deed of trust to the City in the amount of $123,500 for a term of 5 years bearing interest at the rate of 6% with monthly interest-only payments until maturity.

The City's loan is in 2nd lien position behind a lien to Asheville Savings Bank with a current balance in the amount of $250,233.70. The current total loan to value ratio is 48%. The AAAC has requested subordination of the City's lien to a refinancing of the Asheville Savings Bank loan in the amount of $340,233. 70.

Community Development staff have reviewed the request along with supporting documentation with regard to standard underwriting guidelines and determined that the loan to value ratio will remain well within acceptable limits at 59%.

The advantages of the subordination are:

- The loan to value ratio remains well within acceptable limits.
- The refinancing will provide needed operating capital for the AAAC.
- The City's loan is better protected by a financially strong and active AAAC.

The disadvantage is:

- The loan to value ratio will be slightly higher than it is now.

City staff recommends City Council adopt the resolution approving the subordination agreement.

RESOLUTION BOOK NO. 29 – PAGE 60

H. RESOLUTION NO. 05-64 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME "SCARLET OAK LANE"

Summary: The consideration of a resolution accepting the new proposed street name "Scarlet Oak Lane."

Sally E. Darling Trustee, owner of lots on Scarlet Oak Lane off of Ballantree Drive has petitioned the City of Asheville to accept the street name "Scarlet Oak Lane." The new street will begin at Ballantree Drive and end at Scarlet Oak Lane.

City staff recommends adoption of the resolution accepting the new proposed street name "Scarlet Oak Lane."

RESOLUTION BOOK NO. 29 – PAGE 61

I. RESOLUTION NO. 05-65 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAMES "WINKWORTH PLACE," "SHEPHERD'S HILL" AND "TRAFALGAR CIRCLE"

Summary: The consideration of a resolution accepting the new proposed street names "Winkworth Place," "Shepherd's Hill," and "Trafalgar Circle."

Silvaplana LLC, owner of lots in Albemarle Reserve off of Water Road, has petitioned the City of Asheville to accept the street names" Winkworth Place," "Shepherd's Hill," and "Trafalgar Circle."

- Winkworth Place will begin at Waters Road and dead-end at cul-de-sac.
- Shepherd's Hill is to begin at Winkworth Place and dead-end at cul-de-sac.
- Trafalgar Circle is to begin at Winkworth Place and end back on Winkworth Place.

City staff recommends adoption of the resolution accepting the new street names "Winkworth Place," "Shepherd's Hill," and "Trafalgar Circle."

RESOLUTION BOOK NO. 29 – PAGE 62

J. ORDINANCE NO. 3218 - BUDGET AMENDMENT TO APPROPRIATE PUBLIC, EDUCATIONAL AND GOVERNMENT FEE FUNDS

Summary: The consideration of budget amendment, in the amount of $425,000, to appropriate PEG fee funds to support the acquisition of capital equipment and facilities for the URTV public access station.

The City of Asheville, as part of its management agreement with URTV, agreed to provide capital funds to support the necessary initial equipment and facility costs associated with establishing a public access cable channel. The estimated equipment and facilities cost is $425,000.

PEG Fee proceeds, in the amount of $425,000, have been earmarked to support this effort, and they are currently being held in the City's fund balance reserve account. The proposed amendment requests an appropriation of $425,000 of PEG Fee proceeds currently being in held in fund balance to support URTV's initial equipment and facilities costs.

City staff recommends City Council appropriate $425,000 from fund balance to acquire the necessary equipment and facilities for URTV.

ORDINANCE BOOK NO. 22 - -PAGE 13

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF THREE LOTS LOCATED AT THE CORNER OF BREVARD AND SARDIS ROADS

ORDINANCE NO. 3219 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THREE LOTS LOCATED AT THE CORNER OF BREVARD AND SARDIS ROADS

Mayor Worley opened the public hearing at 5:07 p.m.

Urban Planner Julia Cogburn said that this is consideration of an ordinance to extend the corporate limits of the City of Asheville to include three lots located at the corner of Brevard and Sardis Roads. This public hearing was advertised on February 25, 2005.

John and Vaso Barlas and Simi, LLC (of which Mr. Barlas is the sole member/owner/ manager) have petitioned the City for the annexation of three lots (totaling 1.26 acres) they own, located at the corner of Brevard and Sardis Roads. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

The lots currently contain a restaurant, a vacant convenience store and parking areas. The combined assessed valuation for these properties according to the Buncombe County tax records is $1,701,000.00.

Pursuant to N. C. Gen. Stat. sec. 160A-31 a public hearing must be held prior to adopting any ordinance for voluntary annexation.

The petitioner has requested that the annexation become effective on the date of the adoption of the ordinance, if City Council decides to proceed with this request.

City staff recommends City Council adopt the ordinance extending the corporate limits of the City of Asheville to include three lots located at the corner of Brevard and Sardis Roads.

Mayor Worley closed the public hearing at 5:10 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3219. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 25

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 05-66 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT DONATION AND CONVEYANCE OF REAL PROPERTY ON GLENN BRIDGE ROAD FROM ROBERT STULTZ

Field Services Coordinator Ed Vess said that this is the consideration of resolutions (1) accepting a donation of real property between the Airport property and Glenn Bridge Road; (2) authorizing the transfer of City-owned land to the Regional Airport Authority; (3) authorizing an amendment to the Airport lease to include three parcels being acquired by the Airport; and (4) authorizing conveyance of a sewer line easement across Airport property to MSD.

By Resolution No. 02-106, City Council authorized a request for proposals (RFP) regarding a 13.08-acre parcel located directly across from the Asheville Regional Airport. Although several private developers have expressed interest in the property, no proposals have been received in respect to the RFP.

The Airport Authority has offered to purchase two tracts from the City on Airport Road. One tract, the 13.08 acre parcel, (a portion of Buncombe County PIN No. 9643.04-51-6384) includes the site where the FAA tower is located (715 Airport Road) and extends from Fanning Bridge Road almost to Hotel Drive on the east side of Airport Road. The other tract, a 0.59 acre parcel, (Henderson County PIN No. 009643-62-9725-15) is considerably smaller, on the east of Airport Road and just north of Hotel Drive in front of J & S Cafeteria. Both parcels have commercial development potential as well as being suitable for airport related facilities.

A nine (9) acre portion of the larger parcel was acquired by the City of Asheville with assistance from FAA. If the offer from the Airport Authority is accepted it will be necessary to reimburse the FAA for their financial participation in the acquisition of the property on a pro-rata basis i.e. 50% of the current value. That reimbursement perhaps could be accomplished by applying the sum due the FAA to an approved Airport improvement project. The smaller parcel was not acquired with FAA assistance.

The offer from the Airport includes a resolution of two other property issues as a part of the financial settlement on the subject property. One is the acquisition of a small parcel along Glenn Bridge Road, thought to be a part of the Airport property but apparently owned by an adjoining property owner, and the second is the provision of a sewer line easement to MSD to serve the South Ridge Shopping Center and Airport Road area.

1. **Acceptance of Donated Property** - A strip of land between the Airport property and Glenn Bridge Road was recently the subject of a claim by Mr. & Mrs. Roy Moede. The Moedes provided documentary evidence to support their claim. South Ridge developer, Bob Stultz, has acquired the Moede property and has offered to donate it to the City to be dedicated to the Airport. That property has an area of 0.12 acre. The first resolution authorizes the Mayor to accept the donation of the Moede property.

2. **Conveyance of Property to Airport** - The Airport Authority does not have the legal ability to own property - its property is held in the name of the City of Asheville. However, dedicating this land to Airport use has the effect of making it unavailable to the City for other uses. The property dedicated to the Airport on Airport Road will carry restrictions to insure maintenance of a green buffer between Airport Road and the warehouse development at the rear of the subject property, and insure that development of the site is done in a manner suitable to its prominence as a regional gateway site. The second resolution authorizes the transfer of City-owned land to the Airport Authority.

3. **Lease Amendment** - There are two properties that have been acquired since the last amendment to the Airport lease that were acquired with Airport funds, but have not yet been incorporated into the Airport lease. Those properties are a 5.9 acre tract at 74 Pinner Road acquired in April, 1999, and a 5 859 acre tract off Pinner Road acquired in October, 2004. The Airport lease needs to be amended to include the three parcels being acquired by the Airport in the current transaction as well as the two parcels previously acquired with Airport funds. The third resolution authorizes an amendment of the City's lease with the Airport Authority.

4. **Sewer Easement** – The sewer line easement requested by MSD for South Ridge Shopping Center crosses Airport property in a curving direction south to west from the Hidden Creek Subdivision to Glenn Bridge Road near its intersection with Pinner Road. The area of the sewer line easement is 0 98 acre (42,614 sq. ft.). The fourth resolution authorizes conveyance of the sewer easement to MSD.

The proposed financial settlement for dedication of the City owned property on Airport Road to the Airport along with the Moede property on Glenn Bridge Road and transfer of the sewer line easement to MSD would be as follows:

	Airport Authority – "Purchaser"		City of Asheville – "Seller"	
1.	Acquire 13.08 Ac	$1,300,000.00	Transfer 13.08 Ac.	$1,300,000.00
	(Airport Road)		(Airport Road)	
	Credit for Portion		Less Obligation due	
	w/ FAA Assistance	($ 447,247.70)	For FAA Assistance	($ 447,247.70)
2.	Acquire 0.59 Ac.	$ 346,000.00	Transfer 0.59 Ac.	$ 346,000.00
	(Airport Road)		(Airport Road)	
3.	Acquire 0.12 Ac.	$ 2,280.00	Transfer 0.12 Ac.	$ 2,280.00
	(Glenn Bridge Road)		(Glenn Bridge Road)	
4.	Transfer 0.98 Sewer	($ 9,310.00)	Acquire 0.98 Sewer	($ 9,310.00)
	Easement to MSD		Easement for MSD	
	Due from Purchaser	$1,191,722.30	Due to Seller	$1,191,722.30

The advantages of this transaction are:

- Substantial revenue will be generated to the City of Asheville by the transaction.
- The sale to the Airport will enhance the improvement and expansion of Airport facilities.
- The property will be incorporated into and utilized in accordance with the Airport Master Plan.
- The sewer line easement will facilitate the development of the South Ridge Shopping Center which has requested voluntary annexation as well as other development along Airport Road.
- The sewer line easement will facilitate the future development of Airport lands in the vicinity of Glenn Bridge Road.

There are no disadvantages to the transaction.

City staff recommends City Council approve the resolutions which will (1) authorize acceptance of donated real property between the Airport property and Glenn Bridge Road; (2) authorize the transfer of City-owned land to the Regional Airport Authority in the net amount of $1,191,722.30; (3) authorize an amendment to the Airport lease to include said properties, along with two other parcels acquired with Airport funds that have not yet been included in the Airport lease; and (4) authorize conveyance of a sewer line easement across Airport property to MSD.

Upon inquiry of Vice-Mayor Mumpower, City Manager Westbrook said that the revenue would go into Fund Balance.

Airport Director David Edwards spoke in support of the actions noting that the City will benefit and also it will benefit the future growth at the Airport.

In response to Vice-Mayor Mumpower, Mr. Edwards said that some identified uses for the property include additional parking and/or some rental car facilities.

Mayor Worley said that members of Council have been previously furnished with copies of these resolutions and they would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 05-66. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 63

B. RESOLUTION NO. 05-67 - RESOLUTION ACCEPTING A PROPOSAL FROM THE ASHEVILLE REGIONAL AIRPORT AUTHORITY TO ACQUIRE CITY-OWNED PROPERTY

Summary: See Consent Agenda Item "A" above.

Councilwoman Jones moved for the adoption of Resolution No. 05-67. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 64

C. RESOLUTION NO. 05-68 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE LEASE AMENDMENT NO. 4 TO THE LEASE WITH THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Summary: See Consent Agenda Item "A" above.

Councilwoman Jones moved for the adoption of Resolution No. 05-68. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 65

D. RESOLUTION NO. 05-69 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY AN EASEMENT OVER A PORTION OF CITY-OWNED PROPERTY AT THE ASHEVILLE REGIONAL AIRPORT TO THE METROPOLITAN SEWERAGE DISTRICT OF BUNCOMBE COUNTY

Summary: See Consent Agenda Item "A" above.

Councilwoman Jones moved for the adoption of Resolution No. 05-69. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 71

E. RESOLUTION NO. 05-70 – RESOLUTION APPROVING A LOAN FROM THE HOUSING TRUST FUND

Community Development Director Charlotte Caplan said that this is the consideration of a resolution allocating a $250,000 Housing Trust Fund (HTF) loan for affordable housing development.

On February 22, 2005, City Council allocated $370,000 for three affordable housing projects, leaving $570,000 in unallocated funds. Shortly after this allocation was approved, staff received a further application requesting a $250,000 HTF construction loan for the development of 8 units of affordable housing on Bostic Place in the Shiloh neighborhood.

The development will consist of eight 3-bedroom homes of about 1200 sq ft., built for sale at prices from $132,880 to $134,640. The homes will be of good quality modular construction, similar to those at Meadows of Bradley Branch – a development by the same company.

The application was evaluated by staff and scored well against the HTF criteria, particularly for developer qualifications. The Housing and Community Development Committee reviewed the application on March 7, 2005, and has recommended funding the project as described below:

Carr Swicegood, JCS Investments, LLC – 8 units, Bostic Place $250,000 (2 years at 2%)

This action supports Housing Opportunities Goals 3 and 4 of the Strategic Operating Plan

Advantage:

- Assists the development of 8 units of affordable housing for homeownership

Disadvantage: None

Staff recommends approval of the HTF loan to Carr Swicegood, JCS Investments, LLC, in the amount of $250,000.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-70. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 73

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 18-24, 2005: BellSouth (Water), Mary Daniels (Civic Center), Scott Laws (Parking Services), Lajuan Crawford (Streets) and Elizabeth Herrick (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Mumpower commended City crews for their speed on the College Street Roadway Project.

Councilman Newman urged the public to visit the USS Asheville Exhibit located in the lobby of the City Hall Building.

Councilman Dunn wished the Asheville High Lady Cougars and Pisgah High School good luck in their state championships.

Mr. Fred English felt the Pack Square Conservancy should stop their project at Pack Square and the streets should be returned to the state they were before the project began.

Mr. Joshua Massey, representing "The Drum Circle," presented City Council with a petition containing approximately 324 signatures which read "We the citizens of Asheville and its surrounding area declare that (1) the Asheville Parks and Recreation Department must stop issuing permits for Pritchard Park on Friday evenings, allowing for the public gathering of citizens in an open forum of free speech and expression that has been in existence for three years; (2) the right to freedom of speech and expression is protected by The Constitution of the United States of America; (3) the rights of the citizens takes priority to the Asheville Parks and Recreation Department's desire to make a profit from our public lands from private groups, organizations, and performances; and (4) we are not a group, organization, or performance. We are tax paying citizens, exercising our constitutional rights, and the Asheville Parks and Recreation Department and The City of Asheville does not have the authority to charge money or require permits for the citizens' use of a public park." In addition to Mr. Massey, Ms. Susan Bloom and Mr. C.J. Randall, explained that The Drum Circle has gathered every Friday night when it's warm at Pritchard Park for the past 3 years. Their concern that if other groups receive a permit for Friday nights at Pritchard Park, they are excluded from performing at the Park that night. Mr. David Mitchell, with the Parks & Recreation Department, asked them to submit a letter on the day the event would be held. The Parks & Recreation Department would in turn wait to see if the someone else applied for a permit and if not, they would be given authority to use the Park. Mr. Mitchell has also limited the number of permits that could be purchased to one permit per month and the permit fees have been raised from $25 to $100 for 3 hours. They attempted to buy all the permits for Friday nights and that was not allowed. They asked that on Friday nights that the Park be opened for public use. After a short discussion, Mayor Worley asked that Mr. Massey contact City Manager Westbrook to see if there are any solutions that might resolve this concern.

Mr. Gene Hamilton, representing Asheville Citizens for Quality Government, urged City Council to communicate with the County for a quality water system for all. He requested Council perform a mini-audit of the Asheville Water Maintenance Division and the subject water line replacement, located at Patton Mountain Circle for a "Quality Indicator" of quality management.

At 6:05 p.m., Councilman Newman moved to go into closed session for the following reason: To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including possible litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Dunn and carried unanimously. At 9:55 p.m., Vice-Mayor Mumpower moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:55 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 15, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower (arrived at 5:30 p.m.); Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Phyllis Corns

Absent: Councilwoman Terry M. Bellamy

CONSENT AGENDA:

Community Meeting vs. Special Meeting – March 29, 2005

Mayor Worley said that March 11, 2005, was the deadline for receiving applications for the City Manager position. We have heard from our executive search firm that approximately 80 applications have been received. They would like to schedule a closed session with City Council to review the applications to bring them to a short-list. It was the consensus of Council that we not hold a community meeting on March 29, 2005, but instead hold a special meeting at 3:00 p.m., in Room 209, for the sole purpose of having a closed session to review the applications and process.

Buncombe County Hazard Mitigation Plan

Summary: The consideration of a resolution adopting the Buncombe County Hazard Mitigation Plan.

The City of Asheville is required to adopt a Hazard Mitigation Plan by State and Federal law. Local governments in Buncombe County have recognized the importance of working cooperatively during emergency situations. Seven governmental entities in Buncombe County have jointly developed a multi-jurisdictional hazard mitigation plan. Each of the local government units have adopted the plan or are in the process of adopting the unified county-wide plan.

Hazard mitigation is defined as "sustained action that reduces or eliminates long term risk to people and property from natural hazards and their effects". The Federal Mitigation Act of 2000 and North Carolina Senate Bill 300 require local jurisdictions to have prepared and adopted a Hazard Mitigation Plan in order to be eligible for certain types of disaster assistance for both Presidential and State-declared disasters occurring after November 1, 2004.

In order to fulfill this requirement for our area, Buncombe County Emergency Management formed a multi-jurisdictional hazard mitigation planning committee that included representatives from the County and each municipal jurisdiction. The committee conducted risk and vulnerability assessments for each jurisdiction and, based upon the results of those assessments, developed hazard mitigation strategies to address the hazards that threaten our area.

The Hazard Mitigation Plan was then submitted to the North Carolina Division of Emergency Management and the U.S. Department of Homeland Security – Federal Emergency Management Agency for their approval in August of 2004. That approval was granted in October of 2004, pending the adoption of all seven governmental entities.

Buncombe County properly advertised and held a public informational session on the Hazard Mitigation Plan for all of the jurisdictions. In addition, Buncombe County properly advertised and held a public hearing on the Hazard Mitigation Plan for all jurisdictions.

This action clearly supports the City of Asheville Strategic Plan in Goal #3 – Strong City and County Partnerships – explore ways for the City and County to work together to meet mutual needs, to gain efficiencies or to share in regional infrastructure investment needs.

PROS:

- Adoption of the plan enables all of the jurisdictions in Buncombe County to better work cooperatively in the event of disaster and emergency situations by working from the same plan.
- Adoption of the plan enables the city to potentially receive grant funding in the future as well as enables some types of disaster assistance to city residents in the future if the need arises.
- Adoption of the plan better enables the City Manager through city staff to develop and coordinate operational procedures in a unified manner.

CONS:

- None have been identified or known at this time.

City staff recommends City Council adopt the Buncombe County Hazard Mitigation Plan.

Fire Chief Greg Grayson responded to questions from Council regarding the Plan.

Acceptance of Tiverton Lane, Clovelly Way and Bideford Row

Summary: The consideration of a resolution to accept Tiverton Lane, Clovelly Way and Bideford Row, in Devonshire Subdivision, as City maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Tiverton Lane, Clovelly Way and Bideford Row are developer-constructed streets that have an average paved width of 26 feet and a length of 0.35, 0.23 and 0.25 miles respectively for a total length of 0.83 miles. Inspection reports were provided to the City indicating these streets have been constructed in accordance with the approved standards.

Following City Council's approval of this resolution, these streets will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council accept Tiverton Lane, Clovelly Way and Bideford Row in Devonshire Subdivision as City-maintained streets.

Amendment to Civic Center Independent Contractor Agreement

Summary: The consideration of a resolution authorizing the City Manager to enter into a service agreement with the International Alliance of Theatrical State Employees Moving Picture Technicians ("IATSE") for the Asheville Civic Center.

IATSE personnel are independent contractors engaged by the Center to install and remove the ice rink as well as do a number of specialized tasks on behalf of the Civic Center. Because of the number of well-trained and available personnel, it is necessary for the Civic Center to continue to employ them in the future. No other staffing procedure would allow the Center the flexibility in staffing as using IATSE members.

The original amount of the contract was $49,000. However, with the addition of hockey, the Civic Center needs to increase the contract amount by an additional $40,000. There is currently money in the Center's budget and no new funds are required.

Pro: This contract allows the Civic Center to use experienced independent contractors to setup, take down and change over different events without having to hire a full time staff.

Con: None noted.

City staff recommends authorizing the City Manager to enter into a service agreement with the International Alliance of Theatrical State Employees Moving Picture Technicians ("IATSE") for the Asheville Civic Center.

N.C. Dept. of Transportation Agreement for Long Shoals Road

Summary: The consideration of a resolution authorizing the Mayor to execute a Municipal Utility Agreement with the North Carolina Department of Transportation (NCDOT) for widening NC 146 (Long Shoals Road) from east of I-26 to US 25 (Hendersonville Road), including replacing the current 16 inch plastic water line along Long Shoals Road with a new 24 inch ductile iron line.

The current water line on Long Shoals Road is a 16-inch plastic line that has numerous emergency breaks during winter months. The NCDOT betterment project will be the first phase of placing a 24-inch ductile iron pipe line along Long Shoals Road, including crossing the French Broad River and replacing the 16-inch plastic line and an old 8-inch cast iron line on the other side of the interstate. The project cost from US 25 to I-26 is $1,805,799.61 which will be paid in three (3) equal annual installments to the NCDOT.

The annual budget ordinance to be adopted in late May will provide funding for the first installment payment. The funds will come out of the Water Revenue Fund.

Pro:

- This project will enhance customer service by eliminating costly line breaks which cause water outages to area customers on the current line and will help loop the water system to the west and south regions of the system.

Con:

- The final construction cost of this project is $600,000 above the original engineer estimate due to dramatic increases in material cost in the past 18 months.

City staff recommends approval of the Municipal Utility Agreement with NCDOT for the NC 146 (Long Shoals Road) Project: R2813 C.

A short discussion was held about non-betterment costs.

Interim Water Resources Director David Hanks responded to questions from Councilman Dunn regarding plastic waterline pipes.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on March 22, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

On-Street Parking

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the Unified Development Ordinance to allow for on-street parking to be used to meet the parking requirements for a development.

This ordinance amendment is proposed to provide a development option for meeting UDO parking requirements with the use of on-street parking. The City of Asheville's Unified Development Ordinance does not currently provide for the use of on-street parking to meet the stipulated minimum parking requirements for a development, except in a few use districts where on-street parking is allowed. Staff has been presented with some development options where on-street parking provides an appropriate parking solution with additional beneficial development aspects such as buffering the sidewalk from traffic.

This ordinance amendment sets forth that on-street parking may be counted toward the fulfillment of parking requirements if meeting certain standards. Those standards include: that the on-street parking must be newly constructed; that there shall be a minimum of four (4) contiguous on-street parking spaces constructed; that these spaces must typically be parallel parking spaces; that these spaces be located within five hundred (500) feet of the development and be appropriately zoned; that these spaces must connect with adjoining sidewalks that lead to the entrances of the buildings within the development; that these spaces will be public spaces with any easements or rights-of-way conveyed to the City; and that the City Traffic Engineer approve the overall design of the spaces being provided. Any approved parking space meeting these standards shall count as 0.75 of a required off-street parking space.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment provides for a parking design option not currently provided for in the UDO.
- Allowance for on-street parking might open up additional possibilities for adaptive reuse of existing properties where providing on-site parking is difficult.

Cons-

- On- street parking may be seen as disruptive to the flow of traffic on the streets where it is located.

The Planning and Zoning Commission recommended approval of this code amendment on March 2, 2005, by a unanimous vote of 6-0 and City staff recommends approval as well.

Ms. Cogburn also explained two additional amendments to the ordinance before Council and she would have the revised ordinance before Council at their public hearing on March 22, 2005.

Ms. Cogburn responded to various questions from Council.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda.

CONSOLIDATED STRATEGIC HOUSING & COMMUNITY DEVELOPMENT PLAN FOR 2005-2010

Community Development Director Charlotte Caplan presented the key features of the draft Consolidated Strategic Housing and Community Development Plan for 2005-2010.

Every five years, the City is required to prepare a Consolidated Strategic Housing and Community Development Plan to set out broad priorities, strategies, and targets for the use of Community Development Block Grant (CDBG) and HOME funds. This Strategic Plan covers not just the City of Asheville, but also the four-county Asheville Regional Housing Consortium (Buncombe, Henderson, Madison, and Transylvania counties) within which HOME funds are used.

Under the direction of the Consortium Board, staff has commissioned a detailed Housing Needs Assessment for the entire Consortium, and prepared a more limited assessment of non-housing community development needs for Asheville. We have held fifteen public meetings to gather community input on priorities and strategies, and have drafted realistic, measurable targets for each area of activity.

She explained that resale prices are up by 39% in five years; that the median sales price is $170,000; and the minority homeownership rate has decreased from 58% in 1990 to 45% in 2000.

She reviewed the affordable housing priorities as follows: (1) Provide housing for people near minimum wage; (2) Help those with special needs – homeless, elderly, disabled; (3) Make efficient use of land and infrastructure; (4) Preserve existing housing stock through rehabilitation; (5) Coordinate housing with transportation, jobs, and services; (6) Increase affordable housing stock through new construction; (7) Emphasize energy efficient, neighborhood-compatible designs; (8) Help people succeed through housing support services; (9) Build and preserve affordable multifamily rental housing; (10) Use local resources - local contractors and locally-made supplies; (11) Promote homeownership; and (12) Preserve long-term affordability.

She then reviewed the performance targets for housing as follows:

Production Type	5-Year Target
New construction for homeownership	200
New construction for rental	300
Homeowner rehab or repair	200
Rental rehab	75
Downpayment assistance	50
Rent assistance	175
Total	1,000

Ms. Caplan explained that homeless priorities being (1) to maintain existing Continuum of Care; and (2) implementation of the 10-Year Plan to End Homelessness. She reviewed the performance targets for homelessness.

She outlined the non-housing community development priorities being (1) develop living wage employment and job training; (2) provide services that support affordable housing, public transportation, youth and employment; (3) provide infrastructure to facilitate affordable housing,

multi-modal transportation, and economic development; (4) help people improve credit and avoid predatory lending; (5) support start-up and growth of small businesses; and (6) support plan to eradicate homelessness. She then reviewed the performance targets for non-housing activities.

The entire draft Plan will be published on or before March 30, to allow for a 30-day public comment period. A final public hearing is scheduled for the April 12 Council meeting, and staff will seek Council's approval of the Plan on April 26. The Plan is due to be submitted to HUD by May 15.

Concurrently with these stages, the Consolidated Annual Action Plan for 2005, which will allocate CDBG and HOME funds to specific activities, will also be published, discussed at a public hearing, and approved.

Ms. Caplan responded to various questions from Council regarding the Plan.

LOCAL HISTORIC LANDMARK – SAWYER MOTOR COMPANY BUILDING – 100 COXE AVENUE

Historic Resources Director Stacy Merten said that this is the consideration of a motion setting a public hearing on April 12, 2005, to consider designating the Sawyer Motor Company Building, located at 100 Coxe Avenue, as a local historic landmark.

The 2025 Plan calls for continued efforts involving the preservation and enhancement, of historic properties. The Sawyer Motor Company Building has been recommended by the HRC for landmark designation.

The Sawyer Motor Company Building was found to be historically significant in the areas of commerce and architecture. The Sawyer Motor Company was the first automobile dealer to announce plans to build a new showroom on Coxe Avenue in the newly created automotive business district which was developed by E. W. Grove when he filled the deep ravine that existed between Patton and Southside Avenues with the earth obtained from the leveling of the hill where the old Battery Park hotel had stood. The Sawyer Motor Company was founded by Eugene Sawyer who was the first automobile dealer in Asheville, selling his first automobile in 1903.

The structure was completed in 1926 and was built as a grand four-story concrete and steel framed auto showroom and garage. The structure is faced with dark red brick and ornamented with cast concrete trim. Cast concrete names plaques are located at both the corner and at the center of the front entrance as part of an ornamented parapet. The exterior of the building provides a strong example of the streetscape of Asheville as it would have existed on Coxe Avenue in the late 1920's. One of the most interesting features of the 60,000 sq. ft. building was the use of the roof, accessed by an interior ramp to an additional 15,000 sq. ft. of parking.

The Sawyer Motor Company Buildings is a contributing structure in the Downtown Asheville National Register District and is part of a cluster of three automobile showrooms that remain standing on Coxe Avenue, including the B& B Motor Company Building and the Conabeer Motors Building located at 162-164 Coxe Avenue.

The Sawyer Motor Company Building has been rehabilitated and developed as condominiums and commercial space. The garage level on the second floor remains relatively intact with the original concrete framing, beams, pipes, electrical conduit and ductwork all exposed. The commercial area on the first floor has been designed to allow the concrete structure of the building and mechanical systems to remain visible overhead and the exterior walls and windows to remain visible.

The ordinance designates the Sawyer Motor Company Building as a local historic landmark. The property included in the designation consists of Sawyer Motor Company Building and the .63 acre parcel on which it is located as identified on the survey. The designation does not include any interior features.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $6,066,600.00. If the property is designated as a local landmark the potential tax savings for the property owners, including city, county and school taxes would be $40,039.56.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County. All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Pros:

- A significant property will be recognized for its contribution both architecturally and culturally to the economic and industrial history of the area.

Cons:

- If approved, the tax deferral will result in a loss of revenue to the city and county.
- This property has been recognized as part of the downtown National Register district and currently is under no threat of being lost.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance designating the Sawyer Motor Company Building as a local historic landmark.

Staff recommends that the City Council deny the request for landmark designation. Staff is concerned that although the HRC found that the property met the minimum requirement for local significance that overall the structure is not a leading candidate for landmark designation and as such, the potential loss of revenue to the City & County does not outweigh this concern, given that the structure has been recognized as a contributing structure in the Downtown National Historic District and is currently under no threat.

At this time, City staff recommends City Council set a public hearing for April 12, 2005.

Upon inquiry of Councilwoman Jones, Ms. Merten said that each individual owner would have to apply for the exemption. There is a question as to the eligibility of this property for tax deferral as the significant features are exterior only and the property is owned in common as a condominium. Eligibility will be determined by the Buncombe County Tax Assessor.

In response to Councilwoman Jones, Ms. Merten said that the average cost of a condominium ranges from $180,000-$300,000 and there are 20 condominiums.

Ms. Merten then responded to various questions from Council regarding this local historic designation request.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the April 12, 2005, formal City Council agenda.

DOWNTOWN SOCIAL ISSUES TASK FORCE IMPLEMENTATION

City Development Director Sasha Vrtunski said that this is the consideration of implementing two recommendations of the Downtown Social Issues Task Force.

On September 28, 2004, the Downtown Social Issues Task Force (DSITF) made recommendations to City Council concerning panhandling, public drunkenness, and graffiti. City Council asked staff to prepare a resolution supporting more vigorous enforcement of panhandling, public drunkenness and graffiti violations and a resolution supporting the Asheville Mural project.

Pursuant to this direction, staff has prepared two resolutions for Council's consideration. Staff will be coming forward with other actions intended to implement other DSITF recommendations throughout the coming year.

City staff recommends City Council adopt (1) a resolution supporting more vigorous enforcement of panhandling, public drunkenness and graffiti violations; and (2) a resolution supporting the Asheville Mural Project.

Councilwoman Jones felt that, in particular the resolution supporting more vigorous enforcement of panhandling, etc., loses a lot of the history of what Council charged the DSITF to do approximately 2 years ago.

Councilman Davis explained that these resolutions are probably the most doable things from the staff's point of view. However, he noted that other action is going on that does not require Council action, e.g., the spare change for change program being implemented.

Ms. Vrtunski said that the first recommendation by the DSITF was the 10-Year Plan to End Homelessness. She explained staff is not asking for any more stringent regulations, but just more enforcement on the existing ones.

Councilwoman Jones understands the strategy of starting to work on these and then move onto others, however, the City Manager could direct the Police Chief to enforce existing laws. She felt the resolution is a weak response to a lot of efforts and work. She felt the DSITF wanted more community based integrated efforts and she felt we are taking the easy way out by just adopting resolutions.

Councilman Newman felt that the 10-Year Plan to End Homelessness was very substantive document even though we haven't gotten to the implementation phase yet. He felt we are making a commitment in terms of the long-term approach on the homelessness issues. In fact, some of the other ideas the DSITF presented to Council we weren't sure we were going to do at all.

Mayor Worley saw a potential relationship in the sense of the 10-Year Plan requires homeless people to become a part of the Plan and not part of the problem. By occupying the housing to be provided through Housing First and in some ways a more aggressive enforcement of the panhandling ordinance, etc., is an extra incentive to move into the program.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

2006 CONGRESSIONAL PRIORITIES

Mayor Worley said that on February 15, 2005, City Council discussed the 2006 congressional priorities and at that time Council felt it would be appropriate to postpone taking action on this matter until all seven members of Council were present. Unfortunately, at this time we are short two Council Members.

Based on the recommendations from Ball Janik, staff recommends City Council adopt the following congressional priorities for 2006:

Appropriations bills:

1. Methamphetamine interdiction: $300,000-$1 million – Commerce, Justice, State bill

   Methamphetamine Enforcement and Clean-Up. This Department of Justice program funds over $52 million in methamphetamine projects, much of it earmarked to specific state and local governmental entities. These funds help combat methamphetamine production and distribution, along with clean-up and disposal of hazardous materials. Ball Janik recommends that the Asheville Police Department work with the State Bureau of Investigation to develop a methamphetamine project for interested Western North Carolina law enforcement agencies. The project could entail methamphetamine education, training, equipment, or increased personnel for enforcement or clean-up. Rep. Taylor is very interested in enhancing methamphetamine response in Western North Carolina and would support a strong multi-jurisdictional project. Depending on the scope of the project and the entities involved, this request could be as high as $1 million or as low as $300,000.

2. Thomas Wolfe Cabin: $300,000 – Interior bill

   Thomas Wolfe Cabin. An amount of $300,000 is needed to stabilize and refurbish the Thomas Wolfe Cabin located within the Azalea Park. This project is recommended because of an excellent funding source – America's Treasures in the Interior Appropriations bill.

3. Veteran's Memorial: $750,000 – VA/HUD bill, EDI Account

   Veterans' Memorial at Memorial Stadium. The fact that $800,000 has already been raised for this project will set well with federal appropriators. Privately, Rep. Taylor has indicated support for the Memorial. Strategically, the City may want to request $750,000, but should realize that, even if successful, the amount may be reduced by appropriators.

4. Bus replacement: $300,000 – Transportation bill

   City Bus Replacement. Although $300,000 was obtained for a bus in Fiscal Year 2005, this is likely a viable transit funding request for Fiscal Year 2006.

Authorizing legislation:

1. Pack Square: $2-4 million – potentially the TEA-21 Reauthorization bill (with the City supporting the request of the Conservancy)

   Pack Square. The Conservancy has requested $4 million for the Renaissance project. It is recommend that the City support the Conservancy's funding request and assist the

effort on Capitol Hill. Since the Conservancy will be taking the lead on the project, any funds obtained will flow to it. Nonetheless, all funds obtained will benefit the City.

2. UZA/transit funding issue – TEA-21 Reauthorization bill

A major piece of legislation unfinished in the last Congress is the Transportation Equity Act for the 21st Century (TEA-21) reauthorization. Ball Janik worked on the bill to include language that would permanently or at least temporarily exempt Asheville from the "over 200,000 population" urbanized area (UZA) threshold that jeopardizes the City's use of federal dollars for transit operations. Language included in the temporary extension bill provided Asheville Transit with 100% flexibility on the use of transit operating funds through September 2005, our lobbyist will continue to pursue a permanent fix.

Since the 108th Congress adjourned without finishing the TEA reauthorization, the entire legislative process starts over again. That means the City has the opportunity to request a funding project through this major bill that it did not participate in last year. Ball Janik suggests that this account be explored for funding Pack Square. Should that coincide with the goals of our Congressional delegation, it would be a good source of money that does not compete with any of the City's "appropriations" requests. It could be in the range of $2-4 million.

Councilman Davis felt we should try to obtain these funds if we can.

Councilman Newman would defer to Vice-Mayor Mumpower's request and not support the Veteran's Memorial earmarking. He would support the (1) methamphetamine interdiction; (2) City bus replacement; (3) making a top priority of having our lobbyist work on the census area problem that is creating the transit funding problem for Asheville; and (4) the Pack Square legislation. He also supported the funds for the restoration of the Thomas Wolfe Cabin in that it is not so much about the building, but what happened in the building – it's a part of Asheville's history.

Councilwoman Jones did not support asking for funding for the Thomas Wolfe Cabin.

In response to Councilman Newman, City Manager Westbrook said the cabin restoration is a part of the Azalea Road Park. The City purchased the cabin along with the property. The amount requested in the earmarking is only a part of the funding needed to restore the overall cabin itself and the area around it. It's meant to be a part of the overall larger Park that people can visit, which will be connected by walking trails from Azalea Road and accessible by vehicle from Oteen Church Road.

Councilman Dunn has not heard any public outcry for the Thomas Wolfe Cabin restoration.

City Manager Westbrook said that Vice-Mayor Mumpower had a meeting with the Memorial Stadium Committee and they had all voted to support (at some level) earmarking. He wasn't sure if Vice-Mayor Mumpower's decision to not support earmarking changed or not.

Mayor Worley suggested we recess the meeting, reconvene in the Council Chamber for the School Board interviews, and then resume this topic after the School Board interviews. Vice-Mayor Mumpower is expected to return shortly from Washington, D.C.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to arrange interviews for W.E. Lack, Robert Middlemas, Scott Shealy and Starr Silvis for a vacancy on the Board of Adjustment.

BATTERY HILL PARKING DECK

In response to Councilman Newman, City Engineer Cathy Ball said that she has met with the consultants and are moving forward on the design of the parking deck. If the design is going to change, they will need to know as soon as possible. City Manager Westbrook also noted that if the design changes, there will be a financial impact too. It was the consensus of Council to instruct the City Manager to place the parking deck discussion on the next formal meeting agenda to decide whether or not we want to have the west side of the project include some residential component.

At 4:40 p.m., Mayor Worley recessed the meeting to the Council Chamber to conduct School Board interviews. After said interviews, City Council will reconvene the worksession in order to continue discussion on the 2006 Congressional Priorities.

ASHEVILLE SCHOOL BOARD INTERVIEWS

At 5:00 p.m., City Council interviewed Elizabeth Hubbell, Gene Bell, Alfred Whitesides Jr., Keith Thomson and Jim Taylor. At approximately 5:30 p.m., Vice-Mayor Mumpower arrived for the interviews from a meeting in Washington, D.C.

At 7:30 p.m., Mayor Worley reconvened the worksession in order to continue discussion on the 2006 Congressional Priorities. Councilwoman Bellamy was the only Council Member not present.

CONTINUATION OF 2006 CONGRESSIONAL PRIORITIES

Historic Resources Director Stacy Merten reviewed with Council the significance of the Thomas Wolfe Cabin, which was constructed in 1923-1924.

Councilwoman Jones had concerns about $300,000 to stabilize and refurbish the Thomas Wolfe Cabin.

Councilman Davis spoke in support of earmarking funds for the Thomas Wolfe Cabin refurbishment.

Vice-Mayor Mumpower said that in Washington, D.C., he tried to honor the role and speak for City Council with our lobbyist. The amount the lobbyist had for the Thomas Wolfe Cabin was $237,000. (City Manager Westbrook said that the $300,000 was reduced to try to go with the funding that might be available.). Vice-Mayor Mumpower said that the lobbyist is seeking money through the American Treasures Program, which is a dedicated fund. The money will be spent and the lobbyist's argument is let's try to see if there is something we can get to put towards a practical use. He felt the Cabin is worth salvaging.

Vice-Mayor Mumpower said that in his recent meeting with our two representatives and senator he provided bullet points of advocacy on each of these issues. Two issues that resonated with our representatives were the methamphetamine interdiction and the Veteran's Memorial. He felt that everyone was on board with the bus replacement issue. Personally, the two he is most comfortable with reaching for federal dollars are the methamphetamine interdiction

and the bus replacement. The Veteran's Memorial request has been reduced from $750,000 to around $300-350,000 for various reasons. All three of the representatives he met with felt very strongly about the Veteran's Memorial and what the Memorial Stadium Action Committee and our Parks & Recreation Department is trying to do with the help of a lot of people in the community. He personally has trouble going after this money philosophically during the time of real deficit. However, he did talk with the Memorial Stadium Action Committee about it and it was their majority opinion that Council support and seek the funds. Another issue was the water system infrastructure upgrade for a number of neighborhoods, including The Block. That was between $200-300,000. Bullet points included safety, water pressure, areas that needed revitalization, economic development, etc.

Mayor Worley said we most certainly can include the water system upgrade as another congressional priority.

Councilman Newman moved to waive the rules and take formal action on the congressional and legislative issues. This motion was seconded by Councilwoman Jones and carried unanimously.

Vice-Mayor Mumpower said that our lobbyist seemed to have an interest in having the issues prioritized, but the point of stronger weight is to say that we have these 4-5 issues that are priorities because they all come out of different pots.

Councilman Dunn said that after hearing about the Thomas Wolfe Cabin he could support that issue. With the Veteran's Memorial, he felt that $350,000 was more in line with what he could support.

Councilman Newman moved to support water infrastructure funding (funding level to be determined), the methamphetamine interdiction funding ($300,000-$1 Million), the bus replacement funding ($300,00), and the support for the Pack Square project ($2-4 Million). This motion was seconded by Councilman Davis.

Councilman Davis moved to amend Councilman Newman's motion to include the Thomas Wolfe Cabin funding. This motion died for a lack of a second.

Councilwoman Jones said she would vote against the amendment of including the Thomas Wolfe Cabin.

Councilman Newman moved to amend his original motion to include their efforts to fix the census tract problem that is affecting our transit funding formula. This motion was seconded by Councilwoman Jones.

Vice-Mayor Mumpower said that he has been in Washington, D.C., meeting with folks advocating for an agenda. To some extent the die is cast. He followed what was asked of him and he advocated very enthusiastically for the five areas that were on the congressional priority list for 2006, which included the Thomas Wolfe Cabin. He felt our legislators have embraced those areas. He said the Pack Square legislation for $4 Million is a given as much as anything is and he relayed the Mayor and Council's appreciation for that effort on Congressman Taylor's part.

The motion made by Councilman Newman to support water infrastructure funding (funding level to be determined), the methamphetamine interdiction funding ($300,000-$1 Million), the bus replacement funding ($300,00), the support for the Pack Square project ($2-4 Million), and their efforts to fix the census tract problem that is affecting our transit funding formula, and seconded by Councilwoman Jones failed on a 3-3 vote, with Mayor Worley, Councilwoman Jones

and Councilman Newman voting "yes", and Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Councilman Dunn moved that Council vote separately on each congressional issue. This motion was seconded by Councilwoman Jones and carried unanimously.

(1) The methamphetamine interdiction funding ($300,000-$1 Million) was unanimously supported by City Council.

(2) The Thomas Wolfe Cabin ($300,000) vote failed on a 3-3 vote, with Mayor Worley, Councilman Davis and Councilman Dunn voting "yes" and Vice-Mayor Mumpower, Councilwoman Jones and Councilman Newman voting "no."

Vice-Mayor Mumpower was concerned that the City spent a lot of money on lobbyist and a lot of money sending him to Washington to work with the lobbyist to advocate for these issues. The issues have already been tossed into the pot. Our representatives are working these issues. He wondered if Council is doing something productive now. He wondered how it would be if Council didn't take a formal position on these issues and just let the lobbyist do what they can.

Councilman Newman felt this discussion should have happened earlier and it's unfortunate that it didn't. He felt that if there is an issue that they do not believe should be funded with taxpayers dollars, then it should be taken off the list.

Councilwoman Jones explained that we have community needs and she feels that asking for $300,000 for the Thomas Wolfe Cabin sends a mixed message of our community's priorities (e.g., community development funds that could be invested in infrastructure and housing).

Mayor Worley said that the process is already in motion due to Council's inability to reach a decision earlier than this. We started down this road because we know we have opportunities that we have not been able to take advantage of in the past for a number of reasons. We have now made an effort (we have hired a lobbyist) and we have representatives that are in a position to help us. Our lobbyist has met with City staff and City Council to determine where we have needs in our organization and then the lobbyist looked at the availability in Washington of sources of funds to fill those needs. For instance, the Thomas Wolfe Cabin funding will come from the American Treasures funding – there is not a choice to put it towards housing or another priority.

(3) The Veteran's Memorial at Memorial Stadium ($350,000) vote failed on a 2-4 vote with Mayor Worley and Councilman Davis voting "yes" and Vice-Mayor Mumpower, Councilman Dunn, Councilwoman Jones and Councilman Newman voting "no."

Vice-Mayor Mumpower said that voted against the Veteran's Memorial funding because at this time of record deficits anything we get from the federal government should be very targeted to very specific needs and the community was told that there would be no City taxpayer money used to fund the Memorial aspect of the project.

(4) The bus replacement ($300,000), the water infrastructure funding (level to be determined), the support of the Pack Square project ($2-4 Million) and efforts to fix the census tract problem that is affecting our transit funding formula was unanimously supported by City Council.

N.C. LEGISLATIVE PRIORITIES

City Attorney Oast said that he received a letter from Senator Nesbitt indicating that he had introduced 4 blank bills on our behalf, as Council asked him to do. We are still waiting to fill in the content of those bills, which can be determined at a later time.

MISCELLANEOUS

Councilman Davis suggested that RiverLink volunteers to participated in the Swannanoa River clean-up this past weekend should be recognized in some way.

ADJOURNMENT:

At 8:29 p.m., Councilwoman Jones moved to adjourn. This motion was seconded by Councilman Dunn and carried unanimously.

Magdalen Bowlison
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 22, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Davis led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

I. PROCLAMATIONS:

Councilwoman Bellamy proudly showed a picture of her new beautiful baby girl "Imani Bellamy".

A. RECOGNITION OF CITY OF ASHEVILLE RESERVISTS JAMES WRIGHT, DAVID SAUER AND PATRICK CRUDUP

On behalf of City Council, Mayor Worley recognized James Wright from the 210th Military Police Unit of the Army National Guard, employee with the Asheville Police Department; David Sauer, part of a Medical Unit of the Naval Reserves, employee with the Asheville Fire Department; and Patrick Crudup from the 854th Heavy Combat Engineers Unit of the Army Reserves, employee with the Asheville Parks & Recreation Department. He welcomed them home from their lengthy tour of duty.

B. PROCLAMATION PROCLAIMING MARCH 28-APRIL 3, 2005, AS "NATIONAL COMMUNITY DEVELOPMENT WEEK"

Mayor Worley read the proclamation proclaiming March 28-April 3, 2005, as "National Community Development Week" in the City of Asheville. He presented the proclamation to Councilman Dunn, Chair of the Housing and Community Development Committee, and Community Development Director Charlotte Caplan. They briefed Council on some statistics of the Community Development Block Grant Program.

II. CONSENT AGENDA:

Mayor Worley announced that Consent Agenda "H" will be removed from the Consent Agenda and from Council consideration.

Mayor Worley asked that a resolution amending the 2005 scheduled City Council meetings be added to the end of the Consent Agenda.

Councilwoman Jones asked that Consent Agenda items "F" and "G" be removed from the Consent Agenda for individual discussion.

Councilwoman Bellamy asked that Consent Agenda Item "A" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 8, 2005

This item was removed from the Consent Agenda for an individual vote.

B. RESOLUTION NO. 05-71 - RESOLUTION ADOPTING THE BUNCOMBE COUNTY HAZARD MITIGATION PLAN

Summary: The consideration of a resolution adopting the Buncombe County Hazard Mitigation Plan.

The City of Asheville is required to adopt a Hazard Mitigation Plan by State and Federal law. Local governments in Buncombe County have recognized the importance of working cooperatively during emergency situations. Seven governmental entities in Buncombe County have jointly developed a multi-jurisdictional hazard mitigation plan. Each of the local government units have adopted the plan or are in the process of adopting the unified county-wide plan.

Hazard mitigation is defined as "sustained action that reduces or eliminates long term risk to people and property from natural hazards and their effects". The Federal Mitigation Act of 2000 and North Carolina Senate Bill 300 require local jurisdictions to have prepared and adopted a Hazard Mitigation Plan in order to be eligible for certain types of disaster assistance for both Presidential and State-declared disasters occurring after November 1, 2004.

In order to fulfill this requirement for our area, Buncombe County Emergency Management formed a multi-jurisdictional hazard mitigation planning committee that included representatives from the County and each municipal jurisdiction. The committee conducted risk and vulnerability assessments for each jurisdiction and, based upon the results of those assessments, developed hazard mitigation strategies to address the hazards that threaten our area.

The Hazard Mitigation Plan was then submitted to the North Carolina Division of Emergency Management and the U.S. Department of Homeland Security – Federal Emergency Management Agency for their approval in August of 2004. That approval was granted in October of 2004, pending the adoption of all seven governmental entities.

Buncombe County properly advertised and held a public informational session on the Hazard Mitigation Plan for all of the jurisdictions. In addition, Buncombe County properly advertised and held a public hearing on the Hazard Mitigation Plan for all jurisdictions.

This action clearly supports the City of Asheville Strategic Plan in Goal #3 – Strong City and County Partnerships – explore ways for the City and County to work together to meet mutual needs, to gain efficiencies or to share in regional infrastructure investment needs.

PROS:

- Adoption of the plan enables all of the jurisdictions in Buncombe County to better work cooperatively in the event of disaster and emergency situations by working from the same plan.
- Adoption of the plan enables the city to potentially receive grant funding in the future as well as enables some types of disaster assistance to city residents in the future if the need arises.

- Adoption of the plan better enables the City Manager through city staff to develop and coordinate operational procedures in a unified manner.

CONS:

- None have been identified or known at this time.

City staff recommends City Council adopt the Buncombe County Hazard Mitigation Plan.

RESOLUTION BOOK NO. 29 – PAGE 74

C. RESOLUTION NO. 05-72 - RESOLUTION ACCEPTING TIVERTON LANE, CLOVELLY WAY AND BIDEFORD ROW AS CITY-MAINTAINED STREETS

Summary: The consideration of a resolution to accept Tiverton Lane, Clovelly Way and Bideford Row, in Devonshire Subdivision, as City maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Tiverton Lane, Clovelly Way and Bideford Row are developer-constructed streets that have an average paved width of 26 feet and a length of 0.35, 0.23 and 0.25 miles respectively for a total length of 0.83 miles. Inspection reports were provided to the City indicating these streets have been constructed in accordance with the approved standards.

Following City Council's approval of this resolution, these streets will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council accept Tiverton Lane, Clovelly Way and Bideford Row in Devonshire Subdivision as City-maintained streets.

RESOLUTION BOOK NO. 29 – PAGE 75

D. RESOLUTION NO. 05-73 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SERVICE AGREEMENT WITH THE INTERNATIONAL ALLIANCE OF THEATRICAL STATE EMPLOYEES MOVING PICTURE TECHNICIANS AT THE CIVIC CENTER

Summary: The consideration of a resolution authorizing the City Manager to enter into a service agreement with the International Alliance of Theatrical State Employees Moving Picture Technicians ("IATSE") for the Asheville Civic Center.

IATSE personnel are independent contractors engaged by the Center to install and remove the ice rink as well as do a number of specialized tasks on behalf of the Civic Center. Because of the number of well-trained and available personnel, it is necessary for the Civic Center to continue to employ them in the future. No other staffing procedure would allow the Center the flexibility in staffing as using IATSE members.

The original amount of the contract was $49,000. However, with the addition of hockey, the Civic Center needs to increase the contract amount by an additional $40,000. There is currently money in the Center's budget and no new funds are required.

Pro: This contract allows the Civic Center to use experienced independent contractors to setup, take down and change over different events without having to hire a full time staff.

Con: None noted.

City staff recommends authorizing the City Manager to enter into a service agreement with the International Alliance of Theatrical State Employees Moving Picture Technicians ("IATSE") for the Asheville Civic Center.

RESOLUTION BOOK NO. 29 – PAGE 77

E. RESOLUTION NO. 05-74 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE LONG SHOALS ROAD PROJECT

Summary: The consideration of a resolution authorizing the Mayor to execute a Municipal Utility Agreement with the North Carolina Department of Transportation (NCDOT) for widening NC 146 (Long Shoals Road) from east of I-26 to US 25 (Hendersonville Road), including replacing the current 16 inch plastic water line along Long Shoals Road with a new 24 inch ductile iron line.

The current water line on Long Shoals Road is a 16-inch plastic line that has numerous emergency breaks during winter months. The NCDOT betterment project will be the first phase of placing a 24-inch ductile iron pipe line along Long Shoals Road, including crossing the French Broad River and replacing the 16-inch plastic line and an old 8-inch cast iron line on the other side of the interstate. The project cost from US 25 to I-26 is $1,805,799.61 which will be paid in three (3) equal annual installments to the NCDOT.

The annual budget ordinance to be adopted in late May will provide funding for the first installment payment.

Pro:

- This project will enhance customer service by eliminating costly line breaks which cause water outages to area customers on the current line and will help loop the water system to the west and south regions of the system.

Con:

- The final construction cost of this project is $600,000 above the original engineer estimate due to dramatic increases in material cost in the past 18 months.

City staff recommends approval of the Municipal Utility Agreement with NCDOT for the NC 146 (Long Shoals Road) Project: R2813 C.

RESOLUTION BOOK NO. 29 – PAGE 78

F. RESOLUTION SUPPORTING THE ASHEVILLE MURAL PROJECT

This item was removed from the Consent Agenda for discussion.

G. RESOLUTION SUPPORTING MORE VIGOROUS ENFORCEMENT OF PANHANDLING, PUBLIC DRUNKENNESS AND GRAFFITI VIOLATIONS

This item was removed from the Consent Agenda for discussion.

H. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT INVOLVING THE FEDERAL CLEAN WATER ACT AND THE NORTH CAROLINA CLEAN WATER REVOLVING LOAN AND GRANT ACT OF 1987 FOR WATER LINE IMPROVEMENTS

This matter was pulled from consideration by City Council.

I. RESOLUTION NO. 05-75 – RESOLUTION AMENDING THE 2005 SCHEDULED CITY COUNCIL MEETINGS TO ADD A SPECIAL MEETING ON MARCH 29, 2005

RESOLUTION BOOK NO. 29 – PAGE 79

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEMS REMOVED FROM THE AGENDA FOR DISCUSSION

APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 8, 2005

Councilman Dunn moved to excuse Councilwoman Bellamy from voting on this matter since she was not at the March 8, 2005, Council meeting. This motion was seconded by Councilman Newman and carried unanimously.

Councilman Dunn moved to approve the minutes of the regular meeting held on March 8, 2005. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION NO. 05-76- RESOLUTION SUPPORTING THE ASHEVILLE MURAL PROJECT

Summary: The consideration of implementing two recommendations of the Downtown Social Issues Task Force.

On September 28, 2004, the Downtown Social Issues Task Force (DSITF) made recommendations to City Council concerning panhandling, public drunkenness, and graffiti. City Council asked staff to prepare a resolution supporting more vigorous enforcement of panhandling, public drunkenness and graffiti violations and a resolution supporting the Asheville Mural project.

Pursuant to this direction, staff has prepared two resolutions for Council's consideration. Staff will be coming forward with other actions intended to implement other DSITF recommendations throughout the coming year.

City staff recommends City Council adopt (1) a resolution supporting more vigorous enforcement of panhandling, public drunkenness and graffiti violations; and (2) a resolution supporting the Asheville Mural Project.

Councilwoman Jones voiced concern that a "resolution of support" is an easy thing for Council to do but it doesn't have any substance. She felt the Asheville Mural Project is a good project but would like to support it in a more meaningful way.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-76. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 80

RESOLUTION NO. 05-77- RESOLUTION SUPPORTING MORE VIGOROUS ENFORCEMENT OF PANHANDLING, PUBLIC DRUNKENNESS AND GRAFFITI VIOLATIONS

Summary: See Resolution No. 05-76 above.

Councilwoman Jones would not be able to support this resolution. She explained that she is not interested in supporting enforcement of resolutions already on the books when we could be doing other things simultaneously with our community that could make a bigger difference.

Councilman Davis explained that there is other work and programs being implemented by other groups that don't need any action by City Council.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-77. This motion was seconded by Councilwoman Bellamy and carried on a 6-1 vote, with Councilwoman Jones voting "no."

RESOLUTION BOOK NO. 29 – PAGE 81

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO REZONING 335 DEAVERVIEW ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3220 - ORDINANCE TO REZONE 335 DEAVERVIEW ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:34 p.m.

Ms. Kim Hamel, Urban Planner, said that this is the consideration of an ordinance to rezone 335 Deaverview Road from Commercial Industrial District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on March 11 and 18, 2005.

Ms. Hamel said that the subject site is located in West Asheville approximately ¾ miles off of Patton Avenue on Deaverview Road. The property is vacant and consists of 6.12 acres and is currently zoned CI Commercial Industrial District. The owners are James and Helen Beck.

Surrounding land uses and zoning include a single-family dwelling and vacant residential property zoned RS-8 and 1-2 mobile home units zoned RM-16 to the north; vacant property zoned CI to the west; multi-family and single-family units, zoned RM-8 to the South; and a large apartment complex, zoned RM-16 to the east of the site.

The subject site is located within a fairly dense residential neighborhood that consists of a mixture of single-family dwelling and multi-family units. The majority of the property surrounding the site is zoned RM-8 and RM-16. Just east of the property a section of Commercial Industrial (CI) zoned properties exists consisting of the Milkco Manufacturing plant, the MB Haynes Corp.,

and several other medium sized commercial businesses. The site is serviced directly off of Deaverview Road, a 2-lane road, located approximately ¾ mile from Patton Avenue.

The owners of the property, James and Helen Beck, have requested a rezoning of the lot to RM-16 with the intention of developing the property for residential purposes. Although, the Commercial Industrial district permits a density of 16-units per acre, the same density permitted under the RM-16 zoning district, it does not permit single-family development. Accessory apartments and multi-family uses are the only residential uses permitted in the Commercial Industrial zoning district.

Prior to the adoption of the Unified Development Ordinance (UDO) in 1997, the majority of the area, including the subject site, was zoned R-3. This zoning district permitted 16-units per acre, the same as what is being requested by the applicant. It was at the request of the owner, during the zoning discussions associated with the UDO process, that the subject property along with the two adjoining lots to the west of the subject site (also under the same ownership) be zoned Commercial Industrial. It was his intent to attract some commercial-type development similar in nature to the commercial uses that exist east of the site.

The RM-16 District was intended to permit a full range of high density multi-family housing types in area that would be close to shopping facilities, potential employment centers, road and other urban infrastructure capable of handling the demand generated by high density developments.

The Commercial Industrial District was created to provide areas for a wide range of commercial and industrial uses including: light manufacturing, warehousing, retail sales, offices and residential uses, all to be located in an area where existing urban infrastructure is adequate to support such uses.

Pros:

- The rezoning of the lot to RM-16 would be compatible with the density and character of surrounding and adjoining uses.
- Adequate infrastructure capable of handling a residential development exists in the area.
- The site is located in close proximity of potential employment centers, shopping venues and public transportation.
- The gentle-sloping topography of the land makes is suitable for residential or commercial development of the land.

Cons:

- The rezoning of the property to RM-16 would result in the loss of land suitable for the development of light industrial type uses permitted under the current CI zoning designation.
- Adequate infrastructure capable of handling the uses permitted under CI zoning designation exists in the area.

On Wednesday, March 2, 2005, the Planning and Zoning Commission made a unanimous recommendation to approve the rezoning, as requested by the applicant.

Although staff realizes the importance of maintaining the zoning of property that permits industrial type uses, we feel that the request to rezone the property to RM-16 would be compatible with the character and density of the adjoining properties and the surrounding area. The rezoning of the lot to RM-16 also has the capability of providing a high-density infill development within the City Limits in an area where utilities and other infrastructure currently

exists. Based on the above and given that the property was zoned Commercial Industrial District at the request of the owner, staff supports the rezoning of the lot, as requested.

Mayor Worley closed the public hearing at 5:38 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3220. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 27

B. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF THREE LOTS ON BILTMORE AVENUE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED MIXED-USE DEVELOPMENT WITH EXISTING APARTMENTS TO BE CONVERTED INTO CONDOMINIUMS AND SHORT-TERM RENTAL UNITS WITH A PROPOSED RETAIL OFFICE SPACE AND FOOD SERVICE FACILITY**

ORDINANCE NO. 3221 - ORDINANCE REZONING THREE LOTS ON BILTMORE AVENUE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3222 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THREE LOTS ON BILTMORE AVENUE FOR A PROPOSED MIXED-USE DEVELOPMENT WITH EXISTING APARTMENTS TO BE CONVERTED INTO CONDOMINIUMS AND SHORT-TERM RENTAL UNITS WITH A PROPOSED RETAIL OFFICE SPACE AND FOOD SERVICE FACILITY

City Clerk Burleson administered oaths to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:39 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone 3 lots on Biltmore Avenue from RM-16 Residential Multi-Family High Density District and RS-8 Residential Single-Family High Density District to Institutional District/Conditional Use, and a request to issue a conditional use permit for a proposed mixed-use development with existing apartments to be converted into condominiums and short-term rental units with a proposed retail office space and food service facility.

The applicant, David Payne, is requesting a conditional use rezoning of 6.6 acres from RM-16/RS-8 to Institutional District/Conditional Use to allow for the addition of non-residential uses to the property and to allow for the renovation of 114 existing rental apartments (10 buildings) to condominium units where some of the units may be occupied under short term leases not normally permitted in residential districts (Attachments to City Exhibit 3 – Aerial Map and Location Map).

The proposed Master Plan shows the addition of 4 new buildings that vary in size. Building #1 is the largest at 6,960 s.f. with a mix of office and restaurant use. Building #2 shows 4800 s.f. evenly split between office and retail. Buildings #3 and #4 are considerably smaller, between 1500 and1800 s.f. dedicated exclusively to office uses. All four buildings totaled together result in 15,060 square feet with 8,460 s.f. of office, 4200 s.f. of restaurant, and 2400 s.f. of retail. Also associated with the project are 27 additional surface parking spaces along with 39 underground parking spaces strategically planned to take advantage of the existing change in topography. In addition, courtyards, pedestrian connections, amenity improvements, open space, and additional landscaping are also detailed on the Master Plan (Attachments to City Exhibit 3 – Master Plan; Section View; Village View from Biltmore Avenue; Village Interior View; Residential Condominium View; and Pool and Amenity Area).

The subject properties are located in the Asheville city limits on the corner of Biltmore Avenue and Caledonia Road, with additional frontage on Kenilwood Place and Bowling Park Road, which serve as entrances into the Kenilworth neighborhood. The subject properties are directly across from the Marriot Residence Inn, zoned Institutional, and are bordered to the northwest by more Institutional zoned property supporting a Bed & Breakfast Inn, as well as some small business uses zoned CBII to the southwest. The remaining property boundary is surrounded by single family homes all zoned RS-8 (Attachment to City Exhibit 3 – Location Map).

The largest of the three lots is currently zoned RM-16 with the two smaller lots being zoned RS-8. One of the two single family lots is already developed as an accessory use to the apartments (swimming pool) and the other lot located along Bowling Park Road will remain undeveloped and preserved as open space for the project. Other than minor improvements to the pool amenity area, there will be no site plan changes to the existing residential component of the project and the three existing access points will remain open. Two new entrances will be added to access the new mixed use development area, one off of Kenilwood Place across from Finalee Avenue, and the other off of Caledonia Road.

The site supports some impressive mature large hemlock trees located along the bank behind the open green lawn, which effectively shields the traffic on Biltmore Avenue from the residential property. As a result of this project, many, or maybe even most, of those hemlock trees will come down. The designers for the project have stated that it is their intention to preserve as many of these trees as they can, recognizing that the trees are an amenity to the project. It is difficult to predict exactly how many of the trees can be saved or which ones will be saved until the detailed plans are completed. The trees highlighted on the Conceptual Master Plan (Attached to City Exhibit 3) are those that the developer and the site designers are confident that they will be able to preserve. There may be more than this that can be saved, but again, we won't know exactly which ones until more information is gained. She felt that what is shown on the Conceptual Master Plan is the worst-case scenario, as far as tree preservation goes. She also pointed out that there is a significant amount of additional existing vegetation that is not shown on the Master Plan located around the existing residential areas. This vegetation is not expected to be impacted in any way. The one exception is that there may be some impact to the existing vegetation located along the southern edge along Kenilwood Place, but only where the proposed entrance is located.

Normally there is a sidewalk required on all road frontages for projects such as this. We would normally require a sidewalk along Kenilwood Place; however, a fee in lieu option has been afforded to the developer, primarily because there is a pretty steep bank along Kenilwood Place. It is possible to install sidewalks, but it would be more than likely at the expense of removing a significant amount of the trees.

At their March 3, 2005, meeting, the Planning & Zoning Commission reviewed the Conditional Use Rezoning and Master Plan proposal and made a positive recommendation that the project be forwarded to the Asheville City Council, stipulating that the applicant meet all outstanding Technical Review Committee (TRC) conditions and other conditions outlined in the staff's report and presentation before final zoning approval. In addition, after public comment and deliberation, the Planning & Zoning Commission added a number of conditions summarized as follows:

1. The southern entrance along Kenilwood Place be eliminated if approved by the Fire Department and other City departments. If elimination of the entrance is not possible, then pursue option of limiting access to emergency vehicles only or other suitable alternative addressing emergency access requirements (excluding any alternative that accessed Biltmore Avenue).
2. Provide a pedestrian sidewalk from the village area to Kenilwood Place.
3. Traffic light study and construction of light (if approved by DOT) to be funded by the developer.
4. Trees identified on the Master Plan as "existing" must be preserved with other mature trees preserved where possible.
5. Height and character of buildings to reflect the conceptual drawings submitted by the applicant.
6. Provide preliminary sign package addressing neighborhood compatibility.
7. The developer is to hold another meeting with the neighborhood prior to the City Council hearing to:

- explore the possibility of eliminating the parking spaces behind building #2 (drive access to remain open), and
- further explore and address concerns centered on tree preservation and signage.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The proposed development is designed to capitalize on existing topography in order to place parking underneath the building thereby reducing surface parking and impermeable area. In addition, the applicant will be preserving the open lawn area at the front of the property and will be gamering additional information to better address possible tree preservation throughout the site. No significant site work is proposed for the rear of the property adjacent to the residential neighborhood and is not expected to have a significant impact on those areas.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The proposed development will be an attractive mixed-use development that is relatively modest in scale designed to primarily serve the existing neighborhood. The non-residential buildings and uses will be oriented towards the major thoroughfare of Biltmore Avenue and access will be from commercially zoned rights-of-way. In addition to orientation and distance serving to buffer the use against the adjacent residential properties, there is some additional separation and buffering through topography change and proposed landscape buffers. Lastly, renovation and improvement of the ten existing apartment buildings is proposed as a component of this application and, in conjunction with the new development, is not expected to negatively affect the value of adjacent properties.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The proposed new development is located on the front portion of the property closest to the existing commercial corridor and in total, is perfectly in scale with the existing commercial uses. Similarly the new buildings will be in character with scale of the large, high density, multi-family uses already existing on site.

   Single family homes of the neighborhood are separated somewhat by the existing multi-family development, rights-of-way, and topography and are not expected to be heavily impacted by the proposed development. In addition, the new development will be broken into multiple (4) new buildings that will be in keeping with the bulk and coverage of the neighborhood - particularly the two smallest buildings located in closest proximity to single family homes of the area will be no larger than the average home in the neighborhood. Lastly, the conceptual architectural style proposed is intended to reflect the mixed and eclectic architectural styles of the Kenilworth neighborhood with elements of Craftsman and Mediterranean styles combined in a village layout.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The Asheville City Development Plan 2025 is very clear in its support of quality infill development as another method of implementing the City's Smart Growth vision. It goes on to describe one of the reasons for the underdevelopment of property being due to "suburban zoning requirements that do not maximize use of the property for urban purposes" and asks that opportunities for infill development be considered on a case-by-case basis where special regulatory tools, such as conditional use zoning, may be used to encourage compatible development of these properties. This position is further supported by the Smart Growth Land Use Policies adopted by the Asheville City Council in 2000.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The proposed mixed-use project is extremely well positioned to take advantage of existing transportation facilities including alternative transportation options with multiple bus routes running down Biltmore Avenue and through the Kenilworth neighborhood, in addition to an extensive network of pedestrian paths linking the neighborhood to a number of services and employment centers. In addition, the proposed development has been reviewed by the TRC, which did not reveal any problems with providing service to the development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The proposed development is not designed to be a destination center and is intended to primarily serve the residents of Kenilworth and others in relative proximity to the site. The proposed mix of use is not expected to generate a large amount of traffic and this traffic is expected to utilize the main thoroughfare of Biltmore Avenue. The three existing access points to the residential component of the project will remain open while two new access points on either side of the proposed development will help disburse new traffic back to Biltmore Avenue. Lastly, although not a part of this application, the property owner is investigating with N.C. Dept. of Transportation ("NCDOT") the possibility of placing a new traffic light at the corner of Biltmore Avenue and Caledonia Road to help safely control turning movements onto Biltmore Avenue.

Pros

- Promotes quality infill development while retaining open space for the neighborhood
- Provides neighborhood services to the immediate community
- Promotes the renovation and improvement of well positioned residential units

Cons

- Will result in the loss of existing vegetation (extent of loss is undetermined)
- Will result in a modest increase in traffic at intersections with Biltmore Avenue

In the weeks since the Planning & Zoning Commission meeting, discussions between the Planning, Engineering, and Fire Departments resulted in the preference to keep the southern drive entrance along Kenilwood Place open to all traffic. The Fire Department did clarify that a drive that was more residential in character could be substituted or a turn-around alternative could be explored if topographically feasible. The Traffic Engineer also supported moving the entrance closer to Biltmore Avenue, if possible as it related to the parking layout. In addition, the applicant has coordinated with the NCDOT regarding the proposed traffic light and has initiated

the process for formally requesting a traffic light at the intersection of Caledonia and Biltmore, which includes contracting professionals to complete a traffic study. The applicant has also ordered a detailed tree and topographical survey to better assess impacts to the existing vegetation and possible changes to the southern entrance, and it is hoped that this work will be completed prior to the City Council hearing. Lastly, the applicant held a second neighborhood meeting to discuss the primary issues and concerns voiced during public comment by the Kenilworth neighborhood.

The applicant has attended three meetings -- one with the representatives of the Coalition of Asheville Neighborhoods, one with representatives of the Kenilworth neighborhood, and another one with the neighborhood as requested by the Planning & Zoning Commission. In preparation for the last meeting, the designers for the project worked out some alternatives that would better address the neighborhoods concerns and presented Alternative Concept A (City Exhibit 4). Some of the main differences include: (1) Building No. 3 has been relocated to front on Caledonia Road and will utilize an existing parking area; (2) The parking formerly located in the front of Building No. 2 has been eliminated with the proposed parking being redistributed and reduced by 9 spaces. This will drop the number of parking spaces below the minimum for the project for the development. However, given that the existing parking area for the residential component exceeds their minimum, there is enough parking to satisfy all the requirements when looked together in total; and (3) The designers are showing the entrance on Kenilwood Place as an emergency access only. She pointed out that this Alternative Concept A has not been thoroughly reviewed by all technical departments since they only received it late yesterday. However, some City staff have had the opportunity to quickly look over this alternative and do not have any heavy concerns with the proposed changes, with the exception of the emergency access only. In the intervening weeks since the Planning & Zoning Commission meeting, discussions between Planning, Engineering and Fire Departments have resulted in a strong preference to keep the southern drive entrance along Kenilwood Place open and to keep it open to all traffic. The reasons for the preference are numerous, but most notably the preference to keep it open was desired to (1) decrease response time and better serve emergency situations; and (2) help mitigate the flow and disbursement of traffic through better access and connectivity.

In summary, City staff has reviewed the project, and it's Alternative Concept A, and has determined that it does meet technical standards and the seven conditional standards outlined in the UDO.

Mr. Chuck Tessier, consultant representing Power Development, LLC, said they have been working on a plan to fully integrate the new development in an existing lovely property. They are asking that the property be rezoned for two reasons: One reason is to allow the creation of a Village in the front for a public gathering space - for not only our property, but also the residents of Kenilworth. (City Exhibit 3 – Master Plan). Their studies have shown that people are looking for walkability. There will be a restaurant, club area, and private dining room area with some outside seating. The retail component consists of two small shops and there are some office components. The second reason for the rezoning request is to allow for short-term rentals or rentals under one-month. One of the primary motivations of the developer was to provide some housing opportunities for the medical and hospital communities. This could be for families, physicians who are in and out on a short-term basis, or other short-term kinds of needs, both locally with the medical community and seasonal people.

Mr. Tessier said that their meetings with the community were an attempt to listen and respond. They think they have done that. The community was concerned with traffic. We are familiar with the traffic problem at the corner of Caledonia and Biltmore and know others have tried to get the NCDOT to put a traffic light at that location. The developers are have already contracted with a traffic engineer to prepare a traffic study in this area to justify the light. We will pay for the cost of that, which is in excess of $100,000. They will need the City's and the

community's support and help to encourage NCDOT to do this. Another concern of the residents primarily on Kenilwood Place was that they did not want an entry from the project onto Kenilwood Place. The original entry was there for two reasons: (1) to allow the people from the Kenilwood area to have an entry into the restaurant without going out onto Biltmore Avenue and then coming back; and (2) for emergency access. However, the community did not want that exit. Therefore, they have spent a lot of time developing 3 different options, which were presented to the community at their meeting last night. He felt there was a consensus around the Alternative Concept A (City Exhibit 4). He urged City Council approve the Alternative Concept A. Tree protection was another big concern for the neighborhood. Part of their program is to not only protect, but enhance the landscaping of the community. To put the Village in on the only piece of property that we had requires the cutting of some trees and we have done everything possible to minimize that. We have relocated the Village back off of the existing hemlocks to preserve them and made changes to protect as much of the tree cover as possible. We have a complete tree survey of all the trees on the property and will, prior to any construction, mark those trees which are to stay and have that clearly delineated so there would be no misconception of that in the future. The neighborhood had concerns about the parking lot on the south side and concerns about retaining walls. The original design has a series of terraces, but we have changed our plan and reduced the number of parking spaces and made modifications to that in an effort to respond to the community's concern. Regarding the sidewalk all the way up Kenilwood Place, the community said they would rather have trees than sidewalks. The neighborhood was concerned about short-term rentals. Some fears were competition with existing business, deterioration of property values in the area, and how the short-term rentals would be managed. It is real important to understand the economic viability of this project and where the target market is. He explained they had two options for the property when they began – fix up or completely renovate the property. The developers have made the decision to completely rehab the project. The cost of this project, with the acquisition of the existing property and the development of just the existing residential units, without the Village itself, is over $18 Million. Their first priority in terms of target markets was the protection of existing residents. There were about 20 vacant units. Before it was offered at all on the open market it was offered to the existing residents at a price of over $40 a square foot under our initial offering price to the public. We also agreed to pay moving costs, provide financing, and provide free rent while they were dislocated from their units. It was a very advantageous package offered to provide affordable units to the existing residents. In fact, over 15 have bought into the program. The second priority has been to the medical community. All our marketing is designed for walk to work and to provide long and short-term housing needs to the medical community. The third market will be to permanent residents or seasonal investment markets. Those are some of the reasons why we feel the short-term rental program is important. The costs that are going into these and the nature of the rehab will increase the values of these units and the property around it significantly. As to proper management, there were some concerns about how the short-term rentals would be used. We will put in our covenants that any short-term rentals under a month will be done only through a management agency. There are very stiff restrictions in terms of how the units must be maintained.

Mr. Matt Sprouse, landscape architect for Power Development, LLC, said the spirit of the development is one of a walkable, pedestrian oriented design. They have strived to create a plan that meets the needs of our clients, but also has the least amount of impact on the site and its surrounding properties. They have reduced the impervious surface of the new construction of the Village, trying to fit within the natural contours of the land using the existing infrastructure. They are saving greenspace, preserving trees, and they want to keep within the architectural character of the neighborhood. They have acquired a full tree survey of the property of any tree over 10-inches in diameter. Mr. Sprouse then reviewed the original Master Plan (Attachment to City Exhibit 3). There are 4 buildings. The total parking on the original scheme is 66 spaces, 39 of which are underground. The main entrance would be from Caledonia Road. He showed the Village Interior View (Attached to City Exhibit 3), noting the intent is more of a pedestrian oriented plaza. An elevator accesses the parking deck underground. On the Biltmore Avenue side

there is a series of terrace gardens what will cascade themselves down into the green lawn. He also reiterated the concerns of the neighborhood as stated by Mr. Tessier. He showed the tree survey of trees 10-inches and larger (Applicant Exhibit 1), noting the line of hemlocks. When we overlaid the original concept of the Village onto the tree survey, you can see where the line of hemlocks are and that was their first indication to start the Alternate Concept A (City Exhibit 4) (Applicant Exhibit 2 – Original Survey). They have rotated the entire Village around to get Building No. 1 off the line of hemlocks entirely. That shift removed parking spaces and reduced them from 66 spaces to 53 spaces (with approximately 39 spaces being underground).

The following individuals spoke not so much in opposition of the conditional use permit, but wanted the following concerns/thoughts considered and addressed: zoning signs did not specify the complexity of the project; no Kenilwood Road entrance; need for traffic signal at Caledonia Road and Biltmore Avenue, with or without this development; request for postponement to enable the neighbors and developers time to work more on the concerns; tree preservation; severely limit short-term rentals and stipulate the management, number of units and strong covenants; need to keep Kenilworth residential; process is moving too fast; be sure the 11% occupancy tax is collected from the short-term rentals; and request for pedestrian walkway at corner of Biltmore Avenue and Caledonia Road:

Ms. Mary Evers, resident on Finalee Avenue,
Mr. David Herbert, Kenilworth community resident
Ms. Jan Howard, Kenilworth community resident
Ms. Rita Whiteman, owner of Cedar Crest Victorian Inn at corner of Caledonia and Biltmore Avenue
Ms. Miller Graves, resident on Caledonia Road
Mr. Tayo Shapel, resident on Castle Street

The following individuals spoke in support of the conditional use rezoning and permit for various reasons, some being, but are not limited to: the Village will be an asset to the condominium owners and the entire community; renovation of the area will eliminate the trash in the park, junked cars in the lower parking area and disorderly conduct; developers will be investing a lot of money on the project; underground parking costs more and will eliminate a lot of asphalt for above-ground parking; good urban infill project; and revitalization of older buildings:

Ms. Elizabeth Brunsman, resident at Biltmore Gardens,
Mr. Kevin Gentry, Kenilworth community resident
Mr. Joshua Vandergrift, area resident and property owner

In response to Councilwoman Bellamy, Mr. Tessier said that there are two houses immediately behind the pool and four lots adjacent to that which have been purchased by the developer. He has no plans at this time, in terms of what he intends to do with those. It is not part of this rezoning request and basically purchased as a buffer to the project from the community and from other uses.

Upon inquiry of Councilwoman Bellamy, Mr. Tessier said that they have hired Mr. Ken Putnam as their traffic engineer to do a study on the intersection of Caledonia Road and Biltmore Avenue to see if the intersection warrants a traffic signal. At a cursory review, Mr. Putnam felt the traffic counts will be reduced with the condominium project, however, it is their hope that through the combined support forces of the community, City Council and the developer (and the developer's willingness to pay the costs), the NC DOT will install a traffic light.

In response to Councilwoman Bellamy regarding the preservation of trees, Mr. Tessier said that the developer is committed to preserving the trees along Kenilwood Place. He said they have done a complete tree survey of all of the large trees and said that when they do the detailed

design of the project, they will clearly mark those trees that are to remain. Without detailed designs, they can't 100% mark every tree, but before construction, we certainly will have those clearly identified. He assured Council that they will do everything possible to maintain as many trees as they can. He also said we may lose some trees, but we will also gain a great deal in terms of additional landscaping on this property.

When Councilwoman Bellamy asked about the short-term rentals, Mr. Tessier said that the number of units that would be available for short-term rentals will be market driven. In their initial marketing of this property, probably 4 or 5 to one of people are interested in living there as a permanent residence vs. buying it as an investment to rent, either on the regular rental market or for a short-term rental. If the units all sell out to permanent residents, that would be great. We know there is a demand for short-term rentals with services in Asheville and we want the ability for that to happen under strict guidelines. We want this to be a very high grade property and any rentals that happen under a month would be only done through the management company.

Upon inquiry of Councilwoman Bellamy, Mr. Tessier said that there is a bus stop on Biltmore Avenue. He also said there is a school bus stop at the corner of Caledonia and Bowling Park. If they have a significant number of residential, they might offer transportation as part of property's services. The covenants have not yet been written. He explained that until they got through the City Council process and knew that they could even offer rental under a month, or offer a Village, they haven't been able to move forward on the design details. He did say, however, that they would be willing to look at a covered bus stop.

In response to Councilwoman Bellamy, Mr. Sprouse responded to the stormwater mitigation measures.

Councilman Davis asked if our UDO has a definition for short-term rentals. Planning & Development Director Scott Shuford said that the only provision in the UDO is for vacation rentals, and that it would not apply to this parcel because of the zoning being changed from a residential classification. Even if would remain residential, it would not be large enough to have it apply.

In response to Vice-Mayor Mumpower, Ms. Tuch said that the neighborhood was first notified of this project 10 days prior to the TRC meeting, which notices would have been sent out on February 11, 2005.

In response to Vice-Mayor Mumpower regarding a traffic signal at Caledonia and Biltmore, Traffic Engineer Anthony Butzek said that it would be beneficial to the neighborhood in terms of provide access to get out onto Biltmore Avenue safety. It would also provide more of a safe pedestrian crossings at that location. He explained that traffic engineering professionals are bound by a fairly strict set of codes on when traffic signals can be installed. We have, and the NC DOT has, done reviews at this location in the past and based on the number of left turns coming out of Caledonia Road it was no where close to meeting the warrants. He didn't think a traffic signal will be a particularly likely outcome. That is one of the reasons that they recommend keeping the south access point on Kenilwood Road open for all traffic, so traffic can distribute between both intersections on Biltmore Avenue. Another reason is from an emergency response standpoint. If the single point of entrance were closed or blocked, then the emergency vehicles would have no way of reaching the site. Also, for emergency vehicles needing to turn around on the site, having two access points allows them to enter and exit the site without having to find a spot on the site to back up and make that turn. If Council does choose to go with the emergency access route only, he would recommend two conditions: (1) That it would be a paved surface so that pedestrians could utilize it; and (2) that an easement be provided to the City so that if problems did arise in the future the City could reopen that access.

Upon inquiry of Vice-Mayor Mumpower about perhaps restricting no left turns from Caledonia onto Biltmore Avenue, Mr. Butzek said that left turns are fairly typical throughout the corridor to have left turns, although it does create some delay and annoyance to drivers. But in terms of a capacity standpoint, the signal down at Meadow Road will control the capacity, so anything we do for left-turns would be for safety purposes. From a safety standpoint, if a review determined that there was a particularly high crash rate, we may look at some turn prohibitions in the future, but he doesn't recommend that in the current situation.

In response to Vice-Mayor Mumpower, Mr. Butzek said that he does not see any significant traffic increases from this project. The project will generate about 50 new trips (from the commercial aspect) in the pm peak hour (basically the one hour during rush hour), which is half of what it takes to trigger a traffic study. During that time he would expect about 8-10 of those trips to actually be going into the neighborhoods, via Caledonia or Kenilwood Place.

Responding to Councilman Newman, Mr. Butzek said that the basic formula of NC DOT on a traffic signal is that there needs to be enough of a benefit to the side street to justify the additional delay drivers on Biltmore Avenue would see with the light there.

After hearing no rebuttal, Mayor Worley closed the public hearing at 7:15 p.m.

Councilman Dunn moved to approve the conditional use rezoning of 3 lots on Biltmore Avenue from RM-16 Residential Multi-Family High Density District and RS-8 Residential Single-Family High Density District to Institutional District/Conditional Use. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 429

Mr. Shuford said that if Council is considering not allowing the driveway access onto Kenilwood Road to be open for all traffic and that it be limited to the emergency access only, the Fire Department has requested that the buildings near that exit be sprinkled to allow them to be better protected from a fire standpoint. The developer is acceptable to that.

Mr. Butzek clarified one point on the sidewalks vs. the fee in lieu of option. Staff's recommendation on Kenilwood Place is to require a sidewalk between Biltmore Avenue and the project access on Kenilwood Place and the fee in lieu of option above that on Kenilwood Place. The reason is that is a pedestrian route and it also does not have any large trees along that section.

Councilwoman Bellamy asked a condition be added that as many mature trees as possible along Kenilwood Place from the access point on Kenilwood Road up the hill would be saved. Mr. Shuford said we all want to make sure there is some form of fairly quantifiable way to identify the trees that can be preserved under Alternate Concept A. He suggested Council give staff direction to go back and take the reasonably produced tree survey (Applicant Exhibit 1) and have the developer better identify the trees that they would be able to save. Then staff will bring the conditional use permit back to Council at their next meeting for you to have an opportunity to actually see what trees are being talked about, in what areas and with greater specificity. That will give staff a chance to tailor the condition so that there will be no vagueness with regard to what is meant by the condition.

Mr. Tessier said they have a specific site plan that shows where the buildings are going to go, in terms of the distance from Kenilwood Place, and they we have a tree survey. They have talked to two members of the Tree Commission and they are perfectly willing to work with them in terms of a determination of exactly which trees can be saved to accommodate the development.

We do ask that this, however, be done at the time of detailed design and that is a pretty detailed process and will take longer than a couple of weeks.

Mayor Worley asked what would happen if there was a disagreement with the Tree Commission. Mr. Tessier said that if the Tree Commission says a tree can be saved, within the confines of the design that we have done, then they will accept their decision. Again, he would much rather do that with a detailed design, as opposed to making guesses just to expedite a process. When we submit our building permit, we will mark the trees and protect them during the construction process.

Mr. Tessier said that if a question arose whether a tree can or cannot be saved, he would have no problem with the City adding into a condition that the Tree Commission is the arbitrator.

Using the Alternate Concept A (City Exhibit 4), which is the developer's preferred alternative, Ms. Tuch said the trees identified on that plan are trees that were identified on that tree survey. After consultation with the site designers, she said these are the trees that they are confident and committed to preserving. She also noted that the tree survey and the Alternate Concept A only reflects the trees 10-inches and greater. There are more trees on that site that will more than likely be preserved.

City Attorney Oast suggested a condition be that existing trees greater than 2-inches in diameter uphill from the project east access on Kenilwood Place (shown on Alternate Concept A – City Exhibit 4) be preserved and that no sidewalk be required in that area. In addition, the project must be developed within the dimensions as shown on Alternate Concept A and that any removal of the existing trees must be approved by the Tree Commission prior to the issuance of any permits.

Ms. Shannon noted one concern that more than likely, as a result of the creation the Kenilwood Road access, there will be some trees removed. However we won't know the extent of that removal until the site designers do the grading for it.

Councilman Newman asked what would happen if when they are grading the site and some of the existing trees on Alternate Concept A have to be cut. City Attorney Oast said that if that happens, the developer will need to come back to City Council for a modification of the conditional use permit and he can write that in this conditional use permit, if Council chooses.

Ms. Tuch suggested the option that once the designer prepares the detailed drawings that we get detailed plans showing the existing trees to be preserved. Council might word a condition that the plan needs to be reviewed and approved by City Council prior to final zoning approval.

Mr. Shuford said that we have some complicated wording on this condition and staff doesn't want to make a mistake and have an element of vagueness that precludes enforcement of Council's intent. While Council may approve the conditional use permit tonight, he asked that the wording on the conditions come back for a final vote.

Vice-Mayor Mumpower asked for staff to have specific language regarding tree preservation in conditional use permits.

Councilwoman Bellamy also felt that when the neighborhood and developers agree on items, Council should have those agreements as a condition in the conditional use permit as well.

Councilwoman Bellamy asked for a condition that the developer be required to cover the bus stop adjacent to the development.

Councilwoman Bellamy felt a condition regarding short-term rentals would be appropriate. Based on Mr. Tessler's statement, she suggested a condition that the short-term rentals be limited to 25%.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford explained the rental vs. homeownership issue surrounding this project vs. the Appeldoorn Condominium Project. Councilwoman Bellamy used that example to show that it is not unprecedented for Council to put a percentage requirement on how much can be short-term rental or homeownership.

Councilwoman Jones suggested a condition to limit the short-term rentals from 7-30 days opposed to daily rental. After a brief discussion about no enforcement mechanism in the UDO, City Attorney Oast felt that Council can define short-term rentals in this conditional use permit.

Councilman Newman stressed that this development is currently all rental and now it's being rehabbed to condominiums, which will probably be mostly owner-occupied. The close location to the hospitals might bring in medical staff from other parts in the county to stay in Asheville, which is important to our quality of health care and important to the economy. He doesn't think a big percentage of the property will be used for short-rental, but he hoped if Council does put some cap on it, it will have flexibility. He felt this is a legitimate need in our community.

In response to Mayor Worley, Mr. Tessler said that the developer wants the flexibility in the management and occupancy of this property. When you spend $18 Million, that is a lot of money at risk in the market, and they want to be able to allow the market forces to have flexibility in that, because that increases the probability of success of the project.

Mayor Worley said that there will be condominium documents which set forth restrictions and covenants. This is a similar type of concept of a vacation rental where you have high-end condos that are rented on a regular basis through a management company with a lot of restrictions on the type of usage, the upkeep, and the services that are provided. He felt it sounds like what Council is really talking about is less a percentage restriction but more a restriction on the type of rental. He felt that would be a reasonable restriction to impose on the developer.

Councilman Dunn felt that when a developer invests that much money, they would want to rent longer than 30-60 days. He didn't think it was appropriate for Council to put percentage restrictions on the developer. Condominium covenants are very strict.

When Vice-Mayor Mumpower asked Mr. Shuford if he had enough guidance to draft a condition, Mr. Shuford said that he is hearing there is a desire to allow the management company approach to serve as the arbitrator and let that determine basically the standard for the short-term rental process.

Regarding the short-term rental percentage, Councilwoman Bellamy just wants to make sure that we protect the quality of life for the residents surrounding this development. If that can be addressed in a covenant and we can be assured of that, she will be satisfied. She would, however, prefer a percentage. She just wants to make sure that the development is not all rental and if that occurs, what kind of accountability in the covenant documents does the condominium owner have.

Mayor Worley suggested a condition that the condominium declarations require a management company for short-term rentals.

Upon inquiry of Councilwoman Jones, Mr. Tessler said the prices of the units will range from $139,000 for an efficiency up to a 3-bedroom unit for $399,000.

Councilman Dunn moved to adopt Ordinance No. 3222 to issue a conditional use permit by adopting the proposed master plan for the Biltmore Gardens project, subject to the following conditions recommended by City staff and the Planning and Zoning Commission: (1) The applicant to address all outstanding TRC conditions before final zoning approval; (2) That all outdoor lighting be equipped with 90 degree cutoff features and directed away from residences; (3) Where significant hardship does not exist, sidewalk shall be provided for all road frontages with no fee in lieu option provided; (4) The applicant to work with address coordinating to provide new street addressing to most effectively meet emergency access needs; (5) The southern entrance along Kenilwood Place remain open with location and design to be adjusted, if possible, to better address neighborhood compatibility; (6) Provide a pedestrian sidewalk from the village area to Kenilwood Place; (7) Traffic light study and construction of light to be funded by the developer (if approved by NCDOT); (8) Trees identified on the Master Plan as "existing" must be preserved with other mature trees preserved where possible. More detailed tree preservation plans shall be required before final approval, including tree protection plans during construction; these plans shall be shared with the neighborhood prior to construction and protected trees shall be field verified and clearly identified for construction crews and City inspectors; (9) Height and character of buildings to reflect the conceptual drawings submitted by the applicant; (10) Sign package addressing neighborhood compatibility shall be provided by the applicant; (11) The developer be required to cover the bus stop adjacent to the development; (12) That the southern drive entrance along Kenilwood Place be open for full access to all traffic; (13) That Village Alternate Concept A be used in the Master Plan; (14) The condominium declarations require a management company for short-term rentals; (15) That existing trees greater than 2-inches in diameter uphill from the project east access on Kenilwood Place (shown on Alternate Concept A – City Exhibit 4) be preserved and that no sidewalk be required in that area. In addition, the project must be developed within the dimensions as shown on Alternate Concept A and that any removal of the existing trees must be approved by the Tree Commission prior to the issuance of any permits; and (16) The developer is required to install a sidewalk between Biltmore Avenue and the process access on Kenilwood Place; and the fee in lieu of option above that on Kenilwood Place. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

City Attorney Oast said that he would prepare the Order and bring it back for wording approval at Council's next formal meeting on April 12, 2005.

ORDINANCE BOOK NO. 22 – PAGE 31

At 8:20 p.m., Mayor Worley announced a short recess.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW FOR ON-STREET PARKING TO BE USED TO MEET THE PARKING REQUIREMENTS FOR A DEVELOPMENT

ORDINANCE NO. 3223 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW FOR ON-STREET PARKING TO BE USED TO MEET THE PARKING REQUIREMENTS FOR A DEVELOPMENT

Mayor Worley opened the public hearing at 8:45 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an amendment to the Unified Development Ordinance ("UDO") to allow for on-street parking to be used to meet the parking requirements for a development. This public hearing was advertised on March 11 and 18, 2005.

This ordinance amendment is proposed to provide a development option for meeting UDO parking requirements with the use of on-street parking. The City of Asheville's Unified Development Ordinance does not currently provide for the use of on-street parking to meet the stipulated minimum parking requirements for a development, except in a few use districts where on-street parking is allowed. Staff has been presented with some development options where on-street parking provides an appropriate parking solution with additional beneficial development aspects such as buffering the sidewalk from traffic.

This ordinance amendment sets forth that on-street parking may be counted toward the fulfillment of parking requirements if meeting certain standards. Those standards include: that the on-street parking must be newly constructed; that there shall be a minimum of four (4) contiguous on-street parking spaces constructed; that these spaces must typically be parallel parking spaces; that these spaces be located within five hundred (500) feet of the development and be appropriately zoned if located farther than one hundred and fifty feet (150) from the development; that these spaces must connect with adjoining sidewalks that lead to the entrances of the buildings within the development; that these spaces will be public spaces with any easements or rights-of-way conveyed to the City; and that the City Traffic Engineer approve the overall design of the spaces being provided. Any approved parking space meeting these standards shall count as 0.75 of a required off-street parking space.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment provides for a parking design option not currently provided for in the UDO.
- Allowance for on-street parking might open up additional possibilities for adaptive reuse of existing properties where providing on-site parking is difficult.

Cons-

- On- street parking may be seen as disruptive to the flow of traffic on the streets where it is located.

The Planning and Zoning Commission recommended approval of this code amendment on March 2, 2005, by a unanimous vote of 6-0. Staff recommends approval as well.

Mayor Worley closed the public hearing at 8:47 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3223. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 40

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. HAYWOOD STREET PARKING DECK

Councilman Newman said that when Council discussed proceeding with the development of the new parking facility, there were discussions about the design and scale of the project and whether or not it was possible to include more residential development on other parts of the

project. He understood the vote by Council was to go ahead and approve the budget amendment and allow City staff to proceed, without any particular conditions on them to modify the project, nor did we preclude them from looking at different ideas. Staff heard interest in these ideas and were left to consider those ideas and if they thought any were worthwhile, to continue exploring them. A couple of weeks ago City staff contacted him about a couple of design modifications to make the project look better and have other types of uses Council discussed at their meeting. He was invited to review the ideas and basically the feedback he received from staff was that the only potential modifications to the project that were really in the realm of worth considering was to consider doing a design change to include a residential or mixed-use development on the west side of the deck. The other ideas were not feasible. City staff prepared a list of pros and cons of whether or not doing a design modification that way would be a good idea. That is what led us to the interest in having a little more discussion on this matter.

Vice-Mayor Mumpower and Councilman Dunn felt that the parking deck matter was already discussed (with a certain number of parking spaces being set) and voted on and disagreed with the action coming again before City Council.

After a short discussion, Mayor Worley ruled the matter was properly before the Council,

Councilman Dunn moved to overturn the Mayor's ruling that the matter is properly before the Council (thus removing the item from the agenda). This motion was seconded by Vice-Mayor Mumpower and said motion failed on a 2-5 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "yes," and Mayor Worley, Councilwoman Bellamy, Councilman Davis, Councilwoman Jones and Councilman Newman voting "no."

City Engineer Cathy Ball said that staff, along with the consultants for the project, have evaluated the option of incorporating some residential housing units into the proposed footprint of the Haywood Street Parking Garage and found that the only way to add residential units would be to add units on the O.Henry Street side of the parking garage. The impact of this change would be as follows: (1) Nineteen units could be added at a size of about 600 square feet per unit; (2) The number of parking spaces would be reduced by 109 spaces; (3) A minimum of 19 remaining spaces would need to be earmarked for the added residential component of the plan; (4) A need for parking would increase by a minimum of 19 parking spaces to accommodate the residential units; (5) The total impact on the number of parking spaces would be 128, which is approximately 20% of the total number of proposed spaces in the parking garage; (6) The cost to redesign the parking garage would be an estimated additional $250,000; (7) The City would experience an additional four to six month delay in the construction of the parking garage; (8) The cost of constructing the parking garage would remain about the same because the efficiency of the garage would decrease. The cost per parking space would increase approximately $5,000 to $6,000 per space in present day dollars; (9) The marketing of the private development portion of the project may be adversely impacted due to the reduced number of parking spaces available in the parking garage; (10) The cost of financing the garage would increase because a higher percentage of the parking spaces would have to be funded at a non-tax exempt rates; (11) The annual revenue generated from the parking garage would decrease by approximately $150,000; (12) The overall operation of the parking garage would be adversely effected due to the loss of one access point on the O.Henry side of the garage; and (13) Regarding the efficiency of the deck under the current scenario system-wide, in the year 2019, approximately 20 days during that year the deck would be full. The same model suggests that by reducing the number of parking spaces by 128 spaces, (1) in the year 2019, approximately 77 days during that year the deck would be full, and; and (2) in the year 2014, 19 days during the year the deck would be full. After careful consideration, it is staff's recommendation that we move forward with the construction of the parking garage as it is designed. Staff looks forward to exploring the options of developing a request for proposals for the private development portion of the project that may provide opportunity for the addition of some residential housing. Staff will be working closely with

Council and the community to develop this request for proposals. She also suggested a market study to make sure we use the land as appropriately as possible.

Councilman Newman felt there were two basic reasons to consider a design modification. One is that there is a need for more moderately priced residential development downtown and the other is the potential benefits of how the project will look in downtown. Using a picture of a similar deck in Greenville, S.C., he illustrated how the project can look in downtown Asheville.

Upon inquiry of Councilman Newman about some financial positives of considering doing the private sector development on the west side of the property as well as the east side, Ms. Ball said if you were to bring in the residential component on the west side, you wouldn't have to put on the façade. You would still have to build a concrete firewall, which would be cheaper, however, that is a very short distance, so the cost didn't decrease tremendously as a result of that. The other is whether or not you could sell this land or the possible air rights. That cost could potentially be there, but we didn't have market data to show what we could sell them for. However, based on our appraisals we have done in 2000, it was about $34.00 a square foot for land and it's now about $40.00 a square foot. It was approximately $120,000 for the land.

Councilman Newman said that some of the positives would be that we could sell that property for private sector development and there would be some façade reduction costs. Ms. Ball pointed out that those figures have already been included in the total change in cost ($250,000). She said the parking garage costs would remain about the same, but the cost per space would go up. It will not necessarily decrease the cost of the garage because you have to build more in the turn-around area and have to move the elevator. It wasn't enough to offset the per space cost.

Councilman Newman said that the financial benefits of reducing construction costs, compared to the financial costs of having to do redesigns, is basically a wash. Therefore, considering a design modification to the project would lose approximately 115 parking spaces, but what you get is 20 residential units downtown, which will be smaller and hopefully fairly moderately priced. And, the project might look better if the deck is wrapped with residential development.

Upon inquiry of Councilwoman Jones, Ms. Ball said that they did not look at, nor did they consider, the increase associated with putting the property back on the tax rolls. Mayor Worley calculated that the additional tax base to be approximately $1,300 a year.

Councilman Newman explained how in the short run the decks would generate more money. Ms. Ball responded that in come cases where a council wants a certain type of development, they may even give away the land. It would depend on the kind of deal you come up on the spaces, whether or not you lease them at market rate or you are able to throw them in as an affordable housing project. There are a lot of questions Council would have to consider in giving these spaces out. If they paid full costs, there would be a demand for an additional 19 spaces earlier than later. Councilman Newman felt that in the short run the decks would generate more money (because there would be more demand for the parking spaces in the front end.

Councilman Newman also pointed out that since the cost of every parking space is about $50 a month to maintain, there would be reduced future maintenance costs if there were fewer parking spaces.

Ms. Ball said that the finance positives discussed but not listed in her report were the property tax realized (approximately $1,300); the amount of the sale of the property at $40 a square foot (approximately $110-120,000); and maintenance costs (approximately $40-50 a

space). She felt that in the short run, the amount of money that would be generated would be negligible.

Councilman Newman moved to consider design modifications on the west side of the deck for private sector development of approximately 20 moderately priced residential units. This motion was seconded by Councilwoman Jones.

Councilman Newman said that regardless of his first motion, he would put forward a motion to give direction to City staff that when we develop the Request for Proposals (RFP) for the private sector development on the Civic Center side of the deck, that we encourage them to structure the RFP in a way that can hopefully maximize the number of affordably or moderately priced residential units.

Mr. W. Louis Bissette Jr., representing the Grove Arcade, was concerned with the reduction in the number spaces and the delay in the construction of the deck. He urged Council to move forward with the current design plan and hoped that the affordable housing aspect would be addressed by the private sector development near the Civic Center.

Mr. Bill Griffin, merchant at the Grove Arcade, urged Council to proceed with construction of the original design as soon as possible.

Ms. Ruth Summers, with the Grove Arcade, also spoke in support of the original design of the parking deck.

Mr. Eric Gorny, County resident, spoke in support of additional parking in the City.

Ms. Selina Sullivan spoke in support of affordable housing and less parking.

There was further discussion on the design modification and ach Council member voiced their opinion.

City Manager Westbrook suggested a limited market study be performed by someone other than City, as to what may be the best use. Once we have that market study, then we can create the RFP.

Ms. Ball also recommended a market study and then the development of an RFP based on the market study. The market study will give Council better direction on what would be the best options and it will also tell Council what trade-off's the City will have to make if they you want affordable or mid-range housing to occur. She suggested, so that Council can get the best and most information they can, is that Council look at both options – what is the highest and best use, and what kind of subsidy would have to be done for putting in affordable housing units in that area.

Upon inquiry of Councilwoman Bellamy, Ms. Ball said that, based on other units in the area, the market rate for a developer to come in and build the 19 units would be approximately $180,000 a unit, unless there was some subsidy.

Councilwoman Jones said that she would support the motion for a design modification subject to keeping the existing parking commitments and cutting from the vague private sector portion. She did, however, recognized that there would be a time delay.

The motion made by Councilman Newman for a design modification and seconded by Councilwoman Jones failed on a 2-5 vote, with Councilwoman Jones and Councilman Newman

voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Davis and Councilman Dunn voting "no."

Councilman Newman moved that someone other than City staff prepare a market analysis for the private sector development on the Civic Center side of the desk, and that we look at the feasibility of including affordable and moderately priced housing as part of the overall project. This motion was seconded by Councilwoman Bellamy.

When Councilwoman Jones asked that the market study include the downtown merchants to see what they really want, Mr. Shuford suggested a little broader market study in general, and then have a specific component for this area so we are able to have a nice economy of scale and get a useful tool for other areas in downtown as well.

City Manager Westbrook said that staff will bring back an appropriation request of approximately $25,000 to fund the market study prior to the study being actually performed.

Vice-Mayor Mumpower would not support the City spending $25,000 when we have been given many ideas about how the property needs to be developed.

The motion made by Councilman Newman and seconded by Councilwoman Bellamy carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

B. RESOLUTION NO. 05-78 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE SCHOOL BOARD

Vice-Mayor Mumpower said that the terms of John Legerton, Lewis Isaac and Allison Jordan, as members on the Asheville School Board, expire April 1, 2005.

At the City Council worksession on February 15, 2005, City Council instructed the City Clerk to arrange interviews for Elizabeth Hubbell, Leslee Kulba, Keith Thomson, Alfred Whitesides Jr., Jim Taylor and Gene Bell. On March 9, 2005, Ms. Kulba withdrew her name from consideration.

It was the majority of Council's decisions to not bring in Ms. Jordan for an interview, however, she would remain an active candidate for a vacancy.

After each Council member spoke in support of all the candidates, Allison Jordan received 7 votes, Elizabeth Hubbell received no votes, Gene Bell received 7 votes, Keith Thomson received no votes, Alfred Whitesides Jr. received six votes and Jim Taylor received 1 vote. Therefore (1) Allison Jordan was reappointed to serve a four-year term, term to expire April 1, 2009, or until her successor has been appointed; and (2) Alfred Whitesides Jr. and Gene Bell were each appointed as members to the Asheville School Board to serve a four-year term respectively, terms to begin on April 1, 2005, and expire on April 1, 2009, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 82

B. RESOLUTION NO. 05-79 - RESOLUTION APPOINTING A MEMBER TO THE BOARD OF ADJUSTMENT

Vice-Mayor Mumpower said that Jerry Bailey has resigned as a Regular member of the Board of Adjustment, thus leaving an expired term until January 21, 2006.

At the City Council's worksession on March 15, 2005, City Council instructed the City Clerk to arrange interviews for Starr Silvis, W.E. Lack, Scott Shealy and Robert Middlemas. Ms. Silvis was unable to come in for the interview.

After each Council member spoke in support of all the candidates, it was the consensus of City Council to appoint Robert Middlemas (current Alternate member) as a Regular member to the Board of Adjustment to serve the unexpired term of Mr. Bailey, term to expire January 21, 2006, or until his successor has been appointed.

Because Mr. Middlemas was an Alternate member, it was the consensus of City Council to appoint Mr. Scott Shealy to fill the unexpired Alternate term of Mr. Middlemas, term to expire January 21, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 83

VI. OTHER BUSINESS:

For Our Kids

Vice-Mayor Mumpower thanked those who participated in developing The Leadership Circle, which is a project associated with the overall For Our Kids Program, which he and Councilwoman Bellamy share responsibilities in.

Claims

The following claims were received by the City of Asheville during the period of February 25-March 10, 2005: PSNC Energy (Water), Eric Stewart (Water), Kevin Kelley (Water) and James T. Wintle Jr. (Fire.) These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hamilton stressed that it is virtually impossible for any organization to operate successfully without a Comprehensive Quality Plan. The International Standards Organization (ISO 9001) provides ample guidance for the development of such a Plan. On behalf of Asheville Citizens for Quality Government, he urged City Council to improve the quality of City government by instituting such a plan.

Mr. Eric Gorny, County resident, urged City Council to take the initiative to contact the Buncombe County Commissioners and schedule a Joint City-County Meeting to work on the Water Agreement.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:28 p.m.

Magdalen Bowlesson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 12, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Clyde A. Erwin High School Army Junior ROTC led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the Invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING APRIL, 2005, AS "CHILD ABUSE PREVENTION MONTH"

Councilwoman Bellamy read the proclamation proclaiming April 2005 as "Child Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Mr. Bill McGuire, Director of Child Abuse Prevention Services Inc., who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING APRIL 12, 2005, AS "MISSION HOSPITALS DAY"

Mayor Worley read the proclamation proclaiming April 12, 2005, as "Mission Hospitals Day" in the City of Asheville. He presented the proclamation to Mr. Joseph F. Damore, President and CEO; Mr. Ernest Ferguson, Chairman of the Board of Directors of Mission and Senior Vice-President of Wachovia Bank; Dr. George Bilbrey, Chief of the Mission Medical Staff; and Mr. Robert F. Burgin, recently retired President and CEO of Mission Hospitals, who briefed City Council on some activities taking place during the day.

C. PROCLAMATION PROCLAIMING APRIL 10-16, 2005, AS "NATIONAL PUBLIC SAFETY TELECOMMUNICATIONS WEEK"

Councilman Dunn read the proclamation proclaiming April 10-16, 2005, as "National Public Safety Telecommunications Week" in the City of Asheville. He presented the proclamation to telecommunicators with the Asheville Police Department, who thanked City Council for their support.

D. PROCLAMATION PROCLAIMING APRIL 17-23, 2005, AS "NATIONAL VOLUNTEERS WEEK"

Councilman Newman read the proclamation proclaiming April 17-23, 2005, as "National Volunteers Week" in the City of Asheville. He presented the proclamation to Ms. Cathy Stout, Member of Directors of Volunteers in Agencies, who briefed City Council on some activities taking place during the week.

E. RECOGNITION OF RIVERLINK VOLUNTEERS

Councilman Davis commended the RiverLink volunteers who worked diligently to clean-up the Swannanoa River in mid-March, 2005. He presented the recognition certificate to Ms. Karen Cragnolin, Executive Director of RiverLink.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE WORKSESSION HELD ON MARCH 15, 2005, AND THE FORMAL MEETING HELD ON MARCH 22, 2005

B. RESOLUTION NO. 05-80 - RESOLUTION AUTHORIZING THE CITY TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE TRAFFIC SIGNAL SYSTEM

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N.C. Dept. of Transportation (NC DOT) in order for the NC DOT to use City of Asheville earmarked money to proceed with design and construction of new computerized traffic signal systems for College Street and Patton Avenue downtown, and Hendersonville Road from Meadow Road to Long Shoals Road.

The City was awarded an earmark of approximately $2 million for implementation of the City's portion of the citywide computerized traffic signal system. This earmark was intended to be used to match NC DOT's portion, of about $9 million. Instead of waiting for the additional $9 million to be allocated by the State for construction of the citywide traffic signal system, it is proposed to use the available funding to address the most critical needs. In effect, the City would be allowing some of its funding earmarked for City-maintained signals to be used toward State-maintained traffic signals, with the agreement that the State would use its funding to upgrade the remaining City-maintained signals once its funding is allocated. The State's portion of the funding is an unfunded Transportation Improvement Plan (TIP) project and has consistently been one of the City's top TIP priorities. Due to its unfunded status, no definite timetable exists for its implementation.

The project would involve the installation of new traffic signal controllers and cabinets, new communications equipment, new central computers for the City and State, replacement of some traffic signal heads, and some pedestrian signals. It does not include mast arms in any locations; existing poles and mast arms will continue to be used on College Street and Patton Avenue downtown, and span wire will be used on Hendersonville Road, as well as several signals on the periphery of downtown.

The project was initiated with the collaboration of NC DOT signal systems staff and City staff.

Pros

- Installation of much-needed traffic signal system along Hendersonville Road to manage congestion
- Replacement and upgrading of some aging traffic signal equipment downtown
- Use of a federal earmark to leverage future State funding
- No direct cost to City taxpayers (all funding is State-allocated)

Cons

- Lending of City-procured funding to State (not necessarily a negative)

This project meets the following City Council Strategic Operating Plan: (1) Planning Goal #2, Objective A, Task 2: Leverage outside funding to achieve multiple transportation goals where possible; and (2) Planning Goal #2, Objective B, Task 1: Determine opportunities for managing traffic demand through changes to commuting patterns and transportation modes, land use patterns, signalization improvements, etc.

City staff recommends City Council authorize the Mayor to enter into an agreement with the NC DOT in order to allow the NC DOT to begin design of the traffic signal systems.

City Engineer Cathy Ball responded to questions from City Council regarding the traffic signal system.

RESOLUTION BOOK NO. 29 – PAGE 84

C. RESOLUTION NO. 05-81 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT REGARDING A PROPOSED LICENSE AGREEMENT WITH THE HOUSING AUTHORITY FOR AN ANTENNA AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution directing the City Clerk to publish a notice of intent regarding a proposed License Agreement with the Housing Authority of the City of Asheville for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road (White Fawn) is the site of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

The Housing Authority has proposed to install an antenna and related equipment at White Fawn. There are two towers at 36 Reservoir Road and the Housing Authority antenna would be located on the tower known as the "BellSouth Tower" which is immediately west of the proposed Sister Cities Park. The proposed License Agreement will enable the Housing Authority to relocate its antenna from Spivey Mountain to White Fawn and thereby improve its in-house wireless communications.

The Housing Authority will pay an initial annual License Fee of $2,400 for the White Fawn site, which represents about 50% of fair market rent. The reduction in the license fee is in consideration of the official nature of the Housing Authority as an agency of the City of Asheville and its charge to carry out the public housing franchise for the City. The agreement includes a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years.

Approval of the resolution will authorize the City Clerk to publish a notice of intent to enter into the License Agreement.

Planning Department staff recommends adoption of the resolution directing the City Clerk to publish a notice of intent regarding a proposed License Agreement with the Housing Authority of the City of Asheville for an antenna at 36 Reservoir Road.

RESOLUTION BOOK NO. 29 – PAGE 85

D. RESOLUTION NO. 05-82 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY LOCATED ON COURTLAND AVENUE (LOT #11) TO SET SAIL DEVELOPMENT INC.

Summary: The consideration of a resolution authorizing the Mayor to convey land on Courtland Avenue (Lot 11) to Set Sail Development Inc. for $25,500.

On August 24, 2004, the City Council directed the City Clerk to advertise an offer to purchase land on Courtland Avenue from Ross B. Parkinson in the amount of $6,000 for upset bids. The advertisement ran in the Asheville Citizen-Times on August 27, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. An upset bid was received and the sale was re-advertised. Subsequently the sale was advertised a total of 15 times in response to upset bids received. No further bids were received after the 15th advertisement. Therefore, the offer to purchase from Set Sail Development, Inc. in the amount of $25,500 was not upset and the sale to Set Sail Development, Inc. should be approved.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to convey land on Courtland Avenue (Lot 11) to Set Sail Development, Inc., in the amount of $25,500.

RESOLUTION BOOK NO. 29 – PAGE 86

E. RESOLUTION NO. 05-83 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY LOCATED ON COURTLAND AVENUE (LOT #12) TO SET SAIL DEVELOPMENT INC.

Summary: The consideration of a resolution authorizing the Mayor to convey land on Courtland Avenue (Lot 12) to Set Sail Development Inc. for $28,500.

On August 24, 2004, the City Council directed the City Clerk to advertise an offer to purchase land on Courtland Avenue from Samuel Koerber in the amount of $6,000 for upset bids. The advertisement ran in the Asheville Citizen-Times on August 27, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. An upset bid was received and the sale was re-advertised. Subsequently the sale was advertised a total of 15 times in response to upset bids received. The only bid received after the 15th advertisement did not meet the statutory minimum requirement for an upset bid. Therefore, the offer to purchase from Set Sail Development, Inc. in the amount of $28,500 was not upset and the sale to Set Sail Development, Inc. should be approved.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to convey land on Courtland Avenue (Lot 12) to Set Sail Development Inc., in the amount of $28,500.

RESOLUTION BOOK NO. 29 – PAGE 87

F. ORDINANCE NO. 3224 - BUDGET AMENDMENT TO REFLECT CURRENT FUNDING LEVELS FOR THE ASHEVILLE TRANSIT SYSTEM

Summary: The consideration of a budget amendment, in the amount of $332,907, reflecting current funding levels for the Asheville Transit System, including the provision of transit services to the Town of Black Mountain.

The Asheville Transit System has been approved to receive funds from the State of North Carolina in the amount of $65,273 to pass through to Mountain Mobility for the provision of services within Black Mountain; an additional $166,745 in federal operational funding due to late maneuvering in congress which once again resulted in an exemption for the ATS from the new requirements of the Urbanized Area of over 200,000 population classification; the projected increase in budgeted passenger fares and Bulk income of $40,624.

This revenue is offset by the pass through of $65,273 from the State of North Carolina to Mountain Mobility for its fixed route Black Mountain Operations, an increase in Para-transit funding of $12,000, and an increase in the operational budget of $195,369.

The benefit to the City of Asheville is the increased mobility for the citizens of Asheville both within and outside the city.

City staff recommends City Council approve the budget amendment to reflect current funding levels for the Asheville Transit System, including the provision of transit services to the Town of Black Mountain.

Transit Services Director Bruce Black responded to questions from Councilman Newman regarding the transit services budget.

ORDINANCE BOOK NO. 22 – PAGE 43

G. RESOLUTION NO. 05-84 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A FUNDING AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE PROVISION OF TRANSIT SERVICES TO THE TOWN OF BLACK MOUNTAIN

Summary: The consideration of a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation (NC DOT) for the provision of transit services to the Town of Black Mountain.

The Asheville Transit System has received funding for the operation of a route to Black Mountain through a contract signed by the Mayor last year. The unexpended funds have allowed some operation into this year. The City will receive these funds again this year enabling it to continue these routes through June 30, 2005, as well as to pass through funding to Mountain Mobility for the operation of their route in Black Mountain through the same date. There are no City funds in any of these operations, and the City is specifically exempted from funding any of these operations in the contract from the NC DOT for these routes.

The benefit to the City of Asheville is the increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville

There are no disadvantages to the City of Asheville.

City staff recommends City Council to authorize a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation for the provision of transit services to the Town of Black Mountain.

Transit Services Director Bruce Black responded to questions from Vice-Mayor Mumpower regarding the Black Mountain bus route.

RESOLUTION BOOK NO. 29 – PAGE 88

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING AT 96 LOUISIANA AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/ CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE ADDITION OF A PROPOSED DUPLEX, RESULTING IN A TOTAL OF FOUR RESIDENTIAL UNITS**

ORDINANCE NO. 3225 - ORDINANCE REZONING PROPERTY AT 96 LOUISIANA AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/ CONDITIONAL USE

ORDINANCE NO. 3226 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 96 LOUISIANA AVENUE FOR THE ADDITION OF A PROPOSED DUPLEX, RESULTING IN A TOTAL OF FOUR RESIDENTIAL UNITS

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:48 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located at 96 Louisiana Avenue from RM-8 Residential Multi-Family Medium Density District and RS-8 Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density

District/Conditional Use, and a request to issue a conditional use permit for the addition of a proposed duplex, resulting in a total of four residential units.

The applicant (Brian and Joy Fuchs) are requesting a conditional use rezoning of a split-zoned lot from RS-8/RM-8 to RM-8 (Conditional Use). The .51 acre lot is located in West Asheville in a predominantly single family neighborhood where the unusually shaped lot straddles the zoning line between single family and multi-family zoning (Attachments to City Exhibit 3 – Location Map and Aerial Map). The rear portion of the lot lies in the RS-8 zoning district while the front portion of the lot, already supporting a single family home and accessory apartment, lie in the RM-8 zoning district. The applicant is proposing the addition of a 2688 s.f. duplex at the rear of the lot which would result in a total of 4 units. Because the 4 units are spread over three structures, a multi-family zoning designation is required without subdivision. All three structures would share a common driveway but parking is provided separately for all three structures (Attachment to City Exhibit 3 – Site Plan).

Duplexes are permitted in an RS-8 zoning district as either a "Use by Right, Subject to Special Requirements" or as a "Conditional Use". However, due to the inability to subdivide under current standards without a subdivision modification, and due to restrictions associated with the existing zoning, the applicant preferred to keep the larger lot intact and pursue a rezoning that would allow multiple structures on a single lot. The front portion of the lot is surrounded by single family uses zoned RM-8, the rear portion of the lot is surrounded by single family uses zoned RS-8. The proposed density would be 7.8 units an acre, under the maximum allowed. The current site plan shows the location of the existing structures, proposed location of the duplex, required parking for all the units, and landscape requirements for parking and buffering.

The Technical Review Committee (TRC) reviewed this project at their January 19, 2005, meeting where it was unanimously agreed that the project be forwarded to the Planning and Zoning Commission with a recommendation of approval with conditions. The majority of the TRC conditions were minor revisions of clarification and standard comments noting the need for separate applications at a later date. Three points of conditional approval were reiterated after public comment and those points include: (1) Verify project will meet sight visibility requirements; (2) Verify minimum width of driveway required for safe maneuvering; and (3) Applicant to provide more detailed alternative compliance for required buffer.

Both the traffic engineer and fire marshal reviewed the driveway width and sight visibility issues and determined that, given the existing site constraints, a variance to the driveway width would have to be granted (from 16' minimum, to 12'). It was recommended that once past the obstacle of the large mature tree at the corner of the property that the driveway be widened to 16', however, this would result in a further encroachment into the required buffer that was already reduced through alternative compliance. Understanding the conflict, both the traffic engineer and fire marshal have approved the 12' wide driveway for the entire length of the entrance.

At their February 2, 2005, meeting the Planning & Zoning Commission reviewed this application and, after public comment and deliberation, recommended denial by a 5-2 vote. Concerns cited by the Commission included compatibility with the adjacent homes, negative impacts on adjacent property values, failure to meet minimum technical standards, and potential problems with storm water run-off.

The applicant did appeal this recommendation and has submitted revised conceptual building elevations better addressing concerns over architectural compatibility and scale. The revised concept plans reflect a more contemporary suburban style not unusual to west Asheville and is generally felt to be much more architecturally compatible than the original plan showing a stripped down modular style. In addition, a new building model has been chosen by the applicant that is not as tall and smaller in overall square footage and building footprint. The original plan

showed a two story, 30' tall building totaling 2688 s.f. with a 48'x28' footprint. The new plan shows a two story building that is between 25'-28' tall (slab vs. crawl space) that is a little over 2100 s.f. with a footprint of 44'x24' (Attachments to City Exhibit 3 – Elevations and Revised Building Elevation Drawings – Front and Rear Areas). This change results in an approximate 10% reduction in height, a 20% reduction in total square footage and a 4' reduction on both footprint dimensions. The new building model will aid in mitigating the scale and bulk of the proposed building while still enabling the applicant to accomplish his development goals (Attachment to City Exhibit 3 – New Proposed Site Plan Model).

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed duplex will be located in an open and clear area at the rear of the property. A minimal amount of fine grading will be necessary to smooth out grade transitions and no vegetation will be removed as a result of the site work. In addition, a separate grading, drainage, and erosion control plan will be required before site work can begin.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   There is significant evidence that supports the position that the addition of well maintained multi-family, rental properties, or affordable housing does not substantially injure the value of adjoining or abutting property. The applicant has made significant improvements to the single family home and property and intends to continue with renovations. In addition, the conditional use permit can provide a mechanism by which assurances can be made that the property will continue to be well maintained through current or future property owners.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   Evaluating the proposed development for harmony and compatibility with the surrounding neighborhood is challenging. The lot is larger than the average lot with the rear half of the property looking and feeling like its own lot, separate from the front half of the property. Evaluating the duplex alone, on what feels like a separate lot, the duplex is not significantly out of density or coverage with most of the properties in the neighborhood. In addition, at 2112 square feet, the proposed duplex is of a single-family residential

scale. However, the duplex would be taller and larger than most of the existing residences in the surrounding block. This is mitigated somewhat by landscape buffers and placement, tucked back behind the homes on Louisiana Avenue that sit higher than the proposed duplex. The duplex will, however, sit above the adjacent homes on the lower Dunwell Avenue where it is more difficult to assess the impact of scale and bulk or any possible mitigation from landscape buffers. As with standard #3, the conditional use permit may be utilized to mitigate compatibility concerns.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The Asheville City Development Plan 2025 (ACDP 2025) describes the Smart Growth policies adopted by City Council in 2000 and how these policies encourage and support a more efficient use of land and other resources to accommodate the needs of the region's population. The plan goes on to describe that areas within the existing urban fabric that are vacant or underdevloped should be targeted for compatible infill development that takes advantage of the existing infrastructure. One way to accomplish this goal is to apply existing zoning tools to encourage higher density residential infill development. A Conditonal Use Rezoning is one such tool that would allow this property to be developed at a higher density than the current zoning would allow. However, the same sections of the comprehensive plan that discuss the need for residential infill development also state that the "protection, preservation, and enhancement of existing neighborhoods must be as much a part of our development pattern as promoting new construction." There is some concern that the proposed project could result in a higher impact that would be less compatibile with the properties that are in close proximity to the subject property.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   The subject property is well positioned in respect to transportation facilities with easy access to major thoroughfares and multiple bus lines operating on both Patton and Haywood. The project has also been reviewed by the TRC, which did not indicate any problems with providing service to the property.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The Master Plan proposes using the same drive entrance but will relocate the existing parking area away from the adjacent property line, providing some buffer between the drive and adjacent home. In addition, the site will be graded to provide better turn-a-round maneuvering eliminating the need for backing movements into traffic on Louisiana Avenue. Lastly, the City's Engineering Department has reviewed the access and drive and has determined that, given the site constraints and comparatively low volume of traffic, a variance to the minimum driveway width is warranted

Pros

- Provides for infill development
- Provides a variety of housing types
- Improves existing off-street parking conditions
- Eliminates the existing split-zoning

Cons

- Results in a higher impact to adjacent properties
- Project is generally residential in scale and character, but less compatible with surrounding homes
- Project has some challenges meeting minimum requirements (landscape buffers & driveway width)

Staff feels that the proposed development has many positive aspects and does meet the minimum standards required of a conditional use rezoning, particularly in light of the recent changes submitted by the applicant.

Concerns over neighborhood compatibility may be best addressed by those most affected by the proposed use. Staff recommends that the City Council utilize public input concerning this and other issues and carefully consider whether the conditional use permit should be conditioned to mitigate these concerns.

Mr. Brian Fuchs, property owner, said that they currently reside on the property and would like to have the opportunity to build some needed housing on the big weeded field on their back lot. He said that he met with every neighbor that abuts the back lot and explained to them what he would like to do. Unfortunately, the neighbors did not support the structure being built. He said they have done everything they can to meet the neighbors' concerns and the Planning & Zoning Commission's concerns. He had a revised site plan drawn which shows a reduction in height and a smaller footprint. He said that they would like to work on the renovation of the outside of their home at the same time the duplex in the back is being built. He showed several photographs of surrounding properties that show his proposed duplex is not out of scale of what is normal in the area nor is it uncommon to have multi-residences on one property (Applicant Exhibits 1 and 2). He explained how the property values have risen in the area. He explained that his duplex will be built in his back lot which backs up to the backyards of the adjoining property owners. Regarding stormwater run-off, they will build a water basin dispersal pit, which has been approved by the City. He presented Council with a petition containing 134 signatures of people that support the addition of his duplex as well as a letter and e-mail from Adam Fritch and Martha Are (Applicant Exhibits 3 and 4). He stressed that they currently reside of the property and will manage it themselves. He urged Council to support his effort to enhance the area and provide housing by allowing him to build this duplex.

Upon inquiry of Councilman Newman, Mr. Fuchs said that the exterior rendering (Attachment to City Exhibit 3) is what they are working from to move forward.

The following individuals spoke in opposition to the conditional use zoning/permit for several reasons, some being, but are not limited to: renovation of the area is occurring and allowing this duplex will slow down the momentum; all multi-family residents in the area are located on the street, not in the backyards; neighborhood should remain single-family; this will set a precedence of allowing others who have large backyards to build multi-family residences; the base of the proposed duplex will be above the top of the structures on Dunwell Avenue; the neighborhood wants the protection of existing zoning laws; the duplex will injure property values in the area; the duplex will bring more traffic and noise to the area; residents who live on Louisiana Avenue have to deal with existing traffic and noise and their backyards should remain private; this lot is shaped similarly to a flag lot which prohibits duplexes; there is no room to widen the driveway and the large oak tree should remain; there is no room for an appropriate buffer at the front of the property and to put up a fence will be out of character with the neighborhood; lights from the duplex will encroach upon adjoining residences; additional cars backing out onto Louisiana Avenue will be a traffic hazard; there will be a blind spot in the driveway because the driveway will have to loop around the existing garage apartment to get to the duplex; additional

traffic on Louisiana Avenue will result in more accidents; applicant has no firm plans in place for the duplex; and the duplex will have an adverse affect on the privacy of the adjoining backyards:

Mr. Nathan Bryant, resident at 97 Louisiana Avenue
Mr. Joel Mayne, resident at 103 Dunwell Avenue (Neighborhood Exhibits 1-4)
Ms. Julie Allen, resident at 94 Louisiana Avenue (Neighborhood Exhibit 5)
Ms. Carol Ali, resident at 95 Louisiana Avenue (Neighborhood Exhibits 6-7)
Ms. Megan Palmer, resident on Dunwell Avenue (Neighborhood Exhibit 8)
Mr. Keith Buff, resident at 101 Dunwell Avenue (Neighborhood Exhibit 9)

The following individuals spoke in support to the conditional use zoning/permit for several reasons, some being, but are not limited to: property should be used for something other than a field; the proposed fence will create uniformity in the backyard; project is seeking uniformed zoning of a split-zoned lot; duplex will promote infill development; duplex will add needed housing; duplex is close to transit and is well within walking distance of grocery stores and entertainment; parking will be on the property; site plan will enhance the parking of others who reside on the property; and the project will control stormwater runoff:

Mr. Adam Fritch, resident in the garage apartment on the property of 96 Louisiana Avenue
Mr. Colin Robertson, consultant (Applicant Exhibit 5)
Mr. Neal Peak
Mr. Walter Plaue
Ms. Joy Fuchs, applicant who resides at 96 Louisiana Avenue

Upon inquiry of Councilman Newman, Ms. Tuch said that if the project is approved, the duplex couldn't be subdivided.

When Councilman Newman asked about the hazards of backing out onto Louisiana Avenue, Ms. Tuch said that if this project is approved, people will have room to turn-around on the property and drive onto Louisiana Avenue.

Councilman Newman asked to what degree can the City hold the developer to the rendering shown in City Exhibit 3 of the outside of the duplex. Ms. Tuch said that staff monitors the proposed architecture to ensure that it is compatible with what ultimately gets built. Personally she consults with the City's Historic Resources Commission Director for architectural references.

Upon inquiry of Councilwoman Bellamy, Ms. Tuch said that a fire truck and ambulance would be able to access the duplex in case of an emergency. She showed a map of the property lines of the adjoining property owners (City Exhibit 4).

Upon inquiry of Councilman Davis, Ms. Tuch explained what some alternative buffering could be used on the front property of the property and stated that it is up to the applicant to determine what they want to use to comply. City staff will, however, work with the applicant and the adjacent property owner.

In response to Vice-Mayor Mumpower, Ms. Tuch explained why staff does not feel this is a flag lot.

After hearing no rebuttal, Mayor Worley closed the public hearing at 7:29 p.m.

Councilman Newman moved to approve the conditional use rezoning for property located at 96 Louisiana Avenue from RM-8 Residential Multi-Family Medium Density District and RS-8

Residential Single-Family High Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use. This motion was seconded by Vice-Mayor Mumpower.

Councilman Newman supported the motion in that he felt this is a good design and language will be crafted to assure the structure that will be built will fit in and enhance the neighborhood. He felt there is a great need for this type of development in our community. He felt comfortable that the property cannot be subdivided and since the applicant lives on the property, there is an incentive to improve his property value as well.

Vice-Mayor Mumpower felt this is a subjective decision, however, with the housing needs we have in Asheville, we need to reach for opportunities.

Councilman Dunn felt this was an issue of basic property rights and the property owner should be able to use his property as he feels fit. He felt the property values in the area wouldn't be affected by this duplex.

Councilman Davis said that he would reluctantly support the conditional use zoning but was concerned about what zoning protects. He felt the applicant would design a good structure because they live on the property as well.

Councilwoman Bellamy would support the conditional use zoning, but stated her concerns regarding the driveway.

The motion made by Councilman Newman and seconded by Vice-Mayor Mumpower carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 45

After a short discussion and upon a suggestion by the City Attorney, Councilman Davis moved to continue the conditional use permit matter to allow staff to work with the applicant to develop a more detailed site plan and elevation drawings and to address some of the issues raised, like the buffer and the driveway access. This motion was seconded by Councilwoman Bellamy.

At the request of Council, Ms. Tuch suggested the following condition: "Before the issuance of a final zoning permit, the applicant shall permit final plans detailing and qualifying the character of the proposed building elevations including details such as the amount and location of window and door fenestration. the number and direction of the multiple roof pitches with moderate to deep overhangs, the location and layout of the proposed foot paths and ornamental plantings, building materials and architectural details including asphalt roof shingle, hardiplank siding, cedar shake shingles, window shutters and exposed end rafters."

Vice-Mayor Mumpower asked that a sentence be included about compatibility with the surrounding properties.

Councilman Davis was comfortable with the condition suggested by Ms. Tuch, with an additional sentence about compatibility, and withdrew his motion. Councilwoman Bellamy withdrew her second to the motion.

Mayor Worley also suggested that the suggested condition by Ms. Tuch include that the structure be substantially similar with the rendering presented in City Exhibit 3.

At the request of Council, Ms. Tuch suggested the following condition: "Before the issuance of a final zoning permit, the applicant shall submit final plans detailing the alternative

compliance in lieu of the required "B" buffer. An alternative that is historically appropriate to the single-family character of the West Asheville neighborhood, in which the property is located. This plan may include such elements as an evergreen hedgerow, 3-5 feet tall, interspersed with other ornamental species including, but not limited to, small ornamental trees and shade-loving perennials in the areas on the side of the house. In addition, other ornamental plantings shall be added to the front of the existing single-family structure to improve the overall appearance of the existing single-family neighborhood. In addition, this plan shall include the removal of the existing chain link fence."

At the request of Councilwoman Bellamy, Ms. Tuch provided further information regarding the driveway from the Engineering Department and the Fire Department.

Councilman Davis moved to adopt Ordinance No. 3226 to issue a conditional use permit for property located at 96 Louisiana Avenue for the addition of a proposed duplex, resulting in a total of four residential units, subject to the following conditions: (1) Addressing all outstanding TRC conditions; (2) Applicant is to submit a revised site plan displaying new building footprint and elimination of additional parking spaces, as necessary (3) Proposed duplex is to match the character and materials reflected in the conceptual building elevations; (4) Before the issuance of a final zoning permit, the applicant shall permit final plans detailing and qualifying the character of the proposed building elevations including details such as the amount and location of window and door fenestration, the number and direction of the multiple roof pitches with moderate to deep overhangs, the location and layout of the proposed foot paths and ornamental plantings, building materials and architectural details including asphalt roof shingle, hardiplank siding, cedar shake shingles, window shutters and exposed end rafters. (with language about the structure being compatible with other structures in the area and that the structure be substantially similar with the rendering presented in City Exhibit 3); (5) Before the issuance of a final zoning permit, the applicant shall submit final plans detailing the alternative compliance in lieu of the required "B" buffer. An alternative that is historically appropriate to the single-family character of the West Asheville neighborhood, in which the property is located. This plan may include such elements as an evergreen hedgerow, 3-5 feet tall, interspersed with other ornamental species including, but not limited to, small ornamental trees and shade-loving perennials in the areas on the side of the house. In addition, other ornamental plantings shall be added to the front of the existing single-family structure to improve the overall appearance of the existing single-family neighborhood. In addition, this plan shall include the removal of the existing chain link fence; and (6) The two-story structure shall not be more than 2200 s.f. and shall not be more than 28 feet tall. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 47

At 7:54 p.m., Mayor Worley announced a short recess.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING PROPERTY LOCATED ON DEPOT AND RALPH STREETS, KNOWN AS THE GLENROCK PROJECT, FROM CI COMMERCIAL INDUSTRIAL DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A MIXED-USE DEVELOPMENT PLANNED ON DEPOT AND RALPH STREETS

ORDINANCE NO. 3227- ORDINANCE REZONING PROPERTY LOCATED ON DEPOT AND RALPH STREETS, KNOWN AS THE GLENROCK PROJECT, FROM CI COMMERCIAL INDUSTRIAL DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3228 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON DEPOT AND RALPH STREETS FOR A MIXED-USE DEVELOPMENT PLANNED ON DEPOT AND RALPH STREETS

Councilwoman Bellamy asked to be excused from participating in this matter due to a conflict of interest. Therefore, Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 8:30 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Julia Cogburn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Cogburn said that this is the consideration of a request to rezone property located on Depot and Ralph Streets, known as the Glenrock Project, from CI Commercial Industrial District to Urban Place District/Conditional Use, and a request to issue a conditional use permit for a mixed-use development planned on Depot and Ralph Streets.

The applicant, Mountain Housing Opportunities, is requesting a conditional use rezoning of 2.11 acres along Depot, Bartlett and Ralph Streets from CI (Commercial Industrial) District to UP-CUZ (Urban Place Conditional Use) District in order to allow for the development of these parcels for a mixed-use development (Attachment to City Exhibit 3 – Location Map). The project site is located within the City Limits between Ralph and Depot Streets at their intersection with Bartlett Street. The project site currently contains 6 lots that will be combined upon project approval and acquisition of all parcels. The property contains five buildings (the Corner Market building at 262 Depot Street; the old Glen Rock Hotel building at 403 Depot; two block buildings at 376 and 382 Depot Street; and a frame building on Ralph Street (City Exhibit 4).

The development proposal calls for the new construction of a 46,800 square foot (footprint) building with a mix of retail/gallery, office/studio, community and residential development throughout. Parking for the development is provided internally to the new building (first three levels) with entrances for the parking on Depot and Ralph Streets. Retail, community

and office space is also provided on the first three levels of this new building with the proposed residential development of 85 units on levels 4-7. At its highest, the building is 74'8" tall. (Attachments to City Exhibit 3 – Concept Site Plan and Photos of Glen Rock Model).

The development also calls for the later phase rehabilitation of the Glen Rock Hotel and the Corner Market buildings. It is proposed that the Corner Market building will be utilized for retail, office, or light industrial development in the future and that the Glen Rock Hotel will contain a large first floor community space with a maximum of 25 residential units created on the upper two levels. Total residential development for the project is a maximum of 110 units for a density of 52.13 units per acre. The development proposal calls for the demolition of the 2 block buildings and the frame building on the site. The project proposal calls for the provision of 174 parking spaces.

Included in the concept plan design are provisions for improving the Town Branch Creek area by incorporating pedestrian amenities and landscaping along the banks of the creek. Pedestrian amenities are also proposed for an existing unopened alleyway that will lead along a sidewalk to the City's Livingston Street Park. The developer has requested alternative compliance for landscaping requirements to provide street trees along both sides of Ralph Street, street trees along Bartlett Street, and trees along both sides of the proposed Else Alley sidewalk in lieu of required buffer. This request has been approved by the Planning Department based on the limitations of existing conditions on the property and the nature of the development and the surrounding area. The applicant has also requested a reduction in required parking as permitted in the Urban Place District where multi-modal transportation amenities are included. The developer is proposing a number of pedestrian amenities, bicycle parking and a covered transit shelter. Although at the present time, transit service is not currently serving the immediate area (due to little development in the area), there is an interest in trying to serve the development with existing Route 18 once the development is completed.

On February 18, 2005, the Technical Review Committee (TRC) reviewed the conceptual plans and voted unanimously to recommend approval of the project subject to the conditions outlined in the staff report and the following additional conditions:

- That the sidewalks along Bartlett (7.5 feet) and Depot (9.5 feet) would be acceptable but the sidewalk along Ralph Street would need to be constructed to 10 feet in width.
- That the developer work with the City Traffic Engineer on provisions for on-street parking.

The developer has already submitted a revised site plan that addresses most of the conditions shown in the TRC report. Remaining conditions to be addressed include: working out the details on the use of Else Alley with Parks and Recreation; designing the sidewalks and street tree plantings in accordance with Engineering and Public Works Department requirements; and, making sure the final design of the building complies with all the design requirements stipulated in the Unified Development Ordinance (UDO) for the Urban Place District.

On Thursday, February 24, 2005, Mountain Housing Opportunities hosted a neighborhood/developer meeting to share information about the proposed development and hear the concerns of those in the neighborhood. This meeting was held in lieu of Planning and Zoning Commission consideration of the project and associated zoning change. The minutes from this meeting, prepared by the facilitator, Paul Godfrey, illustrate general community support for the project. The principal concerns noted by the neighborhood were traffic and parking. Since this meeting the developer is proposing reducing the density of residential development by removing 15 dwelling units and is working to additionally address parking concerns with the City's Traffic Engineer (providing on-street parking). The traffic concerns raised should be mitigated by the development. Those voicing traffic concerns were not concerned so much for the future traffic to be generated by the development, but for the speed of the traffic currently traveling on Depot

Street. It is felt that the development and on-street parking provisions should assist in slowing down traffic along Depot.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the TRC are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The applicant is incorporating the gradual slope of the property in the design of the proposed new mixed-use building. The developer is incorporating the channeled Town Branch Creek into the project and is proposing a clean up of the area surrounding the creek and the creation of a public amenity along the creek.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The Glen Rock development is proposed in a once vibrant area of Asheville that has experienced neglect in recent years. The design of the project is meant to bring vitality back to the area by bringing in a mix of uses at a significant density and by including a number of amenities to enhance the livability of the entire area. Significant street trees and other vegetation are proposed to further enhance the beautification of the property that will be brought about as a result of this project.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   While it is noted that portions of the proposed Glen Rock development (the new mixed-use building) are of a greater scale and density than other existing development in the area in which the project is located, the development that is proposed is no larger than would be allowed under current zoning (CI). Furthermore, the Glen Rock is felt not to compromise the area because of the location of the project, the largely residential nature of the project, and because of what has been developed in the area in the past and what is envisioned for the future. Any potential conflict in the relationship of this development with the existing single-family neighborhood located to the east is reduced by the topographic change between the areas and the proposed sidewalk and street tree improvements which will link the two areas in the overall design. The Glen Rock will serve as a primarily residential buffer between the industrial/rail development to the west and the neighborhood to the east. The Glen Rock hotel building will basically be used in its current configuration on the property as will the Corner Market. The Urban Place District is envisioned for further application in this area and other

locations along the urban riverfront to encourage redevelopment of the same scale and density as is seen in the Glen Rock and the Wilma Dykeman Plan envisions precisely this scale of development.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The Asheville City Development Plan 2025 calls for the promotion of adaptive reuse of vacant and unterutilized structures and encourages the construction of affordable housing throughout the community. The City's smart growth initiative, contained in the comprehensive plan, encourages mixed use developments and compatible, higher density commercial and residential development. This development proposal also complements the River Arts District concepts found in the Wilma Dykeman Riverway Master Plan.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   Development on the site will require final technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's TRC, which found that adequate services and facilities are available for the proposed development. While transit does not currently service the location, the transit services staff is interested in providing service once the development is completed.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The City's Traffic Engineer has reviewed the proposal and has determined that there are no traffic issues created by this project nor is a traffic impact analysis warranted.

Pros

- The Glen Rock development is proposed in an area that has been neglected over recent years. It is believed that this development will bring renewed interest in development to this area and vitality that will help to further enhance the livability of the area.
- The density proposed for the development can be supported by the existing infrastructure and is in close proximity to potential employment centers, shopping venues and educational institutions which makes the increased density attractive and appropriate at this location.
- The project as initially conceived will make a contribution to meeting the needs for affordable rental housing in the City of Asheville.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to affordable housing, infill development, and smart growth.
- Several amenities (e.g., creek enhancement, pedestrian facilities) are incorporated in the design of this project.

Cons

- The proposed new building is of a larger scale than buildings currently found in the immediate area.
- The reduction in parking provisions allowed in the Urban Place District may present some parking issues in the area.

City staff strongly supports this project due to its potential to jumpstart the implementation of the Wilma Dykeman Plan, adaptively reuse an older structure having significant architectural and historic character, and to establish a strong residential presence in this underdeveloped area of our City.

Ms. Cindy Weeks, representing Mountain Housing Opportunities, spoke in support of the project showing various photographs of the property. She also reviewed a comparison of the Commercial Industrial District vs. the Urban Place District. She said that preliminary figures of the Glen Rock new building would contain 85 apartments and 3000 sq. feet of community space. They anticipate 40 1-bedroom units - $300-500/month; 35 2-bedroom units - $350-575/month; and 10 3-bedroom units - $400-675/month. In the later phase when the Glen Rock Hotel is renovated, they anticipate 20-25 comdominiums with preliminary pricing to range from $130-150 per square foot.

Mr. Rick Reinhardt, architect, reviewed with Council the site plan and elevations (Applicant Exhibit 2).

The following individuals were very supportive of the conditional use zoning/permit:

Ms. Susan Kendall, owner of 357 Depot Street
Ms. Gail McCarthy, property owner in the area
Mr. Kevin Green, representing Greene's Mini-Mart at 414 Depot Street
Mr. Steven Kuhl, owner of 375 Depot Street

Upon inquiry of Councilman Dunn, Ms. Weeks said that there will be 174 parking spaces internally and 66 spaces outside. They will build a bus shelter and the City's transit will try to reroute the bus to that area.

In response to Vice-Mayor Mumpower, Ms. Weeks explained that they will be building this project using three sources of tax credits.

Upon inquiry of Vice-Mayor Mumpower about possible flooding, Ms. Weeks said that they monitored the area very closely after the last heavy flooding in September of 2004 and the water did not go over the banks.

After hearing no rebuttal, Mayor Worley closed the public hearing at 9:13 p.m.

Vice-Mayor Mumpower moved to approve the conditional use rezoning for property located on Depot and Ralph Streets, known as the Glenrock Project, from CI Commercial Industrial District to Urban Place District/Conditional Use. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 54

Vice-Mayor Mumpower moved to adopt Ordinance No. 3228 to issue a conditional use permit for property on Depot and Ralph Streets, known as the Glenrock Project, for a mixed-use development planned on Depot and Ralph Streets, subject to conditions of the TRC. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 56

C. PUBLIC HEARING ON THE CONSOLIDATED STRATEGIC HOUSING & COMMUNITY DEVELOPMENT PLAN FOR 2005-2010

Mayor Worley opened the public hearing at 9:18 p.m.

Ms. Charlotte Caplan, Community Development Director, said that is a public hearing on the Consolidated Strategic Housing & Community Development Plan for 2005-2010. This public hearing was advertised on April 1 and 8, 2005.

She said that every five years, the City is required to prepare a Consolidated Strategic Housing and Community Development Plan to set out broad priorities, strategies, and targets for the use of Community Development Block Grant (CDBG) and HOME funds. This Strategic Plan covers not just the City of Asheville, but also the four-county Asheville Regional Housing Consortium (Buncombe, Henderson, Madison, and Transylvania counties) within which HOME funds are used.

Under the direction of the Consortium Board, staff commissioned a detailed Housing Needs Assessment for the entire Consortium, and prepared a more limited assessment of non-housing community development needs for Asheville. Fifteen public meetings were held to gather community input on priorities and strategies. These are set out in the plan, together with realistic, measurable targets for each priority area.

She explained that resale prices are up by 39% in five years; that the median sales price is $170,000; and the minority homeownership rate has decreased from 58% in 1990 to 45% in 2000.

She reviewed the affordable housing priorities as follows: (1) Provide housing for people near minimum wage; (2) Help those with special needs – homeless, elderly, disabled; (3) Make efficient use of land and infrastructure; (4) Preserve existing housing stock through rehabilitation; (5) Coordinate housing with transportation, jobs, and services; (6) Increase affordable housing stock through new construction; (7) Emphasize energy efficient, neighborhood-compatible designs; (8) Help people succeed through housing support services; (9) Build and preserve affordable multifamily rental housing; (10) Use local resources - local contractors and locally-made supplies; (11) Promote homeownership; and (12) Preserve long-term affordability.

She then reviewed the performance targets for housing as follows:

Production Type	5-Year Target
New construction for homeownership	200
New construction for rental	300
Homeowner rehab or repair	200
Rental rehab	75
Downpayment assistance	50
Rent assistance	175
Total	1,000

Ms. Caplan explained that homeless priorities being (1) to maintain existing Continuum of Care; and (2) implementation of the 10-Year Plan to End Homelessness. She reviewed the performance targets for homelessness.

She outlined the non-housing community development priorities being (1) develop living wage employment and job training; (2) provide services that support affordable housing, public transportation, youth and employment; (3) provide infrastructure to facilitate affordable housing, multi-modal transportation, and economic development; (4) help people improve credit and avoid predatory lending; (5) support start-up and growth of small businesses; and (6) support plan to eradicate homelessness. She then reviewed the performance targets for non-housing activities.

The draft Plan was published on March 29, 2005, to allow for a 30-day public comment period. A final public hearing is required during this comment period. Staff will then seek Council's approval of the Plan (with necessary final corrections and amendments) on April 26, 2005.

Mayor Worley closed the public hearing at 9:30 p.m.

Councilwoman Jones said that this plan involved intensive community work with entities and is real model of how things can work well regionally.

Vice-Mayor Mumpower said that this is a reaffirmation of the 10-Year Plan to End Homelessness and he has many personal concerns about that Plan being unrealistic, unaffordable and personally a disturbing distraction from a real problem that needs more tangible and immediate solutions. He has concerns that this Plan reflects a model of governance that can be better described as socialism than the model of government that best represents the best that is in us. He is not comfortable with that model as reflected by some of the content.

Councilwoman Jones said that the U.S. Dept. of Housing and Urban Development requires this Plan and the City prepares this document every five years.

In response to Councilwoman Jones, Ms. Caplan reviewed with Council the City's progress in meeting the targets in the last 5 years.

Mayor Worley said that the resolution on this matter will be considered at Council's next formal meeting.

D. PUBLIC HEARING ON THE HOME AND COMMUNITY DEVELOPMENT BLOCK GRANT ACTION PLAN FOR 2005

Mayor Worley opened the public hearing at 9:39 p.m.

Ms. Charlotte Caplan, Community Development Director, said that this public hearing is on the draft Annual Action Plan, allocating Community Development Block Grant (CDBG) and HOME funds for Fiscal Year 2005-06. This public hearing was advertised on April 1 and 8, 2005.

The City expects to have available $1,725,170 in CDBG funds and $1,723,349 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2005. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 41 projects.

Ms. Caplan reviewed the following summary of the annual action Plan:

CDBG PROGRAM

Projected Revenue:	
Entitlement Grant from U.S. Dept. of HUD	$1,465,512
Projected 2005-06 Program Income	125,000
Prior Year Program Income Balance	125,813
Reallocation of prior year funds	8,845
Total	$1,725,170

Proposed Use of Funds:	
Affordable Housing Coalition – Homebase Housing Counseling	$ 60,000
Affordable Housing Coalition – Homeownership Education	50,000
Asheville Area Habitat for Humanity – Housing Services	75,000
Asheville-Buncombe Community Relations Council – Fair Housing	15,000
Children First – Emma Resource Center	15,000
City of Asheville – Emergency Relocation	2,000
City of Asheville – CDBG Property Management	5,500
Consumer Credit Counseling Service – Financial Counseling	25,000
Hospitality House – Homeless Programs	95,000
Housing Authority of the City of Asheville – Youth Enrichment	35,000
Mountain Housing Opportunities – Single-Family New Construction	60,000
Mountain Housing Opportunities – Emergency Repair	95,000
Mountain Housing Opportunities – Housing Services	85,000
Mountain Microenterprise Fund – Micro-Business Development	90,000
Mountain Microenterprise Loan Fund – Small Business Loan Pool	75,000
Neighborhood Housing Services – Single Family Development	195,000
Neighborhood Housing Services – Bradley Street Infrastructure	220,000
Neighborhood Housing Services – Burton Street Area Planning	15,000
Neighborhood Housing Services – Housing Services	77,500
Pisgah Legal Services – Resource Development	40,000
Regional Water Authority – Water Line Improvement	87,500
Asheville Transit Authority – Route Signage & Bus Shelters	30,000
City of Asheville – Program Administration	247,229
Contingency	30,441
CDBG Total	**$1,725,170**

HOME PROGRAM

Projected Revenue:		
	Entitlement grant	$1,434,604
	ADDI Entitlement	49,954
	Prior Year Funds Reallocated	185,453
	Program Income (Asheville)	53,338
	Total HOME Funds Available	**$1,723,349**

Proposed Use of Funds:	
Asheville	
Asheville Habitat for Humanity – S/F Housing Development, Enka	$ 103,338
Affordable Housing Coalition – Tenant Based Rental Assistance	50,000
National Church Residences – Vanderbilt Apartments Rehabilitation	250,000
Neighborhood Housing Services – S/F Development	57,067
Mountain Housing Opportunities – Glen Rock Apartments	200,000
Mountain Housing Opportunities – Clingman Avenue Townhomes	50,000
Buncombe County	
Neighborhood Housing Services – S/F Development	80,000
Mountain Housing Opportunities – Owner-occupied Rehabilitation	47,800
Mountain Housing Opportunities – S/F Development,	80,000
Mountain Housing Opportunities – Self-Help Homeownership	80,000
Henderson County	
Housing Assistance Corporation – Mainstay Manor Apartments	90,000
Henderson Co. Habitat for Humanity – Shuey Knolls Subdivision	110,000

Housing Assistance Corporation – Rehab for Home Ownership		60,000
Transylvania County		
Western Carolina Community Action – English Hills Apartments		200,000
Operating Costs		
CHDO (non-profit agencies) Operating Expenses		71,730
City of Asheville – Administration		125,472
Member Government Administration & Planning		17,988
American Dream Downpayment Initiative (ADDI)		
Neighborhood Housing Services of Asheville		49,954
	HOME Total	**$1,723,349**

If approved, the HOME and CDBG funding will assist 376 affordable housing units, Consortium-wide. CDBG funds will help more than 3000 low-income City residents obtain financial and housing counseling, homeless services, youth and family support services, and small business assistance. CDBG funds will also carry out street and waterline improvements in West Asheville, and enhance transit services in several in low-income areas.

Notice of the public hearing and a summary of the draft plan were published on March 29, 2005. A 30-day public comment period is required by federal regulations. The final plan must be submitted to Dept. of Housing and Urban Development by May 15, 2004.

The Consolidated Strategic Plan for 2005-10, which sets out the broad framework for allocating CDBG and HOME funds over the next five years, will be the subject of a separate public hearing also scheduled on April 12, 2005.

Mayor Worley closed the public hearing at 9:50 p.m.

At the request of Vice-Mayor Mumpower, Ms. Caplan said that she would provide him with a hard copy of the Annual Action Plan.

Mayor Worley said that the resolution on this matter will be considered at Council's next formal meeting.

E. PUBLIC HEARING TO CONSIDER THE SAWYER MOTOR COMPANY BUILDING AT 100 COXE AVENUE AS A LOCAL HISTORIC LANDMARK

At the request of the applicants, Councilwoman Bellamy moved to continue this public hearing until May 10, 2005. This motion was seconded by Councilman Dunn and carried unanimously.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3222 – ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THREE LOTS ON BILTMORE AVENUE FOR A PROPOSED MIXED-USE DEVELOPMENT WITH EXISTING APARTMENTS TO BE COVERED TO CONDOMINIUMS AND SHORT-TERM RENTAL UNITS WITH A PROPOSED RETAIL OFFICE SPACE AND FOOD SERVICE FACILITY

City Attorney Oast said that at its March 22, 2005, meeting, Council unanimously approved the issuance of a Conditional Use Permit for the Biltmore Gardens project. This was done as part of a conditional use rezoning, and the approval was subject to final review by Council of the language of the conditions in the Conditional Use Permit (CUP).

Staff has drafted a proposed CUP, with findings, conclusions, and conditions. The conditions were drawn from the staff report, the minutes of the March 22 meeting, and Council's discussion at that meeting. However, the revised site plan, which was to incorporate some of the conditions, has not been completed. As the modifications to the site plan, especially those involving landscaping and tree preservation, were of critical importance to Council and the neighborhood, and may affect the form of the CUP, it is our recommendation that that matter be continued until your April 26 meeting. The developer has indicated that the revised site plan will be available in plenty of time for that meeting, and we will get the proposed CUP to you as soon as possible. If you have any questions or need any further information, please contact us before the April 26 meeting so that we can try to address your concerns.

City staff recommends City Council continue this item until Council's April 26, 2005, meeting.

Councilwoman Bellamy moved to continue the conditional use permit wording until April 26, 2005. This motion was seconded by Councilman Davis and carried unanimously.

V. NEW BUSINESS:

A. ANNEXATIONS

Planning & Development Director Scott Shuford said that this is the consideration of resolutions stating the intent of the City to annex the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Two Town Square East and Town Square East.

He said that the State of North Carolina enables cities to grow by annexation of areas that meet certain statutory requirements. This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population.

The City of Asheville has initiated annexations for the past four years. These recent annexations, like the ones being presented are designed to include: areas that are clearly urban, areas surrounded by the City but not within the City of Asheville and can only be accessed through the City; areas that will create a more logical City boundary; and areas with at least some existing water and sewer service.

The City's policy is to include within its corporate boundaries areas that are urban in nature and meet State of North Carolina qualification requirements. Staff has identified six areas: Ridgefield Business Park, Ascot Point Village, Long Shoals Road, Airport Road, Two Town Square, and Town Square East with potential for being annexed. Under State law, the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

The following steps and dates meet the process required by State law:

Council Adoption of Resolutions of Intent	April 12, 2005
Council Adoption of Plans of Services	April 26, 2005
Staff-Sponsored Public Informational Meeting	May 31, 2005
City Council Public Hearings	June 14, 2005
Council Adoption of Annexation Ordinances	June 28, 2005

Effective Date of Annexations:

September 30, 2005 – Ridgefield Business Park area, Two Town Square & Town Square East

December 31, 2005 – Ascot Point Village, Long Shoals Road & Airport Road

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex the Ridgefield Business Park area, Ascot Point Village area, Long Shoals Road area, Airport Road area, Two Town Square and Town Square East.

Mr. Shuford stated that the resolutions of intent state that (1) it is the intent of the City Council of the City of Asheville to consider annexation of the territory described in the resolution pursuant to Part 3 of Article 4A of Chapter 160A of the North Carolina General Statutes; (2) a public informational meeting on the question of annexing the above-described territory will be held in the First Floor North Conference Room in the City Hall Building, 70 Court Plaza, Asheville, N.C., at 5:00 p.m., at which time a representative of the City of Asheville shall make an explanation of plans for extending services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given the opportunity to ask questions and receive answers regarding the proposed annexation; (3) a public hearing on the question of annexing the above-described territory will be held in the Council Chamber located on the 2nd Floor of the City Hall Building, 70 Court Plaza, Asheville, N.C., at 5:00 p.m. on the 14th day of June, 2005, at which time a representative of the City of Asheville will make an explanation of plans for extending Services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given an opportunity to be heard; (4) a report of plans for extending services to the above-described territory shall be made available for public inspection at the office of the City Clerk at least thirty (30) days prior to the date of the public informational meeting; (5) the statement of financial impact contained in the report shall be delivered to the Buncombe County Board of Commissioners at least thirty (30) days prior to the date of the public informational meeting; (6) a legible map of the area to be annexed and a list of identified persons holding freehold interests in property in the area to be annexed shall be posted in the office of the City Clerk, Asheville City Building, 70 Court Plaza, Asheville, North Carolina, at least thirty (30) days prior to the date of the public informational meeting; (7) the effective date of annexation shall be at least one year, but no more than 400 days, from the date of passage of the annexation ordinance; and (8) notice of the public informational meeting and public hearing shall be given as required by law.

Mr. Shuford then reviewed each of the proposed annexation areas.

Upon inquiry of Councilman Davis, City Attorney Oast reviewed with Council the earlier challenge of Ridgefield Business Park.

Vice-Mayor Mumpower said there are a lot of strong arguments supporting annexation, however, he feels the harm outweighs the benefits. For philosophical reasons, he will vote against the annexations.

Councilman Newman said that families and businesses in Asheville pay twice the property taxation than people who live just outside of the City limits, and when areas become urban in nature, they should pay to support the critical infrastructure needs in Asheville.

Councilman Dunn said that he would not support any annexation unless the City puts the revenue back into basic City services.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 05-85 - RESOLUTION OF INTENT TO ANNEX THE RIDGEFIELD BUSINESS PARK AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 31, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., AT 5:00 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 14, 2005, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE N.C., AT 5:00 P.M.

Councilman Newman moved for the adoption of Resolution No. 05-85. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 89

RESOLUTION NO. 05-86 - RESOLUTION OF INTENT TO ANNEX THE ASCOT POINT VILLAGE AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 31, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., AT 5:00 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 14, 2005, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE N.C., AT 5:00 P.M.

Councilman Newman moved for the adoption of Resolution No. 05-86. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 93

RESOLUTION NO. 05-87 - RESOLUTION OF INTENT TO ANNEX THE LONG SHOALS ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 31, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., AT 5:00 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 14, 2005, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE N.C., AT 5:00 P.M.

Councilman Newman moved for the adoption of Resolution No. 05-87. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 97

RESOLUTION NO. 05-88 - RESOLUTION OF INTENT TO ANNEX THE AIRPORT ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 31, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., AT 5:00 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 14, 2005, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE N.C., AT 5:00 P.M.

Councilman Newman moved for the adoption of Resolution No. 05-88. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 101

RESOLUTION NO. 05-89 - RESOLUTION OF INTENT TO ANNEX TWO TOWN SQUARE AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 31, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., AT 5:00 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 14, 2005, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE N.C., AT 5:00 P.M.

Councilman Newman moved for the adoption of Resolution No. 05-89. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 105

RESOLUTION NO. 05-90 - RESOLUTION OF INTENT TO ANNEX TOWN SQUARE EAST AREA, SETTING A PUBLIC INFORMATION MEETING ON MAY 31, 2005, IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF THE CITY HALL BUILDING, ASHEVILLE, N.C., AT 5:00 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON JUNE 14, 2005, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING, ASHEVILLE N.C., AT 5:00 P.M.

Councilman Newman moved for the adoption of Resolution No. 05-90. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 109

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced the Film Commission vacancy.

Vice-Mayor Mumpower thanked those who participated in the For Our Kids program at Erskine public housing clean-up project, which Program he and Councilwoman Bellamy share responsibilities in.

At the request of Councilwoman Bellamy, City Attorney Oast said that he would provide City Council with a report on taxicab rates at the May 17, 2005, City Council worksession.

Councilwoman Jones urged the public to do what they can to prevent child abuse.

The following claims were received by the City of Asheville during the period of March 11-31, 2005: 32 Ocala Street (Streets), Shawn Wilson (Streets), Carolyn Hembree (Streets), Herman Parris (Sanitation), Virginia Ritter (Inspections), Judy St. Clare (Streets), Bryan McKeown (Sanitation), Gregory Meade (Water), Chin Pak (Water), Cornelia Streeter (Police), Corbin Hightower (Parking Services), Helen Van Rensselaer (Streets), Jim McKinnon (Streets), Kirby Connolly (Civic Center) and Roy Chapman (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mike Fryar asked for time on an upcoming worksession to illustrate his feeling about how installing traffic calming devices will increase our fire ratings. City Engineer Cathy Ball stated that traffic calming devices do not impact the fire ratings.

CLOSED SESSION

At 10:25 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including possible litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To consider the qualifications, competence, performance, character, fitness, conditions of appointment or initial employment of an individual prospective public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

At 12:15 a.m., Councilwoman Bellamy moved to go out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 12:15 a.m.

Magdalen Bourneson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 19, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Towing of Illegally Parked Vehicles, Junked Motor Vehicles or Abandoned Vehicles

Summary: The consideration of an ordinance amending Chapter 19 of the Asheville City Code allowing the city manager or his or her designee to tow illegally parked vehicles, junked motor vehicles or abandoned vehicles in the City of Asheville.

There are several vehicles in the parking garages that are abandoned. They need to be removed. This amendment gives the City Manager or designee the ability to remove vehicles which are abandoned or impeding traffic flow in city garages and parking lots, or vehicles illegally parked in a fire lane or commercial loading zone.

The advantage of this to the City is that vehicles which have been abandoned may be removed, freeing up parking spaces for the paying public, and increasing safety in fire lanes, and increasing the ability to load or unload for commercial businesses.

The disadvantages are that the person whose vehicle has been towed may not feel that he or she should have been towed.

City staff requests that City Council approves the ordinance amending Chapter 19 of the Asheville City Code allowing the city manager or his or her designee to tow illegally parked vehicles, junked motor vehicles or abandoned vehicles in the City of Asheville.

Upon inquiry of Councilwoman Jones, Transit Services Director Bruce Black explained the City's current policy.

Mr. Black responded to Councilwoman Bellamy about the notification procedure.

Amendment to Allow Gates & Doors to Open onto a City Street or Sidewalk

Summary: The consideration of an amendment to Section 16-7 of the City Code to allow gates and doors to open onto a City street or sidewalk under certain specified conditions.

Since 1965, Section 16-7 of the City Code prohibits persons from erecting or maintaining any gate or door which opens outwardly on any street or sidewalk. Throughout the City of Asheville, there are numerous instances whereby gates or doors open outwardly on the street or sidewalk. This amendment is intended to provide flexibility to the strict prohibition by allowing gates or doors to open outwardly onto a City street or sidewalk if there is compliance with the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities.

Pros:

- Provides flexibility to allow consideration for present day situations
- Public safety remains number one priority

Cons:

- Adds additional time to review process

City staff recommends adoption of the ordinance amendment to allow gates and doors to open onto a City street or sidewalk under certain specified conditions.

Strategic Plan Update

Summary: As committed to by City staff at which time that the Asheville City Council formally passed the Strategic Operating Plan, this update is for the various staff tasks outlined within the document.

This multi-year plan document outlines seven (7) key focus areas that City Council has identified as critical to the overall long-term positive growth and vibrancy of the Asheville community. Within those seven key focus areas, 45 goals and 94 operational tasks are identified. Timeframes were identified for each of the tasks. This report outlines staff progress in the third 90 days after adoption of this plan for those tasks with timeframes conducive to this fiscal year.

Pros: City Council will continue to receive quarterly updates to insure city staff is progressing as directed by City Council.

Cons: None noted.

No formal action is required. City Council may provide direction as necessary for tasks as appropriate.

Initiated by Councilman Davis, there was a brief discussion about the vacant economic development position. It was the consensus of Council to discuss the Chamber of Commerce's outside agency funding request for the Economic Development Coalition and the City Manager's request to fill the vacancy of Economic Development Director at the end of this formal agenda.

Upon inquiry of Councilman Davis, Assistant City Manager Jeff Richardson said that Council will need to review the Strategic Plan during the upcoming budget worksessions to determine if it is meeting their long-term or immediate needs and give direction to re-direct staff so that the budget resources can be aligned for future years. City Manager Westbrook also said that Council asked to revisit the Strategic Plan every other year and that should be done at their retreat or similar occasion.

Councilman Davis requested that future Strategic Plan updates be given to Council several days prior to the update being placed on the worksession agenda, in order to give Council additional time within which to review it.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the appropriate formal City Council agenda, if appropriate.

RIVER DISTRICT

Planning & Development Director Scott Shuford updated City Council on where the City is with the redevelopment of the River District area.

He said that the River District (1) contains 873 acres – much larger than the CBD; contains properties located on both sides of the French Broad and Swannanoa Rivers; has 27% of the District is in the Floodway; and has 47% of the district is in the 100-Year Floodplain.

The River District contains a wide variety of land uses and is fairly well-served by roads and other infrastructure, although the main corridor is flood-prone. The City has adopted a plan – the Wilma Dykeman Riverway Master Plan – for improving the area and the transportation corridor.

The Dykeman Plan promotes economic revitalization of River District; promotes environmentally-sensitive redevelopment; and calls for a reconfigured and redesigned road – the Wilma Dykeman Riverway – to serve the area.

Other plans for the River District include (1) Mountain Housing Opportunities has purchased the Depot Street block that contains the Glen Rock Hotel; (2) City Council will consider rezoning this block to Urban Place District; and (3) MHO's plans call for a mixed-use 125 unit project on 2 acres.

He explained the redevelopment planning: (1) The Rural Center has provided the City with a $20,000 planning grant to study the Biltmore Village area of the River District; (2) Up to $700,000 of implementation money may follow this grant; (3) For Biltmore Village proper, we will concentrate on steps needed to protect and rehabilitate historic structures; (4) For nearby areas, we will focus on redevelopment of underutilized property using current development standards and to implement the Dykeman Plan; (5) The City may seek an additional Rural Center planning grant to study another area or areas of the River District; and (6) We could be eligible for additional implementation money as well.

He then explained the roadway planning: (1) The City has obtained $600,000 to prepare some design and development plans for the Wilma Dykeman Riverway; (2) We will try to establish the Riverway as a high priority project on the TIP (Transportation Improvement Program); (3) The City of Asheville is attracting national and international attention; (4) The success of the Downtown is beginning to spread; and (5) City plans and Smart Growth policies promote River (re)development.

He said that recent floods have identified problems in the types of land uses we allow in our floodplains: hazardous materials ended up in our rivers as flooding occurred; and residential areas were isolated by flooding. Certain uses need to be prohibited or better controlled in the River District.

He said that recent development has created new development pressure in the River District. Flood damage has created new opportunities for redevelopment. Development standards need to help implement the Urban Riverfront Plan. Development standards need to reflect best management practices and promote conservation of key features.

He said that with these issues in mind, City staff has identified several categories of redevelopment goals: financial incentives, regulatory incentives, environmental design, and Infrastructure and safety.

Financial incentives provide (1) financial incentives to adaptively reuse existing buildings, especially historic ones; and (2) financial incentives to spur private redevelopment in accordance with Wilma Dykeman Plan.

Regulatory incentives provide (1) regulatory incentives to relocate buildings from floodway and to elevate or flood-proof buildings in flood plain; and (2) regulatory incentives to spur private redevelopment in accordance with Wilma Dykeman Plan.

Environmental designs include (1) Create new greenway and park areas; (2) Promote redevelopment that meets "best management practices" for environmentally-sensitive design; and (3) Address stormwater volume and quality through regional solutions.

Infrastructure and Safety include (1) Relocate roads and associated infrastructure from floodway, where both feasible and appropriate; and (2) Buy-out private property in floodway.

The next steps are to (1) Secure grant(s); and (2) Develop draft ideas to share with: RDDRC, RiverLink, Property owners, Planning and Zoning Commission, City Council, and The Rural Center; (3) Obtain approval of the plan; and (4) Move forward with implementation steps: Financial incentives, Regulatory incentives (including rezoning), development & design standards, property acquisition, and infrastructure construction.

Mr. Shuford responded to various questions/comments from Council, some being, but are not limited to: how does this plan coincide with the Greenway Plan; what is the status of the greenway path on the Super Wal-Mart site; and are we looking to apply for more FEMA grants to buy out some of the River District property.

PETITION FOR ZONING STUDY FOR THE WESTERN PORTION OF SARDIS ROAD

Director of Development Services Joe Heard said that this is the consideration of a request from property owners for a zoning study for properties along the western end of Sardis Road, near the intersection with Sand Hill Road.

Section 7-7-2 of the Unified Development Ordinance (UDO) provides property owners with a method to petition City Council to authorize a zoning study for property not entirely owned by them. The Code requires that at least 51% of property owners in the area join the request and, in this case, the percentage has been reached. The petition process does not require City Council to ask staff to undertake the zoning study; it only requires that Council consider the request.

The area included in the petition is described on the Map #1. In the staff's opinion, this area does not contain all relevant property that should be examined in a zoning study. If Council directs that staff analyze the zoning of this area, then it is recommended that the area be expanded to the proportions illustrated on the Map #2 including all of the CB-II zoned area.

The request is prompted by the petitioners' belief that much of the current development in this area does not comply with the standards for development (particularly restrictions on car sales lots and parking location requirements) in the Community Business II (CB-II) district. The petitioners would prefer a zoning designation of Commercial Industrial (CI) to maximize the number of allowed uses, bring most of the current development into conformity, and allow for future development standards to be more consistent with the current development pattern.

Pro –

- The zoning study would enable the issue about the appropriate zoning of this neighborhood to be decided by City Council.

Con –

- The study will consume limited staff resources that could be devoted to other projects.

Planning & Development staff is presently involved with projects such as annexation coordination, development review, neighborhood planning, and other special studies to implement Council's strategic plan goals. Performing a zoning study for the Sardis Road area would require some of these other duties to be reprioritized. If City Council desires the requested rezoning study be performed, then staff recommends that the study encompass the larger area described in Map 2.

Upon inquiry of Councilman Davis, Mr. Heard explained what is involved in a zoning study.

After a brief discussion, it was the consensus of Council to instruct Planning staff to provide the following information to Council via memo: (1) is there a time sensitive nature of the zoning study relative to the petitioners; (2) what is the effect of the zoning study might have on the Planning Department's current work program; and (3) a doable timeframe to perform the zoning study that doesn't interfere with the current work program.

Councilwoman Jones want to make sure that the applicants understand that if a zoning study is undertaken, the results of that study might result in a different zoning classification than they requested.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on an appropriate formal City Council agenda.

TRAFFIC CALMING

Traffic Engineer Anthony Butzek said that this is information pertaining to historic traffic enforcement data and recent traffic calming projects.

Traffic Enforcement:

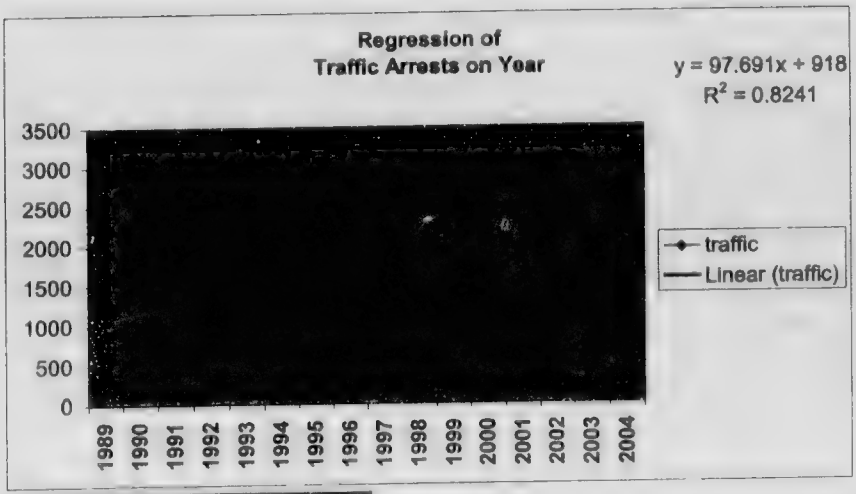
The following provides an historical summary of traffic enforcement activities, including:

1) Traffic Arrest data
2) Traffic crashes reduction efforts
3) Amount of time spent on traffic enforcement activities

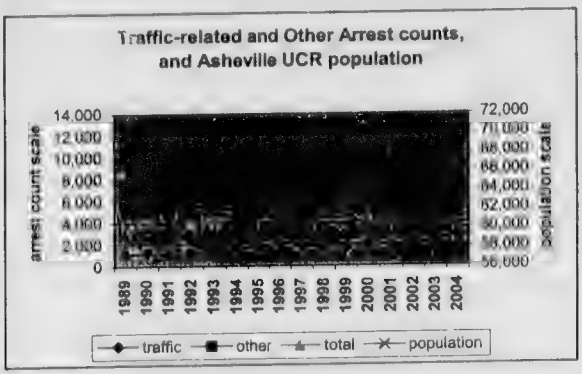
1) Traffic Arrest data

APD arrest data go back 16 years from 1989 to 2004. These were categorized as being either 'traffic-related' or 'other' types of arrests. Based on this data the number of traffic-related arrests has increased each year by an average of 98 arrests per year. The 95% confidence interval for this rate of increase is between 72 and 123 arrests per year. As such, this average increase can be considered to be statistically significant, and we can conclude that traffic-related arrests have generally increased over the last 16 years. It is also notable that year 2004 is appreciably higher than all other years.

The graph below shows the increasing trend of traffic-related arrests by year. The second chart below and associated graph shows the counts, for each year, of 'traffic' arrests and 'other' arrests, as well as UCR population data.



year	traffic	total
1989	1,048	6,549
1990	1,224	7,071
1991	1,073	6,109
1992	1,189	6,876
1993	1,222	6,390
1994	1,615	6,957
1995	1,770	7,342
1996	2,132	7,949
1997	1,856	8,359
1998	1,725	7,349
1999	1,772	8,844
2000	2,112	10,460
2001	1,887	10,528
2002	2,190	11,560
2003	2,248	11,337
2004	2,911	12,914



2) Traffic crashes reduction efforts

An ongoing effort is in place wherein Patrol will select specific roadways and intersections that are known to have relatively high numbers of traffic crashes. Once selected, they work to reduce the number of crashes by at least 5%. To help achieve this goal there is an increase in traffic enforcement activities in these areas. Patrol also works with traffic engineering and NCDOT to enhance red light timing cycles, intersection configurations, signs, and might also employ simple solutions like having shrubbery trimmed by public works. The following represent the results of these activities, based on six-month time intervals.

Last half of 2002 compared to First half of 2003:
Central: from 7 to 2 crashes, 71% reduction (Patton Ave from Clingman to Grove St)
East: from 5 to 1 crashes, 80% reduction (US 70 at Crockett Ave)

North: from 22 to 9 crashes, 59% reduction (Merrimon Ave at Edgewood, E Chestnut, and Hillside)
South: from 5 to 7 crashes, 20% increase (US 25 at Mills Gap Rd)
West: from 2 to 3 crashes, 50% increase (N Bear Creek from Johnston Blvd to Deaverview Rd)
Overall: from 41 to 22 crashes, 46% reduction

First half of 2003 compared to Last half of 2003
Central: from 10 to 4 crashes, 60% reduction (Biltmore Ave and Patton Ave)
East: from 27 to 25 crashes, 7% reduction (Fairview Rd and I-240)
North: from 50 to 48 crashes, 4% reduction (Merrimon Ave between Claremont Ave and Edgewood Rd)
South: from 50 to 44 crashes, 12% reduction (Hendersonville Rd from Thompson St to Lula St)
West: from 180 to 175 crashes, 3% reduction (US 19/23 from Regent Park Blvd to NC 63)
Overall: from 317 to 296 crashes, 7% reduction

Last half of 2003 compared to the First half of 2004
Central: from 2 to 5 crashes, 150% increase (College St from N Oak to Spruce St)
East: from 7 to 8 crashes, 14% increase (US 70 at Riceville Rd)
North: from 65 to 39 crashes, 40% reduction (Merrimon Ave at Gracelyn, Larchmont, Edgewood, Chestnut)
South: from 16 to 25 crashes, 56% increase (Hendersonville Rd from Thompson St to Lula St)
West: from 9 to 8 crashes, 11% reduction (N Louisiana Ave at Kmart/Bi-Lo entrances, just north of Patton Ave)
Overall: from 99 to 85 crashes, 14% reduction

The aggregate change for the above time periods is from 457 to 403 crashes, an overall 12% reduction. A new 10-month cycle will be utilized for future assessments, the next one being for the period 8/1/03-5/31/04 compared to 8/1/04 to 5/31/05. Currently selected locations are: Central (I-240 EB, Smoky Park Bridge to Charlotte St), East (US 70 at Tunnel Rd), North (Merrimon Ave from Edgewood to Dunwood), South (Sweeten Creek at Mills Gap, and West (Patton Ave and Louisiana Ave).

To represent the overall citywide trend, the counts of crash-related calls for service are shown below for available years. It is important to note that the new OSSI CAD system was put in place 3/11/03, and probably does a far better job of excluding duplicate calls for service that relate to the same accident. As can be seen below, the counts using the new system are appreciably lower than counts from the old system.

Year	Count	Source
1999	7,941	old CAD
2000	8,149	old CAD
2001	8,162	old CAD
2002	8,191	old CAD
2003	6,699	mostly new CAD
2004	6,846	new CAD

3) Amount of time spent on traffic enforcement activities

During Fiscal Year 2003-2004 APD spent about 47,000 hours traveling to and servicing all calls for service. Approximately 13,000 of these hours were in response to traffic-related calls for service. Thus, about 13000/47000 = 27% of Patrol's active time is committed to traffic-related activities.

Traffic Calming:

Completed projects
South French Broad (phase 1 of 2), Florida/Dorchester, Caribou, Wyoming, Gracelyn/Ottari – 3.3 miles, $97,000
Murdock/Ridgelawn/Wellington (in progress) – 1.5 miles, $82,000

Projects Under Design
Kenilworth Road – 1.3 miles, est. $80,000
Redwood Forest (from Riverbend) – 0.96 miles, $65,000 max private funds
Shiloh (from Appeldoorn) – 2.3 miles, $84,000 max
Biltmore Park (HOA project) – 2.7 miles, est. $65,000 private funds

Planned Projects
Grove Park neighborhood (from GPI) – 3.4 miles, est. $200,000 private funds

Likely Future Projects
Governors View/Arco (from Riverbend UV) – 1.3 miles, $25,000 max private funds
South French Broad (phase 2 of 2) – 0.5 miles
Cedar Street and Wood Avenue – 0.7 miles

Costs and Needs
The engineer's estimate for the most recent project was about $77,000 per mile of traffic calming. The most recent bid for same was about $114,500 per mile. We believe the engineer's estimate is reasonable, and that the contractor's bids were excessive due to lack of local competition, particularly in the asphalt industry.

At this time, we have not prioritized future projects beyond Kenilworth Road. We have requests for traffic calming on about 300 street segments in the City, totaling about 100 miles of streets. The streets which appear to be most impacted by existing traffic, based on measured traffic volumes and measured speeding are:

- Cedar Street and Wood Avenue, 0.74 miles
- South French Broad Avenue (Phifer to Livingston), 0.47 miles
- Kimberly Avenue and Edwin Place, 1.65 miles
- Montford Avenue, 0.89 miles
- Edgewood Road (north), 0.36 miles
- School Road East, 0.52 miles
- Chestnut Street, 1.12 miles
- Bear Creek Road, 0.73 miles
- London Road, 0.70 miles
- Burton Street, 0.56 miles
- Hanover Street, 0.50 miles
- State Street, 1.00 miles
- Forest Hill Drive (Wyoming to Biltmore), 0.23 miles
- Westwood Place, 0.70 miles
- Shelburne Road, 0.67 miles

These total to 10.84 miles. In addition, there are many more residential streets on which traffic volumes are relatively low, but speeding is particularly prevalent, including Cisco Road, Michigan Avenue, and Riverview Drive.

Pros of traffic calming

- Speeding is reduced
- Need for enforcement is reduced
- Quality of life is improved for residents of streets
- Can include aesthetic enhancements to support community

Cons of traffic calming

- Costs for installation
- Costs of maintenance
- Some opposition to measures (typically a minority of residents)

Regarding the City Council's Strategic Operating Plan, traffic calming supports an efficient transportation system by managing traffic demand in neighborhoods.

Councilman Dunn expressed concern with the $77,000 per mile amount and the time delay for emergency vehicles

Councilman Newman felt that with the resources that we have available, we may need to focus our traffic calming towards more pedestrian safety in key areas, i.e., around playgrounds.

Discussion surrounded the different technology for traffic calming and how the fine money is distributed.

Councilman Dunn was interested in looking at the use of technology as a way of traffic calming.

Councilwoman Jones felt it was important to have community involved if a decision is reached to use different technology in traffic calming.

When Councilwoman Bellamy asked how many police officers are dedicated to traffic enforcement, Police Chief Hogan said that all police officers play a role in traffic enforcement. Twenty-five to twenty-seven percent of our time is spent on traffic enforcement in addition to one officer dedicated in each district to the traffic safety of that district.

It was the consensus of Council to instruct staff to report back to Council of alternative ways to use technology in traffic enforcement.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on May 24, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Establishing Conditional Zoning

City Attorney Oast said that this is the consideration of an ordinance to amend the Unified Development Ordinance by adopting conditional zoning (and repealing conditional use district zoning) as a land use approval process.

Conditional or Special Use District (CUD) zoning has been authorized in North Carolina since the mid 1960's. Asheville adopted CUD zoning as part of the UDO in 2000. Despite the benefits of flexibility that CUD zoning provides, its legal and theoretical underpinnings –

bifurcating the legislative rezoning from the quasi-judicial conditional use permit – have always been difficult to apply in practice.

In 2001 and 2002, the North Carolina Court of Appeals in two cases (review denied by the Supreme Court) approved the use of "conditional zoning." Conditional zoning is essentially the same practically and conceptually as CUD zoning in that it is a rezoning based on a site specific development plan, and the applicant is bound by the conditions in the ordinance. Legally, however, it collapses what was an awkward two-step process into a single process.

One important difference for the Planning and Zoning Commission and City Council is that the conditional zoning process requires no specific findings. Decisions should still be based on sound land use guidance principles, however, and this is set forth in the proposed ordinances. It may help to think of conditional zoning as adopting a set of development regulations (building height, setback, etc.) and applying them to a single property or group of properties, creating a single use classification. Procedurally, the process is much less complicated than CUD zoning. The process for appealing a conditional zoning ordinance into the courts would be different as well.

Under the proposed ordinance, the application process would be mostly unchanged from the current process for CUD zoning – requiring that the owner be the applicant, that a site specific plan be submitted, and that the uses be specified. Also under the proposed ordinance, conditional zoning is not available for classifications such as Urban Village, where a site plan is already required.

The current CUD zoning process would be eliminated for future use. Any CUD zoning designations established by this process, however, would continue to be governed by the CUD ordinance.

History / Prior Actions: After adding the reference to the conditional use standards in Sec. 7-16-2 to Sec. 7-7-8(d)(5), the Planning and Zoning Commission unanimously recommended adoption of the proposed ordinance.

Considerations:

- streamlined process at Planning & Zoning/Council level, and in courts
- increased flexibility in zoning
- less administrative time required to process applications, administer ordinance
- less vulnerability to judicial challenge
- susceptible to over use

City staff recommends City Council amend the Unified Development Ordinance (UDO) by adopting conditional zoning (and repealing conditional use district zoning) as a land use approval process.

City Attorney Oast responded to various questions/comments from Council, some being, but are not limited to: how will protest petitions be affected; will more conditional zoning requests be applied for; how many cities in North Carolina use this type zoning and are they satisfied with the process; what is the reason behind repealing the conditional use district zoning; and are there any hidden risk factors.

City Attorney Oast said that he would include language in the ordinance that it be used for firm development proposals and revise the Code references in Section 7-7-8 (c) (6).

At the request of Councilman Newman, City Attorney Oast said that when this ordinance is brought before Council for formal action, the Planning & Development Director will provide Council with examples of minor modifications that can be approved by him. Councilman Newman asked that City Council be apprised of any minor modifications made by the Planning & Development Director.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this public hearing on the appropriate City Council agenda.

CHAMBER OF COMMERCE – ECONOMIC DEVELOPMENT COALITION

Discussion surrounded the role of the City's vacant Economic Development position; the relationship with the Chamber of Commerce and the next $100,000 commitment for their new building; and the Economic Development Coalition's outside agency request for $75,000.

City Manager Westbrook said that the City's policy is to not recruit and that is the role for the Chamber of Commerce. He explained why the City's Economic Development Director position is distinctly different that the work of the Chamber of Commerce.

Councilman Newman felt the City's economic development policy needed to be reviewed.

Vice-Mayor Mumpower felt the role of the City's Economic Director should be expanded and strengthen for a stronger sense of substance.

Councilman Bellamy said that the City contributes financially to the Economic Development Commission and we are only allowed one voting member. She felt that if the City is "paying" for that seat, we need to be sure that they are meeting our needs and our expectations.

The majority of Council was in favor of the City Manager hiring the City's Economic Development Director.

It was the consensus of City Council to discuss these items with the Chamber of Commerce at their quarterly meeting on May 10, 2005.

SPECIAL MEETING

Councilwoman Bellamy moved to schedule a special meeting on Tuesday, April 26, 2005, at 8:00 a.m. at the Renaissance Hotel in downtown Asheville, for the purpose of participating in the mediation regarding termination of the water agreement. It is anticipated that City Council will go into closed session for a significant part of that meeting, pursuant to the attorney-client privilege exception, in order to consult with the City's attorneys. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint W. E. Lack to the Civic Center Commission, to fill the unexpired term of Sylvia Farrington until June 30, 2005, and then a full three-year term until June 30, 2008, or until his successor is appointed.

It was the consensus of City Council to instruct the City Clerk to arrange interviews for the following individuals for a vacancy on the Film Commission: Mary Trimarco and Donna Daniels.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:25 p.m.

Magdalen Bowlegs
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 26, 2005 - 5:00 p.m.

Regular Meeting

Present Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Leading City Council in the Pledge of Allegiance was Enka High School Air Force Junior ROTC Color Guard.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 05-91 - RESOLUTION OF APPRECIATION TO RETIRING EMPLOYEE JOHN P. MIALL JR

Mayor Worley read the resolution of appreciation to retiring Risk Manager John P. Miall Jr. On behalf of the City Council, Mayor Worley thanked Mr. Miall for his nearly 30 years of service he has devoted to the citizens of Asheville.

Councilman Dunn moved for the adoption of Resolution No. 05-91. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 113

II. CONSENT AGENDA:

At the request of Vice-Mayor Mumpower, Consent Agenda "A" and "B" were removed from the agenda for individual votes.

A. RESOLUTION APPROVING THE CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN FOR 2005-2010

This item was removed from the Consent Agenda for an individual vote.

B. RESOLUTION APPROVING THE HOME AND COMMUNITY DEVELOPMENT BLOCK GRANT ANNUAL ACTION PLAN FOR 2005

This item was removed from the Consent Agenda for an individual vote.

C. RESOLUTION NO. 05-92 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A LICENSE AGREEMENT WITH THE HOUSING AUTHORITY FOR AN ANTENNA AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with the Housing Authority of the City of Asheville for antennas at 36 Reservoir Road.

The property at 36 Reservoir Road (White Fawn) is the site of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

The Housing Authority has proposed to install an antenna and related equipment at White Fawn. There are two towers at 36 Reservoir Road and the Housing Authority antenna would be located on the tower known as the "BellSouth Tower" which is immediately west of the proposed Sister Cities Park. The proposed License Agreement will enable the Housing Authority to relocate its antenna from Spivey Mountain to White Fawn and thereby improve its in-house wireless communications.

The Housing Authority will pay an initial annual License Fee of $2,400 for the White Fawn site. which represents about 50% of fair market rent. The reduction in the license fee is in consideration of the official nature of the Housing Authority as an agency of the City of Asheville and its charge to carry out the public housing franchise for the City. The agreement includes a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years.

The Notice of Intent to enter into a License Agreement with the Housing Authority was published on Friday, April 15, 2005, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested,

Planning Department staff recommends adoption of the resolution authorizing the City Manager to execute a License Agreement with the Housing Authority of the City of Asheville for antennas at 36 Reservoir Road.

RESOLUTION BOOK NO. 29 – PAGE 114

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 05-93 - RESOLUTION APPROVING THE CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN FOR 2005-2010

Summary: The consideration of a resolution approving the City's Consolidated Strategic Housing & Community Development Plan for 2005-2010.

This Strategic Plan sets out broad priorities, strategies, and targets for the use of Community Development Block Grant (CDBG) and HOME funds over the next five years. The draft Plan was published on March 29, 2005, and a public hearing was held at the City Council meeting on April 12.

No public comments were made on April 12, and no comments of substance have been received. The following minor amendments have been made to the Plan since the draft was published, or remain to be made before it is submitted to HUD:

Housing Needs Assessment
- Added information on current rent levels from recent apartment survey
- Added data on Housing Authority waiting lists

Affordable Housing Chapter
- Changes to Henderson County Housing Strategies – per County request
- Add information from Housing Authority Five year Plans (requested)

Non-Housing Community Development Chapter
- Completed blanks in Table 2B (Appendix)
- Separated the targets for job training and micro-business assistance in Tables 12 & 13
- Added information on sewer needs and planned improvements

Appendices
- Add appendix on results of consultation (few comments are expected because so many focus group participants were involved in developing the key sections of the plan)
- Add HUD-required description of priorities and strategies that will reduce number of families living in poverty
- Add note on the cost of the Plan

Revise page numbering & contents pages

Advantages:
- Complies with HUD regulations and enables the City to continue to receive CDBG and HOME funds
- Provides a wealth of information about existing housing and community development needs
- Establishes priorities to direct the use of CDBG and HOME funds over the next five years
- Includes quantitative performance targets to provide accountability in the use of funds

Disadvantages: None

Staff recommends approval of the Consolidated Strategic Housing and Community Development Plan for 2005-10.

Councilman Newman moved for adoption of Resolution No. 05-93. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 115

RESOLUTION NO. 05-94 - RESOLUTION APPROVING THE HOME AND COMMUNITY DEVELOPMENT BLOCK GRANT ANNUAL ACTION PLAN FOR 2005

Summary: The consideration of a resolution authorizing submission of the Consolidated Action Plan for 2005-06, allocating federal Community Development Block Grant (CDBG) and HOME funds, to the U.S. Dept. of Housing & Urban Development.

The City expects to have available $1,725,170 in CDBG funds and $1,723,349 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2005. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 40

projects. Allocations are consistent with the draft Consolidated Strategic Housing & Community Plan for 2005-2010.

If approved, the HOME and CDBG funding will assist 361 affordable housing units Consortium-wide. CDBG funds will also help more than 3000 low-income City residents obtain housing counseling, business training, and other needed services, and will carry out street, water, and public transit improvements in low-income areas.

A summary of the draft Action Plan was published on March 29, 2005, and a public hearing was held at the City Council meeting on April 12. The Plan is due to be submitted to HUD by May 15, 2005.

Advantages:

- Allocates $3,448,519 in compliance with federal rules and enables the City to utilize these funds
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium
- Directly addresses all of the priorities set out in the Strategic Plan except for job training
- Leverages other funding in the ratio of $12 to every $1 of CDBG or HOME funds

Disadvantages: None

Staff recommends approval of the resolution submission of the Consolidated Action Plan for 2005-06, allocating federal Community Development Block Grant (CDBG) and HOME funds, to the U.S. Dept. of Housing & Urban Development.

Councilman Newman moved for adoption of Resolution No. 05-94. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 116

Councilman Dunn would support these two plans to comply with HUD regulations, however, he felt the plans are not practical as the City doesn't have the tax dollars to support them.

Vice-Mayor Mumpower felt he could not support the plans due to some of the language and some of the methodology. He thinks this speaks of a system that psychologically he disagrees with. He feels there is a way to help people without enabling people and he has concerns about a number of the programs that are included in both plans.

III. PUBLIC HEARINGS:

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3222 – ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THREE LOTS ON BILTMORE AVENUE FOR A PROPOSED MIXED-USE DEVELOPMENT WITH EXISTING APARTMENTS TO BE COVERED TO CONDOMINIUMS AND SHORT-TERM RENTAL UNITS WITH A PROPOSED RETAIL OFFICE SPACE AND FOOD SERVICE FACILITY

Urban Planner Shannon Tuch said that on March 22, 2005, City Council unanimously approved the Biltmore Gardens Project with a number of conditions. One of those conditions was that the wording for the conditional use permit be returned to the Council for review before final

approval. City Attorney Oast and the rest of the legal department has worked on providing that draft for your review and Planning staff felt that it would be best to consider this in conjunction with some additional plan information.

She reviewed with Council what was discussed in March. She showed the first drawing, which is an illustrative of the overall Master Plan (Attachment to City Exhibit 3), which shows the overall plan in the original layout for the new construction. As a result of considerable input from the neighborhood, the designers for the project produced an alternative layout referred to as "Alternate Concept A" (City Exhibit 4). This alternate layout is what was approved by Council (City Exhibit 4). For clarification, staff asked the designers to create a new Master Plan inserting Alternate Concept A into the overall Master Plan (Attachment to City Exhibit 5 – Alternate A Plan). The only real difference between new Master Plan and the original Alternate Concept A is that a portion of parking was split up (originally it was one row) to better fit existing grades and to accommodate some large trees on site. However, since the drafting of the memo, the designers worked out an alternative that was more true to the original.

In addition to a more flushed out Master Plan, Planning staff also asked for a blow-up of the new construction area that better identified trees to be preserved (Attachment to City Exhibit 5 – Tree Preservation Plan). What this drawing illustrates is all the existing trees located from a tree survey that will be removed as a result of the new development. The other trees that are more boldly identified with a darker outline will be preserved. She emphasized that these "preserved" trees are trees that will not be removed as a result of construction. It does not mean that they will not be impacted by the construction. The site planners intend on using tree protection fencing but since this fencing cannot be installed to meet the City's standard for tree protection she asked the designers to remove the fencing from the plan over concern that this will lead to confusion and that some people in the community may equate the fencing with adequate protection.

She then pointed out that the bold dashed line in the Tree Preservation Plan, indicates the limits of disturbance. This is the boundary line, so to speak, for grading and other ground disturbing activity. She thought it was important to show so that Council could see how the extent of grading is held very close to the edge of the proposed building. This is accomplished to some degree by the proposed terrace retaining walls (City Exhibit 6) that will help prevent additional grading down slope. You can see up slope of the project, where there are no walls, the extent of grading is broader but still within the building parameters.

Because the existing buildings are a fixed feature, it is possible that some smaller walls could be required on the upslope side but should be comparatively smaller.

She said that the developer has submitted (late this afternoon) a revised Alternate A Plan (City Exhibit 7 – Exhibit XX).

Mr. Matt Sprouse, site designer, said that their site plan just submitted today shows an emergency vehicle entrance only. The owners plan on putting walkable bollards or a gate to now allow traffic to pass through, per the neighborhood's request. He explained that the only change from what was submitted earlier is the entrance and parking area and once they got into the finer grading, they realized that they can have less of an impact with this new configuration (City Exhibit 7 – Exhibit XX).

Ms. Tuch said that this new plan shows the entrance as being emergency access only but it was Council's direction in the conditional use permit that the entrance is to be a full access open to all traffic at all times.

Councilwoman Bellamy expressed concerns about the row of trees as well as the entrance.

After a brief discussion and concurrence by Mr. Sprouse, it was the consensus of City Council to keep the full open access and bring that access around the higher side of the cluster of trees with the single row of parking.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3222, approving the form of the conditional use permit, with said permit condition no. 8 being amended to read "The southern drive entrance along Kenilwood Place shall be open for full access to all traffic, as shown on Exhibit XX." (City Exhibit 7). This motion was seconded by Vice-Mayor Mumpower and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

ORDINANCE BOOK NO. 22 – PAGE 31

V. NEW BUSINESS:

A. REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE FOLLOWING FOUR AREAS PROPOSED FOR ANNEXATION WHICH ARE GENERALLY KNOWN AS (1) THE RIDGEFIELD BUSINESS PARK AREA; (2) THE ASCOT POINT VILLAGE AREA; (3) THE LONG SHOALS ROAD AREA; (4) THE AIRPORT ROAD AREA; (5) TWO TOWN SQUARE AREA; AND (6) TOWN SQUARE EAST AREA

Planning & Development Director Scott Shuford said that the Annexation Services Plan is being submitted for Council's approval for the following areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Two Town Square area and Town Square East area.

City Council approval of this document is the second step in the annexation process that began on April 12, 2005, when Council adopted the resolutions of intent to annex these six areas.

Upon review and approval by City Council, the Plan will be made available for public review. The follow steps will complete the annexation process.

Approval of Annexation Services Plan	April 26, 2005
Public information meeting	May 31, 2005
Public hearings	June 14, 2005
Adoption of annexation ordinances	June 28, 2005

Effective Date of Annexations:

September 30, 2005 – Ridgefield Business Park area, Two Town Square & Town Square East

December 31, 2005 – Ascot Point Village, Long Shoals Road & Airport Road

Mr. Blake Esselstyn, Urban Planner, said that the N.C. General Statutes require that municipalities exercising annexation authority make plans for the extension of services to the area proposed to be annexed and shall, prior to the public hearing and public information meeting, prepare a report setting forth such plans.

The Statutes require that the reports include:

1) Maps showing: (a) The present and proposed boundaries of the municipality; (b) The present major water and sewer lines, and any proposed extensions; and (c) The general land use pattern in the area to be annexed.

2) A statement that the area to be annexed meets the standards of N. C. Gen. Stat. sec. 160A-48 (basically contiguity and urbanization).

3) A statement setting forth the plans of the municipality for extending to the annexation area each major municipal service performed within the municipality. Specifically, (a) police protection, fire protection, solid waste collection and street maintenance on the date of annexation; and (b) extension of major trunk water mains and sewer outfall lines so that property owners in the area will be able to secure public water and sewer service according to the municipal policies in effect for extending such service to individuals lots or subdivisions.

4) The method under which the municipality plans to finance extension of services into the area to be annexed.

5) A statement of the impact of the annexation on any rural fire department providing service in the area to be annexed and a statement of the impact of the annexation on fire protection and fire insurance rates in the area to be annexed.

6) A statement showing how the proposed annexation will affect the City's finances and services, including City revenue change estimates.

Mr. Esselstyn reviewed with Council the specifics of how each area qualifies for annexation and used photos to show some of the uses in the proposed annexation areas.

Ridgefield Business Park Annexation Area – 190.71 acres, 57 properties, 2 dwelling units;

Ascot Point Village Annexation Area – 31.75 acres, 1 parcel, 334 dwelling units;

Long Shoals Road Annexation Area – 215.6 acres, 56 parcels, 706 dwelling units, 1,341 people

Airport Road Annexation Area – 239.23 acres, 113 parcels, 402 dwelling units, 763 people

Two Town Square Annexation Area – 1.19 acre, 1 parcel, commercial

Town Square East Annexation Area – 29.56 acres, 44 parcels, 21 dwelling units, 40 people

Ms. Julia Cogburn, Urban Planner, explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will require expansion of the Police Department. Extending service into the proposed annexation areas will require operational adjustment in two primary areas (1) configuration of patrol districts covering the proposed annexation areas so as to provide for effective manpower deployment and a balanced response time to calls for service; and (2) adding sworn personnel positions to accommodate the anticipated increase in demand for police services. He explained how each area would be served by an expansion of a particular district.

Based on the estimated calls for service in the annexation regions, it will be necessary to add four (4) officers to maintain the ratio of 520 calls for service for each sworn officer. The plan of services calls for the addition of these officers, at the annual cost of $140,000, plus associated capital costs, on or before August 1, 2005.

Fire protection: Three additional firefighter positions will be required to adequately serve the additional land area, dwelling units, businesses and improvements. The current first unit to be placed out of service is Ladder 4 when personnel are not available for minimum staffing. These positions will reduce the number of "out of service" times for this response company. The annual cost for the positions will be $108,906 for salary and benefits plus associated equipment and safety items of $15,500. The extension of fire protection services is not simply an extension of existing department resources. The City is required by G.S. 160A-49.1 to offer existing fire service entities contract opportunities, which allow for the continued service of annexed areas by existing rural fire departments. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the suburban fire department may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending fire protection; therefore, the City has developed a plan that incorporates alternative solutions to extending fire protection to annexed areas.

Solid waste collection: An additional automated truck and a new position, Motor Vehicle Operator III, are required. The City is required by G.S. 160A-49.3 to offer existing private service entities contract opportunities which allow for the continued service of annexed areas by existing companies. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the existing private companies may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending solid waste collection services; therefore, the City has developed a plan that incorporates alternative solutions to extending solid waste collection services to annexed areas.

Street maintenance services: The additional land area, street mileage, dwelling units, businesses and improvements will not require expansion of Public Works Department, Street Maintenance Division. The City has evaluated the streets in the annexation areas for inclusion in the maintenance program as follows: (1) Ridgefield Business Park area: Alliance Court, Heart Drive, Ridgefield Boulevard and Ridgefield Court (39 street lights at a total annual cost of $8,327); (2) Ascot Point Village area: Ascot Point Circle (2 street lights at a total annual cost of $418); (3) Long Shoals Road area – Skyland Inn Drive (3 street lights at a total annual cost of $650); (4) Airport Road – Machen Road (8 street lights at a total annual cost of $1,677); (5) Two Town Square area – none; and (6) Town Square East area – East Schenck Crescent, Columbine Road, Dearborn Street, Town Square Boulevard, Town Square and Dayflower Drive (55 street lights at a total annual cost of $21,945).

Water distribution: On the effective date of annexation, all residents, businesses and property owners within the proposed four annexation areas that are adjacent to existing water facilities will receive service on a basis substantially equal to all current portions of the City. The following four areas require no water line improvements: Ridgefield Business Park area, Ascot Point Village area, Two Town Square area and Town square East area. In the Long Shoals Road area, there is a lack of fire protection coverage. Therefore, there is a need to upgrade an existing small diameter water line on Plott Place and to upgrade an existing small diameter water line on Overlook Road Extension. Approximately 500 linear feet of six-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Plott Place and approximately 550 linear feet of 6-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Overlook Road Extension. All existing water service connections shall be

reconnected to the proposed 6-inch water line and the existing small diameter water lines shall be abandoned. In the Airport Road area, there is a lack of fire protection. Therefore, there is a need to upgrade an existing small diameter water line on Machen Road and install additional fire hydrants to existing water lines in the area to bring fire protection coverage to the same level as other parts of the City. Approximately 1,000 linear feet of 6-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Machen Road. All existing water service connections shall be reconnected to the proposed 6-inch water line and the existing small diameter water line shall be abandoned. Two new fire hydrants will be installed on the existing 24-inch water line along Airport Road, 1 new fire hydrant will be installed on the existing 24-inch water line along Hendersonville Road and 1 new fire hydrant will be installed on the existing 6-inch water line along Glen Bridge Road. Water system improvements for the Long Shoals Road area and Airport Road area are planned for completion within two years of the effective date of annexation.

Sewer collection: The following four areas require no sanitary sewer system improvements: Ridgefield Business Park area, Ascot Point Village area, Two Town Square area and Town Square East area. In the Long Shoals Road area, major sanitary sewer trunk lines and interceptors are currently in place for the majority of this area; however, upgrades will be required to the existing sanitary sewer infrastructure in order to bring this area to substantially the same level as other parts of the City. Approximately 800 linear feet of 8-inch sanitary sewer line and all related appurtenances shall be installed cross-country, beginning on Long Shoals Road, approximately 350 feet east of the intersection of Long Shoals Road and CP&L Drive and extending south to tie into the existing sanitary sewer system on CP&L Drive. In the Airport Road area, major sanitary sewer trunk lines and interceptors are currently in place for the majority of this area; however, upgrades will be required to the existing sanitary sewer infrastructure in order to bring this area to substantially the same level as other parts of the City. Approximately 350 linear feet of 8-inch sanitary sewer line and all related appurtenances shall be installed along Airport Road, beginning 380 feet west of the intersection of Airport Road and Hendersonville Road. Approximately 850 linear feet of 8-inch sanitary sewer line and all related appurtenances shall be installed along Benwood Drive, beginning approximately 700 feet west of the intersection of Benwood Drive and Bradley Branch Road. Sanitary sewer system improvements for the Long Shoals Road area and Airport Road area are planned for completion within two years of the date of annexation.

Administrative and other municipal services: The City of Asheville is governed by a City Council consisting of a Mayor, Vice-Mayor, and five Councilpersons with general administration responsibilities delegated to a City Manager. Supporting the City Manager are key professionals and department heads specializing in public works, police protection, fire protection, urban land use planning and zoning, building code enforcement, legal matters, parks and recreation and various other municipal activities and functions. The City of Asheville is active minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities in an effort to make Asheville a better community for present and future residents, businesses and property owners. Employees and employee relations are managed by the City Manager. The City of Asheville is an Equal Opportunity Employer. Three well-qualified practicing attorneys provide legal counsel to the City.

Financial Impact:

Revenue: Total ad valorem property tax revenue - $1,088,508; Total state utility taxes - $113,120; Total sales tax - $393,265; Total Powell Bill allocation - $66,218; and Total fees, charges and permits - $112,580. Total revenue - $1,773,678.

Annual recurring expenditures: Police (four additional officers to be hired effective August 1, 2005) - $140,000; Fire (costs for additional personnel and financial impact payments to the rural fire departments (5-year duration) - $308,553, Solid waste - $49.909 (annual costs for solid waste collection and disposal and recycling are not anticipated to be absorbed into current budgets; the solid waste annual expenses include an additional MEO III position plus annual disposal costs of $16,909. Annual costs for street maintenance are anticipated to be absorbed into the current budget with no increase in expenditures at this time); Recycling - $0; and Street lighting - $33,017. Total recurring expenditures - $531,479.

Annual capital expenditures: Water lines - $153,650; Sewer lines - $285,000; Solid waste (cost equals potential economic loss compensation for private solid waste haulers of $62,040 plus $182,000 for an additional automated loader truck) - $244,040; Rollout containers - $18,160; Police (police capital costs include equipment, training and vehicles for hired officers) - $186,385; and Fire (fire costs include equipment for hired personnel) - $15,500. Total annual capital expenditure - $902,735.

Ms. Cogburn asked City Council to adopt the resolutions approving the report of plans for the six annexation areas.

Upon inquiry of Councilman Dunn, Police Chief Bill Hogan said that the Police Department has 8 police officer vacancies.

Vice-Mayor Mumpower said that staff has done a good job on presenting the services plan, however, he would be voting against it for previously shared concerns regarding annexation.

Mr. Shuford responded to Councilman Dunn's inquiry of why is the City is annexing small portions of property each year. He said that he would provide Council with information on the City's policies regarding providing specific services to annexation areas.

Councilman Newman said that families and businesses in Asheville pay twice the property taxation than people who live just outside of the City limits, and when areas become urban in nature, they should pay to support the critical infrastructure needs in Asheville. He felt that as an elected official looking out for the wellbeing of Asheville taxpayers, annexation is an issue of basic fairness for families who live in Asheville and he would support it.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 05-95 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE RIDGEFIELD BUSINESS PARK AREA

Councilman Davis moved for the adoption of Resolution No. 05-95. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 117

RESOLUTION NO. 05-96 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE ASCOT POINT VILLAGE AREA

Councilwoman Jones moved for the adoption of Resolution No. 05-96. This motion was seconded by Councilwoman Bellamy and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 118

RESOLUTION NO. 05-97 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE LONG SHOALS ROAD AREA

Councilman Newman moved for the adoption of Resolution No. 05-97. This motion was seconded by Councilwoman Bellamy and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 119

RESOLUTION NO. 05-98 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS THE AIRPORT ROAD AREA

Councilwoman Bellamy moved for the adoption of Resolution No. 05-98. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 120

RESOLUTION NO. 05-99 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS TWO TOWN SQUARE AREA

Councilman Davis moved for the adoption of Resolution No. 05-99. This motion was seconded by Councilman Newman and carried on a 5-2 vote with Vice-Mayor Mumpower, and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 121

RESOLUTION NO. 05-100- RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION, WHICH IS GENERALLY KNOWN AS TOWN SQUARE EAST AREA

Councilwoman Jones moved for the adoption of Resolution No. 05-100. This motion was seconded by Councilwoman Bellamy and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 29 – PAGE 122

VI. OTHER BUSINESS:

For Our Kids Program

Vice-Mayor Mumpower thanked those who participated in the For Our Kids program at the Bartlett Arms Apartments clean-up project, which Program he and Councilwoman Bellamy share responsibilities in:

Claims

The following claims were received by the City of Asheville during the period of April 1-14, 2005: Earl Lee Gray (Water), Margo Lenmark (Streets), Wanda Brookshire (Engineering), Michael Overstrom (Transit Services) and Sarah Brown (Police.)

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English expressed concern over the veterans memorial discussion with the Pack Square Conservancy.

Ms. Mary Steiner and Mr. Fisher Caldwell spoke about the on-going problems escalating at Pisgah View Apartments.

Closed Session

At 6:15 p.m., Councilman Newman moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Gannett Pacific Corporation, d/b/a Asheville Citizen-Times Publishing Company; Chesapeake Television, Inc. d/b/a WLOS-TV; City of Asheville; and County of Buncombe. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Dunn and carried unanimously.

At midnight, Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at midnight.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 10, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY, 2005, AS "MOTORCYCLE AWARENESS MONTH"

Vice-Mayor Mumpower read the proclamation proclaiming May, 2005, as "Motorcycle Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Roger Williams who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

At the request of Councilwoman Bellamy, Consent Agenda Items "K" and "L" was removed from the agenda.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETINGS HELD ON APRIL 12, 2005, AND APRIL 26, 2005, THE WORKSESSION HELD ON APRIL 19, 2005

B. RESOLUTION NO. 05-101 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH MARTIN STARNES & ASSOCIATES, CPAs, P.A., FOR AUDITING SERVICES FOR FISCAL YEAR 2005-06

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Martin Starnes & Associates, CPAs, P.A., for auditing services for Fiscal Year 2005-06.

N. C. Gen. Stat. sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In April of 2005, the City Finance Department sent letters to 31 local and regional CPA firms, including the two firms listed on the Minority Business listing, soliciting proposals from qualified firms of certified public accountants to audit the City of Asheville's financials statements for the fiscal year ending June 30, 2005, with the option of auditing the City of Asheville's financial statements for the two subsequent fiscal years. Five firms expressed interest and were provided a copy of the request for proposals. All five firms submitted a complete proposal. The proposal from Martin Starnes & Associates, CPA's, P.A. proposes a fee of $49,000 for the fiscal year

ending June 2005. Funds are appropriated in the budget of the Accounting Division of the Finance Department.

PROS:

- The fee includes an audit in accordance with generally accepted auditing standards which includes an assessment of the City's internal control procedures, testing for compliance with N. C. General Statutes, testing for compliance with pronouncements of the Governmental Accounting Standards Board, Standards for Audit of Governmental Organizations, Programs, Activities and Functions, the Guidelines for Financial and Compliance Audits of Federally Assisted Programs and the Federal Office of Management and Budget's Compliance Supplement for Single Audits of State and Local Governments.
- This audit will enable the City of Asheville to comply with N.C. Gen. Stat. sec. 159-34.

CONS:

- None determined.

City staff recommends City Council authorize the Mayor to execute a contract with Martin Starnes & Associates, CPAs, P.A., for auditing services for Fiscal Year 2005-06.

City Accountant Pat Leckey responded to questions from Councilman Davis regarding the firm of Martin Starnes & Associates, CPAs, P.A.

RESOLUTION BOOK NO. 29 – PAGE 123

C. ORDINANCE NO. 3229 - ORDINANCE AMENDING CHAPTER 19 OF THE CODE OF ORDINANCES TO DESIGNATE THE CITY MANAGER OR HIS DESIGNEE TO TWO ILLEGALLY PARKED VEHICLES, JUNKED MOTOR VEHICLES OR ABANDONED VEHICLES

Summary: The consideration of an ordinance amending Chapter 19 of the Asheville City Code allowing the city manager or his or her designee to tow illegally parked vehicles, junked motor vehicles or abandoned vehicles in the City of Asheville.

There are several vehicles in the parking garages that are abandoned. They need to be removed. This amendment gives the City Manager or designee the ability to remove vehicles which are abandoned or impeding traffic flow in city garages and parking lots, or vehicles illegally parked in a fire lane or commercial loading zone.

The advantage of this to the City is that vehicles which have been abandoned may be removed, freeing up parking spaces for the paying public, and increasing safety in fire lanes, and increasing the ability to load or unload for commercial businesses.

The disadvantages are that the person whose vehicle has been towed may not feel that he or she should have been towed

City staff requests that City Council approves the ordinance amending Chapter 19 of the Asheville City Code allowing the city manager or his or her designee to tow illegally parked vehicles, junked motor vehicles or abandoned vehicles in the City of Asheville.

ORDINANCE BOOK NO. 22 – PAGE 63

D. ORDINANCE NO. 3230 - ORDINANCE AMENDING SECTION 16-7 OF THE CODE OF ORDINANCES TO ALLOW GATES AND DOORS TO OPEN ONTO A CITY STREET OR SIDEWALK UNDER CERTAIN SPECIFIED CONDITIONS

Summary: The consideration of an amendment to Section 16-7 of the City Code to allow gates and doors to open onto a City street or sidewalk under certain specified conditions.

Since 1965, Section 16-7 of the City Code prohibits persons from erecting or maintaining any gate or door which opens outwardly on any street or sidewalk. Throughout the City of Asheville, there are numerous instances whereby gates or doors open outwardly on the street or sidewalk. This amendment is intended to provide flexibility to the strict prohibition by allowing gates or doors to open outwardly onto a City street or sidewalk if there is compliance with the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities.

Pros:

- Provides flexibility to allow consideration for present day situations
- Public safety remains number one priority

Cons:

- Adds additional time to review process

City staff recommends adoption of the ordinance amendment to allow gates and doors to open onto a City street or sidewalk under certain specified conditions.

ORDINANCE BOOK NO. 22 - PAGE 64

E. RESOLUTION NO. 05-102 - RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Summary: Sylvia Farrington has resigned as a member of the Civic Center Commission, thus leaving an unexpired term until June 30, 2005.

At the City Council worksession on April 19, 2005, City Council instructed the City Clerk to prepare the proper paperwork to appoint Mr. W.E. Lack, as a member of the Civic Center Commission, to serve the unexpired term of Ms. Farrington, term to expire June 30, 2005, and then to serve a full three-year term, term to expire June 30, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 124

F. RESOLUTION NO. 05-103 - RESOLUTION REAPPOINTING MEMBERS TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Summary: The consideration of reappointing members to the Educational Access Channel Commission.

The terms of Charlie Glazener, Gerry Kovach, Greg Dillingham and Rusty Holmes, members on the Educational Access Channel Commission, expire on June 1, 2005.

Mr. Tim Amos, Chairman of the Educational Access Channel Commission, notified the City Clerk that Mr. Glazener, Ms. Kovach, Mr. Dillingham and Mr. Holmes are all interested in reappointment and have an excellent attendance record. He recommended reappointments.

Therefore, the City Clerk has prepared the proper paperwork to reappoint Charlie Glazener (City School representative), Gerry Kovach (County School representative), Greg Dillingham (UNC-Asheville representative) and Rusty Holmes (A-B Technical Community College representative) to each serve a three-term respectively, terms to expire June 1, 2008, or until their successors are appointed.

Staff recommends City Council reappoint members to the Educational Access Channel Commission.

RESOLUTION BOOK NO. 29 – PAGE 125

G. RESOLUTION NO. 05-104 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PURCHASING AGREEMENT WITH DATAMATIC LTD FOR METER READING EQUIPMENT

Summary: The consideration of a resolution authorizing the City Manager to enter into a purchasing agreement with Datamatic, LTD in the amount of $56,278.

The Water Resources Department and Information Technology Department use Datamatic equipment for meter reading data. The current equipment the Meter Services Division has become outdated and the division has now moved to automated meter reading (AMR) devices as well as conventional devices. The standard for new development is now AMR devices. The cost for this upgraded hardware and software including equipment for automated meter reading is $56,278 for which funds are available. Annual maintenance support cost after the first year, which is included in the initial payment amount, is $8,294.50.

PROS:

- This equipment will enable the Water Resources Department to expand its AMR program, which will enhance the safety of meter readers by eliminating areas where the meter readers have to walk on streets and narrow roadways.

CONS:

- The equipment and software cost of $56,278 and recurring annual cost, after the first year of $8,294.00.

City staff recommends City Council approve the City Manager signing purchasing agreement with Datamatic, LTD in the amount of $56,278 and recurring annual maintenance support cost of $8,294.00.

RESOLUTION BOOK NO. 29 – PAGE 126

H. RESOLUTION NO. 05-105 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A SUPPLEMENTAL MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO EXPAND, INSTALL AND MAINTAIN A PUBLIC-ACCESS PARKING LOT ON NC DOT RIGHT-OF-WAY

Summary: The consideration of a resolution authorizing the Mayor to execute a supplemental municipal agreement with the N.C. Dept. of Transportation (NC DOT), to expand, install and maintain a public-access parking lot on NC DOT's right of way.

In 1961 the City entered into a municipal agreement with the NC DOT to utilize the NC DOT's right of way, which is situated on the north side of the expressway fence and to the south

of Cherry Street between Short Street and Broadway for parking purposes. That agreement was subsequently supplemented twice providing additional parking flexibility to the City. The City wishes to further supplement the 1961 agreement by performing some additional improvements within the right of way.

Pros:

- Parking often used by itinerants for living (old buses, vans, etc.). APD will have control of such long-term parkers – safer for citizens
- Parking services will meter lot (revenues)
- Lot will be approved in accordance with downtown development requirements.
- More public parking access for citizens.

Cons:

- Cost to improve lot in accordance with downtown development plans
- Lot must be improved (paved), meters installed, enforcement, etc.

This action complies with City Council's Strategic Operating Plan by encouraging new downtown development by making additional parking available to them (Sense of Place, Heritage and Arts, Goal 3, Objective B).

The Public Works Department staff recommends adoption of the resolution authorizing the Mayor to execute a supplemental municipal agreement with the NC DOT to expand, install and maintain a public-access parking lot on NC DOT's right of way.

RESOLUTION BOOK NO. 29 – PAGE 127

I. RESOLUTION NO. 05-106 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR A MOBILE SOURCE EMISSIONS REDUCTION GRANT

Summary: The consideration of a resolution entering into an agreement with the NC Dept. of Environment and Natural Resources (Division of Air Quality), to accept a Mobile Source Emissions Reduction Grant award and adoption of the accompanying budget amendment.

The Asheville Public Works Department was awarded a $12,000 grant from the NC Dept. of Environment and Natural Resources to purchase two electric vehicles for Asheville Police Department use in the central business district. A match of $9,830 is required for this grant. The matching funds are available from the Asheville Police Department equipment budget.

The Asheville Police Department emphasizes the use of non-traditional modes of transportation for downtown patrol duties. Patrol officers walk or ride bicycles in much of the downtown area. Officers who use standard police patrol vehicles drive at very slow speeds due to both traffic congestion and the need to observe pedestrian and street activities.

This action coincides with the City of Asheville's Strategic Operating Plan under the focus area of Natural and Built Environment, goal #1: Enhance and preserve air and water quality.

Pros

- Two electric vehicles will operate in much the same manner as traditional marked police cruisers, handling routine calls for service, providing traffic control, and conducting patrols.
- At low speeds the electric drive system operates more efficiently than a traditional police vehicle. Replacing two patrol cars with electric vehicles for downtown patrols will eliminate the emissions from those gasoline engines.

- By eliminating the unnecessary pollutants, the electric vehicles will add to the health and enjoyment of residents, visitors, and festival-goers.

Cons
- The cost of the match.

City staff recommends the City of Asheville accept the grant award by entering into an agreement with the NC Department of Environment and Natural Resources, and amend the Fiscal Year 04-05 budget to increase it by $12,000.

RESOLUTION BOOK NO. 29 – PAGE 128

J. ORDINANCE NO. 3231 - BUDGET AMENDMENT TO ACCEPT GRANT FROM N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR A MOBILE SOURCE EMISSIONS REDUCTION GRANT

See Consent Agenda Item "I" above.

ORDINANCE BOOK NO. 22 - PAGE 65

K. RESOLUTION AMENDING RESOLUTION NO. 05-47 FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES HOME GAMES

This item was removed from the Consent Agenda for an individual vote.

L. RESOLUTION OF SUPPORT FOR THE TAX CREDIT APPLICATIONS FOR THE MOUNTAIN HOUSING OPPORTUNITIES' GLEN ROCK HOTEL REVITALIZATION PROJECT

This item was removed from the Consent Agenda for an individual vote.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

RESOLUTION NO. 05-107 - RESOLUTION AMENDING RESOLUTION NO. 05-47 FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES HOME GAMES

Summary: The consideration of an amended resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at The Asheville Grizzlies Home Games.

The Asheville Grizzlies have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their home games and allow for consumption at these events. Ordinance No. 05-47 failed to state the dates and times on which the Grizzlies home games were scheduled.

The Asheville Parks and Recreation Department recommends approval of the resolution amending Resolution No. 05-47.

Councilwoman Bellamy felt that people should not need alcohol to enjoy an event and would not support the resolution.

Councilman Newman moved for the adoption of Resolution No. 05-107. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 29 – PAGE 129

RESOLUTION NO. 05-108 - RESOLUTION OF SUPPORT FOR THE TAX CREDIT APPLICATIONS FOR THE MOUNTAIN HOUSING OPPORTUNITIES' GLEN ROCK HOTEL REVITALIZATION PROJECT

Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Summary: The consideration of a resolution supporting the tax credit applications for Mountain Housing Opportunities' Glen Rock Project.

City Council has recently approved a conditional use zoning for Mountain Housing Opportunities' (MHOs) Glen Rock project. The project is to be funded, in part, by tax credit financing. The resolution of support is intended to reflect City Council's strong enthusiasm for this critical project since it represents an opportunity to implement City Smart Growth infill and redevelopment policies and objectives as well as those of the Wilma Dykeman Riverway Master Plan.

City staff recommends the adoption of the resolution supporting the tax credit applications for Mountain Housing Opportunities' Glen Rock Project.

Councilwoman Jones moved for the adoption of Resolution No. 05-108. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 131

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE SAWYER MOTOR COMPANY BUILDING AT 100 COXE AVENUE AS A LOCAL HISTORIC LANDMARK

Mayor Worley announced that the applicants have requested this public hearing be continued until May 24, 2005. Therefore, Vice-Mayor Mumpower moved to continue this public hearing until May 24, 2005. This motion was seconded by Councilwoman Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER A REVISION TO THE CONDITIONAL USE PERMIT AND MASTER PLAN FOR BROTHERTON COMMONS, LOCATED AT THE CORNER OF VIRGINIA AVENUE AND BROTHERTON AVENUE, FOR A PROPOSED 44-UNIT HOUSING DEVELOPMENT

Mayor Worley announced that the applicants have requested this public hearing be continued until May 24, 2005. Therefore, Vice-Mayor Mumpower moved to continue this public hearing until May 24, 2005. This motion was seconded by Councilwoman Bellamy and carried unanimously.

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE LEXINGTON STATION PROJECT, LOCATED AT THE CORNER OF LEXINGTON AVENUE, HILLIARD AVENUE AND CHURCH STREET, FOR A MULTI-COMMERCIAL, RESIDENTIAL DEVELOPMENT

ORDINANCE NO. 3232 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR LEXINGTON STATION PROJECT, LOCATED AT THE CORNER OF LEXINGTON AVENUE, HILLIARD AVENUE AND CHURCH STREET, FOR A MULTI-COMMERCIAL, RESIDENTIAL DEVELOPMENT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:16 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for the Lexington Station project, located at the corner of Lexington Avenue, Hilliard Avenue and Church Street, for a multi-commercial, residential development.

The proposal is for a new infill development to be located on 1.7 acres in the downtown area of Asheville. The project is being reviewed under the Conditional Use Permit process because of the number of residential units involved. The property was formerly owned by Buncombe County and was purchased in 2000. Concern was expressed in the downtown community when the County announced a proposal to develop a jail annex and later an ambulance response team at that site. People involved in downtown issues and the Downtown Commission became interested in encouraging the County to find another buyer for the property for a mixed-use project.

Last year the County placed the property for sale. The proposal that is being currently reviewed has come from the purchaser of the property.

The proposal is for 3 new buildings to be placed on the parcel (Attachment to City Exhibit 3 – Location Map). The existing building, which is a large warehouse structure, will be

demolished (Attachments to City Exhibit 3 – Street Level Site Plan, Lexington Avenue Elevation, Elevation at Hilliard Avenue, Elevation at Lexington Avenue, Elevation at Lexington Avenue – Building C). The new buildings are proposed to be between three and four stories. The project would provide about 26,000 square feet of commercial space on the ground floor of the buildings and 66 residential condominium units on upper floors. The units could be considered middle price-range housing within the overall downtown condominium market. The units have been offered for about $160,000 for a one bedroom unit and about $250,000 for two bedroom units. Four units will be larger penthouse units located in the fourth floor level of Building B. The commercial space will be offered in buildings A and B. The commercial space totals about 26,000 square feet. Green space for the residential units will be provided along Church Street. Open space is not a requirement for residential projects in the downtown area but this green pocket park will provide some green space in the community.

The existing street width along Lexington Avenue is somewhat narrow. Based on City staff comments, the developer is providing more travel lane width there as well as new sidewalks surrounding the entire development. Area traffic and on-street parking can be accommodated safely. The site plan noted as 'L-1' is the most recently updated site plan showing on-street parking and the travel lanes in the area. Access to the underground parking areas is from 3 driveways along Church Street.

CBD Zoning is developed to reinforce the downtown as the urban center of Asheville and Western North Carolina by encouraging private and public investment. A further goal is to encourage a supportive retail center along with high-density residential development to complement other downtown uses and surrounding neighborhoods. There are no residential density maximums in the downtown area and there are no height limits.

The Asheville City Plan 2025 encourages more sustainable land development patterns in new construction and higher density commercial and residential projects in new mixed-use buildings. The City Development Plan 2025 encourages strengthening of downtown neighborhoods by providing a mix of new residential units and increasing livability by providing pocket parks.

Although the parcel is just outside of the Downtown Design Review map boundaries, the developer provided a courtesy review for the Downtown Commission. The Downtown Commission is supportive of the project and encouraged the architect to reinforce the ground floor areas for commercial uses by providing large well-defined window areas in the style of a storefront. This will better support any uses that will occupy the spaces.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that the seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The project will comply with all City and State codes and requirements and will not endanger public health or safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** The site is an infill parcel that currently contains parking lots and several single-story warehouse buildings. The new proposal will step

with the natural topography of the street and in addition provide more green space than is currently provided on the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The proposed development is not expected to injure the value of adjoining property. Rather, the proposed development represents significant re-investment in this neighborhood and could likely lead to additional redevelopment and increased property values in the surrounding area.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The parcel is located in the Central Business District of the City. The proposed development is in harmony with the goals of the CBD and the scale, density and character of the types of development found in the area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The proposed development conforms to the goals stated in the comprehensive plans and smart growth policies adopted by the City to support denser mixed-use infill development in areas of the City like downtown.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Infrastructure is in place to support the proposed development. The project would involve improvements to the adjoining sidewalks and streets. The development would also provide a bus stop at the corner of Hilliard Avenue and Lexington Avenue. No other infrastructure concerns were noted during the review by the Technical Review Committee.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The density of the development is not expected to create a traffic hazard or undue traffic congestion. The proposed development plan would widen Lexington Avenue to make traffic movements safer and easier.

Pros

- The project brings additional residential uses and commercial space to the downtown area.
- The existing vacant use will be replaced by a much more dynamic proposal.
- This important investment below Hilliard Avenue may encourage other redevelopment proposals in the vicinity of the project.

Cons

- Lexington Avenue is somewhat narrow but the proposed development should improve the traffic flow through the area.

The Planning and Zoning Commission at their April 6, 2005, meeting voted 6 to 0 to recommend approval of the project, subject to the conditions noted by the Technical Review Committee. Staff concurs with that recommendation.

Mr. Steve Moberg, applicant, urged City Council to support this development, which will revitalize the area.

Upon inquiry of Councilwoman Bellamy, Mr. Glines said that the existing angled parking will be improved, the sidewalks along Hilliard will be expanded and the building will be sprinklered.

After rebuttal, Mayor Worley closed the public hearing at 5:28 p.m.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3232, granting a conditional use permit for the Lexington Station project, located at the corner of Lexington Avenue, Hilliard Avenue and Church Street, for a multi-commercial, residential development, subject to the conditions noted by the Technical Review Committee. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 67

D. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED ON HILL STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND OFFICE DISTRICT TO OFFICE/BUSINESS DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE CONSTRUCTION OF A 30,000 SQUARE FOOT OFFICE BUILDING, ASSOCIATED PARKING AREA(S) AND REALIGNMENT OF MICHAEL STREET AND JASON STREET TO PROVIDE ON-STREET PARKING**

ORDINANCE NO. 3233 - ORDINANCE REZONING PROPERTY LOCATED ON HILL STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND OFFICE DISTRICT TO OFFICE/BUSINESS DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3234 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT HILL STREET FOR THE CONSTRUCTION OF A 30,000 SQUARE FOOT OFFICE BUILDING, ASSOCIATED PARKING AREA(S) AND REALIGNMENT OF MICHAEL STREET AND JASON STREET TO PROVIDE ON-STREET PARKING

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:30 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of a request to rezone property located on Hill Street from RM-8 Residential Multi-Family Medium Density District and Office District to Office/Business District/Conditional Use, and a request to issue a conditional use permit for the construction of a 30,000 square foot office building, associated parking area(s) and realignment of Michael Street and Jason Street to provide on-street parking.

The subject property is located within the City Limits on Hill Street, which is located less than ¼ mile from Montford Avenue and near the I-240 interchange (Attachments to City Exhibit 3 – Location Map, Aerial Map). The applicant is requesting a conditional use rezoning of 5 lots totaling approximately 1.15 acres in order to construct a 30,000 square foot office building. The requested zoning change includes two parcels located on the west side of Michael Street, one zoned Office and the other split zoned Office and RM-8, and three parcels located between Michael Street and Jason Street all zoned Office. The applicant, Frontier Syndicate, LLC, is requesting a rezoning of all five (5) parcels to Office Business District in order to allow for the construction of a much larger scaled office building than what is permitted under the current Office District designation.

The properties surrounding the development site include: a single family dwelling zoned RM-8 to the north of the site; vacant property zoned Office District and single family dwellings zoned RM-8 to the west; and a mixture of single-family, office use and vacant property zoned Office, and RM-8 to the east of the site along Jason Street. The south side of the property fronts Hill Street, which is adjacent to I-240.

- The Office district zoning designation allows a structure size of 4,000 square foot in gross floor area for one-story buildings and 8,000 square feet for multiple story buildings. The intent and purpose of this district is to reserve areas for the development of small-scale office uses (or a mixture of office and residential use) adjacent to residential uses and to serve as a transition as residential areas convert to other uses or between residential and commercial areas.
- The Office Business district allows for a structure size of up to 30,000 square feet in gross floor area. The intent and purpose of this district is to reserve areas for development of medium scale office uses and related support uses and may serve as a transition area between commercial and residential areas.

The conceptual site plan(s) proposes removal of two vacant structures housed on the site in order to construct a 30,000 square foot office building and a 50 space off-street parking area (Attachment to City Exhibit 3 – Conceptual Site Plan). Associated with the development, the applicant is also proposing to realign and reconstruct both Michael and Jason Streets and also provide several pull-off parking spaces along Hill Street to provide a total of 38 on-street parking spaces. A recent amendment approved by City Council that allows a percentage of newly created on-street parking spaces to count towards a development's off-street parking requirements, in conjunction with a flexible development approval of a 25% reduction in the total number of required off-street parking spaces for the development, allows for the preservation of a large deciduous tree that is located west of the proposed building. In addition to the preservation of this tree, street trees will be provided along Hill Street and portions of Jason and Michael Streets. The site plan also illustrates a request for alternative compliance along Jason Street and along portions of the western and north sides of the property. In order to provide a more consistent streetscape design, the applicant is requesting street trees be provided in lieu of where a 20-foot Type B buffer would be required along Jason Street. The alternative would also include

buffering the parking area with vegetation in order to effectively screen it from the street and the adjacent residential uses. Alternative compliance is also being requested for a buffer yard reduction from a 25-foot Type C buffer to a 20-foot Type B buffer, in lieu of a privacy fence along the north and western side of the property. The applicant hopes to gain feedback from the adjoining property owners on the type of landscaping that would be most preferred.

The two conceptual site plans included in the submittal illustrate a slight variation in the building design as it pertains to the footprint layout. The option shown in Plan A is for rectangular building. The option shown as Plan B indicates an "L" shaped building. Both building layouts propose an approximate 8,000 square foot footprint with a total building size of 31,000 square feet (1,000 square feet will be used for mechanical space.), and a maximum height of 40-feet. The design of both buildings will be as shown on the schematic elevation provided (Attachment to City Exhibit 3 – Schematic Design Elevation).

On Monday, January 19, 2005, the Technical Review Committee (TRC) approved the project subject to a number of conditions. A revised site plan and narrative provided by the applicant addresses the following conditions: scale of the drawing, a reduction in building size as required by the code, building height, number of spaces required for the development, approval of flexible development standards, location of the bicycle rack, and clarification on the applicants alternative compliance request. Should the project be approved by City Council, the remaining comments will be addressed in detail upon final submittal of the project to TRC.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   With the exception of the grade change between the development site and Hill Street, the project area is relatively flat. Grading of the site and removal of existing vegetation and overgrowth will be necessary in order to meet the stormwater and erosion control requirements and overall development of the site, as proposed.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   Approximately 2/3 of the site is surrounded by property that is zoned Office District, several properties of which are currently vacant. A landscape buffer is required around the north, south and east sides of the site where adjacent residential and lower impact uses exist. The ordinance further requires that all vehicular use areas be screened with

vegetation when within 50 feet of the street. This will assist in mitigating any negative impacts the development may have to abutting properties.

Additionally, the location and design of the building and the proposed road improvements associated with the project is likely to have a positive affect on the surrounding area and may serve as a catalyst for future development on surrounding vacant lots.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   As stated above, the majority of the site is surrounded by property that is currently zoned Office District. Although the scale and bulk of the proposed building is much larger than what is permitted within the Office District, the design and location of the building is likely to add to the character of the area. This, along with the proposed road improvements to Michael and Jason Streets, has the potential of spurring additional improvements and development opportunities on lots that are currently vacant or otherwise under utilized.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The Asheville City Development Plan 2025 (ACDP2025) describes economic development forecasts' in the *Occupational Employment Projections to 2010,* for the need in an increase in private office use, which will result in changes to residential patterns with people wanting to reside in immediate proximity to their workplace. The project supports smart growth and transportation goals by providing a compatible, high density and high quality commercial infill development project within the City Limits in an area where existing utilities are adequate to support the development and extensive infrastructure improvements to several substandard streets servicing the development, are proposed.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   This proposed development is located within close proximity to major road facilities, interstate connections, transit service and other service stations.

   Additionally, representatives of the Water Department and MSD informed the applicant, at the TRC meeting, that any relocation of the existing water lines or sewage manholes associated with the proposed improvements to both Michael and Jason Streets, are to be completed at the expense of the developer.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The City's Traffic Engineer, who has reviewed the proposed project, has determined that the size of the development and associated street improvements, including the proposed on-street parking spaces, will not cause undue traffic congestion or create a traffic hazard. Parallel parking, when placed appropriately, tends to control vehicle speeds, thus reducing crash severity, and protects the sidewalk by serving as a buffer. Parallel parking is typically desirable in urbanized areas. Examples of when this might not be true are on high-speed or high-volume roadways such as Hendersonville Road or Tunnel

Road. Hill Street, Michael Street, and Jason Street do not qualify as either high-speed or high-volume.

Pros:

- The proposed development will provide a high-quality infill site on several properties that have remained vacant for a period of 1-5 years.
- The development is providing the surrounding neighborhood with much needed road improvements to Michael and Jason Streets, including the creation of 38 on-street parking spaces that are open for public use.
- The Office Business district, due to it's proximity to existing neighborhoods limits all activities associated with non-residential uses, including deliveries and refuse collection to the hours of 7:00 a.m. and 10:00 p.m.
- The developer has submitted a list of allowed uses for the property that limits uses to those in a general office classification rather than all uses in the Office Business district. The uses provided on the list are considered low impact uses that should protect the integrity and compatibility of the development with the surrounding area and neighboring residential uses.

Cons:

- Although contrary to favorable comments received by a number of surrounding property owners at the TRC meeting, the creation and use of the on-street parking spaces by the development may be seen as an inconvenience or nuisance to adjoining property owners.
- Due to the size and scale of the proposed building the project has faced many challenges in being able to meet the City's development standards, including off-street parking requirements and required landscape buffers. The developers, have however, utilized several zoning tools available in order to address these difficulties including approval of flexible development standards for a reduction in the required number of off-street parking spaces for the development and also a request for alternative compliance to address some of the landscape issues.

Staff feels that the seven conditional use standards have adequately been addressed and that the proposed development supports several adopted City policies and goals by providing a high-density commercial infill project in an area where adequate infrastructure exists. Staff also feels that the proposed development will have a positive affect on the surrounding area, and is likely to spur additional improvements and development opportunities for properties within the immediate area that are currently vacant or otherwise under utilized.

On April 6, 2005, the City of Asheville's Planning and Zoning Commission voted unanimously to uphold staff's recommendation in recommending approval of the zoning amendment to Office Business District and also approval of the conceptual master plan subject to the following conditions:

1. That all TRC conditions be met;
2. All site lighting shall be equipped with 90 degree cut-off features and be directed away from adjoining properties and streets;
3. All existing vegetation to remain shall be clearly indicated and dimensioned on the site plan. Additionally, tree protection devices in accordance with Section 7-11-2 (c)(3) shall be provided and shown on both the grading and landscape plans;
4. In the event that the large deciduous tree shown as being preserved on the concept plan dies, a 5-6 inch caliper tree chosen from the City of Asheville's tree species list shall replace it.

In addition to the above conditions, staff also recommends that the list of uses, provided by the developer, be made a condition of approval.

1. In order to ensure that the proposed development remains in character with the general office use in which it is intended for, the development shall be limited to the following list of uses provided by the developer: Residential (Dwellings, multi-family); Recreational (no recreational uses shall be permitted); Institutional (No institutional uses shall be permitted); Public/semi-public (no public/semi-public uses shall be permitted); Office/business (offices; home occupations; studios, galleries, and workshops for artists, designers, photographers); and Uses by right subject to special requirements (antenna, government buildings, financial institutions).

Mr. Gerald Green, representing the developer, urged Council to support the development as he spoke about the ways the project meets the goals and direction of the City of Asheville.

Upon inquiry of Councilman Davis, Mr. Green said that the Chamber of Commerce building is roughly 33-34,000 square feet and this proposed building is 30,000 square feet.

Ms. Mary Hitchcock, resident at 11 Jason Street, said that she had several concerns about the project and its impact to her quality of life. Since she will be losing the parking space in front of her home (Applicant Exhibit 1), she requested the developer to construct a gravel parking space on her property, next to her house. Regarding her privacy being affected, she requested a privacy fence built along the front of her property. Regarding the disruption during construction, she was concerned about the asbestos in the structure, which will be demolished, and her access to and from her home. She asked to be notified of the various phases of construction and she may feel it would be best to relocate temporarily during some phases and she would like to be reimbursed for that expense.

Ms. Hamel said that curb and gutter will only be required on the one side of the street where the widening on Jason Street will occur, which will be on the developer's property.

After a brief discussion about providing parking for Ms. Hitchcock, Ms. Green said that the developer would be willing to make her a driveway.

A property owner on Michael Street spoke in support of the development. She did note that they also only have on-street parking, but they are not asking for a driveway to be constructed for them.

Mr. Watkins, resident of 85 Michael Street, explained to Council that his deed shows that he is the owner of some of the property that is being requested to be rezoned.

In response to Mr. Watkins, Mr. Green submitted a letter from the developer's attorney, Mr. David E. Matney, III, (Applicant Exhibit 1), which states in part "...it is our opinion neither Mrs. Watkins, nor any one claiming through her has any interest in any lands owned by Frontier Syndicates, LLC. ... While the Watkins parcel adjoins the Frontier Syndicate property, we have found no evidence of any ownership by Mrs. Watkins, or any one claiming through her in the Frontier Syndicate property." Mr. Green said that Mr. Matney, the developer's attorney, will be willing to work with Mr. Watkins or his attorney to resolve Mr. Watkins' claim.

City Attorney Oast said that City Council is not the appropriate venue for a dispute of this nature. This is an issue between private property owners and if it turns out that the developer does not own the property, the conditional use permit will be void.

Upon inquiry of Vice-Mayor Mumpower, Ms. Hamel said that the developer would be required to get permits from the Air Quality Agency prior to any demolition.

At the request of Vice-Mayor Mumpower for staff to craft some language about providing a parking space, Ms. Hamel suggested the following condition: "The developer shall address the parking impact created by the development to a single-family residential property owned by Mary Hitchcock located on the east side of Jason Street, with an amount to not exceed $5,000."

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:11 p.m.

Vice-Mayor Mumpower moved to approve the conditional use rezoning for property located on Hill Street from RM-8 Residential Multi-Family Medium Density District and Office District to Office/Business District/Conditional Use. This motion was seconded by Councilman Newman.

Councilwoman Bellamy said that she would not support this action. She feels the development does not comply with Condition No. 4, in that the proposed development is too large for the neighborhood.

The motion made by Vice-Mayor Mumpower and seconded by Councilman Newman carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

ORDINANCE BOOK NO. 22 - PAGE 72

Vice-Mayor Mumpower moved to adopt Ordinance No. 3234 to issue a conditional use permit for property located on Hill Street for the construction of a 30,000 square foot office building, associated parking area(s) and realignment of Michael Street and Jason Street to provide on-street parking, subject to following conditions: (1) That all TRC conditions be met; (2) All site lighting shall be equipped with 90 degree cut-off features and be directed away from adjoining properties and streets; (3) All existing vegetation to remain shall be clearly indicated and dimensioned on the site plan. Additionally, tree protection devices in accordance with Section 7-11-2 (c)(3) shall be provided and shown on both the grading and landscape plans; (4) In the event that the large deciduous tree shown as being preserved on the concept plan dies, a 5-6 inch caliper tree chosen from the City of Asheville's tree species list shall replace it; (5) In order to ensure that the proposed development remains in character with the general office use in which it is intended for, the development shall be limited to the following list of uses provided by the developer: Residential (Dwellings, multi-family); Recreational (no recreational uses shall be permitted); Institutional (No institutional uses shall be permitted); Public/semi-public (no public/semi-public uses shall be permitted); Office/business (offices; home occupations; studios, galleries, and workshops for artists, designers, photographers); and Uses by right subject to special requirements (antenna, government buildings, financial institutions); and (6) The developer shall address the parking impact created by the development to a single-family residential property owned by Mary Hitchcock located on the east side of Jason Street, with an amount to not exceed $5,000. This motion was seconded by Councilman Newman.

Councilman Dunn was comfortable with the developer helping Ms. Hitchcock with a driveway, however, was uncomfortable attaching a random dollar figure for that.

Vice-Mayor Mumpower said that Mr. Green suggested the $5,000 cap, although he assumed it would be a much lower figure.

The motion made by Vice-Mayor Mumpower and seconded by Councilman Newman carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

ORDINANCE BOOK NO. 22 – PAGE 74

E. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 66 LONG SHOALS ROAD FROM INSTITUTIONAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED KENNEL OCCUPANCY**

ORDINANCE NO. 3235 - ORDINANCE REZONING PROPERTY LOCATED AT 66 LONG SHOALS ROAD FROM INSTITUTIONAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3236 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 66 LONG SHOALS ROAD FOR A PROPOSED KENNEL OCCUPANCY

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:30 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of a request to rezone property located at 66 Long Shoals Road from Institutional District to Commercial Industrial District/Conditional Use, and a request to issue a conditional use permit for a proposed kennel occupancy.

The subject property is being considered for the addition of a Pet Adoption Center building with associated parking on a 2.63 acre lot. The proposed building will be at the back of the lot, near three existing structures (Attachments to City Exhibit 3 – Location Map, Aerial Map). The lot is on the north side of Long Shoals Road within the City of Asheville's corporate limits. The applicant seeks for the lot to be rezoned from Institutional to Commercial Industrial-CUZ (Attachments to City Exhibit 3 - Existing Conditions Map, Proposed Site Plan, Perspective Drawing).

Kennels are a permitted use (classified as "high impact") in the Commercial Industrial district. The project would involve construction of a new building with an area of 3220 square feet, placing it within the acceptable structure size standards, and exempting it from open space

requirements. Parking areas are shown on the plan and appear to have a sufficient number of spaces.

At their March 21, 2005, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the Conditional Use Rezoning and concept plan proposal and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission, with the following project conditions summarized below. The applicant agreed at the meeting to comply with these conditions.

1. Applicant must provide specific information about the area of the potential future grooming shop building.
2. Sewer easements must be shown.
3. Applicant must document and label other historic easement lines as no longer valid.
4. Buffers must be provided between proposed use and funeral home (type "A") as well as between proposed use and residence (type "D"). Existing vegetation can be used towards alternative compliance in buffer areas and parking lot landscaping, but must be fully documented
5. Area calculations will be required for the vehicular use area.
6. Entire site will have to be brought into compliance – e.g. parking lot landscaping must be
7. specified for existing parking area as well.
8. Street trees at south end of parcels must be identified and either shown to meet City of Asheville requirements, or more street trees must be planted.
9. Sidewalk (or fee-in-lieu) must be provided along Long Shoals Road
10. The existing roadway will need to be upgraded to a min. of twenty feet of width from Long Shoals Road to the one-way split. The entire roadway will also need to an all-weather surface capable of supporting an imposed 75,000 lb. vehicle load. A fire hydrant capable of flowing 500gpm must be provided within 400 ft. of the new building. The developer is responsible for installing all needed fire protection improvements.
11. Driveway apron must be paved per City Standard Detail 3.15
12. Applicant must submit plans if buildings are to be sprinkled.

At their April 6, 2005, meeting, the Planning and Zoning Commission approved the application by a 5-1 vote, subject to the following conditions:

1. TRC conditions must be met.
2. Hours of outdoor animal exercise shall be consistent with the provisions of the noise ordinance. (As with the use of lawn mowing equipment), such exercise shall be permitted only between the hours of 8:00 a.m. and 9:00 p.m. (see UDO Chapter 10-85).
3. All site lighting shall be equipped with 90 degree cut-off features and be directed away from adjoining properties and streets.
4. All existing vegetation shall be clearly indicated and dimensioned on the site plan.
5. Tree protection devices, in accordance with Section 7-11-2 (c) (3) of the UDO shall be provided and shown on both the grading and landscape plans.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The site design is indeed compatible with the surrounding natural features and topography.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   Staff does not expect that the proposed use would have anything more than a minimal impact on property values. The applicant reports that all neighbors have given their support.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The proposed project would be in harmony with these characteristics of the area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The proposed development indeed conforms to the official plans and policies of the City of Asheville. Potential sidewalk improvements are one example of a stated City goal that this project could further.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   The project's location on Long Shoals Road ensures access to major transportation facilities and other services. Technical Review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Pros

- Project appears to have the blessing of neighboring property owners.
- Approval would allow the construction of a project perceived as a "good cause."

480

Cons

- The kennel might not be viewed with the same support if nearby properties were to change hands.

Staff recommends approval of the rezoning request from INST to CI-CUZ with approval of the associated Conditional Use Permit and conceptual site plan, subject to the condition that all outstanding TRC conditions and Planning and Zoning Commission conditions are met.

Ms. Virginia Schmidt, property owner, said that this will be a self-contained building and there will probably be a maximum of 30-35 cats and dogs. She said that here are no future plans for expansion near the street.

Councilman Davis was concerned that future development near the street would disturb grieving families at the funeral home located on the west side of the property. City Attorney Oast noted that the site plan is incorporated into the conditional use permit and if there were any changes, they would have to come before City Council for a modification of the permit.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:43 p.m.

Councilwoman Jones moved to approve the conditional use rezoning for property located at 66 Long Shoals Road from Institutional District to Commercial Industrial District/Conditional Use. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 81

Councilwoman Jones moved to adopt Ordinance No. 3236 to issue a conditional use permit for property located at 66 Long Shoals Road for a proposed kennel occupancy, subject to the condition that all outstanding Technical Review Committee conditions and Planning and Zoning Commission conditions are met. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 83

At 6:45 p.m., Mayor Worley announced a recess.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. CONSIDERATION OF A ZONING STUDY OF THE WESTERN END OF SARDIS ROAD

Director of Development Services Joe Heard said that this is the consideration of a request from property owners for a zoning study for properties along the western end of Sardis Road, near the intersection with Sand Hill Road.

Section 7-7-2 of the Unified Development Ordinance (UDO) provides property owners with a method to petition City Council to authorize a zoning study for property not entirely owned by them. The Code requires that at least 51% of property owners in the area join the request and, in this case, the percentage has been reached. The petition process does not require City Council to ask staff to undertake the zoning study; it only requires that Council consider the request.

The area included in the petition is described on the Map #1. In the staff's opinion, this area does not contain all relevant property that should be examined in a zoning study. If Council directs that staff analyze the zoning of this area, then it is recommended that the area be expanded to the proportions illustrated on the Map #2 including all of the CB-II zoned area.

The request is prompted by the petitioners' belief that much of the current development in this area does not comply with the standards for development (particularly restrictions on car sales lots and parking location requirements) in the Community Business II (CB-II) district. The petitioners would prefer a zoning designation of Commercial Industrial (CI) to maximize the number of allowed uses, bring most of the current development into conformity, and allow for future development standards to be more consistent with the current development pattern.

Pro –

- The zoning study would enable the issue about the appropriate zoning of this neighborhood to be decided by City Council.

Con –

- The study will consume limited staff resources that could be devoted to other projects.

Planning & Development staff is presently involved with projects such as annexation coordination, development review, neighborhood planning, and other special studies to implement Council's strategic plan goals. Performing a zoning study for the Sardis Road area would require some of these other duties to be reprioritized. If City Council desires the requested rezoning study be performed, then staff recommends that the study encompass the larger area described in Map 2.

At the request of City Council at their April 19, 2005, worksession, Planning & Development Director Scott Shuford provided City Council with a memo containing responses to the following questions: (1) is there a time sensitive nature of the zoning study relative to the petitioners; (2) what is the effect of the zoning study might have on the Planning Department's current work program; and (3) a doable timeframe to perform the zoning study that doesn't interfere with the current work program.

Mr. Paul Smith, property owner on Sardis Road, urged City Council to study the west end for a commercial industrial designation since most businesses are out of compliance with the Community Business II designation.

Ms. Robinson, area business owner, also requested Council to study the west end of Sardis Road because it limits any expansion of her property.

In response to Vice-Mayor Mumpower, Planning & Development Director Scott Shuford explained the methodology of a zoning study. He said this particular study is not an extremely complicated one and would require approximately 40-50 hours of staff time to study the staff-recommended area of Sardis Road.

Councilman Davis wondered if it would be better to study the entire corridor since it is the most available and easily developable land we have near the City.

Councilwoman Bellamy felt that an entire corridor study would also benefit the Water Resources Department as it relates to future growth and water line extensions.

Upon inquiry of Mayor Worley, Mr. Shuford said that given his department's current workload, he felt that in about six months they could concentrate on the zoning study.

In response to Councilman Dunn, Mr. Shuford said that he would not hesitate to ask Council to reprioritize his work program. In fact, another possibility is that a consultant could be hired to perform the study, however, they do not have funds in their current budget for that.

Upon inquiry of Councilman Davis, Mr. Smith urged council to move forward quickly on the study of the western end of Sardis Road.

Regarding an entire corridor study, Mr. Shuford said the center portion of Sardis Road seems to be less likely for us to be recommending any change. Perhaps they can look at the entire corridor study and come up with a phased approach of how we would look at it, because it may not make much sense to hold a public meeting, for example, that covers the entire corridor and find out that the real interest is only in one end or the other. We can do that in a phased program and bring it back to Council in pieces. City Council was in consensus of Mr. Shuford's phased zoning study for Sardis Road.

Councilman Davis moved to authorize the Planning Department perform a zoning study for the western Sardis Road area, which encompasses the larger area described in Map 2. This motion was seconded by Councilwoman Bellamy and carried unanimously.

B. RESOLUTION NO. 05-109 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE FILM COMMISSION

Vice-Mayor Mumpower said that there currently exists a vacancy on the Asheville Film Commission until November 1, 2006.

At the City Council's worksession on April 19, 2005, City Council instructed the City Clerk to arrange interviews for Donna Daniels and Mary Trimarco.

After each Council member spoke in support of both candidates, Ms. Donna Daniels was unanimously appointed as a member to the Asheville Film Commission, to serve the unexpired term of Heidi Daugherty, term to expire November 1, 2006, or until her successor is appointed.

Mayor Worley said that he would like to have Ms. Trimarco, AdvantageWest Film Commission, considered for the next available position on the Film Commission, or to amend the ordinance to include a position for the AdvantageWest Film Commissioner. He said that an ex-officio voting member may be appropriate and asked Council to consider the change.

Councilwoman Bellamy would support the addition of the position. One thing the Film Commissioner would bring is collaboration and less duplication of services between the two agencies.

Vice-Mayor Mumpower, member of the Film Commission, said that the 13-member Film Commission is an unusually large board. He suggested having City Clerk Burleson express Council's interest to the Film Commission and ask them to deliberate the idea and report back to Council with their observations and thoughts.

Councilwoman Jones felt there is structural value to think regionally and would like the input of the Film Commission.

It was the consensus of Council to ask the City Clerk to contact the Film Commission to let them know there is an inclination on the part of Council to include an ex-officio voting seat on the Film Commission for the AdvantageWest Film Commissioner. City Council is requesting the Commission's input and staff will report back to Council with their thoughts at an upcoming worksession.

VI. OTHER BUSINESS:

DISCUSSION OF WATER NEGOTIATIONS WITH BUNCOMBE COUNTY

RESOLUTION NO. 05-111 – RESOLUTION ADVISING OUR LOCAL DELEGATION THE STATUS OF WATER AGREEMENT NEGOTIATIONS WITH BUNCOMBE COUNTY AND EXPRESSING CITY COUNCIL'S OPPOSITION TO SULLIVAN ACTS 2 AND 3

Mayor Worley said that it has been a year since we gave notice of termination of the water agreement and we have had a lot of conversations back and forth over that period of time and a mediation meeting. Out of that, Council has the desire to pull things together from a Council standpoint.

Councilman Newman said no issue looms larger in front of City Council than the future of our water system. There is a strong desire on the City Council's part to find an agreement that will be good for the future of Asheville citizens, good for the future of the Asheville water system, and also fair for the water customers who are located outside Asheville. He shared some ideas that he has heard from conversations with his fellow Council members, from conversations he has had with members of the Buncombe County Commissioners, and from members of the community. To get an agreement, we know that both sides are going to have to compromise and find that middle ground. He said was speaking for himself only but hoped this proposal reflects some of the ideas he has heard from Council collectively.

Problems with the current water agreement: (1) families in Asheville pay the highest water rates of any large city in North Carolina; (2) the current agreement prevents vital repairs to the water infrastructure (a) budget approval requires consensus of Water Authority, Asheville and the County; and (b) water revenues are diverted to the general fund of Asheville and County government; and (3) Asheville has a weak voice in governance of the water system.

Positive aspects of the current water agreement include (1) residents in Asheville are reimbursed for County law enforcement services not provided in Asheville; and (2) County takes responsibility for some recreational facilities used by people county-wide.

He provided a few thoughts about what Asheville wants from a new water agreement: (1) a stronger voice for Asheville in the future of our water system; (2) a guaranteed way to invest in water line repairs; (3) more accountability to voters and water customers; (4) relief for families in Asheville who pay the highest rates in North Carolina; (5) a less divisive process for annexation; (6) prevent double taxation of families and businesses in Asheville – tax equity; and (7) partnerships with the County and legislators on Civic Center and recreational facilities.

Concerns we have heard are: (1) extreme water rates for customers outside Asheville; (2) customers outside Asheville could be forced to annex as a condition of receiving water; (3) aggressive "satellite annexation"; (4) County wants a voice in the future of water system too; and (5) if a new agreement is not reached – costly litigation.

A proposal from Asheville for the future of our water system is (1) all current water customers would be guaranteed water; (2) no current water customers could ever be annexed for water service; (3) Asheville retains ownership of its water assets; and (4) partnership between Asheville and Buncombe County on the future of water and regional recreational facilities.

Key elements are:

(1) A more accountable empowered water board. (1) creation of a new water board (a) Asheville has 4 representatives, Buncombe County has 3 representatives; (1a) Asheville owns almost all assets; (1b) majority of customers are in Asheville; (2) Board is allowed to approve water authority budget; and (3) accountability – Asheville will appoint elected officials.

(2) A plan to fix the water system. (1) 100% of water revenues will be dedicated to water infrastructure and services – no diversions; (2) $1.5 Million per year increase to repair water lines; (3) will reduce pressure to raise water rates in the future; (4) will cost city of Asheville $1.1 Million; and (5) will cost Buncombe County government $500,000.

(3) Setting fair water rates. (1) what is true cost of delivering water: (a) 645 customers per square mile in Asheville; (b) about 100 customers per square mile outside Asheville; (c) the system would not exist without Asheville (d) 25,000 acre watersheds are source of most water; (2) NC Average – 85% higher rates for suburban and rural areas; (3) Asheville proposes a rate differential half of the state average – 35%; (4) lower rates for families in Asheville by 10-15%; (5) increase on outside customers no more than 20-25%; (6) permanent caps on rate differential; and (6) could be phased in to prevent sudden increase in water rates.

(4) A reasonable process for annexation. (1) no current water customers could be annexed for water service; (2) no aggressive satellite annexation; (3) only larger new developments proposed along periphery of Asheville could be asked to annex for water service; (4) such developments would be annexed anyway; and (5) a less contentious process.

(5) Asheville and County partnerships on recreational facilities. (1) County will continue to manage The Nature Center and Recreation Park – will receive title to these facilities; and (2) Asheville will resume management of McCormick stadium and the golf course.

(6) A realistic plan to maintain and improve the Civic Center. (1) Asheville taxpayers currently subsidize Civic Center $750,000 per year; (2) Civic Center needs $10-15 Million in short term repairs; (3) estimated 80% of Civic Center customers live outside Asheville; (4) proposal – County invests $500,000 to help finance annual operating costs; (5) proposal – County invests $750,000 to help finance near-term capital improvements; (6) Asheville and County jointly request support from our legislative delegation for a new funding source; and (7) if no new funding source is developed, County will make some additional investments for capital improvements.

This proposal would clarify tax equity payment in the current agreement: (1) law enforcement reimbursement will be set at $2 million per year – clarifies existing policy.

Lifetime of the proposed water agreement: Agreement would last 15 years (1) both sides would have to agree to terminate; (2) after 15 years, either side could withdraw with 12 months notice; and (3) agreement would automatically terminate if anti-Asheville water legislation is passed in the N.C. legislature.

Summary of the proposed agreements includes: (1) all current customers are guaranteed water service; (2) creation of a more empowered, accountable water board; (3) Asheville retains its water assets and has a stronger voice in water governance; (4) Buncombe County also has a strong voice in water governance; (5) greater investment in water infrastructure – no diversions; (6) relief for water customers in Asheville; (7) assure to customers outside Asheville that rate increases will be modest; (8) no current customers could be annexed for water service; (9) no aggressive satellite annexation; (10) a realistic plan to maintain and improve the Civic Center; and (11) Asheville, Buncombe County and legislators avoid expensive and divisive litigation.

Councilman Newman urged City Council to support this proposal for the future of our water system and forward it for consideration to the Buncombe County Commissioners.

Vice-Mayor Mumpower said that Councilman Newman offers some good insights and suggestions; however, he has significant concerns about the overall proposal. He was concerned about the whole process. He has not participated, intentionally, in the formal negotiations because he felt the outcome was established before we started. He felt that we will not get to good places through bad means. He then read the following "Resolution of commitment regarding water negotiations between Buncombe County and the City of Asheville. Whereas, in June of 2004, the City Council of Asheville, following procedures outlined in the existing water agreement, announced its intentions to end that agreement on or about July 1st of 2005; and Whereas, the City Council of Asheville has endorsed a commitment to fact based and fair negotiations on how best to dissolve the current water agreement and establish a new agreement offering just treatment to the citizens of Asheville, Buncombe County and the region; and Whereas, the City of Asheville is the only city of size in Buncombe County and, in fact, the State of North Carolina that does not manage its own water assets and offers no indication of unique incapacity to do so; and Whereas, residents of the City of Asheville pay approximately double the property taxes of those living outside the City; and Whereas, Buncombe County requested that negotiations be postponed until after the recent election and soon thereafter began a misinformation campaign and rigid negotiation posture that has impaired the negotiation process; and Whereas, the State Representatives of Asheville and Buncombe County have, from the onset of negotiations, have inappropriately threatened to introduce legislation against the City and in doing so artificially contrived their desired outcome to this local government issue; and Whereas, our State Representatives and Buncombe County have taken the unusual and ill conceived step of co-writing legislation that assures that negotiations based on facts and fairness are not possible; and Whereas, the City of Asheville does not believe that it is prudent, possible, or appropriate to participate in negotiations that are artificially contrived and controlled by external forces; and Whereas, the quality of life, economic stability, and future viability of our region is heavily founded in stable local government and a well managed, supported, and maintained water system. Now, therefore, be it resolved by the City Council of the City of Asheville that (1) we affirm a commitment to supporting a regional water authority if the means can be found to fully and fairly compensate the citizens of Asheville for the value of their water assets conservatively estimated at $75,000,000, excluding the two primary watershed properties, and that baring this desired outcome, we commit to assuming management of the water system by providing a reasonable rate cap to County residents that is no greater than half of what the state average represents, along with additional caps on monies received by the City from the system and other constraints that assure protection to Buncombe County residents; (2) we further respectfully submit a formal request that our State Delegation withdraw pending legislation that is impairing our collective ability to resolve our water negotiations in constructive fashion; and (3) we further request that the Buncombe County Commission return to an open and public negotiation table with a renewed commitment to time sensitive deliberations toward an agreement coached in facts and fair consideration of all citizens of Buncombe County, including residents of the City of Asheville." Although he would not make a motion to adopt the resolution, he was grateful for the opportunity to speak out directly to some of those concerns.

The following individuals commented on the water agreement: Mr. Fred English, Mr. Roy McGuinn, Ms. Leesa Kulba, Mr. Mike Fryer, Mr. Jerry Rice and Mr. Chris Pelly.

Councilman Dunn said that no where during these negotiations has the delegation, County Commissioners, Asheville Citizen-Times, nor Chamber of Commerce given serious thoughts about the rights of the citizens of Asheville. This proposal shows a fair council, not a city council that is greedily trying to reach out and charge people ridiculous water rates. The system is not equitable and the pending legislation is tying our hands. Even though the water agreement has little to do with the room tax, the County brought the Civic Center into the negotiations. And,

since the delegation has seen fit to enter into these negotiations and interfere with two local governments, they have become an issue and they now need to become part of the solution. The County offered to give the City $750,000 for the Civic Center. But basically 38% of everything the County gives the City is City taxpayer money in the first place. In the proposal we ask that the City and County jointly request support from our legislative delegation for a new funding source. In fact, for years the state delegation has supported room tax increases throughout the state, except in Asheville. He feels it's time for the legislators commit to give Asheville a room tax to go toward the renovation of the Civic Center. He would not be able to support any proposal until the delegation commits that support to us. He felt that since the delegation interfered with these negotiations, he felt it was time for them to help with the solution.

Mayor Worley said that a proposal was sent to the County Commissioners back on March 23, 2005, which is very substantially similar as the current proposal. He also feels like the pending legislation has taken us away from a level playing field and has tainted the negotiations, but we need to work with what we have been dealt. He felt Councilman Newman's proposal is a compromise for everyone. He clarified that in terms of the diversion of water revenues that are currently coming to the City and County, that from the City's standpoint we would phase that in. He agrees that the County should chip in to help finance the annual operating costs, but the real key is the long-term capital needs for the Civic Center. To fix it right will take a substantial revenue source that will enable us to float a bond issue of about $30-35 Million. In terms of the Civic Center he would suggest that the County put in to help finance the annual operating costs, partner with us to go to delegation and put pressure on the delegation to find us a revenue sources (whether a room tax; a food or beverage tax, or some other tax) to give us that amount of revenue. But, it needs to be a genuine partnership with Buncombe County, because if they don't step up to the plate, then they will have to put in additional money to at least help the City finance the status quo of the Civic Center (approximately $10-15 Million). He would like to tie those two together so there truly is a partnership and there is an economic incentive to be in that partnership to go to the legislature. Regarding the law enforcement reimbursement at $2 Million a year, the County has indicated the potential for growth in that figure of about a $60,000 a year increase. He wants to make sure that is part of the proposal. Lastly, we really need to be able to terminate the agreement anytime there is a law passed that would prohibit Asheville's ability to annex, particular law prohibiting the ability to use the water in a way that is conducive to the annexation. He felt the concepts of the proposal are sound and asked that his changes be included in the proposal.

Councilwoman Newman agreed with the changes in the proposal suggested by Mayor Worley.

Councilman Davis felt the proposal is a good compromise and stressed that he would like to see Asheville have the ability to perform as other cities do throughout the state.

Councilwoman Jones said that we may have made some less than perfect decisions around negotiations, we have talked and listened to a lot of citizens in Asheville and Buncombe County.

Councilman Newman explained that the Sullivan Act, which was passed in the 1930's, doesn't say that the City can't charge different rates anywhere in Buncombe County. The short story is that there were some water districts in Buncombe County that used to operate their own systems and the people in those parts of the County issued bonds to pay for those water lines out of their own tax money. What the Sullivan Act says is that in those old water districts, outside of Asheville, we can't charge a different rate on those lines because those water customers in Buncombe County paid for those lines themselves. Those are the only waterlines in Buncombe County that the Sullivan Act applies to and most of those areas are actually in the City of

Asheville now. However, we would not charge a different rate for the water lines that are controlled by the Sullivan Act.

Councilman Newman moved to support the proposal (with Mayor Worley's suggestions) and forward it to the Buncombe County Commissioners and our legislators to make them aware of where we are at and the major concessions that Asheville has made in the spirit of seeking compromise. And, that the City will continue to engage in good faith negotiations with our County Commissioners to work our a final agreement. This motion was seconded by Councilwoman Bellamy.

Councilman Dunn asked for an amendment to the proposal that the agreement would automatically terminate if anti-Asheville water legislation is passed in the NC legislature, or if no legislation is passed to give Asheville a menu of items for the Civic Center.

Councilman Newman's only concern about Councilman Dunn's amendment is that the primary bodies that have to work things out are the Asheville City Council and the Buncombe County Commissioners. The legislators have been involved, but he doesn't want to give them veto power, by their action or their inaction, to unravel the entire agreement.

Councilman Dunn pointed out that the legislation was written by the County Attorney.

Vice-Mayor Mumpower said that Asheville is the only City in Buncombe County and only City in the State that owns its assets and is not able to manage them (other than the unique circumstance in Chapel Hill). We have spent months educating people about fairness, the fact that City residents pay double rates in the city, the high City water rates, the value of the system, and need for an authority and he feels Councilman Newman's proposal is stepping away from the foundation that we have been laying for a long time. He feels we are doing it because we are being blackmailed. This agreement contains the reshuffling of the same old semi-authority. His concerns are that we retain ownership, but with very little control. The agreement doesn't offer fair compensation of the value of the system and the watersheds. The research says that $750,000,000 is an equitable estimation of the water system, which value is based on the replacement value of it being a crucial, irreplaceable infrastructure. What kind of council would give that asset or control away without fair compensation? He has no fixed position on a city managed system or a water authority, but if we are going to have an authority then the citizens of Asheville should be fairly compensated. The plan deceives people because it doesn't even begin to fund the costs of the system and the rates will have to go up dramatically for everyone involved in the very near term. This agreement locks us into paralyzing agreements and caps that we can't get out of this for 15 years. The rate caps are excessive in terms of what we are gaining for them. This agreement shows that a large portion of the County dollars comes from City residents, so when the County gives the City a chunk of money back, a large portion of that money comes from the very people they are supposedly assisting. He didn't think the water agreement is where we should be trying to deal with the Civic Center renovation. What we basically have here is a strategy for surrender. He feels we should stick by facts and fairness. He encouraged City Council to show more courage and not step back from a defensible position on this.

Councilwoman Bellamy said that prior Councils have been trying to get out of the water agreement because they see the problems in the current system that we have. We need to provide safe water for people to drink and that has been left out of the conversations by the County Commissioners and the legislators until recently. She felt we need to put more funds into making the water system better. Although we are paying the highest water rates, our infrastructure needs to be addressed. She believed this proposal begins to get us in the right direction.

Asheville now. However, we would not charge a different rate for the water lines that are controlled by the Sullivan Act.

Councilman Newman moved to support the proposal (with Mayor Worley's suggestions) and forward it to the Buncombe County Commissioners and our legislators to make them aware of where we are at and the major concessions that Asheville has made in the spirit of seeking compromise. She felt we need to put more funds into making the water system better. Although we are paying the highest water rates, our infrastructure needs to be addressed. She believed this proposal begins to get us in the right direction.

The motion made by Councilman Newman and seconded by Councilwoman Bellamy carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

Councilwoman Newman moved to instruct the City Attorney to draft a resolution advising our local delegation the status of water agreement negotiations with Buncombe County and expressing City Council's opposition to Sullivan Acts 2 and 3, with the precise language of the resolution to be circulated amongst Council members. This motion was seconded by Councilman Dunn and carried unanimously.

Upon inquiry of Councilwoman Jones, Assistant City Manager Richardson said that we have contacted the Buncombe County Commissioners about setting up a public meeting but have not heard back from them yet.

RESOLUTION BOOK NO. 29 – PAGE 135

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Mumpower invited the public to participate in the For Our Kids program (which Program he and Councilwoman Bellamy share responsibilities in) on Saturday, May 14, 2005, at the Klondyke Apartments for a clean-up project.

Mr. Fred English commented on the Civic Center, the requested historic designation of the Sawyer building, and the lack of interest the local delegation showed to flooded areas in our vicinity.

Mr. Jerry Rice commented on the costs to developers for installing water lines in their developments.

Mr. Roy McGuinn suggested a payroll tax be implemented.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:37 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

BUNCOMBE COUNTY

CITY OF ASHEVILLE

CITY COUNCIL

MINUTES

VOLUME: 78

(MAY 17, 2005 - JANUARY 21, 2006)
(PAGES: INDEX – 472)

CITY OF ASHEVILLE

Through Truck Prohibitions – Speed limit changes to various streets and through truck prohibitions, 46
Tiffany-Davis, Emily - Claim, 33
Top a Stop Program - Endorsement of this bus stop initiative, 359
Tourism Authority - Council instructed City Clerk to arrange interviews, 197
Tourism Development Authority - Appted Eric Scheffer, 205
Town Square East area – Amendment to Annexation Services Plan, 83
Town Square East Area - Annexed into City, 88
Town Square East area – Public hearing to annex, 42
Transit - NC DOT agrmt for reimbursement of funds for bus service to Black Mountain, 411
Transit Commission - Report on their retreat and request to set up Transportation Demand Management Commission, 455
Transit Commission - Update on their retreat, 251
Transit Garage - Contract with Carolina Specialties for roof replacement at Transit Garage, 430
Transit Services - Agreement with NC DOT to operate bus service to Weaverville, 169
Transportation Advisory Committee - Appted Bryan Freeborn and Brownie Newman as regular members and Robin Cape and Jan Davis as alternate members, 462
Transportation Center - Agrmt with NC DOT for purchase of property for a multi-modal transportation center, 58
Transportation Demand Management Commission - Request to establish, 455
Treetop Road - Discussion of acceptance as a City maintained street, 51, 65
Trimarco, Mary - Appted to Film Commission, 40
Triple H Drive - New street name, 98
Tunnel Road - Public hearing for conditional use permit for Four Seasons Plaza on Tunnel Road, 102
Tunnel Road, 966 - Conditional zoning for 966 Tunnel Road, 415

Two Town Square area – Amendment
to Annexation Services Plan, 83
Two Town Square area – Public hearing
to annex, 42
Two Town Square Area - Annexed into
City, 87

UCANSIGN2 Week - Proclamation, 208
UDO - Amendment to add general retail sales as a use of right in the Neighborhood Business District, 227
UDO - Amendment to add provisions for umbrella signs, 182
UDO - Amendment to change definition for adult establishments., 183
UDO - Amendment to establish live-work unit requirements, 153
UDO - Discussion for clarification of direction from Council on this UDO amendment for open space standards revisions, 124
UDO - Discussion of amendment to add provisions for umbrella signs, 122
UDO - Discussion of amendment to application deadlines, 310
UDO - Discussion of amendment to change definition for adult establishments., 123
UDO - Discussion of amendment to create a new Light Industrial District, 56
UDO - Discussion of amendment to establish live-work unit requirements, 123
UDO - Discussion of amendment to open space standards, 56
UDO - Discussion of amendment to procedures and standards for subdivisions, 54
UDO - Discussion of amendments regarding acts of the state legislature, 357
UDO - Discussion on addition of general retail sales as a use of right in Neighborhood Business District, 193
UDO - Public hearing and amendment for procedures and standards for subdivisions, 106
UDO - Public hearing and discussion of amendment to the UDO regarding open space standards revisions, 109
UDO - Public hearing for amendment to the UDO to create a new Light Industrial District, 108
UDO - Public hearing rescheduled to delete Planned Unit Development Zoning Overlay District, 367
UDO - Public hearing to adopt conditional zoning, 25
UDO - Public hearing to amend UDO to amend specific deadline requirements for rezoning and zoning study petitions, 328
UDO - Public hearing to amend UDO to conform with requirements of State Law including protest petition changes, 375
UDO Amendments - Three amendments not discussed due to lateness of hour, 461
UNC-Asheville Chancellor - Recognition of new Chancellor Ann Ponder, 312
United Way - Recognition of great City campaign, 426
US Dept of Homeland Security - Application for grant to assist with hiring of firefighters, 53
US Dept of HUD - Addendum to MOU for enforcement of fair housing by A-B Fair Housing Commission, 211
US Dept. of Homeland Security - Budget Amendment for fire dept equipment, 163
US Dept. of Homeland Security - Grant money from US Dept of Homeland Security for fire department equipment, 39
US Tennis Association - Budget amendment for grant from US Tennis Association for Aston Park Tennis Center, 428
Utility Franchise Taxes - Agreement with CP&L to settle litigation regarding annexation of the Lake Julia Power Plant and amend agreement regarding utility franchise taxes, 386

Vanderbilt Apartments - Housing Trust Fund loan, 361
Vaughn & Melton Consulting Engineers - Awarded contract for East Oakview Road Bridge Replacement, 36
Victoria of Asheville Board of Directors - Appted Bob Oast, 261
VIPER Communication System – Application for grant with NC Dept of Crime Control & Public Safety to implement VIPER communication system, 16
VIPER Communication System - Discussion of apply for grant with NC Dept of Crime Control & Public Safety to implement VIPER communication system, 6
Virginia Avenue - Public hearing withdrawn for conditional use permit amendment to Brotherton Commons at Virginia and Brotherton Avenues, 20
Vorst, Tim and Wendy - Housing Trust Fund Loan approved, 37

Wal-Mart – Final reading to approve outparcel use based on new traffic study for Riverbend Marketplace development on Bleachery Boulevard, 204
Wal-Mart - Process discussed for Wal-Mart public hearing on Smoky Park Highway, 459
Wal-Mart - Public hearing to consider outparcel use based on new traffic study for Riverbend Marketplace development on Bleachery Boulevard, 175
Walton, Josh - Recognition of fire dept employee, 426
Water Agreement - Budget amendment for legal fees related to Sullivan Acts II and III, 283
Water Agreement - Budget amendment to reflect revisions resulting from termination of water agreement, 112
Water Agreement - Continuing and readopting policies and ordinances applicable to operation of the water system, 113
Water Agreement - Discussion of budget and termination of water agreement, 96
Water Agreement - Discussion of Buncombe County proposal, 33
Water Agreement - Discussion regarding negotiations of termination of water agreement, 93
Water Agreement - Execution of documents to comply with covenants of City's water system revenue bonds for termination of water agreement, 68
Water Agreement - Joint meeting with Buncombe County Commissioners on water agreement termination, 60
Water Authority - City request to County for public meeting regarding water authority, 50
Water System - Agrmt with Schnabel Engineering South to update water reservoir operations and emergency action plans, 380
Water System - Budget amendment to update water reservoir operations and emergency action plans, 381
Water System - Contract with EMA Inc. and MRO Software for computerized maintenance management system for water utility, 445
Water System - Contract with McGill Associates for water system improvements, 18
Water System - Discussion of agrmt with Schnabel Engineering South to update water reservoir operations and emergency action plans, 353
Water System - Discussion of budget amendment to update water reservoir operations and emergency action plans, 353
Water System - Discussion of contract with McGill Associates for water system improvements, 5
Water System - Discussion of dedication of a funding source for capital improvements and fee established, 351
Water System – Motion to accept Brown & Caldwell Report to dedicate a funding source for capital improvements and fee established, 377
Water System Refunding Revenue Bonds - Application to the Local Government Commission for water system refunding revenue bonds, 280
Water System Refunding Revenue Bonds – Approval of Order issuing, 339
Water System Refunding Revenue Bonds - Order issuing, 338
Waters, Kimbra - Claim, 330
Weaverville - Agreement with NC DOT to operate bus service to Weaverville, 169

Weaverville - Budget amendment to operate bus service to Weaverville, 170
Weed, Rob - Claim, 185
Weeks, Cindy - Reappted to Planning & Zoning Commission, 205
West Black Oak Drive - Accepted portion of Black Oak Drive and West Black Oak Drive for public maintenance, 333
West Chestnut Street - Clerk to advertise exchange of portion of property on W Chestnut St for portion of property on Magnolia Ave from Allen & Susan Roderick, 336
West Chestnut Street - Exchange of portion of property on W Chestnut St for portion of property on Magnolia Ave from Allen & Susan Roderick, 364
West Greenbriar Road - Amended resolution to close West Greenbriar Road, 283
West Haywood Road - Agreement with NC State Historic Preservation Office for preparation for National Register Nomination, 65
West Haywood Road – Budget amendment for agreement with NC State Historic Preservation Office for preparation for National Register Nomination, 66
Westbrook, James L. Jr. - Recognition of this retiring city manager at last formal meeting, 49
Westbrook, James L. Jr. - Resolution of Appreciation, 15
Wheeler Construction Company - Contract for Annexation Areas Sanitary Sewer System Improvements, 15
Wheeler Construction Company - Discussion of contract for Annexation Areas Sanitary Sewer System Improvements, 1
White Fawn Reservoir Tower - Clerk to advertise Mtn Area Info Network license agreement on White Fawn Reservoir, 384
White Fawn Reservoir Tower - Discussion of Clerk to advertise Mtn Area Info Network license agreement on White Fawn Reservoir, 348
White Fawn Reservoir Tower - Discussion of Mtn Area Info Network request for grant to offset license fee on White Fawn Reservoir, 52, 110
White Fawn Reservoir Tower - Mtn Area Info Network license agreement on White Fawn Reservoir, 414
Williams, Dee - Contract for traffic calming in Redwood Forest, 136
Williams, Jennifer - Claim, 116
Williams, Sheryl H. - Clerk to advertise offer to purchase property on Bent Tree Road from Sheryl H. Williams, 365
Williams, Sheryl H. - Conveyance of property on Bent Tree Road to Sheryl H. Williams, 410
Williams, Thomas F. - Claim, 449
Wireless Internet Network - Discussion of this matter postponed, 231
Wireless Internet Network Service - Discussion and direction to look at options including citywide svs, 248
Wolfe, Bill - Claim, 270
Woodfin Street - Public hearing and approval of CUP for property on College and Woodfin known as College Street Office Building, 138
Worley, Charles - Appointed as Chairman to ABC Board, 388
Worley, Charles - Appointed as member to ABC Board, 388
Worley, Charles R. - Appreciation to outgoing Mayor, 406
Worley, Charles R. - Comments from outgoing mayor, 391
Wright, Anne - Presented with Sondley Award, 35
Wright, Loraine - Claim, 330

Young, Craig - Appted to
Citizens/Police Advisory Committee,
160

Zavoras, Dan - Claim, 95
Zoning - 75 Long Shoals Road, 339
Zoning - Public hearing and zoning various sections of Brevard Road Zoning Study, 150
Zoning - Public hearing to zone portions of property on Grove Park Cove, 440
Zoning - Public hearing to zone properties along Columbine Road and Heathbrook Circle, 368
Zoning - Public hearing to zone two lots in Southridge area, 438
Zoning, Conditional - Denial of conditional zoning for 6 Edwin Place, 290
Zoning, Conditional - Public hearing to conditionally zone property on Merrimon and Fenner Avenues, 369

Tuesday – May 17, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Community Meeting – May 31, 2005

At the suggestion of the City Manager, it was the consensus of City Council to not hold the May 31, 2005, community meeting due to budget issues and water negotiations.

2003-04 Annexation Areas Sanitary Sewer System Improvement Project

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Wheeler Construction Company, Inc., in the amount of $ 132,950.25, for the project known as 2003-2004 Annexation Areas Sanitary Sewer System Improvements.

This project consists of the installation of approximately 1,200 linear feet of eight-inch diameter sanitary sewer line and related appurtenances.

The Engineering Department received and publicly opened three bids on Thursday, April 28, 2005, at 2:00 p.m. Three bids were received from Wheeler Construction, Hobson Construction and Huntley construction in the amounts of $ 132,950.25, $ 133,436.00 and $ 199,872.75, respectively. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Wheeler Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $ 132,950.25.

The project will be financed with monies from Capital Improvements Fund.

Wheeler Construction Company, Inc., has performed several projects of this nature in the past in a satisfactory manner.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Considerations of adopting a resolution authorizing the City Manager to execute this contract are as follows:

- The execution of this contract will allow the City to meet the requirements for sanitary sewer system service improvements, as established in the 2003 and 2004 Annexation Areas Plan of Services;

- The bid amount of $ 132,950.25 for the construction of the 2003-2004 Annexation Areas Sanitary Sewer System Improvements Project is equitable, as compared to the engineer's estimate of $ 135,528.00 and recent construction cost data on projects of the same nature;

- Extension of the sanitary sewer system enhances the environmental quality of the area to be served and prevents water quality problems.

- The only foreseeable disadvantage of adopting a resolution authorizing the City Manager to execute this contract is the temporary land disturbance along the proposed sanitary sewer construction corridor.

Construction of this sewer line is in line with goal # 1 under the Natural and Built Environment focus area of the Strategic Operating Plan of the City of Asheville.

Staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with Wheeler Construction Company, Inc., in the amount of $132,950.25, for the 2003-2004 Annexation Areas Sanitary Sewer System Improvements Project.

Alcohol at the Rockin' the Mountains Fundraiser

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Rockin' The Mountains fundraiser at Jake Rusher Park.

The Rotary Clubs of Arden and Biltmore have requested, through the Asheville Parks and Recreation Department, that City Council permit them to serve beer and/or unfortified wine at the Rockin' The Mountains fundraising event to be held on Saturday, June 11, 2005, at Jake Rusher Park, formerly known as Royal Pines Park in Arden. The proceeds of this event will go for additional park amenities and beautification projects. This is the second year that these clubs have held this co-sponsored event.

The Asheville Parks and Recreation Department recommends approval of the resolution allowing possession and consumption of malt beverages and/or unfortified wine at the Rockin' The Mountains fundraiser at Jake Rusher Park.

Changes to Speed Limits on Various Streets and Through Truck Prohibitions

Summary: The consideration of an ordinance to enact or change speed limits and enact through truck prohibitions on specific city streets.

The streets listed below have been identified for speed concerns or truck concerns by residents, City boards and commissions, City Council, the Asheville Police Department, Transportation Services Division staff, or other City staff. Transportation Services Division staff has conducted field reviews of street geometry and conditions and/or speed studies. Streets with requests for truck prohibitions have been reviewed for appropriateness. The Police Department supports these recommendations.

Through Truck Prohibitions

The following streets are residential streets on which it is recommended that through trucks be prohibited, with the exception of Page Avenue. Page Avenue was not designed to accommodate large vehicles.

1. Maxwell Street, between Broadway and Chestnut Street
2. Overbrook Road, between Tunnel Road and Governors View Road
3. Page Avenue, between Battery Park Avenue and Battle Square
4. Springside Road, between Hendersonville Road and Overlook Road
5. Sunset Terrace, in its entirety

6. Woodlink Road, in its entirety

15 Miles Per Hour

The following streets are narrow residential streets with extreme street geometry problems, including severe and frequent crests and curves, and heavily used on-street parking. These streets warrant a significantly lower speed limit than the typical 25 mph. The recommended safe operating speed on these streets is 15 mph:

1. Dundee Street, in its entirety

20 Miles Per Hour

The following streets are narrow residential streets with street geometry problems or business district streets. NCDOT has adopted a matching speed limit on Biltmore Avenue. Street geometry problems on residential streets include frequent crests and curves. The recommended safe operating speed on these streets is 20 mph:

1. Biltmore Avenue (US 25), between Hilliard Avenue and Aston Street (NCDOT)
2. Cane Street, in its entirety
3. College Street, between Charlotte Street and Valley Street
4. Sweetspire Ridge, in its entirety

25 Miles Per Hour

Most of the following streets are typical local residential streets without significant street geometry problems. The appropriate speed limit for typical local residential speeds is 25 mph. Cedar Street and Wood Avenue are collector residential streets with character and geometry warranting lower than typical collector speed limit. Roberts Street is a mixed-use street warranting a speed limit higher than a typical business district street but lower than a typical collector street. The recommended safe operating speed on these streets is 25 mph:

1. Allen Street, between State Street and Haywood Road
2. Altamont View, in its entirety
3. Burton Street, between Haywood Road and Florida Avenue
4. Carrier Street, between Sulfur Springs Road and and Baker Place
5. Cedar Street, between Wood Avenue and Fairview Road
6. Courtland Avenue, in its entirety
7. Dortch Avenue, between Hillside Street and Mount Clare Avenue
8. Druid Drive, between Patton Avenue and Mitchell Avenue
9. East Maple Drive, between New Haw Creek Road and the dead end
10. East Oakview Road, in its entirety
11. Gashes Creek Road, between Azalea Road and the dead end
12. Haw Creek Circle, in its entirety
13. Klondyke Avenue, in its entirety
14. Lakeside Drive, between Old Haywood Road and Appalachian Way
15. Langwell Avenue, in its entirety
16. Mann Road, in its entirety
17. Maple Drive, between Old Haw Creek Road and New Haw Creek Road
18. McDade Street, in its entirety
19. Morningside Drive, in its entirety
20. Old Stone Gate Place, in its entirety
21. Olmsted Drive, between Dearborn Street and Columbine Road
22. Pressley Road, in its entirety

23. Racquet Club Drive, between Hendersonville Road and Boddington Court
24. Rhododendron Place , in its entirety
25. Roberts Street, between Craven Street and Lyman Street
26. Samayoa Place, in its entirety
27. Senator Reynolds Road, in its entirety
28. Trinity Chapel, between New Haw Creek Road and Old Haw Creek Road
29. West Maple Drive, between Old Haw Creek Road and Hillview Road
30. Wilmington Street, in its entirety
31. Winthrop Road, in its entirety
32. Wood Avenue, between Cedar Street and end of City maintenance

30 Miles Per Hour

The following streets have features that warrant operating speeds less than the typical collector street speed limit of 35 mph. These features include residential character, narrow widths, and roadside obstructions. The recommended safe operating speed on these street are 30 mph:

1. Azalea Road, in its entirety
2. Florida Avenue, between Burton Street and Patton Avenue
3. Gerber Road, in its entirety
4. Hill Street, between Montford Avenue and US 19-23-70
5. London Road, between Bellview Road and West Chapel Road
6. Lyman Street, between Riverside Drive and Amboy Road
7. Pinecroft Road, in its entirety
8. River Hills Road, in its entirety
9. Riverside Drive, between Interstate 240 and Lyman Street
10. Royal Pines Drive, in its entirety
11. Shelburne Road, in its entirety
12. Spooks Branch Road, in its entirety
13. State Street, in its entirety

The Engineering Department requests that City Council approve the ordinance amending these speed limit and through truck prohibition changes.

Traffic Engineer Anthony Butzek responded to Councilman Newman regarding how truck traffic will be affected on Maxwell Street.

In response to Vice-Mayor Mumpower, there was a brief discussion about the criteria used for lowering or raising speed limits on streets, in particular Kimberly Avenue, which current speed limit is 25 mph.

Mr. Butzek responded to various questions/comments from Council, some being, but are not limited to: does the speed limit posted have an influence on how people drive; is pedestrian traffic factored into determining speed limits; and what is the cost of signs.

Vice-Mayor Mumpower felt that the City needs to approach enforcement with enthusiasm.

Mr. Butzek said that prior to this issue coming back to Council for formal consideration on June 14, 2005, he would provide information relative to the speed limit on Kimberly Avenue, including a report from the Police Department regarding enforcement.

New Street Name – Regan Lane

Summary: The consideration of a resolution approving Regan Lane as the name for a new street located off Downing Street.

Staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any new street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. A street name was necessary to facilitate specific street name and numbers for new structures. It would be impractical, and due to the existing street numbers, impossible to address the new structures from Downing Street without causing emergency response delays.

Pro:

- The street will be utilized to access six new homes. Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Con:

- There are no negative affects of for assignment of Regan Lane to this new street.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure:
Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

Staff recommends adoption of the resolution accepting Regan Lane as new street name.

Contract for Professional Services

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services contract with McGill Associates, P.A.

The Water Resources Department has requested a low interest state loan in the amount of $1,775,000.00 and has approximately $700,000.00 in unused state grant funds for infrastructure improvements.

The Water Resources Department requires a professional engineering firm to prepare the necessary documentation required by the state and appropriate professional engineer civil designed water plans for a project on US 1923 (low interest low request) and to complete the Critical Needs Phase III water system improvement projects. McGill Associates, a local engineering firm has previously worked on the preliminary design and scope of these projects. This contract is to formalize the completion of the project and to prepare all documentation required by the State of North Carolina concerning funding and reimbursement for these projects with the cost of these professional services to be $157,000.00. Funds are available in the current water budget for this expenditure.

PROS:

- These projects will enhance the water system and help create a connection to the Canton, N.C., water system.

CONS:

- There are no cons to these projects, water pressure will be increased and the US 19/23 corridor area will enhance the development potential of an area in the county that currently does not have a water line.

City staff recommends City Council approval of the City Manager signing contract agreement with McGill Associates in the amount of $157,000.00.

Ms. Rebecca Guggenheim, Executive Assistant with the Water Resources Department, responded to questions from Councilman Newman regarding the replacement water line. She said that she would provide Council with a list of the critical needs projects.

Application with the N.C. Dept. of Crime Control & Public Safety for Radio Towers to Implement VIPER Communication System

Summary: The consideration of a resolution ratifying the City Manager's actions in applying for a grant from the N.C. Dept, of Crime Control and Public Safety to construct radio towers to implement the VIPER communication system.

The N. C. Dept. of Crime Control and Public Safety, through the Governor's Crime Commission, has money available to local governments in order to have its radio system VIPER compliant. The City of Asheville entered into an agreement with the State of North Carolina through the N.C. Dept. of Crime Control and Public Safety for the purchase and installation of VIPER compliant radios for the Fire and Police Departments with endorsement of the Asheville City Council in January 2005. This grant is to construct towers to implement the VIPER system enhancing communication ability and improving interoperability.

The towers and VIPER system will allow emergency responders to communicate with each other and other state agencies involved in an incident with Asheville and in many areas across North Carolina. The towers and VIPER system will allow personnel in Asheville to communicate with our personnel or responding personnel to us in other areas of the State.

The City of Asheville will not receive these funds; instead, we are authorizing the State of North Carolina to spend the $1.5 Million on our behalf. Therefore, no budge amendment is necessary.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure:
Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

PROS:

- The towers would allow the Asheville Fire and Rescue Department to take advantage of the information and technology that is available to us and allow us to apply it virtually every day.
- The enhanced communication potential would increase effectiveness during emergencies.
- The ability to communicate from Asheville to our personnel or responding mutual aid is and invaluable service.
- If the grant is approved, 100% of the funds, would be supplied by through the N.C. Dept. of Crime Control and Public Safety.

CONS:

- Staff is not aware of a negative consequence to this grant.

City staff recommends City Council approve the resolution ratifying the City Manager's actions in applying for the grant with the N.C. Dept. of Crime Control and Public Safety.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

GATEWAY CORRIDORS

Planning & Development Director Scott Shuford said that City Council has made gateway planning and improvement a critical piece of its Strategic Operating Plan. He said that Planning staff retained an intern over the past six months to prepare a gateway inventory and strategies for gateway improvement.

Mr. Wade Luther of Clemson University then reviewed with Council a presentation summarizing his work. He said that the study is being developed as required by the Center City Plan and the City Council Strategic Operating Plan as a means for improving downtown development and to determine ways in which improvements can benefit the changing conditions that are occurring in the neighboring downtown urban core.

The objectives of the gateway corridor study was to (1) tie neighborhoods together; (2) strengthen community identity; (3) unify roadway improvements; (4) enhance and encourage new downtown development; and (5) make downtown development more attractive to the private sector.

He reviewed each study area, which included Patton Avenue, College Street, Merrimon Avenue/Broadway Street, I-240 and Biltmore Avenue.

The goals of the study include (1) develop a welcoming environment entering the City; (2) create an identity that complements the identity of the Central Business District; (3) reflect the aesthetics of the downtown urban core; (4) encourage economic growth and development in an urban form consistent with smart growth initiatives and the Center City Plan; (5) create a pedestrian-friendly environment; (6) encourage multi-modal transport; and (7) promote urban development at key gateway parcels.

General recommendations include infill redevelopment; proper land uses; traffic study and roadway design; streetscape plan, proper landscaping and signage; multi-modal transport; and Amendment One. He felt the recommendations of the study will foster economic growth and quality development for the gateways and the Central Business District as a whole through enhancing the built environment with infill redevelopment and by creating a pedestrian realm that encourages economic activity and supports multi-modal transport.

Staff recommends that the City Council receive the gateway corridor study and provide any desired direction.

Councilman Davis felt that, in the short-term, more trash receptacles are needed in the western corridor.

In response to Councilwoman Bellamy, Planning & Development Director Scott Shuford said that staff will be bringing forward to Council an ordinance that would essentially say that if you are developing in the Central Business District, your Level III threshold goes away if you able to comply with the Downtown Design Guidelines. In addition, the Downtown Commission is reviewing the Central Business District regulations and will be bringing forward some suggested changes that will help with the voluntary compliance issue.

Mr. Shuford said that this study is intended to set the groundwork for further efforts. Over the next few months, one staff effort will be to develop a project development financing plan that we will bring to Council that will include a funding source from the Amendment One authority.

Upon inquiry of Councilwoman Jones, Mr. Shuford explained Amendment One and said that he would send Council a memo outlining the tax increment financing.

It was the consensus of Council to accept the report and instruct staff to move forward in finding ways to carry out the corridor plan, e.g. ordinance revisions or other mechanisms.

CONVERSION OF COLLEGE STREET AND PATTON AVENUE TO TWO-WAY

Traffic Engineer Anthony Butzek said that this is consideration of an ordinance converting the downtown one-way pair of College Street and Patton Avenue back to two-way operation.

A traffic study commissioned by the City in 2001 concluded that the conversion to two-way traffic is feasible and would not significantly degrade traffic operations. Levels of service remained generally similar to conditions under one-way operation with the full implementation of the conversion, including several minor geometric improvements. This study, conducted by Kimley-Horn and Associates, analyzed traffic conditions in the downtown area, recommended improvements for two-way operation, and estimated costs for conversion.

The conversion from one-way to two-way would be done to support the economic vitality of downtown and increase pedestrian safety. It is generally felt that one-way streets have the ability to move more traffic, while two-way streets are more conducive to economic vitality. Two-way streets also avoid the confusion to motorists that one-way streets create, allowing for more direct routes of travel. This is especially important in Asheville as downtown is a tourist destination. Two-way streets would result in slower traffic movement, and slightly increased congestion. The idea that congested downtown streets keep people away is generally obsolete, with current wisdom dictating that slower traffic is representative of economic vitality. Many cities are converting their one-way streets back to two-way, as traffic conditions permit.

Generally, downtown merchants have expressed support for two-way streets. Representatives of several buildings, including the Biltmore Building and the BB&T Building, have expressed concern over the potential conversion.

College Street and Patton Avenue are currently proposed to be converted to two-way east of Biltmore Avenue/Broadway to facilitate traffic movement consistent with the Pack Square Plan. In order to pursue conversion of the remainder to the west (to Coxe Avenue), and to request State funding to perform necessary replacement of the signals on Biltmore Avenue/Broadway at Patton Avenue and College Street, staff requests approval of the conversion by City Council.

Summary of PM peak-hour operational differences between levels of service (LOS):

Intersection	One-way LOS	Two-way LOS
College & Spruce	B	B
College & Market	A	A
College & Broadway	B	B
College & Lexington	B	B
College & Haywood	B	B
Patton & Coxe	C	C
Patton & Haywood	A	A
Patton & Lexington	B	B
Patton & Biltmore	C	C
Patton & Market	B	*

The conversion requires modification to or replacement of eight traffic signals (six City and two State) along the corridor, and allows for removal of three others (Haywood & Battery Park, Patton & Haywood, Patton & Market). These replacements comprise most of the costs associated with the conversion. Replacement of all eight signals with decorative poles is estimated to cost $1.05 million. Modification to the City's six signals could serve two-way traffic on a temporary basis at an estimated cost of $100,000. Geometric modifications to the streets for two-way traffic are estimated at $125,000, about half of which will be done as part of Pack Square.

Staff proposes that Council allocate approximately $250,000 per year over the next four budget years in order to facilitate the necessary geometric modifications and replacement of traffic signals.

Pros

- Expected economic benefits for downtown
- Reduced traffic speeds downtown (pro for downtown) and improved pedestrian safety
- Consistency with Pack Square plans
- Support by many downtown merchants

Cons

- Costs
- Reduced traffic speeds downtown (con for drivers)
- Concerns from some downtown office buildings

This project meets several of Council's strategic goals and objectives:

- Planning Goal #2, Objective A, Task 2: Leverage outside funding to achieve multiple transportation goals where possible.
- Planning Goal #2, Objective B, Task 1: Determine opportunities for managing traffic demand through changes to commuting patterns and transportation modes, land use patterns, signalization improvements, etc.

Staff recommends City Council support the two-way plan and authorizing staff to pursue State funding and phased implementation of the two-way conversion as budgets permit.

Upon request of Councilman Davis, Mr. Butzek said that he would be happy to furnish Council with a map outlining the conversion and visual aids when this matter comes back to Council for approval on June 14, 2005.

Mr. Butzek responded to various questions/comments from Council, some being, but are not limited to: was this a staff initiated plan; what happens and what are the costs if we don't make the conversion; how long has the streets been one-way and why; is this conversion linked

to the pedestrian plan; will the traffic signals need replacing in the near future if nothing is done at this time; would the conversion have an impact on emergency vehicles; will it take longer to drive from one end of the downtown to the other; what would be the expected economic benefits for downtown; will there be any loss of parking spaces; how much property tax dollars come from the Central Business District; and what other groups have reviewed this conversion plan.

Councilman Davis was concerned about not creating too much of an obstacle course in the downtown area to slow traffic because customers may feel it is easier to go somewhere else for basic shopping.

Mr. Butzek pointed out that the entire conversion could be done for approximately $250,000. He additional costs come from the replacement of the traffic signals that staff is also recommending.

When Vice-Mayor Mumpower asked if Council should consider a special tax for the Central Business District since this project seems devoted to them. City Manager Westbrook said that normally what a special use tax is used for are other kinds of improvements, such as a uniform sidewalk streetscaping, not passing traffic.

Upon inquiry of Vice-Mayor Mumpower, Planning & Development Director Scott Shuford said that he would provide Council with information from other cities where this type of change took place and what type of rewards were had from an economic development standpoint. In addition he would provide Council with specific indications from the stakeholders who have reviewed this plan.

City Engineer Cathy Ball said that we may want to consider is asking the N.C. Dept. of Transportation to take over those streets once we have made the decision to go with the two-way conversion. We could then ask for additional funding from them in order to support putting in the decorative poles. She said that staff will research that and bring it back to Council at the June 14 meeting.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the June 14, 2005, formal City Council agenda.

At 4:34 p.m., Mayor Worley announced a short break.

ANIMAL CONTROL ORDINANCE

Assistant City Attorney Curt Euler said that this is the consideration of an ordinance amending the existing animal control ordinance.

The Asheville Police Department is seeking to improve public safety and the humane treatment of animals by reviewing and updating the animal control ordinance. Many of the amendments are technical in nature.

The following are the major revisions to the ordinance:

- City Council will have to decide between adopting a differential licensing or fertile animal permit scheme:

  A. Differential licensing fees for fertile and unfertile dogs, Sec. 3-5 Annual Registration for Dogs

1. Annual registration for spayed/neutered dogs will be less than that for fertile dogs.
2. Owner must provide proof of sterilization when initially registering a dog
3. The Fees and Charges Committee will set the annual fertile and unfertile license fees.

B. The Fertile Animal Permit

1. The owner of a fertile animal will have to pay the City a one-time $100.00 permit fee to keep a fertile animal within the City.
2. The City will only enforce this section if the Animal Control Officer is investigating another violation of the ordinance.
3. If the owner if found to have a fertile animal without a permit, the fine is $200.00
4. If the owner gets the animal spayed or neutered within 30 days of the issuance of the fine, the City will waive the fine.

- Waiver of Registration Fees for licensed service dogs and working law enforcement dogs
- Fine structure has been amended –Appendix B

A. There is a cap on the amount of fines a person may receive before it is turned over to debt collections
B. The fine will accrue monthly, not weekly

- Specific regulations placed on the tethering of an animal, Sec. 3-12 Animal Care

A. Restraint must be at least 15 feet in length
B. Restraint shall not become tangled or prevent the dog from moving freely or having access to food, water or shelter.

- Changes providing more agreement with state law, such as the requirement to immediately report an animal bite to the Police Department, Sec. 3-13 Animal Bite

- Adoption of fertile animals in public prohibited, Sec. 3-12 Animal Care

- Prohibits the giving away of animals as a prize. Sec. 3-12 Animal Care

- Selected serious offenses made Criminal, Sec. 3-20 Penalties

A. Interference with Animal Control Officer, Concealment of Animal, Sec. 3-8 Inspection, Interference or Concealment
B. Animal Fighting, Sec. 3-12 Animal Care
C. Failure to report an animal bite, Sec. 3-13 Animal Bite
D. Failure to comply with an order of seizure, Sec 3-30 Seizure and Disposition of Animals

- Clarified definition of terms, Sec. 3-4 Definitions

A. *Bona fide farm*: use of one's real property for a farming business or enterprise, zoned or grandfathered for agricultural use; must comply with all applicable federal, state and local laws.
B. *Exotic pet*: any animal that is not classified as domesticated, livestock or a wild animal; does not include feral animals.

C. *Feral animal*: an animal of a species normally domesticated that has reverted back to a wild state.
D. *Fowl*: any bird traditionally associated with sport, farming or production; including but not limited to poultry and game birds.

- Added definitions of humane care and treatment, sufficient water, sufficient food and sufficient shelter, Sec. 3-4 Definitions

A. *Humane care and treatment*: maintaining an animal in an appropriate, sanitary environment. Humane care and treatment also considers the age, size, health problems, hardiness and other characteristics of the individual animal in daily care to prevent avoidable harm and suffering.
B. *Sufficient food*: the provision of food of sufficient quantity and quality to insure property growth or maintenance of body weight appropriate to the age and species of the animal.
C. *Sufficient shelter*: a structure which consists of least three sides, a floor and a roof and adequate in size and design to preserve the animal's body heat and protect the animal from the elements.
D. *Sufficient water*: access to a constant supply of water that is clean, fresh, and visibly free of debris and organic material, or provided at suitable intervals for the species, and not to exceed 24 hours at any interval.

- Lessened the 150-foot minimum distance that permitted livestock, fowl and exotic pets are allowed to be from adjacent households, Sec. 3-36 Permit for keeping

A. No person shall keep livestock and chickens and fowl within 100 feet of any household other than that of the owner of the animal, chicken or fowl.

- Numerous technical changes have been made to the wording of the ordinance for consistency and clarity and in order to make it easier to read.

The animal control ordinance was last revised on September 10, 2002. In an effort to meet public expectations and insure the most up to date ordinance possible, the Asheville Police Department began a review of the ordinance in late 2003. Consistent with City Policy, the Asheville Police Department sought input from organizations such as the Asheville Humane Society, the American Kennel Club, and other local animal welfare groups. In addition, the City held a public forum on May 4, 2005, for citizens to give input.

Pros:

- The fertile animal permit and the restrictions on adopting fertile animals in public locations are steps towards reducing the number of unwanted animals in the City.

- The new fine structure will be more equitable to citizens.

Cons:

- There will be a significant increase in time spent on each Animal Control call for service to enforce the fertile animal permit. This will reduce time spent on handling other Animal Control matters.

- The City will need to create new fields in the Animal Control database to keep track of the fertile animal permits. In addition, there will be significant additional staff time needed to deal with the citations and possible waiver of fines (this includes both Customer Service staff as well as Animal Control staff).

City staff recommends approval of the ordinance amending the existing Animal Control ordinance.

Mr. Euler, along with Ms. Brenda Sears, Animal Control Officer, responded to various questions and comments from Council, some being, but are not limited to: what are the statistics of regarding the number of impounded animals from the City, specifically euthanized (1,333), adopted (280) or returned to owners (495); what is involved with a Dept. of Agriculture license and how much is that type license; what is the adoption rate at the animal shelters; what is the cost to the City to pick up and take an animal to the shelter; what is the cost to spay/neuter; how will this ordinance be enforced; can existing personnel handle the changes; will this ordinance be enforced in the extra-territorial jurisdiction area; and are there subsidies/grant monies available to help with the cost of spaying/neutering.

Mr. Euler explained that this ordinance this is a good step in trying to regulate and reduce the number of unwanted pets by making sure that the pets adopted are spayed or neutered before being turned over to the new owners, as opposed to getting vouchers where there is not a lot of control as to what happens later.

Vice-Mayor Mumpower felt this ordinance would adversely impact the ability of people to facilitate adoption of pets. He particularly pointed out that there is a person who, on a regular basis, sets up in front of Earth Fare and has made an enormous effort to find homes for cats and dogs. He wondered what might be some possibilities (permit or voucher) to allow those types of people to continue to try to facilitate adoptions.

Ms. Sears felt there isn't any reason to make any exceptions to animals going home fertile. She stressed how one fertile animal could negate the work for an entire adoption day just by reproducing. She stressed that we need to be consistent in upholding the standards throughout our entire community. She did point out that the fertile animal regulations (spaying/neutering or a permit) are required for both dogs and cats.

Upon inquiry of Vice-Mayor Mumpower, Ms. Sears said that if the transaction is taking place on city property in a public area, then that is what transactions would be impacted. People can give away pets all day at their private homes. She said that it would be unlawful for a person to sell or trade an animal, unless they are licensed by the Department of Agriculture, in a public venue.

There was considerable discussion about good humanitarian efforts. Ms. Sears said the easy solution would be to have people take the animals to the animal shelter or humane society. They are the professionals at evaluating the adoptability of animals and they will never refuse to take an animal.

Vice-Mayor Mumpower asked staff to meet with people who have a deeper understanding of this issue and see if there is a way to not create an administrative nightmare, but doesn't punish the people who are trying to compassionately affect animals.

Councilwoman Jones asked that an exception to the spaying and neutering requirement be made for service dogs in training.

Mr. David Long, Director of Animal Control for Buncombe County, responded to various questions from Council and recommended Council adopt the spaying/neutering ordinance.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Barbara Marlowe to the Civil Service Board.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Leesa Gibbs to the Firemen's Relief Fund.

Regarding the sunset date of June 30, 2005, for the Sustainable Economic Development Strategic Plan Implementation Task Force, it was the consensus of City Council to invite the Chairman in to give City Council a report of their activities and their recommendation on whether to extend the term of the Task Force.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:49 p.m.

Magdalen Bouleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – May 24, 2005 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor R. Carl Mumpower, Presiding; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr. City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Charles R. Worley and Councilwoman Terry M. Bellamy

PLEDGE OF ALLEGIANCE

The T.C. Roberson High School Air Force ROTC led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 05-110 - RESOLUTION OF APPRECIATION TO RETIRING CITY MANAGER JAMES L. WESTBROOK JR.

Vice-Mayor Mumpower read the resolution of appreciation to retiring City Manager James L. Westbrook Jr. On behalf of the City Council, Vice-Mayor Mumpower thanked Mr. Westbrook for his ten years of service he has devoted to the citizens of Asheville.

Resolution No. 05-110 was adopted by acclamation.

RESOLUTION BOOK NO. 29 – PAGE 134

B. PRESENTATION OF ACCREDITED AGENCY STATUS FOR THE ASHEVILLE FIRE AND RESCUE DEPARTMENT FROM THE COMMISSION ON FIRE ACCREDITATION INTERNATIONAL

Chief Paul Brooks, Vice-Chairman of the Commission on Fire Accreditation International, presented the City of Asheville Fire Department with the Accredited Agency Award.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 10, 2005, AND THE WORKSESSION HELD ON MAY 17, 2005

B. MOTION SETTING A PUBLIC HEARING ON JUNE 14, 2005, REGARDING ADOPTION OF THE FISCAL YEAR 2005-06 ANNUAL OPERATING BUDGET

C. RESOLUTION NO. 05-112 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH WHEELER CONSTRUCTION COMPANY INC. FOR THE 2003-04 ANNEXATION AREAS SANITARY SEWER SYSTEM IMPROVEMENTS PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Wheeler Construction Company, Inc., in the amount of $ 132,950.25, for the project known as 2003-2004 Annexation Areas Sanitary Sewer System Improvements.

This project consists of the installation of approximately 1,200 linear feet of eight-inch diameter sanitary sewer line and related appurtenances.

The Engineering Department received and publicly opened three bids on Thursday, April 28, 2005, at 2:00 p.m. Three bids were received from Wheeler Construction, Hobson Construction and Huntley construction in the amounts of $ 132,950.25, $ 133,436.00 and $ 199,872.75, respectively. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Wheeler Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $ 132,950.25.

The project will be financed with monies from Capital Improvements Fund.

Wheeler Construction Company, Inc., has performed several projects of this nature in the past in a satisfactory manner.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Considerations of adopting a resolution authorizing the City Manager to execute this contract are as follows:

- The execution of this contract will allow the City to meet the requirements for sanitary sewer system service improvements, as established in the 2003 and 2004 Annexation Areas Plan of Services;
- The bid amount of $ 132,950.25 for the construction of the 2003-2004 Annexation Areas Sanitary Sewer System Improvements Project is equitable, as compared to the engineer's estimate of $ 135,528.00 and recent construction cost data on projects of the same nature;
- Extension of the sanitary sewer system enhances the environmental quality of the area to be served and prevents water quality problems.
- The only foreseeable disadvantage of adopting a resolution authorizing the City Manager to execute this contract is the temporary land disturbance along the proposed sanitary sewer construction corridor.

Construction of this sewer line is in line with goal # 1 under the Natural and Built Environment focus area of the Strategic Operating Plan of the City of Asheville.

Staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with Wheeler Construction Company, Inc., in the amount of $132,950.25, for the 2003-2004 Annexation Areas Sanitary Sewer System Improvements Project.

RESOLUTION BOOK NO. 29 – PAGE 136

D. **RESOLUTION NO. 05-113 - RESOLUTION RATIFYING THE CITY MANAGER'S ACTIONS IN APPLYING FOR A GRANT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR A GRANT TO CONSTRUCT RADIO TOWERS TO IMPLEMENT THE VIPER COMMUNICATION SYSTEM WITHIN THE CITY**

Summary: The consideration of a resolution ratifying the City Manager's actions in applying for a grant from the N.C. Dept, of Crime Control and Public Safety to construct radio towers to implement the VIPER communication system.

The N. C. Dept. of Crime Control and Public Safety, through the Governor's Crime Commission, has money available to local governments in order to have its radio system VIPER compliant. The City of Asheville entered into an agreement with the State of North Carolina through the N.C. Dept. of Crime Control and Public Safety for the purchase and installation of VIPER compliant radios for the Fire and Police Departments with endorsement of the Asheville City Council in January 2005. This grant is to construct towers to implement the VIPER system enhancing communication ability and improving interoperability.

The towers and VIPER system will allow emergency responders to communicate with each other and other state agencies involved in an incident with Asheville and in many areas across North Carolina. The towers and VIPER system will allow personnel in Asheville to communicate with our personnel or responding personnel to us in other areas of the State.

The City of Asheville will not receive these funds; instead, we are authorizing the State of North Carolina to spend the $1.5 Million on our behalf. Therefore, no budge amendment is necessary.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure:
Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

PROS:

- The towers would allow the Asheville Fire and Rescue Department to take advantage of the information and technology that is available to us and allow us to apply it virtually every day.
- The enhanced communication potential would increase effectiveness during emergencies.
- The ability to communicate from Asheville to our personnel or responding mutual aid is and invaluable service.
- If the grant is approved, 100% of the funds, would be supplied by through the N.C. Dept. of Crime Control and Public Safety.

CONS:

- Staff is not aware of a negative consequence to this grant.

City staff recommends City Council approve the resolution ratifying the City Manager's actions in applying for the grant with the N.C. Dept. of Crime Control and Public Safety.

RESOLUTION BOOK NO. 29 – PAGE 137

E. RESOLUTION NO. 05-114 – RESOLUTION ACCEPTING THE NEW STREET NAME OF "REGAN LANE"

Summary: The consideration of a resolution approving Regan Lane as the name for a new street located off Downing Street.

Staff has reviewed the proposed name and found no conflicts that would impede emergency service response. The primary purpose of establishing a name for any new street is to facilitate emergency response. Staff researched the street data and has determined that this name is not duplicated. A street name was necessary to facilitate specific street name and numbers for new structures. It would be impractical, and due to the existing street numbers, impossible to address the new structures from Downing Street without causing emergency response delays.

Pro:

- The street will be utilized to access six new homes. Assignment of specific addresses, utility connection, and potential emergency response will be enhanced with specific the street name.

Con:

- There are no negative affects of for assignment of Regan Lane to this new street.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure:
Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

Staff recommends adoption of the resolution accepting Regan Lane as new street name.

RESOLUTION BOOK NO. 29 – PAGE 138

F. **RESOLUTION NO. 05-115 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH MCGILL ASSOCIATES, P.A., FOR WATER SYSTEM IMPROVEMENTS**

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services contract with McGill Associates, P.A.

The Water Resources Department has requested a low interest state loan in the amount of $1,775,000.00 and has approximately $700,000.00 in unused state grant funds for infrastructure improvements.

The Water Resources Department requires a professional engineering firm to prepare the necessary documentation required by the state and appropriate professional engineer civil designed water plans for a project on US 1923 (low interest low request) and to complete the Critical Needs Phase III water system improvement projects. McGill Associates, a local engineering firm has previously worked on the preliminary design and scope of these projects. This contract is to formalize the completion of the project and to prepare all documentation required by the State of North Carolina concerning funding and reimbursement for these projects with the cost of these professional services to be $157,000.00. Funds are available in the current water budget for this expenditure.

PROS:

- These projects will enhance the water system and help create a connection to the Canton, N.C., water system.

CONS:

- There are no cons to these projects, water pressure will be increased and the US 19/23 corridor area will enhance the development potential of an area in the county that currently does not have a water line.

City staff recommends City Council approval of the City Manager signing contract agreement with McGill Associates in the amount of $157,000.00.

RESOLUTION BOOK NO. 29 – PAGE 139

G. RESOLUTION NO. 05-116 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Mumpower said that the term of Gene Bell, as a member of the Civil Service Board, expired May 21, 2005.

At the City Council worksession on May 17, 2005, City Council instructed the City Clerk to prepare the proper paperwork to appoint Barbara Marlowe to the Civil Service Board to serve a two-year term, term to expire May 21, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 140

H. RESOLUTION NO. 05-117 - RESOLUTION APPOINTING LEESA GIBBS TO THE FIREMEN'S RELIEF FUND

Summary: Ms. Eva Williams, member of the Firemen's Relief Fund, recently died, thus leaving an unexpired term until January 1, 2007.

At the City Council's worksession on May 17, 2005, City Council instructed the City Clerk to prepare the proper paperwork to appoint Leesa Gibbs as a member of the Firemen's Relief Fund Board of Trustees, to serve the unexpired term of Ms. Williams, term to expire January 1, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 141

I. RESOLUTION NO. 05-118 – RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ROCKIN' THE MOUNTAINS FUNDRAISER AT JAKE RUSHER PARK ON JUNE 11, 2005

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Rockin' The Mountains fundraiser at Jake Rusher Park.

The Rotary Clubs of Arden and Biltmore have requested, through the Asheville Parks and Recreation Department, that City Council permit them to serve beer and/or unfortified wine at the Rockin' The Mountains fundraising event to be held on Saturday, June 11, 2005, at Jake Rusher Park, formerly known as Royal Pines Park in Arden. The proceeds of this event will go for additional park amenities and beautification projects. This is the second year that these clubs have held this co-sponsored event.

The Asheville Parks and Recreation Department recommends approval of the resolution allowing possession and consumption of malt beverages and/or unfortified wine at the Rockin' The Mountains fundraiser at Jake Rusher Park.

Vice-Mayor Mumpower said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Dunn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AMENDING THE CONDITIONAL USE PERMIT AND MASTER PLAN FOR BROTHERTON COMMONS, LOCATED AT THE CORNER OF VIRGINIA AVENUE AND BROTHERTON AVENUE, FOR A PROPOSED 44-UNIT HOUSING DEVELOPMENT

On May 12, 2005, a letter was received from Clay Estep, Construction Project Manager for Neighborhood Housing Services of Asheville, N.C., Inc., to Urban Planner Kim Hamel as follows: "Pursuant to our conversation earlier this morning, please withdraw the Brotherton Commons/Greenwood Point Project from Council presentation. As discussed the main reason for the application withdrawal is the separation of principals within the Verdi Group. The designer or record will change from David Hill with the Verdi Group to Mitchel Sorin. Mitchel has been involved with the project extensively and will not move to Charleston with the Verdi Group. We will resubmit our information to TRC for the June meeting."

B. PUBLIC HEARING TO CONSIDER THE SAWYER MOTOR COMPANY BUILDING AT 100 COXE AVENUE AS A LOCAL HISTORIC LANDMARK

Vice-Mayor Mumpower said that this public hearing was scheduled for April 12, 2005; however, the applicants requested a continuance until May 10, 2005. On May 10, 2005, the applicants then requested a continuance until May 24, 2005.

Vice-Mayor Mumpower opened the public hearing at 5:24 p.m.

Historic Resources Director Stacy Merten said that this is the consideration of an ordinance designating the Sawyer Motor Company Building at 100 Coxe Avenue as a local historic landmark. This public hearing was advertised on April 1 and 8, 2005.

The 2025 Plan calls for continued efforts involving the preservation and enhancement, of historic properties. The Sawyer Motor Company Building has been recommended by the HRC for landmark designation.

The Sawyer Motor Company Building was found to be historically significant in the areas of commerce and architecture. The Sawyer Motor Company was the first automobile dealer to announce plans to build a new showroom on Coxe Avenue in the newly created automotive business district which was developed by E. W. Grove when he filled the deep ravine that existed between Patton and Southside Avenues with the earth obtained from the leveling of the hill where the old Battery Park hotel had stood. The Sawyer Motor Company was founded by Eugene Sawyer who was the first automobile dealer in Asheville, selling his first automobile in 1903.

The structure was completed in 1926 and was built as a grand four-story concrete and steel framed auto showroom and garage. The structure is faced with dark red brick and ornamented with cast concrete trim. Cast concrete names plaques are located at both the corner and at the center of the front entrance as part of an ornamented parapet. The exterior of the

building provides a strong example of the streetscape of Asheville, as it would have existed on Coxe Avenue in the late 1920's. One of the most interesting features of the 60,000 sq. ft. building was the use of the roof, accessed by an interior ramp to an additional 15,000 sq. ft. of parking.

The Sawyer Motor Company Buildings is a contributing structure in the Downtown Asheville National Register District and is part of a cluster of three automobile showrooms that remain standing on Coxe Avenue, including the B& B Motor Company Building and the Conabeer Motors Building located at 162-164 Coxe Avenue.

The Sawyer Motor Company Building has been rehabilitated and developed as condominiums and commercial space. The garage level on the second floor remains relatively intact with the original concrete framing, beams, pipes, electrical conduit and ductwork all exposed. The commercial area on the first floor has been designed to allow the concrete structure of the building and mechanical systems to remain visible overhead and the exterior walls and windows to remain visible.

The ordinance designates the Sawyer Motor Company Building as a local historic landmark. The property included in the designation consists of Sawyer Motor Company Building and the .63 acre parcel on which it is located as identified on the survey. The designation does not include any interior features.

Designation of this site as a local historic landmark makes the property owner eligible for a 50% reduction in local property taxes. Currently the tax appraisal for the property included in the proposed designation is $6,066,600.00. If the property were designated as a local landmark the potential tax savings for the property owners, including city, county and school taxes would be $40,039.56. Each individual owner would have to apply for the exemption. There is a question as to the eligibility of this property for tax deferral as the significant features are exterior only and the property is owned in common as a condominium. The Buncombe County Tax Assessor will determine the applicability.

When a property is designated historic, restrictions are placed on the property, and any modification to the land or structure must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County (HRC). All improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings. It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons and for the benefit of future generations.

Pros:

- A significant property will be recognized for its contribution both architecturally and culturally to the economic and industrial history of the area.

Cons:

- This is not a strong candidate for landmark designation.
- If approved, the tax deferral will result in a loss of revenue to the city and county.
- This property has been recognized as part of the downtown National Register district and currently is under no threat of being lost.

Based upon the foregoing, the HRC recommended that the Asheville City Council adopt an ordinance designating the Sawyer Motor Company Building as a local historic landmark.

Staff does not recommend that the City Council adopt the ordinance for landmark designation of the Sawyer Motor Company Building. Staff is concerned that although the HRC found that the property, technically met the minimum requirement for local significance, that the structure is not a strong candidate for landmark designation as the interior of the structure has

lost much of its integrity, as reflected in the minutes from the HRC hearing. Also, The structure is currently well maintained and under not threat of demolition, having recently been renovated and adaptively reused as a mixed-use development. Additionally, the property has little educational value to the community as a whole.

Ms. Merten further explained that there are two key reasons for designating a structure as a local landmark. The first is to provide a financial incentive to preserve a critically important and potentially threatened structure. Since the renovation of the Sawyer Motor Building has been accomplished, this reason does not apply over at least the short term -- it is unlikely that the building is threatened with demolition at this time. The second reason -- and the one that applies in this circumstance -- is to recognize a critically important structure and protect it from future renovations that could threaten its historic integrity.

She reviewed with Council the following list of existing local landmarks in the downtown area of Asheville.

Downtown Local Landmarks	Year Designated
Grove Arcade	1985
Loughran Bldg.	1994
Flat Iron Bldg.	1990
Public Service Bldg.	1990
S & W Cafeteria	1982
Drhumor Bldg.	1998
Kress	1982
Thomas Wolfe House	1998
Market Street & Langren Alley	1985
Old Pack Library	1982
YMI	1981
City Building	1988
Ravenscroft School	1981

A number of these buildings have been renovated and adapted for new uses following their designation as local landmarks. These renovations were reviewed by the HRC in accordance with the Secretary of Interior Standards for Rehabilitation. These reviews have been extremely helpful in protecting the historic integrity of the buildings.

Landmark designation is an honor and it is the highest level of recognition that a property can receive at the local level. It signifies recognition that the property is vitally important to the heritage and character of the community and that its protection significantly enriches the community's residents. In other words, the purpose of local designation is to recognize and protect a structure the community regards as irreplaceable. Ultimately, therefore, the Council must decide if the Sawyer Motor Building belongs in the list of local landmarks and whether its demolition or inappropriate renovation would result in an irreplaceable loss to the character of downtown Asheville and to the citizens of the community as a whole. If the Council agrees with the HRC and feels the Sawyer Motor Building is of comparable character to the buildings on the list, the building should be landmarked. If not, the Council should follow the staff recommendation and not designate the building as a local landmark.

Mr. Fred English felt that this is a tax dodge and urged Council not to designate the building as a local historic landmark.

Mr. Ray Conaway, Sawyer Motor Building (SMB) Condominium, said that landmark designation is an honor. It signifies recognition that a property is important to the heritage and character of the community and its protection enriches all of the community's residents.

The present renovation and reuse of the Sawyer Motor Building has, in fact, made many concessions to preserve and be respectful of the interior integrity of the structure while allowing the building to remain in service. The Sawyer Motor Building rehabilitation project was approved by both the Restoration Branch of the North Carolina State Office and the National Park Service in accordance with the Secretary of the Interior's standards for rehabilitation.

On the first floor, the exposed concrete post and beam construction, mechanical equipment and low-partition walls were aspects of the renovation that contribute to the open atmosphere of the original first floor showroom. The full-height central office area of the old showroom is clearly evident in the interior of the new space. The second floor garage, for the residents of the building includes factory windows, original paint with customer instructions, concrete posts and beams with evidence of the original ramp to the upper floors and fully conveys the historic character of that level.

The partitioning of the third and fourth floors for the residential units does contain some concessions to modern convenience and code requirements for residential use, but again, the ceilings reveal the original steel beams, girders and the concrete floors above. The mechanical systems have been left exposed in order to retain much original character of the building. Original factory windows are found in every residential unit and hallways.

According to the Designation of Historic Landmarks, the property must meet at least one of the following criteria:

(1) It is associated with events that have contributed significantly to our history.

The Sawyer Motor Company was the first automobile dealer to build a new showroom and garage facility on Coxe Ave. in the spring of 1925.

(2) It is associated with the life of a person significant in our past.

Eugene C. Sawyer, President of Sawyer Motor Co., was the first automobile dealer in Asheville, selling his first car in 1903. Two of his early sales of vehicles were to Rutherford P. Hayes, son of the former President, and George W. Vanderbilt, owner of Biltmore House.

(3) It embodies the distinctive characteristics of a Type, Period, or Method of Construction.

During the 1920's population boom in Asheville, the growth of the automobile business was reflected in an impressive number of new structures designed for the sales, maintenance, and storage of these automobiles. In Asheville, the greatest concentration of these buildings occurred on Coxe Ave, which had been promoted as the City's "Automobile Traffic Center".

The Sawyer Motor Building meets not just one, but three of the five listed criteria for Historic Significance.

The N. C. Dept, of Cultural Resources' Division of Historic Resources, Preservation Specialist Rebecca Johnson sent a letter dated July 1, 2004, to the Historic Resources Commission of Asheville and Buncombe County after reviewing the Local Designation Report prepared by Edwards - Pitman Environmental stating the following, "The Sawyer Motor Building,

built from 1925-1926, is presented as an intact example of auto related building construction located on Coxe Ave. The Sawyer Motor Company was the first automobile dealer to announce plans to build a new showroom and garage on Coxe Ave., an area that was advertised as the Automotive Business District of Asheville. The Sawyer Motor Building contributes to the significance of the downtown Asheville Historic District listed in the National Register of Historic places. The designation report, together with the National Register nomination for the district, provides the Historic Resources Commission and Buncombe County sufficient information to determine the Sawyer Motor Building possesses both the special significance and requisite integrity for Landmark Designation."

Landmark designation means the community recognizes this building as an important historical resource worthy of preservation. Any substantial exterior design alterations will be subject to the design review procedures of the local commission. The owners may apply for an annual deferral of fifty percent of the property taxes as long as the property is designated and retains significance and integrity.

Through several meetings, phone conversations and written communications, he felt that the HRC agrees that the building meets three (not just one) of the stated criteria. Staff quotes that the building is not under imminent threat because it is listed on the National Register of Historic Places. According to Rebecca Johnson, Preservation Specialist with State Archives and History, this does not preclude any alterations or changes to the structure such as replacing windows, adding top floors or changing the exterior surfaces. The only control to prevent those changes can be preserved by Local Historic Resources. If the City wants to have control over their historic treasures, they must designate them as Local Historic Resources. That is the import and reason for the Commission.

Although this is a presentation for local historic designation of the Sawyer Motor Building, he would like to point out the new development in this area (the south side of Asheville) that is going on because of the rehab of the Sawyer Motor Building. It has been expressed to me that a pattern of development is now underway because the Sawyer Motor Building has given others the courage to develop in this area. Including the Sawyer Motor Building annex and the Union Transfer Building, that is now underway, a low estimate shows that approximately $23 million will be added to the tax base of the City of Asheville. The development in this area will continue to add revenue to the City by attracting more visitors, investors and future homeowners to Asheville.

In conclusion, Mr. Conaway the City Council has this opportunity to designate the Sawyer Motor Building, a well-qualified historic building of significance to the history and posterity of Asheville. There will probably never be another opportunity to preserve it locally, and after two more years when the federal tax credits expire, changes can and will occur to the building that will forever disqualify it from ever being kept intact as an Asheville historic treasure.

Mr. Alan Ditmore did not support the designation in that the condominiums are too elite.

Vice-Mayor Mumpower closed the public hearing at 5:41 p.m.

Discussion surrounded Ms. Merten's responses to various questions/comments from Council, some being, but are not limited to: how long are the federal tax credits in effect and do the tax credits place restrictions on what can happen to the building; if the building is owned by individuals, how does someone go about changing the exterior; and is it anticipated that there will be changes to the exterior portion of the windows when the federal tax credits expire.

Ms. Merten said that if Council is concerned about the appearance of the building, she felt that a case could be made for local district designation. She explained how that process would work.

Upon inquiry of Councilman Davis, Ms. Kathy Conaway, resident of the Sawyer Motor Building, explained why the developer did not seek local historic designation before the building was renovated.

Councilman Davis asked if staff's recommendation for local landmark designation would have been in support if the designation had been applied for before renovations to the building occurred. Ms. Merten responded that she still didn't think their recommendation would have been in support for landmark historic designation.

Vice-Mayor Mumpower was impressed that Mr. Pilos, the developer, began renovation of the building on Coxe Avenue with no infrastructure support from the City. Ms. Merten agreed that Mr. Pilos made a great contribution, however, receiving no support from the City is not a criteria for landmark designation.

Councilman Davis moved to deny designating the Sawyer Motor Company Building at 100 Coxe Avenue as a local historic landmark. This motion was seconded by Councilman Dunn.

Councilman Dunn felt this building is a great place to live and the property values will rise. However, he felt we would be subsidizing some high income property and would not be able to support this designation.

Councilwoman Jones was not familiar with historic preservation and felt that she would have to rely on the HRC's expertise, which was a unanimous vote in support of the designation.

The motion made by Councilman Davis and seconded by Councilman Dunn to deny the local historic designation carried on a 4-1 vote, with Councilwoman Jones voting "no."

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE BY ADOPTING CONDITIONAL ZONING AS A LAND USE APPROVAL PROCESS

ORDINANCE NO. 3237 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE BY ADOPTING CONDITIONAL ZONING AS A LAND USE APPROVAL PROCESS

Vice-Mayor Mumpower opened the public hearing at 6:06 p.m.

City Attorney Oast said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) by adopting conditional zoning (and repealing conditional use district zoning) as a land use approval process. This public hearing was advertised on May 13 and 20, 2005.

Conditional or Special Use District (CUD) zoning has been authorized in North Carolina since the mid 1960's. Asheville adopted CUD zoning as part of the UDO in 2000. Despite the benefits of flexibility that CUD zoning provides, its legal and theoretical underpinnings – bifurcating the legislative rezoning from the quasi-judicial conditional use permit – have always been difficult to apply in practice.

In 2001 and 2002, the North Carolina Court of Appeals in two cases (review denied by the Supreme Court) approved the use of "conditional zoning." Conditional zoning is essentially

the same practically and conceptually as CUD zoning in that it is a rezoning based on a site specific development plan, and the applicant is bound by the conditions in the ordinance. Legally, however, it collapses what was an awkward two-step process into a single process.

One important difference for the Planning and Zoning Commission and City Council is that the conditional zoning process requires no specific findings. Decisions should still be based on sound land use guidance principles, however, and this is set forth in the proposed ordinances. It may help to think of conditional zoning as adopting a set of development regulations (building height, setback, etc.) and applying them to a single property or group of properties, creating a single use classification. Procedurally, the process is much less complicated than CUD zoning. The process for appealing a conditional zoning ordinance into the courts would be different as well.

Under the proposed ordinance, the application process would be mostly unchanged from the current process for CUD zoning – requiring that the owner be the applicant, that a site-specific plan be submitted, and that the uses be specified. Also under the proposed ordinance, conditional zoning is not available for classifications such as Urban Village, where a site plan is already required.

The current CUD zoning process would be eliminated for future use. Any CUD zoning designations established by this process, however, would continue to be governed by the CUD ordinance.

History / Prior Actions: After adding the reference to the conditional use standards in Sec. 7-16-2 to Sec. 7-7-8(d)(5), the Planning and Zoning Commission unanimously recommended adoption of the proposed ordinance.

Considerations:

- streamlined process at Planning & Zoning Commission/Council level, and in courts
- increased flexibility in zoning
- less administrative time required to process applications, administer ordinance
- less vulnerability to judicial challenge
- susceptible to over use

City staff recommends City Council amend the Unified Development Ordinance (UDO) by adopting conditional zoning (and repealing conditional use district zoning) as a land use approval process.

City Attorney Oast said that Mr. James Judd, with the Coalition of Asheville Neighborhoods, has made some suggestions, which staff agree with. He then reviewed the following recommended changes with Council:

7-7-8(c) - *General requirements.* The following provision shall apply in the administration of Conditional Use Zoning.

* * *

7-7-8(c)(6)c. - Replace current wording with the following: Any other minor modification in accordance with the limitations and procedures prescribed in this Chapter, unless a conditional zoning ordinance adopted pursuant to this section specifies otherwise

City Attorney Oast said that staff will come back to Council at some point in the near future with a proposed ordinance that would establish what a minor modification is and the boundaries that would affect minor modifications.

* * *

7-7-8(c)(9) - If no action has been taken to begin development of the property in accordance with the conditional zoning ordinance within 24 months of its approval by city council, or no vested right has been obtained then the property shall revert to its previous zoning classification, or the planning director may initiate appropriate action to rezone the affected property to any other classification.

7-7-8(c)(10) - If the use or uses commenced pursuant to a conditional zoning ordinance adopted pursuant to this section are abandoned or discontinued pursuant to sections 7-17-5 or 7-17-6; or no vested right has been obtained then the property shall revert to its previous zoning classification, or the planning director may initiate appropriate action to rezone the affected property to any other classification.

* * *

7-7-8(d)(2) - The application and supporting materials shall be reviewed by the technical review committee in accordance with its procedures for reviewing applications for conditional use permits prior to the meeting of the planning and zoning commission at which the application is to be considered. The recommendations and comments of the technical review committee shall be reported to the planning and zoning commission. In addition, the planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Sec. 7-16-2, and shall submit said report at the public hearings on said applications.

City Attorney Oast said that the effective date of the proposed ordinance is July 1, 2005, however, someone has contacted him and would like to take advantage of this ordinance sooner. Therefore, he asked that the ordinance be made effective upon date of adoption by Council, but still keep the date of July 1, 2005, for the repeal of the conditional use district zoning.

Vice-Mayor Mumpower closed the public hearing at 6:16 p.m.

City Attorney Oast responded to various questions/comments from Council, some being but are not limited to: how does the appeal process differ from the conditional use district zoning; and what happens when a prior conditional use zoning have been approved but construction has not begun.

Upon inquiry of Councilman Newman, City Attorney Oast explained how Council will have a broader degree of flexibility with adoption of the conditional zoning ordinance.

Vice-Mayor Mumpower said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3237. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 88

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. **ORDINANCE NO. 3238 - ORDINANCE AMENDING THE EXISTING ANIMAL CONTROL ORDINANCE**

ORDINANCE NO. 3239 - ORDINANCE AMENDING APPENDIX B (SCHEDULE OF CIVIL PENALTIES) THE CODE OF ORDINANCES RELATING TO THE ANIMAL CONTROL ORDINANCE

Assistant City Attorney Curt Euler said that this is the consideration of an ordinance regarding animal control.

The Asheville Police Department is seeking to improve public safety and the humane treatment of animals by reviewing and updating the animal control ordinance. Many of the amendments are technical in nature.

The following are the major revisions to the ordinance:

- City Council will have to decide between adopting a differential licensing or fertile animal permit scheme: (The proposed ordinance is drafted with the Fertile Animal Permit)

  A. Differential licensing fees for fertile and unfertile dogs, Sec. 3-5 Annual Registration for Dogs

     1. Annual registration for spayed/neutered dogs will be less than that for fertile dogs.
     2. Owner must provide proof of sterilization when initially registering a dog
     3. The Fees and Charges Committee will set the annual fertile and unfertile license fees.

  B. The Fertile Animal Permit

     1. The owner of a fertile animal will have to pay the City a one-time $100.00 permit fee to keep a fertile animal within the City.
     2. The City will only enforce this section if the Animal Control Officer is investigating another violation of the ordinance.
     3. If the owner if found to have a fertile animal without a permit, the fine is $200.00
     4. If the owner gets the animal spayed or neutered within 30 days of the issuance of the fine, the City will waive the fine.

- Waiver of Registration Fees for licensed service dogs and working law enforcement dogs

- Fine structure has been amended – Appendix B

  A. There is a cap on the amount of fines a person may receive before it is turned over to debt collections
  B. The fine will accrue monthly, not weekly

- Specific regulations placed on the tethering of an animal, Sec. 3-12 Animal Care

  A. Restraint must be at least 15 feet in length
  B. Restraint shall not become tangled or prevent the dog from moving freely or having access to food, water or shelter.

- Changes providing more agreement with state law, such as the requirement to immediately report an animal bite to the Police Department, Sec. 3-13 Animal Bite

- Adoption of fertile animals in public prohibited, Sec. 3-12 Animal Care
- Prohibits the giving away of animals as a prize. Sec. 3-12 Animal Care
- Selected serious offenses made Criminal, Sec. 3-20 Penalties

  A. Interference with Animal Control Officer, Concealment of Animal, Sec. 3-8 Inspection, Interference or Concealment
  B. Animal Fighting, Sec. 3-12 Animal Care
  C. Failure to report an animal bite, Sec. 3-13 Animal Bite
  D. Failure to comply with an order of seizure, Sec 3-30 Seizure and Disposition of Animals

- Clarified definition of terms, Sec. 3-4 Definitions

  A. *Bona fide farm*: use of one's real property for a farming business or enterprise, zoned or grandfathered for agricultural use; must comply with all applicable federal, state and local laws.
  B. *Exotic pet*: any animal that is not classified as domesticated, livestock or a wild animal; does not include feral animals.
  C. *Feral animal*: an animal of a species normally domesticated that has reverted back to a wild state.
  D. *Fowl*: any bird traditionally associated with sport, farming or production; including but not limited to poultry and game birds.

- Added definitions of humane care and treatment, sufficient water, sufficient food and sufficient shelter, Sec. 3-4 Definitions

  A. *Humane care and treatment*: maintaining an animal in an appropriate, sanitary environment. Humane care and treatment also considers the age, size, health problems, hardiness and other characteristics of the individual animal in daily care to prevent avoidable harm and suffering.
  B. *Sufficient food*: the provision of food of sufficient quantity and quality to insure property growth or maintenance of body weight appropriate to the age and species of the animal.
  C. *Sufficient shelter*: a structure which consists of least three sides, a floor and a roof and adequate in size and design to preserve the animal's body heat and protect the animal from the elements.
  D. *Sufficient water*: access to a constant supply of water that is clean, fresh, and visibly free of debris and organic material, or provided at suitable intervals for the species, and not to exceed 24 hours at any interval.

- Lessened the 150-foot minimum distance that permitted livestock, fowl and exotic pets are allowed to be from adjacent households, Sec. 3-36 Permit for keeping

  A. No person shall keep livestock and chickens and fowl within 100 feet of any household other than that of the owner of the animal, chicken or fowl.

- Numerous technical changes have been made to the wording of the ordinance for consistency and clarity and in order to make it easier to read.

The animal control ordinance was last revised on September 10, 2002. In an effort to meet public expectations and insure the most up to date ordinance possible, the Asheville Police

Department began a review of the ordinance in late 2003. Consistent with City Policy, the Asheville Police Department sought input from organizations such as the Asheville Humane Society, the American Kennel Club, and other local animal welfare groups. In addition, the City held a public forum on May 4, 2005, for citizens to give input.

Pros:

- The fertile animal permit and the restrictions on adopting fertile animals in public locations are steps towards reducing the number of unwanted animals in the City.
- The new fine structure will be more equitable to citizens.

Cons:

- There will be a significant increase in time spent on each Animal Control call for service to enforce the fertile animal permit. This will reduce time spent on handling other Animal Control matters.
- The City will need to create new fields in the Animal Control database to keep track of the fertile animal permits. In addition, there will be significant additional staff time needed to deal with the citations and possible waiver of fines (this includes both Customer Service staff as well as Animal Control staff).

City staff recommends approval of the ordinance amending the existing Animal Control ordinance and the ordinance amending Appendix B (Schedule of Civil Penalties) relating to the animal control ordinance.

Mr. Euler said that pursuant to Council's directions at the May 17, 2005, Council worksession, staff has made the following amendments to the Revised Ordinance:

1. In Sec. 3-5(e) service dogs and service dogs in training will be exempted from paying the animal registration fee provided that the handler gives the City the service dog's and/or training dog's service registration number.

2. Staff did make some cosmetic changes to Sec. 3-12(k) in that the N.C. Department of Agriculture only regulates dogs or cats when they are sold, traded or put up for auction. Hence the City will prohibit the buying, selling or trading of dogs or cats without a permit from the Department of Agriculture. However, the City will keep the broader definition of "animal" (i.e. any nonhuman vertebrate creature) for pet adoptions taking place in a public area.

3. As to the issue of restricting pet adoptions in public places, the City's proposed ordinance is consistent with Buncombe County and no revisions to the proposed ordinance have been made. However, he did note that he has been working on this issue with other groups involved and feels that they have reached a compromise. He suggested dropping the 501 (c) (3) designation and just require that the group be a valid active non-profit North Carolina corporation. This would still not allow the individual citizen to take their box of kittens to Wal-Mart to do the adoption, but on the other hand, it would allow a lot of well-meaning animal groups to conduct public auctions without having to go through the burden of getting their 501 (c) (3) designation.

At the request of Vice-Mayor Mumpower, Mr. Euler explained why we are amending the ordinance at this time. He said that (1) the existing ordinance has been in effect for 2-3 years and it is time for an update, (2) the City needs to be consistent with the County animal control

ordinance; and (3) the community expressed concern about pet over-population as a problem and this ordinance addresses that concern.

Mr. John Van Wezel, volunteer puppy raiser with Southeastern Guide Dogs Inc., urged City Council to exempt both the guide dog puppies in training as well as guide dog breeders from the provisions of the ordinance – both licensing and the spay/neutering provision. He explained that it can take up to two years for the Southeastern Guide Dogs Inc. to decide whether a guide dog puppy in training can become a breeder or not. It depends on the lineage of that puppy and how it is performing.

Mr. Mary Parker, representing Forever Friends and Merry Paws, hoped that discussions on this ordinance will continue to help the City manage the problem of killing healthy, adoptable animals in the City. She hoped there is an ongoing process to evaluate whether particular provisions help or hurt the overall goal. She felt we need more information on where the animals that are breeding are really coming from. She supported the ordinance amendment that allows a state non-profit corporation conduct adoptions. She said there is a big problem with pet stores selling animals and would like to work with Council to get the State to enforce stricter standards. She explained that there are a number of people that will not take animals to the shelter and unless there are organizations like Forever Friends and Merry Paws, they will dump them somewhere. She asked Council to work with her organizations on this issue.

Ms. Leslie Armstrong urged City Council to not change the existing ordinance regarding exotic animals in the City. Our existing ordinance prohibits the private possession of exotic wild animals. The draft ordinance will make a distinction between wild and exotic animals and allow exotic animals to be kept if a permit is obtained. Exotic animals require special care and special maintenance and private individuals cannot do that. Exotic animals pose health and safety risks. She urged City Council to not change the existing ordinance but to keep the strong law that we already have regarding exotic wild animals.

Mr. Alan Burger echoed Ms. Armstrong's comments regarding prohibiting the private possession of exotic wild animals in the City.

Ms. Ann Johnston, private owner of show dogs, said it would be a tragedy if she had to pay $100 for each of her four dogs and she doesn't want them spayed/neutered because the American Kennel Club does not permit people to show dogs that have been spayed or neutered. She suggested Council set up a separate group of dog owners and let them try to work out the problem and then they will submit their recommendation Council.

Ms. Marta Stoneman, Legislative Chair of the Asheville Kennel Club (AKC), presented City Council with materials regarding their response to the proposed ordinance. In summary of one concern, they felt that the proposed mandatory spay/neuter requirement is an attempt to address a problem that has not been adequately defined. While this change will certainly have a negative impact on many responsible pet owners, there is little evidence that it will have a positive impact on reducing the shelter population on the number of adoptable animals euthanized by the shelter. Numerous more positive and more effective alternatives exist. They recommended that the licensing fee for intact animals be removed from the proposed ordinance changes and tabled pending a one year analysis of the shelter population. The AKC offers its services, along with the resources of the AKC, to assist in constructing and conducting this analysis. The resulting report will be presented to City Council detailing the results of the analysis, suggested solutions, and the anticipated cost and effectiveness of each solution. Another concern is that the following sentence should be reinserted in the proposed ordinance to protect the rights of our citizens: "The animal control officer removing the animal shall then impound the animal and leave in a prominent place on the motor vehicle a written notice of the animal's impoundment, a brief description of the animal, and where and when the animal may be reclaimed." The final concern

is that the appeals process has been redirected from the Chief of Police to the Director of Animal Control. The AKC is concerned that this does not provide appropriate checks and balances and requests that the language not be changed from the existing ordinance of "Chief of Police."

Rev. Nancy Clark, President of the Asheville Humane Society, explained that this ordinance works as seen during the past year with the County's adoption of their animal control ordinance. She said they have seen an incredible decrease in the number of animals euthanized and the number of animals adopted has held almost the same. Regarding show dogs, she explained that the ordinance targets animals and their owners that are the problem. They will only enforce the spay/neuter clause if the animal is in violation of another clause in the ordinance. Therefore, it's the dogs that are running loose that will be targeted. She encouraged Council to keep strong language denying any permits for exotic animals.

Mr. Stewart David, representing Carolina Animal Action, explained how he felt this ordinance is a big step in the right direction.

Vice-Mayor Mumpower closed the public hearing at 7:12 p.m.

Discussion surrounded Mr. Euler's and Ms. Brenda Sears', Animal Control Officer, responses to various questions/comments from Council, some being, but are not limited to: is the ordinance enforceable; is the success of the County ordinance based on education enforcement or enforcement efforts; how much does it cost to get your animal spayed/neutered and are there agencies that can assist low income people; how many employees does the County have to enforce their ordinance; how many exotic animals are permitted and what are they; should permits be higher for exotic animals; what is the appeal procedure; and what is the procedure for impounding animals from cars.

Upon inquiry of Councilman Dunn, Ms. Shelly Moore, Executive Director of the Asheville Humane Society, said that the County's Animal Services Department supplied her with the following statistics: Since adoption of the County's ordinance, there have been a total of 187 citations issued, in conjunction with another violation of the ordinance. Of those, 41 people paid or complied (bought a permit or paid the fine), 83 were dismissed (people got their animal spay/neutered), and 63 are pending (they have an appointment to get the animal spayed/neutered or they have not complied and they are following up on compliance).

Upon inquiry of Councilwoman Jones, discussion took place as Ms. Sears explained the reasoning behind permitting exotic animals and how the City will enforce the permit.

At the request of Vice-Mayor Mumpower, Mr. Euler explained a scenario of the animal control officer being called to a home.

Vice-Mayor Mumpower said that members of Council have been previously furnished with a copy of the ordinances and they would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3238. This motion was seconded by Councilwoman Jones.

Councilwoman Jones asked to amend the motion to include the following language in Section 3-12- (k): "In addition, it shall be unlawful to adopt any animal in a public place within the city unless the entity placing the animal is an active North Carolina non-profit corporation, and prior to adoption of the animal, the animal is spayed/neutered and has all of the necessary vaccinations set forth by state law."

ordinance; and (3) the community expressed concern about pet over-population as a problem and this ordinance addresses that concern.

Mr. John Van Wezel, volunteer puppy raiser with Southeastern Guide Dogs Inc., urged City Council to exempt both the guide dog puppies in training as well as guide dog breeders from the provisions of the ordinance – both licensing and the spay/neutering provision. He explained that it can take up to two years for the Southeastern Guide Dogs Inc. to decide whether a guide dog puppy in training can become a breeder or not. It depends on the lineage of that puppy and how it is performing.

Mr. Mary Parker, representing Forever Friends and Merry Paws, hoped that discussions on this ordinance will continue to help the City manage the problem of killing healthy, adoptable animals in the City. She hoped there is an ongoing process to evaluate whether particular provisions help or hurt the overall goal. She felt we need more information on where the animals that are breeding are really coming from. She supported the ordinance amendment that allows a state non-profit corporation conduct adoptions. She said there is a big problem with pet stores selling animals and would like to work with Council to get the State to enforce stricter standards. She explained that there are a number of people that will not take animals to the shelter and unless there are organizations like Forever Friends and Merry Paws, they will dump them somewhere. She asked Council to work with her organizations on this issue.

Ms. Leslie Armstrong urged City Council to not change the existing ordinance regarding exotic animals in the City. Our existing ordinance prohibits the private possession of exotic wild animals. The draft ordinance will make a distinction between wild and exotic animals and allow exotic animals to be kept if a permit is obtained. Exotic animals require special care and special maintenance and private individuals cannot do that. Exotic animals pose health and safety risks. She urged City Council to not change the existing ordinance but to keep the strong law that we already have regarding exotic wild animals.

Mr. Alan Burger echoed Ms. Armstrong's comments regarding prohibiting the private possession of exotic wild animals in the City.

Ms. Ann Johnston, private owner of show dogs, said it would be a tragedy if she had to pay $100 for each of her four dogs and she doesn't want them spayed/neutered because the American Kennel Club does not permit people to show dogs that have been spayed or neutered. She suggested Council set up a separate group of dog owners and let them try to work out the problem and then they will submit their recommendation Council.

Ms. Marta Stoneman, Legislative Chair of the Asheville Kennel Club (AKC), presented City Council with materials regarding their response to the proposed ordinance. In summary of one concern, they felt that the proposed mandatory spay/neuter requirement is an attempt to address a problem that has not been adequately defined. While this change will certainly have a negative impact on many responsible pet owners, there is little evidence that it will have a positive impact on reducing the shelter population on the number of adoptable animals euthanized by the shelter. Numerous more positive and more effective alternatives exist. They recommended that the licensing fee for intact animals be removed from the proposed ordinance changes and tabled pending a one year analysis of the shelter population. The AKC offers its services, along with the resources of the AKC, to assist in constructing and conducting this analysis. The resulting report will be presented to City Council detailing the results of the analysis, suggested solutions, and the anticipated cost and effectiveness of each solution. Another concern is that the following sentence should be reinserted in the proposed ordinance to protect the rights of our citizens: "The animal control officer removing the animal shall then impound the animal and leave in a prominent place on the motor vehicle a written notice of the animal's impoundment, a brief description of the animal, and where and when the animal may be reclaimed." The final concern

is that the appeals process has been redirected from the Chief of Police to the Director of Animal Control. The AKC is concerned that this does not provide appropriate checks and balances and requests that the language not be changed from the existing ordinance of "Chief of Police."

Rev. Nancy Clark, President of the Asheville Humane Society, explained that this ordinance works as seen during the past year with the County's adoption of their animal control ordinance. She said they have seen an incredible decrease in the number of animals euthanized and the number of animals adopted has held almost the same. Regarding show dogs, she explained that the ordinance targets animals and their owners that are the problem. They will only enforce the spay/neuter clause if the animal is in violation of another clause in the ordinance. Therefore, it's the dogs that are running loose that will be targeted. She encouraged Council to keep strong language denying any permits for exotic animals.

Mr. Stewart David, representing Carolina Animal Action, explained how he felt this ordinance is a big step in the right direction.

Vice-Mayor Mumpower closed the public hearing at 7:12 p.m.

Discussion surrounded Mr. Euler's and Ms. Brenda Sears', Animal Control Officer, responses to various questions/comments from Council, some being, but are not limited to: is the ordinance enforceable; is the success of the County ordinance based on education enforcement or enforcement efforts; how much does it cost to get your animal spayed/neutered and are there agencies that can assist low income people; how many employees does the County have to enforce their ordinance; how many exotic animals are permitted and what are they; should permits be higher for exotic animals; what is the appeal procedure; and what is the procedure for impounding animals from cars.

Upon inquiry of Councilman Dunn, Ms. Shelly Moore, Executive Director of the Asheville Humane Society, said that the County's Animal Services Department supplied her with the following statistics: Since adoption of the County's ordinance, there have been a total of 187 citations issued, in conjunction with another violation of the ordinance. Of those, 41 people paid or complied (bought a permit or paid the fine), 83 were dismissed (people got their animal spay/neutered), and 63 are pending (they have an appointment to get the animal spayed/neutered or they have not complied and they are following up on compliance).

Upon inquiry of Councilwoman Jones, discussion took place as Ms. Sears explained the reasoning behind permitting exotic animals and how the City will enforce the permit.

At the request of Vice-Mayor Mumpower, Mr. Euler explained a scenario of the animal control officer being called to a home.

Vice-Mayor Mumpower said that members of Council have been previously furnished with a copy of the ordinances and they would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3238. This motion was seconded by Councilwoman Jones.

Councilwoman Jones asked to amend the motion to include the following language in Section 3-12- (k): "In addition, it shall be unlawful to adopt any animal in a public place within the city unless the entity placing the animal is an active North Carolina non-profit corporation, and prior to adoption of the animal, the animal is spayed/neutered and has all of the necessary vaccinations set forth by state law."

Councilman Dunn accepted the amending. Therefore, the amended motion carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 94

Councilman Dunn moved for the adoption of Ordinance No. 3239. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 117

VI. OTHER BUSINESS:

Councilman Davis announced various board and commission vacancies.

City Attorney Oast handed to Council a letter just received from County Attorney Joe Connolly, dated May 24, 2005, regarding the "Consolidated Water and Sewer Authority." As each Council member spoke about the need for the City's review of the content prior to response, Councilman Newman briefly stated that he has reviewed the proposal and personally feels there are serious problems in it from the City's perspective. There were several very important issues that City Council was interested in when we started the process of creating a new water agreement for the future of our water system. One of the main reasons was that we wanted to provide relief for families in Asheville who pay the highest water rates in North Carolina. As far as he can tell, the County's proposal does nothing to address that concern. City Council also wanted to create a plan to fix our water system and to stop diverting water revenues towards other governmental purposes. The County's plan would actually increase the level of diversion of water revenues to non-water purposes in local government. The current plan diverts 7.5% of water revenues to other governmental purposes and the County's plan would actually divert approximately 12% of water revenues to non-revenue purposes. Those revenues would come to City government, but 60% of the water customers already live in Asheville so asking those water customers to give City government more money for non-water purposes is not attractive. City Council also was interested in a more reasonable process for annexing large new developments that are being built around Asheville city limits. The County's proposal does not address that in any meaningful way beyond what existing State law already allows. In addition, City Council wanted to assure that Asheville's perspective is fairly represented in the future governance of the water system - the majority of customers live in Asheville and Asheville owns almost all of the water assets. The County's proposal actually places Asheville in a permanent minority position in the future of governance of our water system, which is unacceptable. City Council is working hard to reach out and find an agreement that addresses these concerns, as well as addressing concerns we have heard from our County Commissioners. However, it is his sense that the County plan presented today does not do a very effective job of finding that common ground.

Vice-Mayor Mumpower thanked the County Commissioners for taking the lead this year on the Memorial Day celebration and urged citizens to attend this event.

Vice-Mayor Mumpower also reported on the For Our Kids Day event which took place at Klondyke Apartments. He also praised the work of the Hillcrest community who undertook a major clean-up effort in their community.

The following claims were received by the City of Asheville during the period of April 15-May 12, 2005: Valerie Y. Harper (Fire), Emily Tiffany-Davis (Sanitation), Wally King (Parks & Recreation), John Reed (Water) and Walter Robertson (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Kyle Ross urged City Council to investigate police behavior. During her comments, a motion was made by Councilman Newman and seconded by Councilwoman Jones (which carried on a 4-1 vote, with Vice-Mayor Mumpower voting "no") to allow Ms. Ross to have an additional three minutes to complete her comments.

VIII. ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 8:20 p.m.

Magdalen Burleson
CITY CLERK

Charles B. Worley
MAYOR

Tuesday – June 14, 2005 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Vice-Mayor Mumpower led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

ADDITION TO THE AGENDA

At the request of City Attorney Oast, it was the consensus of City Council to add a resolution regarding a power line easement to Progress Energy under the "Consent Agenda."

A brief discussion was held about the substance of a closed session following this meeting. Vice-Mayor Mumpower felt that if the subject matter will be to talk about compromise plans regarding the Water Agreement then it should be held in open session. City Attorney Oast said that the reason for the closed session was to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation.

I. PROCLAMATIONS:

A. RECOGNITION OF EXCELLENCE IN PUBLIC SERVICE AWARD WINNERS

Mayor Worley read the certificates honoring the City of Asheville Excellence in Public Service Award Winners for 2005 and presented each one with a Certificate.

B. PRESENTATION OF THE SONDLEY AWARD TO ZOE RHINE AND ANNE WRIGHT

Mayor Worley recognized Scott Riviere, Chairman of the Asheville-Buncombe Historic Resources Commission. Mr. Riviere said that the Historic Resources Commission gives the Sondley Award to an individual(s) in the community who by word or deed has kindled among the citizenry of Asheville and Buncombe County an appreciation for the history or historic resources of the area. He presented this year's Sondley Award to Ms. Zoe Rhine and Ms. Anne Wright.

C. RECOGNITION OF MC COMMUNICATIONS IN SWANNANOA RIVER CLEAN-UP DAY

Mayor Worley commended MC Communications' volunteers who worked diligently to clean up the Swannanoa River in mid-March, 2005. He presented the recognition certificate to Ms. Toni Fisher of MC Communications.

D. PROCLAMATION PROCLAIMING JUNE 2005 AS "APHASIA AWARENESS MONTH"

Councilwoman Bellamy read the proclamation proclaiming the month of June 2005 as "Aphasia Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Edna Tipton and Ms. Robin Jones who briefed City Council on some activities taking place during the month.

E. RECOGNITION OF CITY CLERK MAGDALEN BURLESON

Mayor Worley recognized City Clerk Burleson for obtaining the Master Municipal Clerk status from the International Institute of Municipal Clerks. This professional designation represents the Institute's highest recognition for Clerk achievement. City Clerk Burleson is the first City Clerk in Asheville's history to receive the designation.

II. CONSENT AGENDA:

Mayor Worley announced that Consent Agenda Items "E" and "F" would be pulled from the Consent Agenda.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 24, 2005

B. RESOLUTION NO. 05-119 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH VAUGHN & MELTON CONSULTING ENGINEERS FOR THE EAST OAKVIEW ROAD BRIDGE REPLACEMENT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Vaughn & Melton Consulting Engineers for the project known as East Oakview Road Bridge Replacement Project for professional consulting engineering services.

The East Oakview Road Bridge Replacement Project consists of the provision of professional consulting engineering services for the preparation of the required planning document, engineering design, right-of-way and easement acquisition assistance, bidding and award assistance, construction inspection services and construction administration services associated with the construction of a new permanent bridge on East Oakview Road over Hominy Creek. The new bridge will be constructed to replace the existing temporary bridge that was put in place after structural failure of the old original bridge.

The City's Engineering Department requested qualification proposals from several consulting engineering firms from a list of approved N.C. Dept. of Transportation (NCDOT) design firms. The Engineering Department received and evaluated seven different proposals. City staff selected Vaughn & Melton Consulting Engineers as the most qualified firm along with NCDOT's approval.

The Project will be financed with monies from the City's Capital Improvements Fund. The NCDOT will reimburse the City 80% of the approved allowable Project costs from Federal Highway Administration funds.

The Project is in line with "Partnerships to Improve Critical Services and Infrastructure" focus area of the Strategic Operating Plan of the City.

The pros of executing the contract are:

- The process will commence to provide permanent access to residents of East Oakview Road.
- The professional services contract and cost amount of $ 318,376.92 has been approved by all applicable agencies.

The con of executing the contract is:

- The temporary land and creek disturbance that will be brought about by construction activities.

Staff recommends that City Council adopt a resolution authorizing the City Manager to execute a professional consulting engineering services contract with Vaughn & Melton Consulting Engineers for the project known as East Oakview Road Bridge Replacement Project, not to exceed the budgeted amount.

RESOLUTION BOOK NO. 29 – PAGE 144

C. RESOLUTION NO. 05-120 – RESOLUTION TO APPROVE LOAN FROM THE CITY'S HOUSING TRUST FUND

Summary: The consideration of a resolution allocating a $150,000 Housing Trust Fund (HTF) loan to Tim and Wendy Vorst for affordable housing development.

The balance of Housing Trust Funds currently available to lend is $395,000. We have received an application from Tim and Wendy Vorst requesting a $150,000 HTF loan for the development of 6 units of affordable housing on Patton Avenue (corner of Mimosa Drive).

The building will consist of six 1-bedroom units to be rented for $525 each per month. The developer successfully completed the construction of an identical 6-plex on Hendersonville Road in 2002 using HTF dollars and continues to have success leasing that property at affordable rents.

The application was evaluated by staff and scored well against the HTF criteria, particularly for developer qualifications and cost-effectiveness. The Housing and Community Development Committee reviewed the application on May 23, 2005, and has recommended a loan of $150,000 for 30 years at an interest rate of 2%.

This action supports Housing Opportunities Goals 3 and 4 of the Strategic Operating Plan.

Advantage: Assists the development of 6 units of affordable rental housing

Disadvantages: None

City staff recommends approval of the HTF loan to Tim and Wendy Vorst, in the amount of $150,000.

RESOLUTION BOOK NO. 29 – PAGE 145

D. RESOLUTION NO. 05-121 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY AN EASEMENT OVER CITY-OWNED PROPERTY ON CAUBLE STREET TO SET SAIL DEVELOPMENT INC. FOR A PRIVATE RESIDENTIAL SEWER LINE

Summary: The consideration of a resolution authorizing the Mayor to convey an easement over a portion of City-owned property on Cauble Street to Set Sail Development Inc. for a private residential sewer line.

The City owns property (PIN No. 9649.13-14-0658) located on Cauble Street. The property, which is part of the Reed Creek Greenway, is located about 200' west of the intersection of Cauble Street and Broadway. It is irregular in shape following the meandering of Reed Creek and containing approximately 0.32 acre. It is generally level with the street and forms a grassy plain along the bank of the creek.

Set Sail Development Inc. owns property on Cauble Street, comprised of two residential lots, which adjoins the City's property on Cauble Street. Set Sail proposes to build a house on each lot. Due to the location of the sewer main, the most direct and efficient route to provide sewer to the new houses is across a portion of the City's property. The requested easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the use of the easement area for a greenway, which is the proposed use of the property. The portion of land encumbered by the permanent easement comprises approximately 1,277 square feet

The City recently acquired the property on Cauble Street at a price of $31,100 reflecting a per square foot value of $2.23. The easement comprises and area of 1,277 square feet. The easement value is calculated at 50% of the land value rendering an easement value of $1,424.

The advantages of conveying the easement are:

- The easement will enable Set Sail to proceed with construction of two new homes on his property which will increase the tax base, generate economic activity, further smart growth objectives of urban densification and provide needed housing.
- The easement will provide the most practical and efficient access to the public sewer.

The disadvantage is the land within the easement area (1,277 sq. ft.) cannot be built upon or planted with large trees; however, that is mitigated by the fact that the land within the easement area is within the building set back area and cannot be built upon anyway.

Planning & Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing the Mayor to convey an easement over a portion of City-owned property on Cauble Street to Set Sail Development Inc. for a private residential sewer line.

RESOLUTION BOOK NO. 29 – PAGE 146

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. STATE HISTORIC PRESERVATION OFFICE FOR A GRANT FROM THE U.S. DEPT. OF INTERIOR, NATIONAL PARK SERVICE, FOR HAYWOOD ROAD NATIONAL REGISTER DISTRICT NOMINATIONS

This item was removed from the Consent Agenda.

F. BUDGET AMENDMENT FOR GRANT FROM THE N.C. STATE HISTORIC PRESERVATION OFFICE FOR PREPARATION OF THE WEST HAYWOOD ROAD COMMERCIAL HISTORIC DISTRICT AND EAST HAYWOOD ROAD COMMERCIAL HISTORIC DISTRICT NATIONAL REGISTER NOMINATIONS

This item was removed from the Consent Agenda.

G. RESOLUTION NO. 05-122 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE THE EXCHANGE OF PROPERTY BETWEEN CHRISTOPHER J. PETERSON AND THE CITY OF ASHEVILLE FOR ACCESS INTO RICHMOND HILL PARK VIA RICHMOND HILL DRIVE

Summary: The consideration of a resolution authorizing the City Manager to approve the exchange of property between Christopher J. Peterson and the City of Asheville for access into Richmond Hill Park via Richmond Hill Drive.

The City of Asheville Parks and Recreation Department and Legal staff have been working for several months on acquisition to the Richmond Hill Park from Richmond Hill Drive. A purchase option agreement was signed in February, 2005, between the City of Asheville and Christopher J. Peterson. This purchase option agreement deals with the exchange of approximately one acre of property owned by Mr. Peterson and valued at approximately $35,000. The City wishes to exchange an equal value of property to Mr. Peterson for the one acre that will allow access into the park. Staff is requesting City Council approval to give Mr. Peterson notice of exercise of this option in order to move forward with this exchange.

Pros:

- This exchange of property will allow for extension of the Richmond Hill Drive into Richmond Hill Park for the purpose of development of the National Guard Armory and other park features.
- This access meets the conditions of the conditional use permit approved by City Council.

Cons:

- The City will be exchanging approximately five to six acres of property from the Richmond Hill Park site

The Parks and Recreation Department recommends City Council approval for the City Manager to exercise the purchase agreement option dated February 17, 2005, in order to proceed with the exchange of property by Christopher J. Peterson and the City of Asheville to allow access into Richmond Hill Park via Richmond Hill Drive.

RESOLUTION BOOK NO. 29 – PAGE 147

H. ORDINANCE NO. 3240 - BUDGET AMENDMENT FOR FIRE DEPARTMENT U.S. DEPT. OF HOMELAND SECURITY GRANT

Summary: The consideration of a budget amendment, in the amount of $77,117, to receive grant money from the U.S. Dept. of Homeland Security (DHS), sub-granted through the Federal Emergency Management Agency's (FEMA) Fiscal Year 2004 Assistance to Firefighter's Grant Program, for procurement of fire and safety education equipment and computers and associated fire inspection supplies.

The City of Asheville Fire and Rescue Department, with endorsement of the Asheville City Council in November, 2003, requested $71,126 from the U.S. Dept., of Homeland Security to fund educational material for children attending public elementary schools and day care centers, public service announcements for fire and life safety education, and personal field use computers for fire prevention and inspection activities. The Federal grant was for 70% of the costs with the City to match 30%, or $23,135. Staff was successful in obtaining those Federal funds.

The goal of the project is to reduce the number of deaths and injuries to the residents of Asheville by at least 10% over a five-year period. The focus of the program benefits those individuals most likely to be affected by fire. Public safety spots, produced by the City, will be

aired on local television at times the public is watching TV. The announcements will cover topics such as holiday safety, use of smoke detectors, the importance of home fire escape plans, fire extinguisher use, fire drills and more, including topics of interest to children. Mobile interface capability through new handheld computers and printers will address the redundant procedure now in use by Deputy Fire Marshals. They will be able to complete the inspection form while performing the inspection and print the form for the occupant while at the building site. The procedure will streamline the inspection process, improve communication with occupants, and provide a safer environment for the occupants, residents, and visitors.

Pros:

- Increased public awareness and education will decrease the number of deaths and injuries to the residents of the City of Asheville.
- The increased efficiency and increase communication with the handheld computers will benefit the building owners, the occupants, and staff.

Cons:

- The City of Asheville's share of the matching grant.

Asheville City Council has directed staff to validate levels of emergency services provided for our citizens through the City's Strategic Operating Plan. Within the City of Asheville Strategic Operating Plan section on Critical Services and Infrastructure:
Goal 3 – Strong City and County Partnerships; Objective 1 – Review and validate the levels of critical emergency services provided throughout the city; Task 3 – Review and validate the levels of critical emergency services provided throughout the city.

City staff recommends City Council approve the budget amendment to receive grant money from the U.S. Dept. of Homeland Security.

ORDINANCE BOOK NO. 22 – PAGE 119

I. RESOLUTION NO. 05-123 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE FILM COMMISSION

Summary: At the City Council meeting on May 10, 2004, it was the consensus of City Council to appoint Mary Trimarco, AdvantageWest Film Commissioner, to the next vacancy on the Film Commission. Mr. David Shulman has resigned, this leaving an unexpired term until November 1, 2007. Therefore, Mary Trimarco will be appointed to fill the unexpired term of Mr. Shulman, term to expire November 1, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 148

J. ORDINANCE NO. 3241 – BUDGET AMENDMENT FOR REIMBURSEMENT INCOME

Summary: The consideration of a budget amendment, in the amount of $765,000, for insurance recovery reimbursement.

The City has incurred health care expenses this year that are eligible to be reimbursed. This budget amendment adds the reimbursements to the Fiscal Year 2004-05 budget in order to replenish our accounts.

The City operates a self-funded health care program whereby the City is responsible for paying employee medical expenses directly with funds included in the City's budget. In order to protect the City from large health care claims, and provide a cap for the cost of our health plan on a yearly basis, the City's health care budget includes a "stop-loss coverage" policy, which sets a limit on the amount the City has to pay on any individual health care claim. Eligible health care expenses above the established limit are reimbursed by our stop-loss insurance provider.

In the current fiscal year, the City has incurred higher-than-normal medical claim expenses, which has caused the medical claims budget to be overspent. However, due to these higher than normal expenses, the City has received additional stop-loss coverage reimbursement revenue, over and above what was budgeted as well. In order to cover the overspent medical claims account, staff requests an amendment adding $765,000 to our medical claims expense budget to be funded with an additional $765,000 in stop-loss reimbursement revenue that will be received by June 30. There is no net cost to the City associated with this amendment.

City staff recommends the budget be amended to add revenue received from insurance recovery and investment earnings to offset higher than anticipated health care expenses.

ORDINANCE BOOK NO. 22 – PAGE 121

K. RESOLUTION NO. 05-124 - RESOLUTION AUTHORIZING THE CITY TO CONVEY AN EASEMENT FOR LOCATION OF ELECTRIC POWER FACILITIES

Summary: The consideration of a resolution authorizing the City to consider an easement for power line location at Azalea Park

Since last summer, the City has been proceeding with the development of the park facility on Azalea Road; this work was interrupted by the hurricanes in September. In connection with this work, Progress Energy is installing some power lines, and needs an easement for the installation and any ongoing maintenance or repair. The exact location is unknown, and may change as our needs change, but Progress Energy will work with the Parks and Recreation Department as to the location of these lines and the easement will so provide.

Considerations:

- This is a routine request and will benefit the City.
- The easements are necessary to the use and enjoyment of the park
- Progress Energy will work with the City to minimize interference with activities.

If Council approves of this conveyance, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 29 – PAGE 149

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

ANNEXATION PUBLIC HEARINGS

Planning & Development Director Scott Shuford explained that purpose of these hearings is for the City to explain the plan for extending City services to the proposed annexation areas, and to give all persons resident or owning property within the areas, and all residents of the City, the opportunity to be heard.

On April 12, 2005, the City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Two Town Square, and Town Square East. The Annexation Services Plan was approved on April 26, 2005, and a public information meeting was held on May 31, 2005. Approximately 7 persons affected by the proposed annexations attended this meeting. On June 28, 2005, City Council will consider adoption of the ordinances extending the corporate limits, with an effective date of Ridgefield Business Park, Two Town Square and Town Square East being September 30, 2005, and the effective date of the Ascot Point Village area, the Long Shoals Road area and the Airport Road area being December 31, 2005.

Urban Planner Julia Cogburn advised Council that she would be bringing forward, at the June 28, 2005, meeting, a resolution amending the plan for services. Said amendment will consist of minor corrections and updates to the revenue estimates based on newer data.

A. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE RIDGEFIELD BUSINESS PARK AREA

Mayor Worley opened the public hearing at 5:37 p.m.

Ms. Cogburn reviewed with Council the specifics of the Ridgefield Business Park area.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner II Blake Esselstyn and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:38 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 28, 2005.

B. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE ASCOT POINT VILLAGE AREA

Mayor Worley opened the public hearing at 5:39 p.m.

Ms. Cogburn reviewed with Council the specifics of the Ascot Point Village area.

Mr. Eric Gorny felt that density does not equal community, and City Council should take care of the existing infrastructure, etc. in the City before trying to bring in more people.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for

this hearing. Urban Planner II Blake Esselstyn and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan, the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:41 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 28, 2005.

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE LONG SHOALS ROAD AREA

Mayor Worley opened the public hearing at 5:42 p.m.

Ms. Cogburn reviewed with Council the specifics of the Long Shoals Road area.

Mr. A.B. Wexler felt that this annexation does not meet the density requirements. He felt that the City of Asheville caters to developers and does not support existing businesses or residents. He strongly expressed his dissatisfaction in this annexation process.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner II Blake Esselstyn and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:47 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 28, 2005.

D. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE AIRPORT ROAD AREA

Mayor Worley opened the public hearing at 5:48 p.m.

Ms. Cogburn reviewed with Council the specifics of the Airport Road area.

Ms. Carolyn Baity, co-owner of Baity's Precision Machining on Glen Bridge Road, spoke in opposition to the annexation of this area. She said they have all the services they need. She felt this is a heavy tax burden on small businesses and felt they should be been allowed to vote on whether to be annexed or not.

Mr. Eric Gorny felt that density does not equal community. He felt City Council should take care of the existing infrastructure, etc. to make it more appealing to be a City resident.

Ms. Frances Briggs, resident on Long Shoals Road, spoke against annexation. She felt annexation pushes businesses out of the area. She felt it was not the County's responsibility to clean up Asheville's problems.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner II Blake Esselstyn and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:54 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 28, 2005.

E. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF TWO TOWN SQUARE

Mayor Worley opened the public hearing at 5:55 p.m.

Ms. Cogburn reviewed with Council the specifics of the Two Town Square area.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner II Blake Esselstyn and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:56 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 28, 2005.

F. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF TOWN SQUARE EAST

Mayor Worley opened the public hearing at 5:57 p.m.

Ms. Cogburn reviewed with Council the specifics of the Town Square East area.

Mr. A.B. Wexler spoke in opposition to this annexation.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner II Blake Esselstyn and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of

impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:58 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on June 28, 2005.

At 5:59 p.m., Mayor Worley announced a short recess.

B. PUBLIC HEARING ON THE FISCAL YEAR 2005-06 ANNUAL OPERATING BUDGET

Mayor Worley opened the public hearing at 6:08 p.m.

Budget Director Ben Durant said that the City Council conducts a public hearing each year to receive public input on budget issues before the Annual Operating Budget is adopted.

The Fiscal Year 2005-06 Annual Operating Budget was presented to City Council on May 2, 2005. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on June 3 and June 10, 2005. Adoption of the Budget Ordinance is scheduled for June 28, 2005, at the City Council meeting.

The Fiscal Year 2005-06 Annual Operating Budget is balanced with an Ad Valorem Tax rate of $0.53 per $100 assessed value.

A copy of the Budget is available for public inspection in the City Clerk's Office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which cannot be changed once adopted.

City staff requests City Council conduct the public hearing on the City of Asheville Fiscal Year 2004-05 Annual Operating Budget and include public input in consideration of the budget.

Two residents on South French Broad Avenue urged City Council to not eliminate traffic calming on South French Broad Avenue. They urged Council to finish their traffic calming on the south end of French Broad Avenue.

Councilman Newman explained that City Council is not eliminating traffic calming, just expanding the definition to include pedestrian safety measures into the traffic calming terminology.

Mr. David Bailey, CEO of United Way of Asheville and Buncombe County, updated City Council on the United Way 211 Call Center and asked for support on their outside agency funding request.

Ms. Leslee Kulba urged City Council to proceed with termination of the Water Agreement.

At 6:21 p.m., Mayor Worley closed the public hearing.

After a lengthy discussion on the budget process to date and the next step, it was the consensus of City Council to ask City staff to come back at the June 21, 2005, worksession with funding options for other initiatives.

Mayor Worley announced that on June 28, 2005, City Council will take all comments into consideration and consider the adoption of the Fiscal Year 2005-06 Annual Operating Budget.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 3242 - ORDINANCE TO ENACT OR CHANGE SPEED LIMITS ON VARIOUS STREETS AND TO ENACT THROUGH TRUCK PROHIBITIONS ON SPECIFIC CITY STREETS

Mr. Anthony Butzek, Traffic Engineer, said that this is the consideration of an ordinance to enact or change speed limits and enact through truck prohibitions on specific city streets.

The streets listed below have been identified for speed concerns or truck concerns by residents, City boards and commissions, City Council, the Asheville Police Department, Transportation Services Division staff, or other City staff. Transportation Services Division staff has conducted field reviews of street geometry and conditions. Streets with requests for truck prohibitions have been reviewed for appropriateness. The Police Department supports these recommendations.

Through Truck Prohibitions

The following streets are streets on which it is recommended that through trucks be prohibited. All are residential, with the exception of Page Avenue and Maxwell Street. Page Avenue is a commercial street that was not designed to accommodate large vehicles. Maxwell Street is a mixed-use street on which it is desirable to discourage use by trucks.

1. Maxwell Street, between Broadway and Chestnut Street
2. Overbrook Road, between Tunnel Road and Governors View Road
3. Page Avenue, between Battery Park Avenue and Battle Square
4. Springside Road, between Hendersonville Road and Overlook Road
5. Sunset Terrace, in its entirety
6. Woodlink Road, in its entirety

15 Miles Per Hour

The following streets are narrow residential streets with extreme street geometry problems, including severe and frequent crests and curves, and heavily used on-street parking. These streets warrant a significantly lower speed limit than the typical 25 mph. The recommended safe operating speed on these streets is 15 mph:

1. Dundee Street, in its entirety

20 Miles Per Hour

The following streets are narrow residential streets with street geometry problems or business district streets. NCDOT has adopted a matching speed limit on Biltmore Avenue. Street geometry problems on residential streets include frequent crests and curves. The recommended safe operating speed on these streets is 20 mph:

1. Biltmore Avenue (US 25), between Hilliard Avenue and Aston Street (NCDOT)
2. Cane Street, in its entirety
3. College Street, between Charlotte Street and Valley Street
4. Sweetspire Ridge, in its entirety

25 Miles Per Hour

Most of the following streets are typical local residential streets without significant street geometry problems. The appropriate speed limit for typical local residential speeds is 25 mph. Cedar Street and Wood Avenue are collector residential streets with character and geometry warranting lower than typical collector speed limit. Roberts Street is a mixed-use street warranting a speed limit higher than a typical business district street but lower than a typical collector street. The recommended safe operating speed on these streets is 25 mph:

1. Allen Street, between State Street and Haywood Road
2. Altamont View, in its entirety
3. Burton Street, between Haywood Road and Florida Avenue
4. Carrier Street, between Sulfur Springs Road and Baker Place
5. Cedar Street, between Wood Avenue and Fairview Road
6. Courtland Avenue, in its entirety
7. Dortch Avenue, between Hillside Street and Mount Clare Avenue
8. Druid Drive, between Patton Avenue and Mitchell Avenue
9. East Maple Drive, between New Haw Creek Road and the dead end
10. East Oakview Road, in its entirety
11. Finalee Avenue, in its entirety
12. Gashes Creek Road, between Azalea Road and the dead end
13. Haw Creek Circle, in its entirety
14. Kenilwood Place, in its entirety
15. Klondyke Avenue, in its entirety
16. Lakeside Drive, between Old Haywood Road and Appalachian Way
17. Langwell Avenue, in its entirety
18. Mann Road, in its entirety
19. Maple Drive, between Old Haw Creek Road and New Haw Creek Road
20. McDade Street, in its entirety
21. Morningside Drive, in its entirety
22. Old Stone Gate Place, in its entirety
23. Olmsted Drive, between Dearborn Street and Columbine Road
24. Pressley Road, in its entirety
25. Racquet Club Road between Hendersonville Road and Boddington Court
26. Rhododendron Place, in its entirety
27. Roberts Street, between Craven Street and Lyman Street
28. Samayoa Place, in its entirety
29. Senator Reynolds Road, in its entirety
30. Trinity Chapel, between New Haw Creek Road and Old Haw Creek Road
31. West Maple Drive, between Old Haw Creek Road and Hillview Road
32. Wilmington Street, in its entirety
33. Winthrop Road, in its entirety
34. Wood Avenue, between Cedar Street and end of City maintenance

30 Miles Per Hour

The following streets have features that warrant operating speeds less than the typical collector street speed limit of 35 mph. These features include residential character, narrow widths, and roadside obstructions. The recommended safe operating speed on these streets is 30 mph:

1. Azalea Road, in its entirety
2. Edwin Place, in its entirety
3. Florida Avenue, between Burton Street and Patton Avenue
4. Gerber Road, in its entirety
5. Hill Street, between Montford Avenue and US 19-23-70
6. Kimberly Avenue, in its entirety
7. London Road, between Bellview Road and West Chapel Road
8. Lyman Street, between Riverside Drive and Amboy Road
9. Pinecroft Road, in its entirety
10. River Hills Road, in its entirety
11. Riverside Drive, between Interstate 240 and Lyman Street
12. Royal Pines Drive, in its entirety
13. Shelburne Road, in its entirety
14. Spooks Branch Road, in its entirety
15. State Street, in its entirety

Mr. Butzek said that at the May 17, 2005, City Council worksession, Council requested staff to review the speed limits on Edwin Place and Kimberly Avenue for conformance with standard speed limit adoption practices. Included in this ordinance is a recommendation for increasing these limits from 25 mph to 30 mph.

The Engineering Department requests that City Council approve the ordinance amending these speed limit and through truck prohibition changes.

The following residents urged City Council to not raise the speed on Kimberly Avenue and Edwin Place for several reasons, some being, but are not limited to: Edwin and Kimberly are residential streets being used as north/south major thoroughfares to Merrimon Avenue; no other streets in Asheville averages over 10,000 vehicles a day; Kimberly Avenue has more pedestrian traffic than other streets in Asheville, other than the downtown streets; raising the speed limit will give people permission to go faster; Merrimon Avenue is the real problem, not Kimberly Avenue; and the speed on Kimberly and Edwin work fairly well now and should remain 25 mph

Ms. Barbara Hodgson, resident on the corner of Evelyn and Kimberly
Ms. Judi Williams, resident on Kimberly Avenue
Ms. Stacy Ibrahim, resident on Kimberly Avenue
Mr. Dennis Hodgson, resident on the corner of Evelyn and Kimberly
Mr. Peter Luther, resident on Kathryn Place

When Councilman Dunn asked if Kimberly Avenue is slated for traffic calming, Mr. Butzek responded that a portion of Kimberly Avenue and Edwin Place are slated for traffic calming in conjunction with the Grove Park Inn expansion. He said that $375,000 will be spent by the developer, which will be spent on a number of City streets as well as sidewalk and engineering associated with that.

Vice-Mayor Mumpower said that he was the person who raised the issue about the speed limit on Kimberly and Edwin. He doesn't really have an advocacy position on what that speed limit would be, but he has been hearing for years that staff has recommended one speed limit, but for political or other reasons, previous councils have elected to put an artificially low speed limit on those streets. It is his belief that we should not make our decisions on the basis of political pressures or people's personal preferences. He believes we should treat all streets the same and have the same kind of policies regardless of who lives there. People who live there resent the fact that this is a major thoroughfare, but it is. We rely heavily on Kimberly and Edwin to move people in the City.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that typically there is a balance between efficiency and safety when setting speed limits on particular streets. Higher speeds are generally always going to lead to reduction in safety, but increasing efficiency. Lower speed limit results in improved safety with a decrease in efficiency. Setting artificially low speed limits can generate enforcement problems. At this point, staff does not see a severe safety problem with either the 25 mph or 30 mph speed limit. However, given the fact that Kimberly Avenue is a collector street in a residential neighborhood, staff would typically recommend 30 mph for that type of street.

Councilwoman Jones noted that Kimberly Avenue has a vast amount of pedestrian traffic on it all the time and hoped that would be a factor considered in setting speed limits.

Councilwoman Jones moved to adopt Ordinance No. 3242, deleting the increase of the speed limit on Kimberly Avenue and Edwin Place to 30 mph. This motion was seconded by Councilwoman Bellamy.

Upon inquiry of Vice-Mayor Mumpower, Police Department Capt. Splain said that in the past 12 months they have issued 82 citations on Kimberly Avenue and the majority of those were speed violations. Capt. Splain said that they have an on-going plan regarding speed enforcement on Kimberly Avenue, which is managed through the North District Traffic Officer.

As Mr. Butzek responded to various questions from Council, discussion was held regarding the issue to raise or continue the existing speed limit on Kimberly and Edwin.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

The motion made by Councilwoman Jones and seconded by Councilwoman Bellamy carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 123

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced vacancies on various boards for the month of June and urged citizens to apply.

On behalf of City Council, Mayor Worley congratulated Councilman Dunn on becoming a grandfather. Councilman Dunn proudly announced the birth of his grandson today, Bryce Cooper Davidson.

Vice-Mayor Mumpower urged citizens to come forward and volunteer for the For Our Kids Clean-Up at Pisgah View Apartments on Saturday, June 18, 2005.

City Council expressed their sincere sympathy to Councilwoman Bellamy upon the passing of her grandmother.

As this was City Manager Westbrook's last formal meeting before retirement, City Council thanked him for his 11 years of service with the City of Asheville.

The following claims were received by the City of Asheville during the period of May 13-26, 2005: Deanna Frisbee (Sanitation), George Frisbee (Sanitation), Dennis E. Eatmon (Transit Services), Tracy Crowe (Transit Services), Curtis Crooks (Police), Diane Dalton (Water),

BellSouth (Water), Carol Schell (Streets), Juanita Grantham (Transit Services) and Marcia Egan (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mike Fryar spoke to Council about traffic calming.

Ms. Leslee Kulba, speaking on behalf of the Libertarian Party of Buncombe County, expressed their opinions regarding the negotiations on the water agreement.

Closed Session

Councilwoman Bellamy left the regular meeting and was not present during the closed session, but had not been excused.

At 7:56 p.m., Councilman Newman moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Jones and carried unanimously.

At 9: 05 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

Vice-Mayor Mumpower moved for Council to request the Buncombe County Board of Commissioners to honor their commitment to have a public meeting with the City Council to discuss the Water Agreement, and authorized the Mayor to send the Board a letter renewing this request. There was a brief discussion regarding the content of the letter, and specifying that the meeting should occur on or before June 28, 2005. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Davis informed City Council that it looked like no agreement would be reached with the Asheville Aces hockey team for the next season.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:15 p.m.

Magdalen Bowlesson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 21, 2005 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Interim City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Street Acceptance of Hoyle Lane and Treetop Road in Lakeshore Hills Subdivision

Summary: The consideration of a resolution to accept Hoyle Lane and Treetop Road in Lakeshore Hills Subdivision as City maintained streets.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Hoyle Lane and Treetop Road are developer constructed streets that have an average paved width of 23 feet and a length of 0.14 and 0.10 miles respectively for a total length of 0.24 miles. The City of Asheville staff inspected the construction of these roadways and certified they were built in accordance with City standards.

Following City Council's approval of this resolution, these streets will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council adopt the resolution to accept Hoyle Lane and Treetop Road in Lakeshore Hills Subdivision as a City maintained streets.

Provisions for Possession of Malt Beverages and/or Unfortified Wine at Various Events

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at various events.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- Asheville Welcomes the World, scheduled for July 5, 2005, in the grassy knoll next to the Biltmore Building. This is an event to acknowledge Asheville's Sister Cities.
- City of Asheville Tennis Tournament Picnic, scheduled for July 21 and 22, 2005, at Aston Park. This is a hospitality picnic for the spectators and players.
- Clues, Carats and Grapes, scheduled for September 22, 2005, in the grassy knoll next to the Biltmore Building. This is a benefit for the American Cancer Society.

City staff recommends City Council approve these resolutions on behalf of the applying organizations.

Budget Amendment for FEMA Reimbursements

Summary: The consideration of a budget amendment which adds FEMA reimbursements to the Fiscal Year 2004-05 budget to replenish various departmental budgets that incurred storm related expenses.

Several departments incurred extraordinary expenses this year as a result of major clean-up efforts that the City had to undertake after the impact of hurricanes Ivan and Francis. Clean-up expenses for major tropical storms or hurricanes are typically not included in the City's an annual budget since they generally do not represent recurring annual expenses; as such, departments had to redirect resources that were initially earmarked for the provision of basic services to storm-related clean-up. The City has applied for and received FEMA for reimbursements for most of these expenses. The amendment will add $599,610 to the General Fund and $549,252 to Parks Capital Project budgets to replenish various departmental operating line items that were used to cover clean-up costs.

City staff recommends the budget be amended to add revenue received from FEMA to the Fiscal Year 2004-05 to cover the City's storm-related clean-up costs.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

REQUEST FROM MOUNTAIN AREA INFORMATION NETWORK

Grants Specialist Laurie Sexton said that this is the consideration of a request from Mountain Area Information Network (MAIN) for a grant to offset the license fee for the installation of two antennas on one of the City's towers at White Fawn Reservoir, along with space in the equipment building at no cost.

The City typically charges other organizations, including nonprofit organizations, for this service. As in other cases where a nonprofit has asked for the waiver of a fee, City staff analyzed MAIN's request as if it were an Outside Agency Grant request.

The request is for a minimum of $12,000 initially, based on MAIN's list of equipment. (For future years, there is a 4% per annum increase in the license fee.)

The application submitted by MAIN did not provide all the information required of outside agencies and needed by staff to perform a comparable analysis. MAIN could not provide a strategic plan, or operating goals and objectives. The lack of a plan is a concern given the fast-changing technology of MAIN's field. MAIN also did not provide the requested audit, and their current year financial statements were incomplete; as such, standard financial ratios could not be calculated to determine the agency's financial health, history and stability. The City typically does not fund agencies if it can't adequately assess their financial health or determine their goals and objectives.

She said that Mr. Wally Bowen, Executive Director of Mountain Area Information Network (MAIN), has provided City staff today with the financial information. She requested City staff be given the opportunity to review the financial information in order to present City Council with a more informed recommendation. She also noted that Mr. Bowen would provide City staff with their Strategic Operating Plan.

She said that MAIN's overall mission and community network, however, do appear to support the City of Asheville's focus in the area of economic and community development.

Pros
- MAIN's service provides economic value especially to low income citizens, nonprofits, and micro-enterprises.
- MAIN has broad support from the community.
- The Town of Bakersville has set a precedent by providing free access to its tower.

Cons
- The opportunity cost of the grant ($12,000 minimum per year), foregoing the potential revenue from renting the space to another customer.
- Staff has unresolved questions about MAIN's financial statements and the goal of the requested funding, as well as concerns about management practices.
- MAIN was not able to demonstrate as requested the extent to which it serves low-income people even though they have 425 subsidized subscribers, referred by disability organizations, and support 504 nonprofit websites.

At this time, based upon City staff not being given the opportunity to review the financial statements, City staff recommends the City of Asheville not make the grant award to MAIN to offset the license fee for space on the City's tower. Again, she requested City staff be given the opportunity to review the financial information in order to present City Council with a more informed recommendation.

Mr. Wally Bowen, Executive Director of Mountain Area Information Network (MAIN), requested City Council waive the $12,000 license fee for their installation of two antennas, along with space in the equipment building, at White Fawn Reservoir. He explained that their sole reason for not incorporating the cost of the antenna space into their rate structure is that they cannot meet their organizational mission of "affordable access" for at-risk citizens and small businesses if they increase their rates to pay commercial rates for tower access.

Throughout discussion, Mr. Bowen responded to various questions/comments from Council regarding MAIN's mission, the merits of the proposal, what the benefits would be to our community; and what kind of access will be provided in the Asheville area.

Vice-Mayor Mumpower expressed a personal concern in that he felt MAIN (per their website) supports a political agenda and he would not support subsidizing the request with City tax dollars.

It was the consensus of City Council to bring this request back to City Council on July 12, 2005, in order to allow staff time within which to (1) review their financial documents and their Strategic Operating Plan; (2) provide Council with information on how much space is available on the tower; and (3) review of the quality of service they could provide to the City of Asheville.

RESOLUTION NO. 05-125 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT FROM THE DEPT. OF HOMELAND SECURITY TO ASSIST WITH THE HIRING AND RETENTION OF FIREFIGHTERS

Fire Chief Greg Grayson said that this is the consideration of a resolution to apply for funds through the Dept. of Homeland Security Office for Domestic Preparedness for a five-year grant to pay a portion of the salaries of three firefighters.

A Staffing for Adequate Fire and Emergency Response (SAFER) Grant would fund the salaries and associated benefits for new firefighters hired to increase Asheville Fire Rescue's capability, specifically so that AFR might more adequately comply with the minimum staffing standard for the first-arriving engine (or company) to initiate suppression.

These grants require the City to match an increasing proportion of the salary over a four-year period; in the fifth year of the grant, the City must absorb the entire cost of any positions awarded as a result of the grant. Once a SAFER funded position is filled, the funded position must remain filled until the end of the period of performance. The grant would fund 90 percent of the actual costs (up to $36,000 per position) in the first year; 80 percent in the second year; 50 percent in the third year; 30 percent in the fourth year; and zero in the fifth year.

Asheville Fire Rescue would like to request $272,265.00 in funding over four years from the Office for Domestic Preparedness for three new firefighter positions. The grant requires a 10% match in the first year, or $10,890.60. The match is available from the Fiscal Year 2005-2006 operating budget of Asheville Fire and Rescue Department. The required match in subsequent years would be $21,781.20 year two; $54,453.00 year three; $76,234.20 year four; and $108,906.00 in year five.

This action coincides with the City of Asheville's Strategic Operating Plan under the focus area of Partnerships To Improve Critical Services & Infrastructure.

Pros
- The project will improve public safety by enabling Asheville Fire Rescue to comply with the minimum staffing standard for the first-arriving engine to initiate fire suppression.
- This grant would allow the City to increase staffing quickly while phasing in the cost of the new positions over five years.
- This grant will reduce overtime costs when meeting staffing minimums and keeping units in service.

Cons
- The cost of the match.

The Fire Rescue Department recommends the City of Asheville apply for grant funds to pay a portion of the salaries and benefits, for four years, for three new firefighter positions.

Chief Grayson responded to various questions from Councilwoman Bellamy.

Councilwoman Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Davis and carried unanimously.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-125. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 150

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on July 12, 2005. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Procedures and Standards for Subdivisions

Urban Planner Julia Coburn said that this is the consideration of an amendment to the Unified Development Ordinance for the purpose of amending the procedures and standards for subdivisions.

City staff is proposing this wording amendment concerning the procedures and standards for subdivisions to accomplish three things:

- To clarify the procedures and standards to which "exempt subdivisions" must adhere.
- To codify a staff interpretation concerning access to small (four or fewer lot) subdivisions.
- To place access standards in both the subdivision (by reference) and general development standards of the UDO so that there is no question that all subdivided properties (exempt or nonexempt) must comply with these standards in order to obtain development permits.

The UDO sets forth regulations in Article XV for the division of land within its jurisdiction. In accordance with the N. C. Gen. Stat. sec. 160A-376, certain divisions of land are set forth in Article XV as "exempt subdivisions" and therefore, are not subject to the regulations authorized by the State and contained in Article XV of the UDO.

While the City has long had established procedures for handling these "exempt subdivisions" it was determined that these practices needed to be codified for the benefit of all reading this section of the ordinance. The proposed amendment sets out the statutorily determined situations that constitute an exemption (7-15-1(b)(1)) and also specifies (7-15-1(b)(2) that consecutive "exempt land divisions" of the same tract or parcel, created as a means of circumventing the subdivision standards, will not be permitted if occurring within five (5) years of each other. These two sections are substantively unchanged from the current UDO, except for the clarifying addition of the five (5) year time limitation. The proposed amendment goes on to require that a certification of exemption be received prior to the recordation of an exempt subdivision in order for staff to confirm the exempt status of the proposed division of land. The most important clarification found in this amendment is contained in proposed Section (7-15-1(b)(4)) that outlines the effect of a certification of exemption. This proposed provision clarifies that while an "exempt subdivision" may be recorded without review and without compliance with the City's subdivision regulations, a building or zoning permit will only be issued for subdivided property if that property meets the standards for development set forth in the UDO. In practice, although it will not be required, staff plans to encourage those proposing an exempt subdivision to bring in a plat which can be reviewed both for the certification of exemption and for compliance with all City regulations.

This amendment also adds wording to Article XV (Subdivisions), by reference, and Article XI (Development and Design Standards) to codify a staff interpretation concerning small (four lots or fewer) subdivisions. This interpretation/proposed amendment states that where there is a division of land into not more than four (4) lots for development for single-family purposes, such subdivisions need not comply with the requirement that all residential lots abut a public street or private street developed to City standards. As an alternative, such subdivisions must provide for a recorded minimum twenty (20) foot right-of-way off of a city- or state-maintained road. Such rights-of-way shall contain a private drive meeting construction specifications concerning materials, the need for a turnaround, and the slope of the road. The ability to create these small subdivisions is limited, in the amendment, to those not coming from a parcel in the same ownership. Additionally, the amendment sets forth a spacing requirement to reduce the proliferation (in a single area) of these exceptions to the subdivision regulations.

The final element of this proposed amendment involves moving the access requirements (both commercial and noncommercial) currently found in the subdivision regulations (Article XV) to the City's general development standards (Article XI) with reference in the subdivision regulations. This amendment serves to clear up any confusion as to whether or not exempt subdivisions must comply with the access requirements of the UDO.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros-

- The amendment clarifies and codifies the City's practices with respect to exempt subdivisions and adds a requirement for certification of exemption.
- The amendment sets forth an allowance for small single-family subdivisions to have access off a private drive meeting certain standards. Adding such a provision can facilitate infill development.
- The amendment clarifies that all lots, whether in exempt or nonexempt subdivisions, must meet the City's access standards.

Cons-

- Certifying exemption may be viewed as an unnecessary exercise for those subdividing properties.
- Private drives may be seen as insufficient access to developed properties.

The Planning and Zoning Commission recommended approval of this code amendment on February 2, 2005, by a unanimous vote of 7-0. Staff recommends approval as well.

Ms. Cogburn responded to various questions from Councilwoman Bellamy regarding this amendment.

New Light Industrial District

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to create a Light Industrial District.

This code amendment is intended to implement several infill development, community compatibility, and economic development goals and strategies of the Asheville City Development Plan 2025 through the creation of a new zoning district that allows for limited industrial development.

The amendment fills a gap between higher intensity industrial zoning districts and heavy commercial districts.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pros –

- Several goals and strategies of the 2025 Plan will be implemented.
- A wider range of land uses would be available to property owners.

Con – None noted.

The Planning and Zoning Commission recommended approval of this amendment on April 6, 2005, by a vote of 6-0. City staff also recommends approval of the proposed code amendment as well.

Mr. Shuford responded to various questions from Council regarding this amendment.

Open Space Standards Revisions

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to revise the open space standards to ensure a more uniform application of the standards and to provide for a fee-in-lieu option.

This code amendment is intended to implement goals, objectives and tasks of the City Council's Strategic Operating Plan related to the Natural and Built Environment. The Strategic Operating Plan proposes enhanced recreational facilities, especially greenways, as well as a fee-in-lieu program.

The UDO currently contains requirements for open space provision for property being developed or redeveloped for residential and for tourist accommodation purposes. These requirements note the connection between development and loss of open space, and include measures to compensate for this loss. In practice, however, the current requirements are not especially effective in providing meaningful compensatory open space and may, in some cases, actually be at odds with City smart growth policies that promote a more urban development pattern.

The ordinance applies open space requirements to a broader range of land uses, including smaller nonresidential projects, and smaller residential developments. In most circumstances, it allows a developer to opt to pay a fee-in-lieu of open space instead of providing the open space. It caps the amount of open space required at 10% for residential and 5% for nonresidential and mixed use development; this eliminates the "penalty" that affects denser or more intensive developments in the current ordinance. It requires the City to expend open space fee dollars in areas reasonably proximate to where they are collected. It broadens the types of areas that can be used for open space. In the event that "excess" land area is required to implement the Greenway Master Plan, density or intensity bonuses are provided.

The proposed ordinance provides a more balanced approach to open space provision by better relating it to the use proposed for the property, the associated zoning district or districts, and any related park, greenway and open space plans and policies. Additionally, there is greater flexibility created by providing for fee-in-lieu of open space.

The amendment has been routed to the Downtown Commission, CAN, CREIA, and CIBO for review and comment.

Pros –

- Several goals and strategies of the Strategic Operating Plan will be implemented.
- The amendment will provide for a more effective provision of meaningful open space.
- There is greater developer flexibility.

Con –

- The amendment applies to a wider range of land uses and therefore may be considered more restrictive than current requirements (possibly a pro).

Planning and Zoning members opposed to the amendment noted concerns that included a failure to see the benefit of requiring open space as a regulation in general, concern about the effect on smaller developments, and opposition to the fee-in-lieu concept.

The Planning and Zoning Commission recommended approval of this code amendment on June 1, 2005, by a vote of 4-3. City staff recommends approval of the proposed code amendment, as well.

During discussion of this amendment, Mr. Shuford responded to various questions from Council.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these public hearings on the July 12, 2005, City Council agenda.

RESOLUTION NO. 05-126 - RESOLUTION AUTHORIZING THE CITY MANGER TO ENTER INTO A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR PURCHASE OF PROPERTY FOR A MULTI-MODAL TRANSPORTATION CENTER

Transit Services Director Bruce Black said that this is the consideration of a resolution authorizing the City Manager to enter into a Municipal Agreement with the N.C. Department of Transportation (NCDOT), Rail Division, to participate and expend funds in the amount of $140,000 for the purchase of a future multi-modal transportation site on the southeasterly side of Thompson and Decatur Streets.

Resolution No. 04-112, adopted on May 11, 2004, authorized the City Manager to enter into a municipal agreement with NCDOT for the purchase of three tracts of property in the Biltmore Village Shopping Center for the purpose of establishing a multi-modal transportation center. The state was not able to purchase this property, and an alternative site was sought.

The NCDOT Rail Division has located a 3.05 acre improved site on Thompson Street, immediately adjacent to the above site. The new site is accessible from Thompson and Decatur Streets, and is along the Norfolk Southern rail tracks. This site is superior to the former site in both access and size.

The purchase price for this property is approximately $1,700,000 less the value of a three-year lease-back (approximately $300,000) to Granieri Properties LLC, the current owners. There are provisions to extend this lease if the state agrees to do so. Granieri will be responsible for all insurance, maintenance, taxes and utilities.

The City of Asheville will hold a 10% undivided fee simple interest in this property and will contribute $140,000 to the purchase. This amount is in the Fiscal Year 2004-05 budget, and will not require a budget amendment.

The NCDOT Rail Division will undertake and be responsible for all management of the property.

The due diligence has been done by the NCDOT Rail Division, and reviewed in house by the City of Asheville. No problems or issues were found related to this site.

Advantage:

- Secure site for possible Inter-modal Rail Station

Disadvantage:

- Ties up $140,000 for the next three years.

This action complies with the City Council Strategic Operating Plan in the Natural and Built Environment, Goal 3, Support Passenger Rail Service to the Region.

City staff recommends City Council authorize the City Manager to enter into a municipal agreement with NCDOT to participate in the purchase of the new site.

Vice-Mayor Mumpower asked if this agreement obligates the City to participate in the construction on the new site. While responding to various questions from Council, Mr. Black noted that this agreement does not tie up the City in terms of rail service itself. However, Interim City Manager Westbrook felt it was fair to say that the State would expect the City to be a partner in anything that may come up there in the future if it works out financially.

Councilwoman Bellamy moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Davis and carried unanimously.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 05-126. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 151

At 5:00 p.m., Mayor Worley announced a short recess.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to (1) re-advertise for the West resident position; (2) reappoint Tim Flora (North) and John Burchfield (Central); and (3) arrange interviews for Davidson Jones, Donald Swaby and Mary Ann LaMantia for vacancies on the Citizens/Police Advisory Committee.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Max Alexander and appoint Jean Ann Taylor to the Civic Center Commission.

It was the consensus of City Council to instruct the City Clerk to (1) appoint Councilwoman Bellamy; (2) reappoint Bill McGuire; and (3) arrange interviews for Bill Kelley and Nancy Ray. After a brief discussion, the City Clerk was instructed to contact the Board of Directors to see if they would be willing to entertain a Police Department liaison role on the Board. If there would be a concern with that, then City Clerk Burleson was instructed to also arrange an interview for Lt. Kevin West.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Diane Duermit and John Cram to the Historic Resources Commission.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) reappoint Eleanor Campbell and Jim Drummond; and (2) arrange interviews with Matthew Davis, Susan Birkholz, Geoffrey Ferland and Andrew Gall for vacancies on the Recreation Board.

The majority of City Council instructed City Clerk Burleson to prepare the proper paperwork to appoint T. Clark Brown as Chair of the Civil Service Board.

BUDGET WORKSESSION

City Council reviewed the budget prior to adoption on June 28, 2005.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:45 p.m.

Magdalene Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 28, 2005 - 3:00 p.m.

Special Meeting on Water Agreement Negotiations

Asheville City Council
Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Phyllis Coms

Buncombe County Commissioners
Present: Chairman Nathan Ramsey, Presiding; Vice-Chair David Gantt; Commissioner Bill Stanley; Commissioner Carol Peterson; and Commissioner David Young; and County Manager Wanda Greene

Mayor Worley and Chairman Ramsey opened their respective meetings.

Vice-Chair Gantt said that the goals of the County Commissioners have always been to fix the water system. They want to treat the rate-payers the same and they want to create a board that has minimal political influence. He reviewed the history of the water system, going all the way back to the 1920's. A year ago City Council notified the County that they wanted to terminate the Water Agreement. He said the County and the City have met by letters, met in person, in staff, by managers, and by e-mail. The first offer was February 3, 2005, when the County Commissioners sent a proposal that said they want an independent water authority and we need to have an independent recreation board. They wanted to fix the Civic Center through the recreation board. On March 14, 2005, the County held a public hearing and a majority of City Council attended and told them what they thought about the water agreement. On March 27, 2005, City Council responded to their offer and basically rejected it and said the County's facts were incorrect. On April 27, 2005, the County and the City spent 16 hours in mediation. There were 3 main County proposals. We made an offer of $9.6 Million to the City and we proposed to take over the Civic Center and repair it. That offer was rejected. After mediation there have been many proposals back and forth between individual members of each board. The County received a City Council proposal on May 10, 2005, that water be a City-run department and require the County to pay $3.5 Million. Then on May 24, 2005, there was a County offer to do consolidated water and sewer authority which was indirectly enforced by the Chamber of Commerce. We received a letter from the City on June 7, 2005, which said City Council was disappointed with our proposal but did not give a counter-offer. On June 8, 2005, Councilman Dunn made a proposal that suggested a City-run water department, no deferential rates and money to be reinvested in the water system. On June 23, 2005, the County unanimously accepted that offer, however, they still felt an independent board is the best way. He said that presently around 30% of the water is lost. Based on a study, $350 Million of repairs and maintenance will be required over the next 30 years. According to a 2004 audit, there is $12.9 Million sitting in the account of the Water Authority and $11.4 Million of bond money that has not been spent. We have some of the highest rates and have been asked to raise the rates five different times in the past couple years. We have passed some and some we have not. The County has two proposals on the table. One proposal is to consolidate the water and sewer. We think it will save the rate-payers money and we think that water is a regional asset and the financial responsibility for fixing it should be a regional responsibility. We feel we could save money with N.C. Dept. of Transportation non-betterment and betterment repairs. The other proposal is Councilman Dunn's proposal. We will support either one of the two proposals. We hope we can work an agreement, even at this late hour.

Mayor Worley agreed that we want to fix the water system. That has been a commitment to the entire Council. We want to be able to move ourselves into a position as quickly as possible to return all of the water revenues to do just that. We also want to treat the rate-payers the same,

however, we differ in how we want to go about that. We recognize that there is a cost of service differential between the more dense urban area and the much-less dense rural area – it does cost more to provide service and perform the maintenance on a per customer basis in the rural areas. We want a system that is accountable to the public and we think the best way to provide accountability is through the governing body board that is controlling and making policy decisions that respond to the will of the people and that can be replaced if they don't respond to the will of the people. The City gave notice of termination a year ago and the City had every right to do so. The water agreement is a contract which has provisions on how the contract can be terminated and the City followed that contract He felt what disappointed City Council was how the "playing field," in terms of negotiating and dealing with the termination of that contract, has gone far beyond the bounds, with introduction, with the County Commissioner's assistance, of the legislation that seeks to go well beyond maintaining the status quo. That has clearly made these negotiations much more difficult and probably has prevented us from reaching an agreement long before now. One of the reasons set forth for that legislation was to bring us to the table. There has been a lot of allegations that we have not been at the table and not been negotiating. He put together a timeline, which started on July 13, 2004. A lot of meetings, which City Council and County Commissioners agreed to informally, took place between our staffs. Those meetings took place August 6, August 7, August 12, August 24, 2005, August 26, etc. There are almost four pages of dates when we have had various types of meetings, negotiations, and proposals back and forth until September and then picking up again in early December and January. The hiatus between September and November was at the County Commissioner's request, because the Commissioners were facing an election. When you look through the timeline, it is obvious that the City Council, within the parameters that it has set forth, had a couple of main goals in giving notice of termination. One was to achieve a more equitable rate structure and the other was to take control of the water line extension policy in terms of growth and in terms of the City's own growth. Secondly, the City wants to provide a little more accountability to fix a system that was convoluted in the way it was operating and it was not serving our needs. Those were our main goals. Within the parameter of our main goals, one, two or three members of Council or Commissioners came up with proposals. When you look at those over the course of the last year, certainly it is City Council's position that the City has bent over backwards to find every conceivable combination of things where we might make concessions and get to achieve some of our goals. It has not been for lack of effort on our part. We are continuing in our efforts to find a solution with the right combination, that will give us some of things we need with limitations and restrictions and to satisfy some of the County's needs. Our effort has been to find a solution as well. In any controversy, solutions are found with compromise and that is what we are trying to do and we hope we can continue and find that common ground with the County Commissioners.

Commissioner Peterson, member of the Regional Water Authority, spoke of the highly qualified appointees on the Water Authority. However, the way the organization is structured, the Water Authority has little authority. She explained why the Commissioners recommend the model of the Metropolitan Sewerage District ("MSD") be adopted.

Councilwoman Bellamy felt this was the time to not just state our positions, but to negotiate.

There was a brief discussion about the recreational facilities; however, Commissioner Young felt that if we are able to give the City and County Manager time they would be able to come up with a compromise. Commissioner Peterson felt it was very important that we realize the water agreement has so many facets she that didn't think the Commissioners are in a position today to take anything off the table because they are looking at the total picture.

Councilman Davis spoke in support in giving Asheville the opportunity to plan for future growth at a natural rate as other cities in North Carolina are allowed to do.

Commissioner Young explained why he supported the excellent water/sewer authority model in Orange County and Chapel Hill.

Councilman Dunn said that his proposal consists of three basic parts: (1) the City runs the water system; (2) no deferential rates; and (3) we put back as much money back into the water system as we can. He felt we needed to focus on water and work out the issues on the recreation facilities and the Civic Center at a later date.

Chairman Ramsey felt understands that if the County wants an independent authority then the County has to give up some things that are very important to them. Same thing with the City. If the City wants to run the water system as a City department, the City has to make some large concessions to accomplish that for us to reach an agreement. He feels the independent water/sewer authority would be very beneficial to the City taxpayers. The focus on deferential rates is unnecessary and not healthy for the City.

Upon inquiry of Councilman Newman, Chairman Ramsey confirmed that all the water lines outside the City of Asheville will be maintained by the County.

Councilman Newman said that Asheville just wants to be treated like all the other cities in North Carolina that operate municipal water systems. He did think there are some merits to the independent water authority idea, the N.C. Dept. of Transportation line replacement cost issue being probably being the most compelling one. He wished the County had put forth a proposal for an independent system that actually addressed enough of the City's concerns that City Council would have given serious consideration to. He also wished the County would have been more open to a City-run system. He supported the idea of solving the recreational piece of this puzzle today. He felt that if we gave ourselves additional time maybe the City, County and legislators could work together to solve some difficult issues.

Vice-Mayor Mumpower explained why he felt that this meeting, like the entire process is a charade. Our legislators' involvement has skewed our ability to create a fair and reasonable negation. We have further impaired ourselves by having closed negotiations. Every proposal that has come before City Council so far that has been seriously considered has involved Asheville taking a much larger step than the County. There is no way that the City Council could surrender the assets of the City without fair compensation or accept an agreement that doesn't represent a middle ground blank compromise. We can't even agree on the basic facts. How do you negotiate to a good point if you can't agree on basic facts, like what is the value of the water system? He would be in support of a 30-day delay.

Councilwoman Jones felt it was not fair that the citizens of Asheville pay the highest water rates in North Carolina. We may not be able to fix that in five years, but hopefully will be able to in 10-15 years. She suggested negotiations continue later this evening after both bodies hold their respective formal meetings. She felt hoped that at least the City and Council will agree on the recreation facilities piece today and get those out of the water agreement negotiations.

Chairman Ramsey said that from his perspective he felt the City should operate the Nature Center and Recreation Park.

Mayor Worley said that the nothing would prevent the City and County to negotiate an agreement after July 1, other than perhaps the passage of the two Sullivan Acts. Mayor Worley asked the County if they would be willing to continue negotiations.

Commissioner Gantt said the General Assembly, at the County's request, got involved and he felt that was a good thing for the people of Buncombe County because it started the two governing bodies to start talking. He would not be in favor of asking the General Assembly to

delay action on the two Sullivan Acts because he thinks that is what is best for the people of Buncombe County.

Chairman Ramsey said that if Councilman Dunn's proposal is adopted and we do it for a term of 35 years, he personally be willing to request that the General Assembly, if Sullivan Acts II and III pass, withdraw those two local bills.

Mayor Worley said there is some room in Councilman Dunn's proposal in some of the collateral issues and some willingness to give on Council, but there needs to be some willingness to give on the Commissioner's part as well. He hoped these discussions can continue in order to reach an agreement.

There was a brief discussion amongst the Council and Commissioners about what will happen if the Sullivan Act bills are adopted.

At 4:20 p.m., Mayor Worley and Chairman Ramsey adjourned their respective meetings.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and Deputy City Clerk Phyllis Corns

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

CHANGES TO THE AGENDA

Councilman Newman asked that Consent Agenda Item "I" be removed from the Consent Agenda for discussion since it related to the Water Agreement. In addition, he requested a discussion regarding the negotiations of the Water Agreement be added under "Other Business."

I. PROCLAMATIONS:

A. CERTIFICATE OF APPRECIATION TO ROBERT L. CAMBY JR.

On behalf of City Council, Councilman Davis, liaison to the WNC Regional Air Quality Agency, read the certificate of appreciation to Robert L. Camby, Jr., Executive Director of the Western North Carolina Regional Air Quality Agency, who will be retiring after several years of service

B. PRESENTATION OF TELLY AWARDS

Mayor Worley said that the Telly Awards were founded in 1979 and is the premier award honoring outstanding cable television programs and commercials, as well as the finest video and film productions. Award recipients represent the best work of the most respected advertising agencies, production companies, television stations, cable operators, and corporate video departments in the world. With a 25-year history of recognizing creative excellence, the Telly Awards is a widely known and highly respected international competition. The 26th Annual Telly Awards received over 10,000 entries from all 50 states and numerous countries. This was the first time the City of Asheville submitted programming for judging, and as a result, The Asheville Channel was recognized with two awards for the programs, "Asheville City Limits: Fire Rescue", and "Asheville City Limits: Sanitation and Recycling."

On behalf of City Council, Mayor Worley congratulated Jeff Reble, Cable Access Coordinator, Kelley Webb and Richard Grant for their work on these productions.

II. CONSENT AGENDA:

Councilman Newman asked that Consent Agenda Item "I" be removed from the Consent Agenda for discussion since it related to the Water Agreement.

Councilwoman Bellamy asked that Consent Agenda Item "J" be removed from the agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 14, 2005, AND THE WORKSESSION HELD ON JUNE 21, 2005

B. RESOLUTION NO. 05-127 - RESOLUTION ACCEPTING HOYLE LANE AND TREETOP ROAD IN LAKESHORE HILLS SUBDIVISION AS CITY-MAINTAINED STREETS

Summary: The consideration of a resolution to accept Hoyle Lane and Treetop Road in Lakeshore Hills Subdivision as a City maintained streets.

Section 7-15 1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Hoyle Lane and Treetop Road are developer constructed streets that have an average paved width of 23 feet and a length of 0.14 and 0.10 miles respectively for a total length of 0.24 miles. The City of Asheville staff inspected the construction of these roadways and certified they were built in accordance with City standards.

Following City Council's approval of this resolution, these streets will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council adopt the resolution to accept Hoyle Lane and Treetop Road in Lakeshore Hills Subdivision as a City maintained streets.

RESOLUTION BOOK NO. 29 – PAGE 152

C. RESOLUTION NO. 05-128 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. STATE HISTORIC PRESERVATION OFFICE FOR A GRANT FROM THE U.S. DEPT. OF INTERIOR, NATIONAL PARK SERVICE, FOR HAYWOOD ROAD NATIONAL REGISTER DISTRICT NOMINATIONS

Summary: The consideration of a resolution & budget amendment to enter into an agreement with the North Carolina State Historic Preservation Office (NCSHPO) to accept a federal grant from the US Department of Interior, National Park Service via the NCSHPO in the amount of $4,140 for the purpose of the preparation of the West Haywood Road Commercial Historic District & East Haywood Road Commercial Historic District National Register Nominations and to receive the local match of $2,760 from SAW Ventures, LLC.

The project is to prepare two National Register nomination forms for the West Haywood Road Commercial Historic District & East Haywood Road Commercial Historic District. The proposed West Haywood Road District includes approximately 27-28 properties on 3 ½ blocks running roughly between Dunwell Avenue and Brevard Road to the east past Mildred Avenue to the west. The proposed district was added to the North Carolina Study List in February of 2005, as the Haywood Road Historic District. The proposed East Haywood Road District includes approximately 12 properties on roughly two blocks and runs roughly between Michigan Avenue to the east and Hanover Street to the west. It was added to the North Carolina Study List in 1999 as the Haywood Road/ Westwood Commercial Historic District. A consultant who meets the qualifications outlined in 36 CFR 61 will be hired to prepare the nomination according to the

guidelines outlined in National Register Bulletin 16A. The complete and final draft will be submitted to the NCSHPO no later than August 31, 2006.

The total cost for the project is $6,900. The grant is for $4,140. SAW Ventures, LLC has agreed to provide the local match of $2,760. The City will not be responsible for the local match, although the HRC would like to reimburse Saw Ventures for a portion of the match, if possible. The grant period is from 7/1/2005-8/31/2006.

Pros:

- If the nomination is approved for listing on the National Register, no obligations or restrictions will be placed on the property
- If listed on the National Register privately owned buildings in the district will be eligible for a 20% federal income investment tax credit and a 20% state tax credit
- The local match will be provided by the SAW Ventures, LLC

Cons:

- National Register listing does not prevent demolition of structures or inappropriate alterations.

This architectural study will document the architectural and cultural history of the Haywood Road Corridor, which is vital to understancing the history of West Asheville. The preservation of this area further acknowledges the importance of cultural and architectural heritage in maintaining Asheville's unique "Sense of Place", which is identified as a Focus Area in the City's Strategic Operating Plan.

City staff recommends that the City of Asheville enter into an agreement with the State Historic Preservation Office and adopt a budget amendment to receive grant funds and local matching funds from SAW Ventures, LLC, to hire a consultant to complete the nomination report for the West Haywood Road Commercial Historic District & East Haywood Road Commercial Historic District National Register Nominations.

Planning & Development Director Scott Shuford responded to some questions from Councilman Davis regarding this grant.

RESOLUTION BOOK NO. 29 – PAGE 154

D. ORDINANCE NO. 3243- BUDGET AMENDMENT FOR GRANT FROM THE N.C. STATE HISTORIC PRESERVATION OFFICE FOR PREPARATION OF THE WEST HAYWOOD ROAD COMMERCIAL HISTORIC DISTRICT AND EAST HAYWOOD ROAD COMMERCIAL HISTORIC DISTRICT NATIONAL REGISTER NOMINATIONS

Summary: See Consent Agenda Item "C" above.

ORDINANCE BOOK NO. 22 – PAGE 126

E. ORDINANCE NO. 3244 - BUDGET AMENDMENT FOR FEMA REIMBURSEMENTS

Summary: The consideration of a budget amendment which adds FEMA reimbursements to the Fiscal Year 2004-05 budget to replenish various departmental budgets that incurred storm related expenses.

Several departments incurred extraordinary expenses this year as a result of major clean-up efforts that the City had to undertake after the impact of hurricanes Ivan and Francis. Clean-up expenses for major tropical storms or hurricanes are typically not included in the City's an annual budget since they generally do not represent recurring annual expenses; as such, departments had to redirect resources that were initially earmarked for the provision of basic services to storm-related clean-up. The City has applied for and received FEMA for reimbursements for most of these expenses. The amendment will add $599,610 to the General Fund and $549,252 to Parks Capital Project budgets to replenish various departmental operating line items that were used to cover clean-up costs.

City staff recommends the budget be amended to add revenue received from FEMA to the Fiscal Year 2004-05 to cover the City's storm-related clean-up costs.

ORDINANCE BOOK NO. 22 – PAGE 128

F. RESOLUTION NO. 05-129 - RESOLUTION APPOINTING A CHAIR TO THE CIVIL SERVICE BOARD

Summary: The consideration of appointing the Chair to the Civil Service Board.

It is City Council's responsibility to appoint a Chair to the Civil Service Board annually.

At the City Council's worksession on June 21, 2005, it was the consensus of City Council to appoint T. Clark Brown as Chair to the Civil Service Board, to serve at the pleasure of City Council.

RESOLUTION BOOK NO. 29 – PAGE 155

G. RESOLUTION NO. 05-130 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Summary: The term of Max Alexander, as a member of the Civic Center Commission, will expire on June 30, 2005. In addition, Charlie Cole has resigned as a member, thus leaving an unexpired term until June 30, 2006.

At the City Council worksession on June 21, 2005, the City Council instructed the City Clerk to prepare the proper paperwork to reappoint Max Alexander to serve an additional three year term, term to expire June 30, 2008, or until his successor has been appointed.

Also at the June 21, 2005, worksession, City Council instructed the City Clerk to prepare the proper paperwork to appoint Jean Ann Taylor to fill the unexpired term of Mr. Cole, term to expire June 30, 2006, or until her successor has been appointed.

RESOLUTION BOOK NO. 29 – PAGE 156

H. RESOLUTION NO. 05-131 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Summary: The terms of Diane Duermit and John Cram, as members on the Asheville-Buncombe Historic Resources Commission, expire on July 1, 2005.

At City Council's worksession on June 19, 2005, the City Council instructed the City Clerk to prepare the proper paperwork to reappoint Diane Duermit and John Cram to each serve a

three-year term respectively, terms to expire July 1, 2008, or until their successors have been appointed.

RESOLUTION BOOK NO. 29 – PAGE 157

I. **RESOLUTION ALLOW THE EXECUTION OF DOCUMENTS NECESSARY TO COMPLY WITH THE COVENANT REQUIREMENTS OF THE CITY'S WATER SYSTEM REVENUE BONDS, SERIES 2001 FOR TERMINATION OF THE RESTATED AND AMENDED SUPPLEMENTAL WATER AGREEMENT**

This item was removed from the Consent Agenda for an individual discussion.

J. **RESOLUTION MAKING PROVISIONS FOR THE POSSESSION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CITY OF ASHEVILLE TENNIS TOURNAMENT PICNIC**

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CLUES, CARATS & GRAPES AMERICAN CANCER SOCIETY EVENT

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE WELCOMES THE WORLD SISTER CITIES EVENT

These items were removed from the Consent Agenda for an individual vote.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 05-132 - RESOLUTION ALLOW THE EXECUTION OF DOCUMENTS NECESSARY TO COMPLY WITH THE COVENANT REQUIREMENTS OF THE CITY'S WATER SYSTEM REVENUE BONDS, SERIES 2001 FOR TERMINATION OF THE RESTATED AND AMENDED SUPPLEMENTAL WATER AGREEMENT

City Attorney Oast said that this is the consideration of a resolution allowing the execution of documents necessary to comply with the covenant requirements of the City's Water System Revenue Bonds, Series 2001 for termination of the Restated and Amended Supplemental Water Agreement.

The City Council has given notice of its intention to terminate the Restated and Amended Supplemental Water Agreement effective June 30, 2005. The bond documents for the Water System Revenue Bonds, Series 2001 contain a covenant, which must be deleted in order to allow the termination of the Water Agreement. There may also be other documents legally required to allow the termination of the Water Agreement. The resolution allows for the execution of the necessary documents to allow for the termination of the Water Agreement.

PROS:

- All necessary documents will be executed to allow for termination of the Water Agreement

CONS:

- None noted.

City staff recommends Council adopt the resolution allowing the execution of documents necessary to comply with the covenant requirements of the City's Water System Revenue Bonds, Series 2001 for termination of the Restated and Amended Supplemental Water Agreement.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-132. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 158

RESOLUTION NO. 05-133 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CITY OF ASHEVILLE TENNIS TOURNAMENT PICNIC

RESOLUTION NO. 05-134 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CLUES, CARATS & GRAPES AMERICAN CANCER SOCIETY EVENT

RESOLUTION NO. 05-135 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE WELCOMES THE WORLD SISTER CITIES EVENT

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at various events.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- Asheville Welcomes the World, scheduled for July 5, 2005, in the grassy knoll next to the Biltmore Building. This is an event to acknowledge Asheville's Sister Cities.
- City of Asheville Tennis Tournament Picnic, scheduled for July 21 and 22, 2005, at Aston Park. This is a hospitality picnic for the spectators and players.
- Clues, Carats and Grapes, scheduled for September 22, 2005, in the grassy knoll next to the Biltmore Building. This is a benefit for the American Cancer Society.

City staff recommends City Council approve these resolutions on behalf of the applying organizations.

Councilman Newman moved for the adoption of Resolution No. 05-133. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 29 – PAGE 160

Councilman Newman moved for the adoption of Resolution No. 05-134. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 29 – PAGE 162

Councilman Newman moved for the adoption of Resolution No. 05-135. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 29 – PAGE 164

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE REZONING OF 1451 SWEETEN CREEK ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3245 - ORDINANCE TO REZONE 1451 SWEETEN CREEK ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Worley opened the public hearing at 5:21 p.m.

Ms. Julia Cogburn, Urban Planner, said this is the consideration of an ordinance to rezone 1451 Sweeten Creek Road from RM-16 Residential Multi-Family High Density District to Commercial Industrial District. This public hearing was advertised on June 10 and 17, 2005.

The owners, Narrell E. and Billie S. Owenby, have petitioned the City for rezoning property located on Sweeten Creek Road in South Asheville, which presently contains a single-family residence. The property backs up to Edgewood Road, a predominately residential street that intersects with Rock Hill Road. Sweeten Creek runs through the back of this property. As a result, a little over half of the property is in the regulatory flood area. The immediate back portion of the property is in the floodway.

The zoning surrounding the site is varied. Zoning to the west is RS-8; to the south RM-16; to the east RS-4; and to the north, CI.

The property immediately south of this property is wooded and vacant. Farther south there are a mix of residential uses. To the west, the land use is predominately single-family residential as you cross Edgewood Road although the Asheville Bit and Steel operation is located to the northwest of the subject property across Edgewood Road. Land uses to the north along Sweeten Creek Road are primarily commercial and commercial/industrial in nature from this property to the intersection of Sweeten Creek with I-40. To the east, across Sweeten Creek Road from the subject property, the land use is predominately residential. The Biltmore Church of God is located immediately northeast across Sweeten Creek Road.

CI zoning does not allow for single-family dwellings, so the existing structure would become nonconforming with this rezoning. CI zoning does, however, permit multi-family dwellings.

Sanitary sewer and water are available to this property.

Pros

1. The property is in an appropriate area for commercial development and is served by water and sewer. It is a level piece of property located along a busy road just south of the intersection of this road with an interstate highway.

2. Sweeten Creek provides a natural delineation point for the transition between commercial and residential development along Sweeten Creek Road as just south of this lot is where two streams converge into the creek.

Cons

1. This rezoning could be viewed by some as a continuation of strip commercial development along Sweeten Creek Road.
2. The properties surrounding the subject property in every direction, except to the north, are predominately developed for residential purposes.

The Planning and Development staff recommended approval of this rezoning to the Asheville Planning and Zoning Commission. At its meeting on April 6, 2005, the Planning and Zoning Commission had a split vote of 3-3 on this petition. The applicant has appealed to the Asheville City Council.

Ms. Cogburn presented City Council with a copy of a petition which contained approximately 35 signatures from members of the Stockwood Association who are opposed to the proposed rezoning.

Mr. W. Louis Bissette Jr., attorney representing the petitioner, presented City Council with a petition which contained approximately 75 signatures of people who support the rezoning to Commercial Industrial District. He said that this property has been in Mr. Owenby's family since around 1925. He showed City Council pictures of the property which showed the close proximity of other Commercial Industrial uses. He felt the rezoning would have a very mimimal impact on the Stockwood Subdivision. He urged City Council to rezone the property and noted that with all the restrictions on the property, they would not be able to get anywhere near 16 residential units built. In addition, he felt residential would not be attractive on the site due to the close proximity of other industrial and commercial uses and the fact that it is on a major thoroughfare.

Mrs. Hazel Edwards, resident on Stockwood Road and owner of property adjoining the subject property, did not oppose the rezoning.

The following individuals spoke in opposition to the proposed rezoning for various reasons, some being, but are not limited to: there will be a negative impact on the residential quality and integrity of the Stockwood community; the proposed property to be rezoned is kiddy-corner from the only entrance to the Stockwood community; various uses can be built on the property is the property is rezoned to Commercial Industrial; other properties along Sweeten Creek Road are likely to request to be rezoned Commercial Industrial as well; area residents bought their homes because other residential property was around them; property values of the residential homes will be reduced since they will be able to see industrial from their homes; City Council should stop rezoning residential property; if Council does want to rezone the property, they should wait until the widening of Sweeten Creek Road is completed; and more traffic will be added to Sweeten Creek Road if zoned Commercial Industrial:

Mr. Douglas Johnson, resident on Stockwood Road
Ms. Martie Hillyer, resident on Stockwood Road
Mr. Kevin Blanton, resident on Stockwood Road
Ms. Nancy Taylor, resident on Stockwood Road
Mr. Paul McNeil, resident on Stockwood Lane

Mr. Bissette pointed out that for commercial zoning, they are required to have a 35-foot setback, which is a great deal more than the residential required setback. He felt the setback would help buffer the building from the road and from the neighborhood.

Mayor Worley closed the public hearing at 5:50 p.m.

At the request of Councilwoman Bellamy, Ms. Cogburn read the permitted uses allowed in the Commercial Industrial District.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3245. This motion was seconded by Vice-Mayor Mumpower.

Vice-Mayor Mumpower felt this would be a limited intrusion on the neighborhood but a reality of a growing city.

Councilwoman Bellamy agreed that the Sweeten Creek Road area is changing, however, this property is basically surrounded by residential. She felt that if the property was brought to Council as a conditional use permit, then Council could place restrictions on it. However, a straight rezoning allows too many unknowns.

The motion made by Councilman Davis and seconded by Vice-Mayor Mumpower carried on a 4-3 vote, with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

Mayor Worley said that due to the number of votes received in favor of this ordinance, it would require a second reading, which will be held at the next formal meeting on July 12, 2005. He said that there will be no public comment allowed at the second reading.

ORDINANCE BOOK NO. 22 – PAGE 133

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON KENILWORTH KNOLL, KNOWN AS THE BEAUCATCHER CONDOMINIUMS, FOR A PROPOSED 106-UNIT CONDOMINIUM PROJECT

ORDINANCE NO. 3246 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON KENILWORTH KNOLL, KNOWN AS THE BEAUCATCHER CONDOMINIUMS, FOR A PROPOSED 106-UNIT CONDOMINIUM PROJECT

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:58 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for property located on Kenilworth Knoll, known as the Beaucatcher Condominiums, for a proposed 106-unit condominium project.

On April 29, 2005, the Kassinger Development Group and their representative Gerald Green submitted a conceptual master plan for the construction of a 106-unit condominium project proposed on approximately 5.2 acres off of Kenilworth Knoll (Attachment to City Exhibit 3 – Aerial Map). The project site involves two parcels; the former McGuffy's Restaurant site and the Visions Healthclub site, each zoned Highway Business. The properties surrounding the site are all zoned Highway Business and include the following uses: an assortment of retail, restaurant and lodging facilities along the north and west sides of the property, a high-density multi-family complex to the south and Interstate 240, to the east.

The conceptual master plan and development of the site will include (Attachment to City Exhibit 3 – Site Plan):

- Demolition of the McGuffy's restaurant and Visions Healthclub facilities;
- A 14,400 square foot parking deck consisting of 48 spaces;
- A 36, 210 square foot off-street surface parking area consisting of 116 spaces;
- Sidewalks will be provided from the development to Tunnel Road;
- Transit shelter will be provided at the existing bus stop located at Tunnel Road and Kenilworth Knoll;
- Construction of a 163, 600 square foot building, housing 106 condo units;
    - 74 – 2 bedroom units, and 32- 1 bedroom units
    - Building will consist of 4-stories at a height of 50-feet

The elevations included in the plan submittal are for the front and rear facades of the building (Attachments to City Exhibit 3 – East Elevation and Rear Elevation Drawings). It illustrates craftsman style architecture with details such as: porches, chimneys, gabled rooflines with moderate to deep overhangs and double-hung windows. A list of proposed building material includes: stonework, hardi-plank siding, painted wood trim and cedar shake siding.

On May 16, 2005, the Technical Review Committee (TRC) approved the project subject to the conditions outlined in the staff report and with the following added conditions: (1) The applicant address right-of-way and property discrepancy issues; (2) Sidewalk shall be installed along Kenilworth Knoll Drive down to Tunnel Road; and (3) Pedestrian signals shall be required at Kenilworth Knoll Drive and Tunnel Road.

The plans have been revised to address several TRC conditions outlined in the TRC Staff report including: setbacks, landscaping, open space and parking. Additional comments will be addressed upon final submittal to the TRC, should the project be approved by City Council.

On June 1, 2005, the Planning and Zoning Commission voted 7-0 in favor of approving the project subject to conditions by the TRC, staff and the following condition: The crosswalks required by the Technical Review Committee at the corner of Tunnel Road and Kenilworth Knoll, shall be upgraded to high-visibility type crossings. Markings may be ladder-style or piano-key style, similar to City markings in the downtown area. Material shall be white thermoplastic meeting N.C. Dept. of Transportation standards.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed use of the property is a multi-family residential project. Prior to the issuance of any permits, the TRC will review the final detailed plans to insure technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety, are met.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project site consists of two developed parcels that will be excavated in order to construct the proposed development. Additional grading of the site will occur along portions of the western side of the property where the land begins to drop in elevation, excluding the steeper parts of the bank. This is necessary to accommodate both the parking deck and portions of the building that are proposed below grade. A single retaining wall structure will only be necessary around the sidewalk proposed on the northern end of the building. The required landscaping in this area, however, will mask the height of the structure.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The project site and the surrounding properties are all zoned Highway Business district and consist of both low to high impact commercial uses and high density residential uses. The building is being designed with high-quality, long lasting building materials with enhanced architectural features and is likely to have a positive affect on adjoining and abutting properties. In addition, landscape buffers are proposed around the perimeter of the site, which will assist in mitigating any negative impacts the development may have on the surrounding area.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The development will be compatible with the immediate and surrounding area that is zoned Highway Business district where a wide range of uses and a mixture of both small and large scaled buildings exist. The site is not only being developed at a density below what is permitted, but is also being developed in a manner that preserves the steeper slopes on site. In addition to the perimeter landscaping required for the project, both the

parking deck and portions of the residential building are proposed below grade in order to assist in providing visual relief of the full scale and height of the structures. Lastly, the proposed building is designed with enhanced architectural features and long lasting building materials that is likely to add character to the surrounding area.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and transportation goals. The project utilizes the existing zoning on the lot to create a sustainable high-density residential development within the City Limits. The site is also located within very close proximity of transit service, potential employment centers, restaurants and shopping centers.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   A transit stop currently exists along the north side of Kenilworth Knoll and Tunnel Road. Additionally, any development of the site would require technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's TRC, which found that adequate services and facilities are available for the proposed development.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   The sito is served by a traffic signal at the intersection of Kenilworth Knoll and Tunnel Road. Comments received from Engineering staff at the Technical Review Committee meeting did not foresee any undue traffic congestion or hazards being created from this development.

Pros

- The site is appropriately zoned for this type of development.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to smart growth, infill and sustainable development, and transportation goals.
- The proposed development will provide a high-quality infill site on several properties, one of which has remained vacant for a period of time.
- The density proposed for the development can be supported by the existing infrastructure and is in close proximity to transit service, potential employment centers and shopping venues, which makes the development attractive and appropriate at this location.
- The project will provide housing for people with a range of incomes and needs. Proposed pricing of the units range from $143,000k to $300,000.

Cons

- It is noted that staff did not find any "cons" with the proposed development.

Based on the seven findings, staff recommends approval of the conditional use permit with the conditions outlined by the TRC and the following added conditions (1) All site lighting shall be equipped with 90 degree cutoff features and be directed away from adjoining properties and streets; (2) All existing vegetation to be retained shall be clearly indicated and dimensioned

on the site plan; and (3) The crosswalks required by the Technical Review Committee at the corner of Tunnel Road and Kenilworth Knoll, shall be upgraded to high-visibility type crossings. Markings may be ladder-style or piano-key style, similar to City markings in the downtown area. Material shall be white thermoplastic meeting N.C. Dept. of Transportation standards.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that City Council does not have a role in the contractual issues between the operator of the health club and the patrons.

Mr. Gerald Green, representing the developer, spoke in support of the conditional use permit. They hope to strengthen the residential core in that area. This project will provide a wide-range of home ownership for people in our community.

After rebuttal, Mayor Worley closed the public hearing at 6:15 p.m.

Councilman Newman moved for the adoption of Ordinance No. 3246, granting a conditional use permit for property located on Kenilworth Knoll, known as the Beaucatcher Condominiums, subject to the conditions outlined by the TRC and the following added conditions: (1) All site lighting shall be equipped with 90 degree cutoff features and be directed away from adjoining properties and streets; (2) All existing vegetation to be retained shall be clearly indicated and dimensioned on the site plan; and (3) The crosswalks required by the Technical Review Committee at the corner of Tunnel Road and Kenilworth Knoll, shall be upgraded to high-visibility type crossings. Markings may be ladder-style or piano-key style, similar to City markings in the downtown area. Material shall be white thermoplastic meeting N.C. Dept. of Transportation standards. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 135

C. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS ON HAYWOOD ROAD FROM COMMUNITY BUSINESS II DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3247 - ORDINANCE TO REZONE TWO LOTS ON HAYWOOD ROAD FROM COMMUNITY BUSINESS II DISTRICT TO CENTRAL BUSINESS DISTRICT

Mayor Worley opened the public hearing at 6:20 p.m.

Mr. Alan Glines, Urban Planner, said this is the consideration of an ordinance to rezone two lots on Haywood Road from Community Business II District to Central Business District. This public hearing was advertised on June 10 and 17, 2005.

The owners of 797 Haywood Road, Paul and Margaret Nichols, with a lease purchase option to SAW Ventures Haywood LLC, were given a letter of violation regarding grading activity without an approved permit on the two lots that are a part of the rezoning request. This is related to renovation work being done at 797 Haywood Road to excavate the basement of the existing building.

This project and property came to the attention of the Planning and Development staff because of grading activity on the two parcels adjacent to the Nichols Furniture building at 797 Haywood Road. The new owners of this building are SAW Haywood Ventures, LLC who are renovating the building. They also have a lease purchase agreement for the two adjacent parcels. The parcels provided parking for Nichols Furniture when it operated there. In order to use the basement of the former Nichols Building, the owners began to excavate soil in order to

lower the floor level. The soil material was placed on these adjacent lots and the grading began. The Unified Development Ordinance outlines that grading activities require a permit.

After meeting with staff, SAW Haywood Ventures decided to seek a rezoning for the two parcels to provide consistent zoning for the properties that are under their control. A rezoning to CBD will also provide some relief to the landscape bufferyard requirements for the CBD parcels. This is consistent with the historic pattern of development for the downtown business section of the Haywood Road. Properties are often developed parcel line to parcel line without a large landscape buffer area. However, if a parking lot were developed, a minimum five foot wide parking lot landscape strip would be required which includes a row of trees interspersed with shrubs. Additional parking lot landscaping may be required if internal parking lot aisles are provided.

Staff is considering some rezoning action along the Haywood Road corridor. Based on the high level of redevelopment activity along Haywood, staff is interested in selecting a suitable zoning district. It seems clear that the older development pattern with the building placed at the street front with a commercial storefront would be a successful pattern for new development along the corridor. A recent report produced by students from UNC-Chapel Hill also recommended a consistent pattern for commercial uses along the corridor. Zoning options considered by staff for Haywood Road have included the Neighborhood Corridor District, Urban Place District or a special district created for Haywood Road. The study by staff for this area is just getting underway and we are not ready to provide a complete recommendation for what zoning district will be most suitable at this time.

The Central Business District (CBD) is provided to reinforce the downtown as the center of commerce for the region. It also allows a wide variety of uses including office, retail, residential and commercial uses. It is likely that parts of Haywood Road were zoned CBD because this was the best fit for existing buildings and uses along the corridor. More of the properties are conforming with the CBD zoning in place. Also the Haywood Road corridor is historically the main commercial street for west Asheville and provides a similar function that the central business district does. Buildings are required to be set just behind the sidewalk in the Central Business District zoning areas. There are also some building development standards for new projects in this district.

The Community Business II District (CBII) allows medium to high density business and service uses serving several residential neighborhoods. CB II is also expected to serve as a workplace for many residents in the surrounding neighborhood and also be pedestrian and auto friendly. A wide variety of office, retail and residential uses are allowed in the CB II district. Although buildings can be placed anywhere on the lot, locating the building to the front of the lot is encouraged and parking is allowed to the side or rear of the building but not in front.

Pros

- The rezoning provides zoning consistency for this property and other adjoining properties under the same ownership.
- The historic development pattern is maintained and consistent with the surrounding area.
- A zoning change to CBD provides an efficient development pattern with some additional development standards for new buildings.

Cons

- The rezoning request removes the requirement for the landscape bufferyard, which is based on compatibility of uses.

78

The Planning and Zoning Commission at their June 1, 2005, meeting voted 7-0 to recommend approval of the rezoning request. City staff concurs with that recommendation.

Mr. Austin Walker, applicant, was pleased to see what is happening in west Asheville and urged City Council to support his rezoning.

Councilwoman Bellamy said that the subject lots are deeper than the surrounding ones on Haywood Road and asked that as plans are developed, that they work with City staff to ensure that the houses are shielded from excess traffic and noise.

Mayor Worley closed the public hearing at 6:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3247. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 141

D. PUBLIC HEARING TO CONSIDER THE REZONING OF FOUR LOTS ON CLINGMAN AVENUE AND ADJOINING RIGHT-OF-WAY FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO URBAN RESIDENTIAL DISTRICT

ORDINANCE NO. 3248 - ORDINANCE TO REZONE FOUR LOTS ON CLINGMAN AVENUE AND ADJOINING RIGHT-OF-WAY FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO URBAN RESIDENTIAL DISTRICT

Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

Mayor Worley opened the public hearing at 6:28 p.m.

Ms. Julia Cogburn, Urban Planner, said this is the consideration of an ordinance to rezone four lots on Clingman Avenue and adjoining right-of-way from RM-8 Residential Multi-Family Medium Density District to Urban Residential District. This public hearing was advertised on June 10 and 17, 2005.

The owners, Mountain Housing Opportunities, Inc., have requested the rezoning of property located on the western side of Clingman Avenue immediately south of the developing Prospect Terrace area. The properties are currently vacant. The area proposed for rezoning abuts Clingman Avenue. It is proposed that one property be split zoned so that only the portion that abuts Clingman is rezoned to URD (leaving the portion abutting Jefferson as RM8). A small creek runs through a deep ravine in the property. Fill and piping will be necessary to develop the site. An unopened right-of-way has been included in this rezoning. MHO plans to petition to close this right-of-way in the future.

Zoning and land use surrounding the site are predominately higher density residential in nature. The zoning to the west is RM8; to the south RM8 with CI further down Clingman; to the east, the zoning is RM8 and to the north the zoning is mostly RM16.

The property immediately to the south of the subject properties is vacant. The Silver Dollar Restaurant is on property further south along Clingman as you approach the commercial/industrial section of the West End/Clingman neighborhood at the river. Properties to the north, west and east are predominately higher density single-family residential in character.

The RM8 District is intended to permit a full range of medium density multi-family housing types including single-family detached and attached residences.

The URD District is established to complement existing residential neighborhoods by providing an improved diversity of housing types, scale, affordability and character in areas where they can best be served by city services and infrastructure and is intended to be located on significant transit corridors and/or high growth areas. It is designed to provide new development and redevelopment opportunities that encourage urban scaled residential structures that relate to the street and character of Asheville's urban areas. A density of 32 units per acre is permitted.

Access to the properties is off of Clingman Avenue and Owens Bell Road. Sanitary sewer and water are available.

Pros

- The property is an appropriate area for higher density residential development as it is located in an area close to downtown with infrastructure to support such development.
- The plans for the West End/Clingman area promote higher density residential development in the residential core of the neighborhood.
- Surrounding development is predominately higher density residential in nature.

Cons

- Large ravine on the property will make development difficult.
- Non-residential development allowed in the URD District as part of a mixed use development may be considered by some to be inappropriate for this residential area.

The Planning and Development staff recommended approval of this rezoning to the Asheville Planning and Zoning Commission. At its meeting on June 1, 2005, the Planning and Zoning Commission unanimously (6-0) voted to recommend approval of this rezoning to City Council.

Mr. Mike Vance, representing Mountain Housing Opportunities, urged City Council to support their rezoning request.

Mayor Worley closed the public hearing at 6:30 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3248. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 143

E. **PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 13 SUMMERLIN ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED 9,000 SQUARE FOOT**

BUILDING EXPANSION AND AN ADDITIONAL 24-SPACE SURFACE PARKING LOT

ORDINANCE NO. 3249 - ORDINANCE REZONING PROPERTY LOCATED AT 13 SUMMERLIN ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO INSTITUTIONAL/CONDITIONAL USE

ORDINANCE NO. 3250 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 13 SUMMERLIN ROAD FOR A PROPOSED 9,000 SQUARE FOOT BUILDING EXPANSION AND AN ADDITIONAL 24-SPACE SURFACE PARKING LOT

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:36 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located at 13 Summerlin Road from RM-6 Residential Multi-Family Low Density District to Institutional/ Conditional Use, and a request to issue a conditional use permit for a proposed 9,000 square foot building expansion and an additional 24-space surface parking lot.

The owners of the property, Clear Channel Communication, have requested the conditional use zoning of property located in the City's extraterritorial jurisdiction area (ETJ) and unnamed neighborhood in West Asheville, north of Patton Avenue (Attachment to City Exhibit 3 – Location Map). The property is relatively large with a significant natural woodland surrounding the developed portion of the site. The existing building and parking area is accessed off of the dead-end of Summerlin Drive where City maintenance ends at the edge of the property (Attachment to City Exhibit 3 – Aerial Map). The property is surrounded by a few different zoning districts with the majority of the adjacent zoning being multi-family residential (RM-6 & RM-16); the property south of the subject site is single family residentially zoned (RS-2). Also located on the site are four communication broadcast towers scattered throughout.

The current use, radio broadcast studios and offices, is currently a "grandfathered" non-conforming use due to the existing RM-6 zoning in which business and office uses are not permitted. Non-conforming uses are not allowed to expand and any consideration of expansion would require a rezoning to a district that would allow the use as a "permitted use". The applicant is requesting a rezoning to the INST-CUZ designation in order to allow for the expansion but to also ensure that there will be limits on this, and any future development, in order to secure some compatibility with the adjacent properties.

The proposed Master Plan shows the existing 6,733 square foot building and existing 39 space parking lot (Attachment to City Exhibit 3 – Site Plan). Also shown on the Master Plan are two building and parking lot expansions. The first expansion (Phase 1) is for 9,000 square feet and an additional 24 parking spaces. The applicant is also seeking conceptual approval for a second building expansion (Phase 2) of an additional 5,200 square feet and 39 parking spaces (that would absorb the previous 24 spaces). Phase 1 would result in the maximum amount of parking permitted; Phase 2 would reduce the parking ratio to be within the minimum and maximum amount of parking permitted for the entire project area. Also associated with the project will be landscaping and other site compliance required for the parking areas (City Exhibits 4 and 5 – Existing Parking Photos). The proposed project will result in a medium impact use; when a medium impact use is adjacent to low or medium density residential a 25' Type 'C' landscape is required. This buffer may be reduced by approximately 40% when a distance separation of over 100 linear feet exists. Due to this separation and the amount of existing woodland that will remain, an alternative compliance that preserves the existing woodland edge will be considered as an alternative that is "equal to or better" than normal compliance. In areas where the surrounding woodland does not meet the minimum standard, additional plant material will be installed to meet the requirements of Section 7-11-2 of the Unified Development Ordinance.

At their May 16, 2005, meeting, the Technical Review Committee (TRC) met to review the project and made a motion to approve the rezoning and Conditional Use Permit request with the conditions outlined in staff's report. The majority of the revisions were minor revisions of clarification.

At their June 1, 2005, meeting, the City of Asheville Planning and Zoning Commission reviewed the Conditional Use Rezoning and Master Plan proposal and voted unanimously to recommend approval to the Asheville City Council, stipulating that the applicant meet all outstanding TRC conditions. In the intervening month the applicant has submitted a revised Master Plan that does appear to address the majority of the TRC comments, in addition to a formal letter of alternative compliance.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

82

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed building expansion will be located in the portion of the property where topography is very mild and only a relatively small amount of site disturbance is expected.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The existing use and proposed expansion are centrally located on the site with a substantial distance and vegetative buffer in place. No new access points for the project are proposed and it is anticipated that the expansion will be barely detectable by adjacent properties.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The proposed expansion is considered to be small (one story; 15,200 square feet total), relative to the size of the subject property (over 61 acres). In addition, as a result of the proposal a significant vegetative buffer will remain in place which will aid in preserving the character of the residential areas by buffering them from the non-residential use.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The ***Asheville City Development Plan 2025*** describes the need for the city to move away from "smokestack" type industries while attacting high-tech businesses. It also states that as a goal of the *Sustainable Economic Development Strategic Plan* that effort must be made to insure that Asheville's urban planning, zoning, and permitting processes, facilitate sustained and positive development (p. 200). Approval of this project would allow for the expansion of a "smokeless" high-tech business while the adoption of the associated masterplan would help insure compatibility with the adjacent residential uses.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   This proposed development is within close proximity to transportation facilities and other utilities appear adequate. The project area is located near major road facilities, interstate connections and other service centers on Patton & the New Leicester Highway. In addition, the proposed project will only require a relatively small expansion to the existing water and sewer service and preliminary review has not revealed any problems with providing future service to the building expansion.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

Although the proposed building expansion is 1 ½ times the size of the existing building, the parking area is not being expanded to the same ratio. No new access points for the project are being proposed and the use is not expected to generate at significant amount of traffic. Lastly, the City Traffic Engineer has reviewed the proposal and has not identified any traffic hazards.

Pros

- Allows for the expansion of a high-tech business.
- Retains a significant distance and vegetative buffer to adjacent properties.

Cons

- Allows for the expansion of a currently non-conforming use.
- Reduces the potential for the property to be redeveloped for a multi-family residential development.

For the reasons outlined, City staff concurs with the Planning and Zoning Commission and recommends approval of the zoning change from RM-6 to Institutional/Conditional Use and approval of the associated conditional use permit with detailed Master Plan.

Mr. Jeff Glasscock, architect representing Clear Channel, urged City Council to support the conditional use zoning.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:38 p.m.

Vice-Mayor Mumpower moved to approve the conditional use rezoning for property located at 13 Summerlin Road from RM-6 Residential Multi-Family Low Density District to Institutional/Conditional Use. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 22 - PAGE 145

Vice-Mayor Mumpower moved to adopt Ordinance No. 3250, to issue a conditional use permit for property located at 13 Summerlin Road for a proposed 9,000 square foot building expansion and an additional 24-space surface parking lot, subject to the applicant addressing all outstanding TRC conditions before final zoning approval. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 147

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 05-136 -RESOLUTION AMENDING THE ANNEXATION SERVICES PLAN

Planning & Development Director Scott Shuford said that this is the consideration of a resolution amending the Annexation Services Plan for the Year 2005 Annexation Areas to reflect revisions to the revenue estimates.

In adopting an annexation ordinance, the City has the authority to annex all or some of an area proposed for annexation, as long as that area qualifies for annexation. The City may also amend the services plan for the proposed annexation area or areas, as long as the requirements for providing service to the annexation areas continue to be met.

City staff presented the Annexation Services Plan for the Ridgefield Business Park, Ascot Point Village, Long Shoals Road, Airport Road, Two Town Square, and Town Square East areas to City Council on April 26, 2005. The report included a financing plan with estimates for revenues and expenditures included. The City Council adopted the Plan on this date.

The staff is now proposing that three pages of this plan be amended (those dealing specifically with revenue estimates) for two reasons. The first is to revise these revenue figures to reflect last minute changes to the qualifications numbers (population and acreage) that we failed at final publishing of the Plan to transfer to the revenue section of the plan. Secondly, the Budget and Research Division has provided us with new estimates for a few of the revenue figures, based on more current data. These revisions/corrections result in a net increase to the revenue estimate for these annexations of $53,550.00

As long as the Annexation Services Plan does not show the annexation area as qualifying under any additional statutory tests, no additional public hearing is required for this amendment to the Plan.

City staff recommends City Council adopt a resolution amending the Annexation Services Plan to reflect revisions/corrections to the revenue estimates.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-136. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 29 – PAGE 166

B. ORDINANCE NO. 3251 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE RIDGEFIELD BUSINESS PARK AREA

Mayor Worley said that the public hearing on this matter was held on June 14, 2005.

Planning & Development Director Scott Shuford said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Ridgefield Business Park area.

On April 12, 2005, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Town Square East, and Two Town Square. The Annexation Services Plan for all of these areas was approved on April 26, 2005, and the Plan was amended on June 28, 2005. A public information meeting was held on May 31, 2005. Public hearings on each of annexations were held by City Council on June 14, 2005. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Shuford said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is September 30, 2005.

Mr. Shuford explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Ridgefield Business Park area, with an effective date of September 30, 2005.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3251. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

Councilman Dunn said that he has voted against every annexation since being elected because he did not feel that the City was addressing some major issues, such as the water agreement, police presence, drug enforcement, and the issue of an increased room tax. As long as those issues were not addressed, he would not vote for annexation because we are not taking care of things we should be taking care of. Hopefully with the budget soon to be adopted, Council will be addressing some of those major issues and he would start supporting annexation.

Vice-Mayor Mumpower said there are strong arguments for annexation; however, he is principally against the idea of forced annexation. In addition, he said that we have a demonstrated willingness to annex manufacturing industry and he is opposed to that. Finally, he thinks it's unfair to annex County residents and not be able to give them any lower rates to help compensate for those added taxes.

Councilman Newman felt that annexation is about fairness in taxation. While the involuntary nature of the annexation process is not pleasing, it's even less fair to require the citizens and businesses who are located in the City of Asheville to pay twice the level of taxation. The families and businesses in the City of Asheville are paying for infrastructure and services that are important to the City of Asheville but are also important to all of Buncombe County and Western North Carolina. As the areas around the City limits become just as urbanized and just as developed as the areas across the street that are in the City limits, then to require the people who live in the City to pay double of what the others pay, is not fair.

ORDINANCE BOOK NO. 22 – PAGE 152

C. ORDINANCE NO. 3252 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE ASCOT POINT VILLAGE AREA

Mayor Worley said that the public hearing on this matter was held on June 14, 2005.

Planning & Development Director Scott Shuford said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Ascot Point Village area.

On April 12, 2005, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Town Square East, and Two Town Square. The Annexation Services Plan for all of these areas was approved on April 26, 2005, and the Plan was amended on June 28, 2005. A public information meeting was held on May 31, 2005. Public hearings on each of annexations were held by City Council on June 14, 2005. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Shuford said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to

extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is December 31, 2005.

Mr. Shuford explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Ascot Point Village area, with an effective date of December 31, 2005.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Newman moved for the adoption of Ordinance No. 3252. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 155

D. ORDINANCE NO. 3253 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE LONG SHOALS ROAD AREA

Mayor Worley said that the public hearing on this matter was held on June 14, 2005. .

Planning & Development Director Scott Shuford said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Long Shoals Road area.

On April 12, 2005, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Town Square East, and Two Town Square. The Annexation Services Plan for all of these areas was approved on April 26, 2005, and the Plan was amended on June 28, 2005. A public information meeting was held on May 31, 2005. Public hearings on each of annexations were held by City Council on June 14, 2005. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Shuford said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is December 31, 2005.

Mr. Shuford explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Long Shoals Road area, with an effective date of December 31, 2005.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Davis moved for the adoption of Ordinance No. 3253. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 158

E. ORDINANCE NO. 3254 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE AIRPORT ROAD AREA

Mayor Worley said that the public hearing on this matter was held on June 14, 2005.

Planning & Development Director Scott Shuford said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Airport Road area.

On April 12, 2005, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Town Square East, and Two Town Square. The Annexation Services Plan for all of these areas was approved on April 26, 2005, and the Plan was amended on June 28, 2005. A public information meeting was held on May 31, 2005. Public hearings on each of annexations were held by City Council on June 14, 2005. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Shuford said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is December 31, 2005.

Mr. Shuford explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Airport Road area, with an effective date of December 31, 2005.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3254. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 161

F. ORDINANCE NO. 3255 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE TWO TOWN SQUARE

Mayor Worley said that the public hearing on this matter was held on June 14, 2005.

Planning & Development Director Scott Shuford said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to Two Town Square.

88

On April 12, 2005, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Town Square East, and Two Town Square. The Annexation Services Plan for all of these areas was approved on April 26, 2005, and the Plan was amended on June 28, 2005. A public information meeting was held on May 31, 2005. Public hearings on each of annexations were held by City Council on June 14, 2005. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Shuford said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is September 30, 2005.

Mr. Shuford explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for Two Town Square, with an effective date of September 30, 2005.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Newman moved for the adoption of Ordinance No. 3255. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 164

G. ORDINANCE NO. 3256 – ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE TOWN SQUARE EAST

Mayor Worley said that the public hearing on this matter was held on June 14, 2005.

Planning & Development Director Scott Shuford said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Town Square East area.

On April 12, 2005, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Ridgefield Business Park area, the Ascot Point Village area, the Long Shoals Road area, the Airport Road area, Town Square East, and Two Town Square. The Annexation Services Plan for all of these areas was approved on April 26, 2005, and the Plan was amended on June 28, 2005. A public information meeting was held on May 31, 2005. Public hearings on each of annexations were held by City Council on June 14, 2005. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Shuford said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is September 30, 2005.

Mr. Shuford explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Town Square East area, with an effective date of September 30, 2005.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Davis moved for the adoption of Ordinance No. 3256. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 22 – PAGE 167

At 7:05 p.m., Mayor Worley announced a short recess.

H. ORDINANCE NO. 3257 - ORDINANCE ADOPTING THE FISCAL YEAR 2005-06 ANNUAL OPERATING BUDGET

Assistant City Manager Jeff Richardson said that this represents the Fiscal Year 2005-06 Annual Operating Budget for City Council's consideration before adoption.

The Fiscal Year 2005/2006 Annual Operating Budget was presented to City Council on May 2, 2005. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on June 3 and June 10, 2005. The City Council conducted a public hearing on the budget on June 14, 2005.

The Fiscal Year 2005/2006 Annual Operating Budget is balanced with an Ad Valorem Tax rate of $0.53 per $100 of assessed valuation, which reflects no increase over the current property tax rate. All essential City programs and services are maintained.

The net operating budget as currently presented to City Council is set at $103,926,947, which includes a General Fund appropriation of $74,392,126. This budget includes several changes that were made by Council at the June 21 Council meeting. Those changes are summarized below:

- Council added a total of $672,710 to the budget to support various new programs and initiatives. Those initiatives included $100,000 in annual debt service payments to finance the replacement of the Civic Center roof; $165,000 for repairs and renovations at the Reid Center and other recreation centers; $115,000 for the widening of Yorkshire Street; and $292,710 to hire five additional police officers, fund necessary training and equipment expenses, and purchase 3 additional police cars.

- In addition, $55,000 has been added to the budget to cover the cost of an additional Project Engineer position. This position was requested in the Proposed Budget; however, no funds were included to cover its cost, as funding was contingent upon Council approval of an increase to the Plans Review fee for Water Line Extensions. Council subsequently approved the fee increase; thus revenue and expenditures associated with the Project Engineer have been added.

- A portion of the aforementioned new initiatives was funded by identifying $245,813 in revenue adjustments. Specifically, $7,500 in revenue was added by increasing Adult Athletic Fees; $35,000 by increasing Co-sponsored group fees; $115,000 by transferring savings from the Affording Housing Infrastructure Project to the General Fund; $36,000 from increased MPO matching support from other jurisdictions; and $52,313 was added by

adjusting sales tax revenue estimates.

- The remaining portion of the new initiatives was funded by reducing expenditures by $426,897 in various areas of the budget. Specific reductions are as follows:

Remove Pack Square Consultant Cost	$12,500
Re-bid Recycling Contract	$11,000
Reduce Free Transit Pass Budget	$17,000
Eliminate 3 Vacant Telecommunicators	$105,261
Eliminate Vacant GASB Accountant	$40,000
Bring Minority Affairs In-House	$50,000
Reduce Azalea Park	$50,000
Reduce Memorial Stadium	$50,000
Reduce Contingency	$91,136
Total	**$426,897**

- Outside Agency funding is presented in accordance with the Outside Agency Committee recommendations. Several changes were made to Outside Agency appropriations for Fiscal Year 2005-06.

- Various changes or increases to fees & charges are presented in accordance with the Fees & Charges Committee recommendations. Specific fees & charges recommendations are provided as a part of the annual budget ordinance. Changes to the Affordable Housing Rebate program have been made to make it consistent with the standards used for the Affordable Housing Trust Fund Program.

Staff requests that Council review the FY 2005/2006 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Discussion surrounded Councilman Newman's proposed amendment to the stormwater program. He suggested investing more funds into the Priority Capital Projects ($50,000 increase) for infrastructure and reducing education/outreach ($15,000 reduction), public participation ($5,000 reduction) and stormwater planning ($30,000 reduction).

City Engineer Ball could support reducing the education/outreach and public participation by $20,000 and putting that into Priority Capital Projects, however, she explained the need for the existing $200,000 in stormwater planning. She said that any savings will be folded into the capital projects.

To address Councilman Davis' concern about people who have gone the extra mile to comply with stormwater regulations, Ms. Ball said there is the opportunity for people to get up to a 60% credit. City Manager Jackson said that since this is the first year of the stormwater mandated program, staff would report back in 6 months to update Council on how the policies and implementation of the program is proceeding.

Discussion surrounded Councilman Newman's proposed amendment to move forward with the Police take-home car policy in light of the significant budget reductions previously agreed to and with a modest reduction in the municipal salary increase (3% average pay increase but not the 1% cost-of-living). He explained four significant benefits: (1) creating a significant "perk" for our law enforcement officers; (2) improving the retention of good officers; (3) creation of a strong incentive for officers to consider living in Asheville; and (4) it will free up additional parking spaces

in downtown. Discussion of Police moral and vehicle maintenance surrounded this suggested amendment.

Discussion surrounded Councilman Newman's proposed amendment regarding the deletion of the 1% cost-of-living increase. He felt a 3% average increase is a fair and positive increase, given the state employees are expecting a 2.5% increase. He also felt that in light of the uncertainty of the water agreement Council should be careful to limit the expansion of government spending which will create permanently recurring costs. Discussion surrounded this suggested amendment.

Councilwoman Bellamy supported the Police take-home car policy; however, not at the expense of deleting the 1% cost-of-living increase for all City employees. She suggested the amount for the take-home car policy come out of Fund Balance.

Councilman Newman moved to approve a 3% average increase and a .5% cost-of-living increase for City employees and implement the 4-year lease program for the Police take-home car policy. This motion was seconded by Vice-Mayor Mumpower. Said motion failed on a 3-4 vote, with Vice-Mayor Mumpower, Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Councilwoman Bellamy, Councilman Davis and Councilman Dunn voting "no."

Discussion surrounded other areas (Housing Trust Fund, Fund Balance) to find the necessary funds to implement the 4-year lease program for the Police take-home car policy.

City Manager Jackson said here is merit to the take-home car policy if the cars stay within the City limits. However, he would not recommend any cut of non-recurring funding for this policy direction. He said that staff will update Council in 90 days on sales tax data, the revenue picture and the overall budget position along with providing some other options on how to implement this program.

Mayor Worley felt there is a majority support for the take-home car policy, but the real concern is the budgetary implications. After a short discussion, it was the consensus of Council to support the Police take-home car policy and leave it up to City staff to implement.

After a discussion initiated by Councilwoman Bellamy, it was the consensus of City Council to co-sponsor the Parks & Recreation events in the amount of $35,000.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved to adopt Ordinance No. 3257, with the following changes (1) in the stormwater program budget, reducing the education/outreach and public participation by $20,000 and reallocating it into Priority Capital Projects; (2) implement the Police take-home car policy; and (3) reinstate the $35,000 for the co-sponsor of Parks and Recreation events. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 22 – PAGE 170

V. NEW BUSINESS:

A. RESOLUTION NO. 05-137 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE AGREEMENT WITH THE ASHEVILLE TOURISTS FOR THE USE OF MCCORMICK FIELD

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution authorizing the City Manager to enter in to a lease agreement with the Asheville Tourists for the use of McCormick Field.

The Asheville Tourists of the South Atlantic Baseball League have used McCormick Field for many years and wish to continue this arrangement. The use of the facility is governed by a lease agreement between the Tourists and the owners of the facility.

With the transfer of McCormick Field from Buncombe County to the City of Asheville upon the termination of the 1981 Water Agreement, the current lease agreement between the Asheville Tourists and Buncombe County is no longer in effect. A new lease agreement has been negotiated between the City of Asheville and the Asheville Tourists. The new lease agreement will be effective July 1, 2005, for a period of nine years and eleven months.

Pros:

- Allows for the continued use of McCormick field by the Asheville Tourists for a significant period of time.
- Allows for cooperative efforts between the City and the Asheville Tourists to encourage greater community use of the facility, especially in terms of youth baseball.

Cons:

- Failure to enter into the agreement would cause the Asheville Tourists to find another facility for baseball, possibly away from Asheville.

This action relates to City Council's Strategic Operating Plan of improved water system governance that better serves City of Asheville goals; Objective A: Gain control of growth by disengaging from the existing Water Agreement.

City staff recommends that City Council authorize the City Manager to enter into a lease agreement with the Asheville Tourists for the use of McCormick Field.

Because of the water agreement negotiations, Mr. Brinson said that City Council has not had the opportunity to review this item at a worksession. He then responded to various questions from Council regarding this lease, some being, but are not limited to: maintenance of the facility; parking; how long has the Asheville Tourists been in their current contact; what is the lease amount and does that amount increase in future years; has consideration been given to a shorter term than 9 years; and has the City looked at what other cities do in terms of minor league baseball franchises.

City Manager Jackson suggested this matter be deferred until City Council has had an opportunity to get more background information and review the terms of the lease. Mr. Brinson explained that the lease will expire on July 1, 2005, depending the outcome of the water agreement termination.

Mayor Worley said that members of City Council have been furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 05-137. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 29 – PAGE 170

B. RESOLUTION NO. 05-138 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A PROPERTY TAX COLLECTION AGREEMENT WITH BUNCOMBE COUNTY TO CONTINUE COLLECTION OF THE CITY OF ASHEVILLE'S PROPERTY TAXES

Interim Finance Director Ben Durant said that this is the consideration of a resolution authorizing the Mayor to sign a property tax collection agreement with Buncombe County to continue collection of the City of Asheville's property taxes.

As part of the Restated and Amended Supplemental Water Agreement, Buncombe County has collected and remitted property tax payments on behalf of the City of Asheville. The property tax collection process is a long, involved process which utilizes staff specifically trained in that function. If the City Council decided to begin to collect City property taxes within the City, it would require significant staff time and expense to prepare for implementation of the collection process and to perform such a process effectively. The proposed agreement would allow for continuation of the current property tax collection process for the City while the Council decided either to begin such a collection process within the City or to negotiate a long-term agreement with the County or some other service provider.

The Buncombe County Board of Commissioners approved this on June 21, 2005.

PROS:

- The City's property tax collection rate would remain high, as it mirrors the collection rate of Buncombe County
- The proposed agreement continues until terminated on a year-to-year basis and does not lock the City into a long-term agreement
- The proposed agreement would allow time for Council to decide to perform the process in-house or for a more favorable agreement with the County to be negotiated

CONS:

- None noted.

City staff recommends City Council authorize the Mayor to sign a property tax collection agreement with Buncombe County to continue collection of the City of Asheville's property taxes.

Councilman Dunn wondered how much it would cost for the City to begin collecting the property taxes. Mr. Durant said that we could probably do it for half of what the County is charging us; however, there are other issues to be considered, one is the logistical sort out that would need to occur and we just didn't have an opportunity in this budget year to do that. Next year when we renegotiate this contract, we will look for a better rate.

Mayor Worley said that members of City Council have been furnished with a copy of the resolution and it would not be read.
